Notice Concerning the Launch of the "Sustainability" website

ENECHANGE (hereinafter referred to as "the Company") announces the launch of our Sustainability website to inform our stakeholders of our ESG (Environmental, Social and Governance) initiatives aimed at realizing a sustainable society.

SUSTAINABILITY

URL: <https://enechange.co.jp/en/sustainability/>

In October 2020, Japan, the world's fifth largest emitter of greenhouse gases (Note 1), announced that it would reduce its greenhouse gas emissions by 46% in FY2030 compared to FY2013 (Note 2), with the realization of carbon neutrality in 2050 as a pillar of its growth strategy. Most of the carbon dioxide emissions come from energy sources, and the energy industry in Japan is in need of reform. Our mission is to "create the future of energy", and as a category leader in the energy tech field we aim to contribute to the realization of a sustainable society.

We will continue to actively disclose information so that more stakeholders can understand our activities, and promote business activities that contribute to solving social issues.

(Note 1) From the website of "the Japan Center for Climate Change Actions"
