Kudan Inc.

**Kudan Visual SLAM and its AMR prototype to be featured in ADLINK booth at Robotics & Automation exhibition in UK**

Kudan Inc. (headquarters in Shibuya-ku, Tokyo; CEO Daiu Ko, hereafter “Kudan”) is pleased to announce that it will demonstrate autonomous mobile robot (AMR) prototypes implementing Kudan’s localization & mapping software capability at Robotics & Automation exhibition on November 2nd and 3rd in Coventry, UK. This event is the largest dedicated robotics and automation exhibition in the UK and will be held in-person.

Kudan will showcase its AMR prototypes using Kudan Visual SLAM together with ADLINK’s ROScube PICO TGL and a demo video on a screen at the ADLINK stand 322.

See below the previous article about our collaboration with ADLINK.

[Kudan and ADLINK have developed an autonomous mobile robot \(AMR\) prototype and launched partnership to expand its presence in AMR applications](#)

### **About ADLINK Technology Inc.**

ADLINK Technology Inc. (TAIEX:6166) leads edge computing, the catalyst for a world powered by artificial intelligence. ADLINK manufactures edge hardware and develops edge software for embedded, distributed, and intelligent computing – from powering medical PCs in the intensive care unit to building the world’s first high-speed autonomous racecar – more than 1600 customers around the world trust ADLINK for mission-critical success. ADLINK holds top-tier edge partnerships with Intel, NVIDIA, AWS, and SAS, and also participates on the Intel Board of Advisors, ROS 2 Technical Steering Committee, and Autoware Foundation Board. ADLINK contributes to open source, robotics, autonomous, IoT, and 5G standards initiatives within 24+ consortiums. For over 25 years, with 1800+ ADLINKers and 200+ partners, ADLINK enables the technologies of today and tomorrow. ### **About Kudan Inc.**

Kudan (Tokyo Stock Exchange securities code: 4425) is a deep tech research and development company specializing in algorithms for artificial perception (AP). As a complement to artificial intelligence (AI), AP functions allow machines to develop autonomy. Currently, Kudan is using its high-level technical innovation to explore business areas based on its own milestone models established for deep tech which provide wide-ranging impact on several major industrial fields.

For more information, please refer to Kudan’s website at <https://www.kudan.io/>.
