Introducing the ZOOM B6

THE MOST ADVANCED MULTI-EFFECTS FOR BASS WITH BUILT-IN DI BOX MODELING

The ZOOM B6 Multi-Effects Processor delivers a beautifully integrated pedalboard with 6 stomp pedals with a truly innovative DI box modeling section. The B6 in fact offers four selectable types of DI Box modeled on iconic products to give the bass player the widest variety of tonal options and allow connection of both electric and acoustic upright bass w/ Piezo pick-ups.

Designed on the same footprint of the ZOOM G6 for Guitar, the B6 will also mount a 4.3" Color Touchscreen interface with drag and swipe functions for easy and fast navigation through its four Play Modes. ZOOM's legendary library of Amps and Cabinets (now enriched by IR data) and stomp Effects for Bass is also enhanced by 10 newly crafted head amps, mic preamps and modulations (ranging for new Octaver to Bass Synth sounds), all conveniently arranged in 100 top-class Preset Patches, developed by an array of pro bassists around the world.

With the introducing of B6, we aim at further consolidating ZOOM's significant market share for MFX (Multi-Effects) products which has a pillar of our business since the company's foundation.
