## 1. Qualitative Information

### 1) Explanation Concerning Operating Results

The Meiji Group kicked off the first fiscal year of our 2023 Medium-Term Business Plan. We launched initiatives aimed at realizing both profit growth and sustainability activities in line with the basic concept of “Promote the Meiji ROESG®\* Management Effectively”.

Below is the key issues of 2023 Medium-Term Business Plan.

#### 1. Business strategy

##### Food segment

- Recover from the slump in our core business
- Accelerate growth in our business overseas

##### Pharmaceutical segment

- Strengthen vaccine business
- Expand CMO/CDMO business

##### Overall group

- Venture into new domains

2. Improve business management using ROIC effectively
3. Investing to grow business while constructing strong financial base
4. Promote the Meiji Group Sustainability 2026 Vision

\*ROESG is a registered trademark for a management indicator developed by Kunio Ito, a professor at Hitotsubashi University.

In the FYE March 2022, we assume COVID-19 pandemic continue to impact the global economy and domestic consumption trends.

In the food segment, we will steadily capture new demand driven by the change of consumer consciousness concerning health and nutrition in Japan. Overseas, we will continue to expand production and sales capacity in China and grow the sales into new growth pillars in the region.

In the pharmaceutical segment, we will achieve targets by enhancing initiatives of human vaccine and driving growth in the overseas business to cover the impact of NHI price revisions in Japan. In collaboration with external research organizations, we will apply the Meiji Group’s advanced technology and vast experience related to viruses to develop an inactivated vaccine for COVID-19 and organize production system.

These factors resulted in net sales of JPY 235.921 billion (down 16.1%, year on year), operating profit of JPY 18.621 billion (down 19.6%, year on year), and ordinary profit of JPY 19.091 billion (down 18.8%, year on year) during the first three months of FYE March 2022. Profit attributable to owners of parent was JPY 12.491 billion (down 6.6%, year on year).

The Accounting Standard for Revenue Recognition is applied from the beginning of FYE March 2022. As such, the following plan figures are calculated based on the assumption of accounting treatment changes related to revenue recognition. For reference, if we applied this accounting standard to net sales from same period of the previous fiscal year, this would result in a year-on-year decrease of 0.7% this fiscal year.

The Meiji Group is engaged in the following initiatives for development and supply of potential COVID-19 vaccines.

Currently, Group subsidiary KM Biologics is collaborating on research and development activities with the National Institute of Infectious Diseases, the Institute of Medical Science at the University of Tokyo, and the National Institutes of Biomedical Innovation, Health, and Nutrition to develop an inactivated vaccine for COVID-19. In May 2020, KM Biologics was selected from the initial public call for proposals for the COVID-19 Vaccine Development (Corporate-led) Project, the open R&D project being conducted as part of the Drug Discovery Support Promotion Project overseen by the Japan Agency for Medical Research and Development (AMED). In August 2020, KM Biologics was also selected for the second public call for proposals. We began conducting non-clinical trials in September 2020, and domestic Phase I/II clinical trials on March 22, 2021. This fall, we are planning to conduct Phase II/III clinical trial. In July 2020, KM Biologics was also selected to participate in the MHLW Vaccine Production Structure Emergency Development Project (initial public call). We are organizing a production structure that will enable rapid provision in Japan for the inactivated vaccine.

In June 2020, Group subsidiaries Meiji Seika Pharma and KM Biologics agreed with AstraZeneca PLC to hold discussions regarding the stable provision of the COVID-19 vaccine, AZD1222, allocated for Japan. In February 2021, Meiji Seika Pharma and KM Biologics individually concluded business consignment agreements with AstraZeneca. KM Biologics received active ingredient from AstraZeneca and started formulation and commercialization (vial filling and packaging) from March 19, 2021, utilizing a production system for pandemic influenza vaccines. From August, Meiji Seika Pharma has started handling product storage and transporting of the COVID-19 vaccine, *Vaxzevria*<sup>TM</sup> by utilizing its own supply system for vaccines. Meiji Seika Pharma will also collect safety management information.

The status of operations by segment and business are as follows. We apply the Accounting Standard for Revenue Recognition as of FYE March 2022. As a result, segment-specific earnings for the current fiscal year under review reflect amounts calculated after the application of this Standard. Business-specific earnings from the current fiscal year and the previous fiscal year both reflect figures prior to the application of the Standard.

(1) Food segment

- Net sales decreased significantly year on year. Following is the year on year change in net sales before applying the Standard. Sales of nutrition business, B to B business, and overseas business increased significantly year on year. Chocolate and gummy business, other and domestic subsidiaries increased year on year. Sales from yogurt and cheese business decreased significantly year on year due to the leveling off of extraordinary demand during the previous fiscal year caused by the COVID-19 pandemic. The drinking milk business, and frozen dessert and ready meal business decreased year on year.
- Operating profit decreased significantly year on year. While we worked to control promotion expenses and other costs, this was not enough to cover decreased revenue from the yogurt and cheese business.

■ Yogurt & cheese business (Probiotic yogurt, yogurt, cheese)

- Net sales decreased significantly year on year. Sales of functional yogurt decreased significantly after the leveling off of favorable sales during the previous fiscal year on demand driven by increased health management awareness and stay-at-home demand. Also, sales of yogurt and cheese decreased.
- Operating profit decreased significantly year on year due to the impact of decreased sales despite efforts to control promotion expenses and other costs.

■ Nutrition business (Infant formula, sports nutrition, enteral formula, beauty supplement)

- Net sales increased significantly year on year. Sales of infant formula decreased. Sales of sports protein SAVAS increased significantly year on year on increasing need to address a lack of exercise and an expanding customer base. Sales of liquid diet *Meiji Mei Balance* were favorable.
- Operating profit increased significantly year on year due to increased sales, even though promotion expenses and depreciation costs increased.

■ Chocolate & gummy business

- Net sales increased year on year. Sales of health-conscious chocolate were favorable, particularly for large-volume packages. Gummy products increased significantly year on year after struggling the previous fiscal year on the decreased demand during rush hour and among office workers.
- Operating profit increased significantly year on year due to the sales increase, even though promotion expenses and depreciation costs increased.

- Drinking milk business
  - Net sales decreased year on year. In addition to the leveling off of demand from the previous year that was favorable on increased health management awareness and stay-at-home consumption, the impact of reduction of the number of items resulted decrease in net sales.
  - Operating profit increased year on year. We covered the decrease in net sales by cutting operating expenses, including reducing promotion expenses and reevaluating our production structure.
  
- B to B business
  - Net sales increased significantly year on year. While demand dropped during the previous year due to the impact of stay-at-home orders, demand normalized and net sales of cream and dairy products for professional use increased significantly.
  - Operating profit increased year on year due to the sales increase.
  
- Frozen dessert & ready meal business (Ice cream, prepared foods, butter and margarine)
  - Net sales decreased year on year. The leveling off of stay-at-home demand from the previous year resulted in a significant decline in net sales for butter and margarine. In addition to this leveling off of demand, net sales for ice cream also decreased significantly due to impact of unusually cool weather.
  - Operating profit decreased significantly year on year due to the decrease in sales and the increase in promotion expenses.
  
- Overseas business (Overseas subsidiaries, exports)
  - Net sales increased significantly year on year. Net sales from our US subsidiary decreased but our Chinese subsidiaries recorded significantly increased net sales for the drinking milk, yogurt, confectionery, and ice cream businesses.
  - Operating profit decreased significantly year on year due to increased personnel and research expenses incidental to structural enhancements in China.
  
- Other / domestic subsidiaries (Domestic subsidiaries, chewing gum, candy, OTC drugs)
  - Net sales were impacted by the removal of a logistics subsidiary from the scope of consolidation following the transfer of stock for said subsidiary. However, overall net sales increased year on year due to increased sales from our sugar trading company and our feed business.
  - Operating profit increased significantly year on year on increased profits from our logistics subsidiaries and feed business.

(2) Pharmaceutical segment

- Net sales decreased year on year. Following is the year on year change in net sales before applying the Standard. Sales of agricultural chemicals & veterinary drugs business increased significantly and sales of overseas ethical pharmaceuticals business increased year on year. Sales of domestic ethical pharmaceuticals business were largely unchanged and sales of human vaccines business decreased year on year.
- Operating profit decreased significantly year on year due to the significant decrease in profits from the overseas ethical pharmaceuticals business.

Agricultural chemicals& veterinary drugs	3.4	3.9	16.0%	Agricultural chemicals& veterinary drugs	-0.2	-0.3	—

- Domestic ethical pharmaceuticals business (Domestic ethical pharmaceuticals excluding human vaccines)
  - Sales of the antibacterial drug *MEIACT* and the anti-allergic drug *BILANOVA*, increased year on year after being impacted by reduced number of outpatient visits to medical institutions during the previous year due to the COVID-19 pandemic. However, net sales were largely unchanged due to the sales from the antidepressant drug *REFLEX* decreased and the impact of NHI pricing revisions.
  - Operating profit increased year on year due to sales increase of main products, even though there was an impact of NHI price revisions in Japan.
- Overseas ethical pharmaceuticals business
  - Net sales increased year on year. Sales of our subsidiary in India increased, thanks to favorable contracted manufacturing business. However, sales of subsidiaries in Spain, Indonesia and Thailand decreased due to the impact of the COVID-19 pandemic.
  - Operating profit decreased significantly year on year due to the decreased sales of few subsidiaries.
- Human vaccines business
  - Even though there was a contribution from a contracted manufacturing income related to COVID-19 vaccine formulation, net sales decreased year on year due to the sales decrease of DPT-IPV *Quattrovac*. Also, compare to the previous year, there was no contract manufacturing of pre-pandemic influenza vaccine and this resulted decrease in the net sales.
  - Operating profit increased year on year due to a decrease in inventory valuation losses.
- Agricultural chemicals & veterinary drugs business (Agricultural chemicals, veterinary drugs, veterinary vaccines)
  - Net sales increased significantly year on year. Sales of the rice blast preventative, *ORYZEMATE* increased thanks to the resumption of provision.
  - Operating profit decreased year on year due to the increase in cost of sales.

#### 4) Notes Concerning Quarterly Financial Statements

(Notes Concerning the Premise of a Going Concern)

Not applicable.

(Notes Concerning Significant Changes in Shareholders' Equity (if any))

Not applicable.

(Adoption of Special Accounting Methods for Preparation of Quarterly Consolidated Financial Statements)

Tax expenses are calculated by rationally estimating the effective tax rate after application of tax effect accounting to profit before income taxes for the consolidated fiscal year, which includes the current quarter under review, then multiplying profit before income taxes by the estimated effective tax rate.

Income taxes-deferred are shown included in income taxes.

(Changes in Accounting Practices)

(Application of Accounting Standard for Revenue Recognition)

The Accounting Standard for Revenue Recognition (ASBJ Statement No. 29, March 31, 2020, hereinafter, "Revenue Recognition Accounting Standard") has been applied from the beginning of the first quarter of the current consolidated fiscal year. As a result of this change, at the point the control of promised goods or services are transferred to the customer, revenue is recognized based on the amount projected to be received in exchange for said goods or services.

Below is a major change due to the application of the Revenue Recognition Accounting Standard.

1. Variable consideration and consideration payable to a customer

In the previous consolidated fiscal year, variable consideration including rebates and consideration payable to a customer were reported in cost of sales and selling, general and administrative expenses. From the current consolidated fiscal year, it is reported as the eliminating item from net sales.

2. Agent transaction

In the previous consolidated fiscal year, we reported revenue from agent transactions based on the gross amount received from customers. From the current consolidated fiscal year, we report its revenue based on the net amounts retained, reducing amounts paid to the third party.

The application of the Revenue Recognition Accounting Standard is based on transitional handling as prescribed in the Proviso to Section 84 of the Revenue Recognition Accounting Standard. We reflected the cumulative impact amount in year-beginning retained earnings based on the assumption of the retroactive application of this new Standard prior to the beginning of the first quarter of the current consolidated fiscal year to apply this new accounting practice as of year-beginning balance for the current consolidated fiscal year.

As a result, for the first three months of the FYE March 2022, JPY 42,990 million decreased in net sales, JPY 19,944 million decreased in cost of sales, JPY 23,046 million decreased in gross profit and JPY 23,284 million decreased in selling, general and administrative expenses. Furthermore, the impact on operating profit, ordinary profit, quarterly profit before income taxes, and the year-beginning balance for retained earnings was minimal.

Due to the application of the Revenue Recognition Accounting Standard, as of the first quarter of the current consolidated fiscal year, we now indicate refund liabilities as an independent reporting item. In accordance with transitional treatment as prescribed in Section 89-2 of the Revenue Recognition Accounting Standard, we have not modified the previous consolidated fiscal year based on new indication methods. Furthermore, in accordance with transitional treatment as prescribed in Section 28-15 of the Revenue Recognition Accounting Standard (ASBJ Statement No. 12, March 31, 2020), we do not report information regarding divided revenue from customers related transactions in the first quarter of the previous consolidated fiscal year.

(Application of Accounting Standard for Fair Market Value Calculation)

As of the beginning of the first quarter of the current consolidated fiscal year, we apply the Accounting Standard for Fair Value Measurement (ASBJ Statement No. 30, July 4, 2019, hereinafter, "Fair Value Measurement Accounting Standard"). In accordance with transitional treatment as prescribed in Section 19 of the Fair Value Measurement Accounting Standard and Section 44-2 of the Accounting Standard for Financial Instruments (ASBJ Statement No. 10, July 4, 2019), we have decided to apply the new accounting practices stipulated by the Fair Value Measurement Accounting Standard prospectively. As such, there is no impact on financial statements for the quarterly consolidated financial statements.

(Significant changes in the amount of goodwill)

There were no significant changes in the amount of goodwill.

(Significant gain on negative goodwill)

No significant negative goodwill was generated.

### (3) Changes related to segment information

As shown in Changes in Accounting Practices, the Accounting Standard for Revenue Recognition (ASBJ Statement No. 29) is applied from the beginning of the first quarter of the current consolidated fiscal year. As such, accounting method for revenue recognition and calculation method for income by segment are changed.

As a result, compared to the figures based on the previous methods, net sales for food segment decreased by JPY 41,676 million, and net sales for pharmaceutical segment decreased by JPY 1,314 million. The impact on income by segment resulted from the changes was minimal.

(Significant subsequent events)

(Transfer of stock equity in equity method affiliate)

Our subsidiary Meiji Seika Pharma Co., Ltd. (hereinafter, Pharma) agreed to transfer all its stock holdings in the equity method affiliate DM Bio Limited (hereinafter, DM Bio) to the Dong-A Socio Group.

Furthermore, Pharma and Dong-A Socio Holdings Co., Ltd. have agreed on the continuation of their partnership related to biosimilars.

1. Reason for transfer

DM Bio was established in October 2015 as a company engaged in the manufacturing and sales of biosimilars and other pharmaceutical products. At present, the company conducts sample manufacturing for bio pharmaceuticals, including DMB-3115 currently under development, and the contracted manufacturing of commercial bio pharmaceuticals for other companies. Upon completion of the DM Bio GMP structure and the establishment of a stable manufacturing structure, ownership of DM Bio was transferred and consolidated into the Dong-A Socio Group to enable more rapid decision-making at DM Bio and allow Pharma to inject resources into the development of DMB-3115.

2. Recipient of stock transfer

Dong-A Socio Holdings Co., Ltd. (and others)

3. Transfer timing

September 2021 (planned)

4. Name of equity method affiliate

DM Bio Limited

5. Number of shares to be transferred, transfer price, gains on transfer, and equity ratio following transfer

Number of shares to be transferred	1,862,000 shares
Transfer price	JPY 6,750 million (planned)
Gains on transfer	Planning to record gain on sales of investment securities of approximately JPY 2,500 million (estimated) in the second quarter of the current consolidated fiscal year.
Equity ratio following transfer	--%
