1. Basic Views

The Company believes that not only complying with laws and regulations but also strengthening supervisory functions to enhance management transparency with a view to increasing corporate value is among its management priorities.

The Company therefore has adopted an organizational framework with Audit & Supervisory Board Members (or the Audit & Supervisory Board), focusing on the enhancement of functions of the Board of Directors and the Audit & Supervisory Board, as part of endeavors to bolster corporate governance.

The Company works to ensure an appropriate number of members of the Board of Directors, with a focus on improving flexibility and expediting the decision-making process. Moreover, the Company has appointed three Outside Directors with specialized knowledge and abundant experience to maintain and improve the soundness of the Company’s management as well as appropriateness of business execution, with the aim of further strengthening corporate governance.

[Reasons for Non-compliance with the Principles of the Corporate Governance Code]

The Company implements all the principles of the Corporate Governance Code.

[Disclosure Based on the Principles of the Corporate Governance Code]

UPDATED

Principle 1.4 Cross-Shareholdings

<Policy on Cross-Shareholdings>

The Company believes that it is essential to have partner companies with which the Company can maintain a long-term collaborative relationship, in order to discover innovative pharmaceutical products that bring true benefit to patients. The Company, therefore, holds shares that it deemed necessary to hold for strategic

purposes, after comprehensively considering the business relationship with the issuers of those shares and the synergies created, in light of a medium- to long-term perspective for increasing corporate value.

When judging whether shareholding will lead to an increase in the corporate value of the Company from the medium- to long-term perspective, the Company reviews the purpose of the shareholding, the benefits and risks from shareholding with respect to each issuer of the cross-held shares at the Board of Directors once a year, and determines whether or not to continue holding those shares after comprehensively considering the business relationship with the issuers and synergies created as the basis for an overall review of its cross-shareholdings. For the shares that the Company decides to reduce holdings as a result of this review, dialogue will be held with the investees to obtain their understanding while implementing the reduction.

As part of an overall revision of cross-shareholdings, the Company has been systematically reducing them since fiscal 2018. Cross-shareholdings as of the end of March 2018 (111 issues, totaling 167.1 billion yen) had been reduced by 50 issues by the end of March, 2023, bringing the total amount on the balance sheet to 107.8 billion yen and the ratio of cross-shareholdings to consolidated net assets to 17.2%. Going forward, the Company will continue to reduce these holdings with the goal of reducing the ratio to less than 10% over the medium to long term.

<Basic Views on Exercise of Voting Rights>

The Company determines how it exercises its voting rights not by uniform standards, but by considering whether the cross-shareholding will lead to an increase in the corporate value of the Company from a medium- to long-term perspective, while respecting the management policies of the issuers of those shares.

Principle 1.7 Related Party Transactions

Any transaction with the related parties of the Company that may cause a conflict of interest requires approval of the Board of Directors pursuant to the Rules of the Board of Directors. In addition, transaction results are appropriately disclosed in accordance with laws and regulations.

Supplementary Principle 2.4.1 Ensuring Diversity in the Promotion to Core Human Resources

<Views on Ensuring Diversity>

In order to prevail in competitions while coping with various changes in environment, it is important to increase diversity as well as to talent development. The Company believes that by creating an environment that allows each and every employee to respect the different values of others and work with a sense of security and by nurturing a corporate culture that accommodates diversity, it will be able to strengthen the sense of unity and improve employee engagement. To this end, the Company is promoting Diversity, Equity & Inclusion (DE&I) based on the theme of “Difference” × “Sense of Unity.”

<Voluntary and Measurable Goals for Ensuring Diversity and Their Status>

(1)Female employees

Aiming to promote the participation of women, the Company is working to increase the percentage of female managers by hiring more female new graduates into main career track positions, preparing work environment and work styles that make it possible for employees to make the most of their individuality, and developing and growing their capabilities. The target figures for these initiatives are set as the percentages of women among new graduate hires for main career track positions of 40% and in the section chief level, or manager candidates, of 15%; the figures currently stand at 39.2% (average of actual figures for the past five years) and 15.8% (actual, FY2022), respectively. The Company intends to continue the initiatives to promote women’s participation towards the goal of increasing the percentage of female managers to 10% by FY2026 and 20% by FY2031.

Activities to promote female employee participation in the workplace:

(2)Foreign nationals

In the course of its overseas expansion, which is an important management issue, the Company hires local human resources at its overseas subsidiaries and appoints them to important positions, as they are indispensable for the promotion of projects. (Approximately 80% of managers in the overseas subsidiaries in the United States, United Kingdom, South Korea and Taiwan.)

Overseas subsidiaries play an important role in promoting open innovations such as drug discovery alliances, and global clinical trials. The overseas subsidiaries work together with the head office organization on projects to become a Global Specialty Pharma.

At present, the Company is building a system that enables it to conduct a clinical development in the US and Europe on its own, and is strengthening its organization with a view to future marketing operations. For

this reason, the Company believes that the number of local employees hired and promoted to management positions will increase, and the diversity of the Company as a whole will improve.

In light of the stage of its overseas development, the role of its overseas subsidiaries, and their relationship with the head office organization, the Company currently has not set any voluntary and measurable goals for the hiring of foreign nationals or their appointment to management positions at the Company.

(3) Mid-career employees

In order to respond to changes in the business environment, the Company hires mid-career persons with the skills, knowledge, and experience that it needs as an immediate force.

In particular, since 2014, when the Company faced new growth opportunities, the Company has been actively hiring mid-career persons. The ratio of mid-career employees to total employees in Japan is 16.0%, and the ratio of mid-career employees to management positions is 15.8% (as of March 31, 2023).

Furthermore, the increase in the number of mid-career persons and their promotion to management positions are also driving a change in the organizational culture.

Going forward, the Company intends to continue hiring mid-career persons and promoting them to management positions while taking into consideration changes in the business environment and organizational management needs, and has included an increase in mid-career persons in its workforce plan for the next five years.

The Committee monitors the status of the pension assets and regularly assesses the asset managers in a comprehensive manner. Incentive Remuneration for Members of the Board of Directors, excluding Outside Directors

1. Bonuses (Short-term Incentives)

Bonuses reflect the degree of achievement of performance indicators for each fiscal year in order to raise the sensitivity of the Members of the Board of Directors, excluding Outside Directors, toward performance targets. The Company also uses qualitative indicators that are set annually for each individual in accordance with medium-term management challenges in order to evaluate activities undertaken each year for sustainable growth of the Company.

Bonus amounts are calculated by reflecting the evaluation of the degree of achievement of company performance on the base amount set for each executive position, then considering the evaluation results of individual performance. The targets and results related to the main evaluation indicators for FY2022 are shown in the table below.

Evaluation Items		Targets	Results

2. Restricted Stock Remuneration

Restricted stock remuneration, which serves as a medium- to long-term incentive, is intended to motivate Members of the Board of Directors, excluding Outside Directors, to increase corporate value over the medium to long term and to further sharing of value with shareholders, and in principle, two types of restricted stock, all of which will have transfer restrictions lifted upon retirement of the Member of the Board of Directors, are granted.

(1) Tenure-based restricted stock remuneration (long-term incentive)

The number of shares to be granted in tenure-based restricted stock remuneration is determined in accordance with the degree of responsibility for decision-making.

(2) Performance-linked restricted stock remuneration (medium-term incentive)

Performance-linked restricted stock remuneration is intended to further encourage Members of the Board of Directors, excluding Outside Directors, to make efforts to improve corporate value over the medium term and to raise their sensitivity for performance targets, ESG evaluations, etc. The Company uses performance targets (including ESG targets) that are linked to medium-term management strategies and set for each fiscal year, and management challenges for each fiscal year as evaluation indicators.

The number of shares to be granted is determined in the range of 0 to 200% according to performance evaluation at the end of a performance evaluation period (one fiscal year) with respect to the standard number of shares (set according to position, job responsibilities, etc.).
