## 1. Qualitative Information on Results for the First Half Ended September 30, 2021

### (1) Details of Operating Results

With the COVID-19 pandemic dragging on amid resurgences triggered by new variants, the outlook remains uncertain. Under these conditions, House Foods Group launched its Seventh Medium-term Business Plan from April 2021. Under this Medium-term Business Plan, the Group will accelerate its transformation into a high quality company in terms of all “three responsibilities” (“For our customers,” “For our employees and their families,” and “For society”). It has also defined four value chains or VCs (the Spice VC, the Functional Ingredients VC, the Soybean VC and the Value Added Vegetable VC) as domains in which it will, create the value of “Healthy Life Through Foods” and will seek priority allocation of management resources to growing domains with the aim of achieving sustainable growth.

Net sales for the first six months ended September 30, 2021 increased mainly due to growth in the International Food Business and Other Food Related Business, which offset year-on-year declines in the Spice/Seasoning/Processed Food Business and the Health Food Business. Operating profit decreased in the absence of the special demand arising from at-home consumption in the same period a year earlier in the Spice/Seasoning/Processed Food Business, which offset a boost to profit because the goodwill which arose in the Restaurant Business when Ichibanya Co., Ltd. was made into a consolidated subsidiary was fully amortized the previous fiscal year. Ordinary profit and profit attributable to owners of parent both increased, bolstered by the recording of a gain on sale of investment securities in addition to decreases in the share of loss of entities accounted for using equity method and impairment losses which were recorded in the same period a year earlier.

As a result, the Group’s operating results were as shown below.

	Six months ended September 30, 2021	
	Amount (million yen)	Year-on-year change (%)
Net sales	124,127	100.4
Operating profit	9,032	91.2
Ordinary profit	10,336	116.9
Profit attributable to owners of parent	7,211	725.2

The Company has applied the Accounting Standard for Revenue Recognition (ASBJ Statement No. 29, March 31, 2020) and the Implementation Guidance on Accounting Standard for Revenue Recognition (ASBJ Guidance No. 30, March 26, 2021), effective from beginning of the first quarter of the fiscal year. Regarding application of said accounting standard and implementation guidance, the Company applied the new policy retrospectively to all prior periods in accordance with the principle treatment set forth in Paragraph 84 of the Accounting Standard for Revenue Recognition. Comparative analysis with the first half ended September 30, 2020 and the fiscal year ended March 31, 2021 are therefore based on figures after retrospective application of said standard and implementation guidance. Please refer to “2. Quarterly Consolidated Financial Statements and Key Notes (4) Notes to Quarterly Consolidated Financial Statements (Changes in Accounting Policies)” for details.

The following is an overview of results by segment (before the elimination of inter-segment transactions).

Segment	Consolidated net sales		Consolidated operating profit Segment profit (loss)

(Note) 1. Adjustment (elimination) comprises profit or loss not distributed to segments and the elimination of inter-segment transactions.

### Spice / Seasoning / Processed Food Business

The Spice/Seasoning/Processed Food Business segment posted declines in sales and profit in the absence of special demand arising from at-home consumption in the same period a year earlier and also due to higher advertising expenses, depreciation and amortization, and other costs.

In the products for household use business of House Foods Corporation, as the COVID-19 pandemic dragged on and changes in customer needs became apparent, efforts were made to propose new value, including the promotion of a shift towards microwaveable retort pouched products to increase convenience and reduce environmental impact, in addition to enhancement of menu varieties and a review of product promotions.

The business of products for food service use conducted by House Foods Corporation and Gaban Co., Ltd. posted higher net sales than a year earlier despite continued challenging conditions as people refrained from going out and restaurants shortened their operating hours. Sun House Foods Corporation, which is charge of manufacturing retort-pouched products, put a production line for large-volume products into operation in July 2021.

As a result of the above, sales in the Spice/Seasoning/Processed Food Business stood at 56,965 million yen, down 3.8% year on year, and operating profit was 5,402 million yen, down 32.1% year on year. As a result, the ratio of operating profit to net sales was 9.5%, declining 4.0 percentage point from the same period of the previous fiscal year.

The Group decided to transfer part of the business of Malony Co., Ltd. to House Foods Corporation with effect from April 1, 2022. Please refer to “Notice of Partial Business Transfer to House Foods Corporation by Malony Co., Ltd.” issued on September 30, 2021, for further details.

### Health Food Business

The Health Food Business pushed ahead with restructuring, including integrating House Wellness Foods Corporation’s sales capabilities for products for household use in Japan into House Foods Corporation in April, which was the start of the period under review. However, the segment continued to face a challenging business environment as the effects of COVID-19 dragged on and reported decreased sales and an operating loss.

After plunging sharply the year before, sales of the *Ukon No Chikara* series fell year on year, with further resurgences of COVID-19 at the beginning of the period under review limiting opportunities to drink out for a prolonged period of time. Meanwhile, sales of vitamin products such as *C1000* and *Ichinichibun No Vitamin* decreased, reflecting the impact of withdrawal from unprofitable business in the previous year. However, the effects of restructuring such as the diversification of sales channels through the integration of sales capabilities were apparent in some areas.

As a result of the above, sales in the Health Food Business declined 13.0% year on year, to 7,039 million yen. The implementation of cost reductions and expeditious cost control was not enough to offset the impact of the decline in sales

and the segment reported an operating loss of 333 million yen, representing a decrease of 281 million yen year on year. Consequently, the ratio of operating profit to net sales was -4.7%, down 4.1 percentage point from a year ago.

**International Food Business** Period covered by the consolidated financial statements: Mainly from January to June 2021

The International Food Business maintained business growth and posts gains in sales and profits in the three priority areas (United States, China and ASEAN).

The tofu business in the United States achieved growth in sales and profit due to improvement in the production efficiency of the new lines at the Los Angeles Plant, which went into operation the previous year, offsetting the impact of rising prices for raw materials and packaging.

The curry business in China recorded decreased sales of products for household use in the absence of the special demand arising from at-home consumption in the same period a year earlier. However, sales of products for food service use not only recovered from the previous year when they were affected by the COVID-19 crisis but surpassed pre-COVID levels. As a result, overall sales increased. Operating income fell compared to the same period a year earlier, when the curry business benefited from special demand coupled with lower costs due to restrictions on business activities.

The functional beverage business in Thailand posted higher sales and profits, partly due to a lighter tax burden in addition to the encouragement of deliveries to the traditional market as a result of government measures to boost consumption.

As a result of the above, sales in the International Food Business rose 6.4% year on year, to 19,440 million yen, and operating profit increased 8.6%, to 3,227 million yen. Consequently, the ratio of operating profit to net sales was 16.6%, improving 0.3 percentage point from a year earlier.

**Restaurant Business** Periods covered by the consolidated financial statements: From March to August 2021 for Ichibanya Co., Ltd. and from January to June 2021 for overseas subsidiaries

The business environment surrounding the Restaurant Business segment remained challenging, with the declaration of a state of emergency resulting in restaurants being called upon to shorten their operating hours for a prolonged period in an increasing number of regions.

Ichibanya Co., Ltd. continued to make efforts to operate in such a way that made customers feel safe and focused on the expansion of restaurants offering delivery services and the promotion of takeout using web advertising, to tap into demand. At restaurants overseas, business generally improved from the dramatic slump seen the same period a year earlier, although conditions varied from region to region.

As a result of the above, sales in the Restaurant Business amounted to 22,106 million yen, rising 2.0% year on year. Operating profit grew 1,969 million yen year on year, reaching 526 million yen. This was partly due to the effect of increased sales and partly because the goodwill which arose when Ichibanya Co., Ltd. was made into a consolidated subsidiary was fully amortized the previous fiscal year. Consequently, the ratio of operating profit to net sales was 2.4%, rising 9.0 percentage points from a year earlier.

### **Other Food Related Business**

Delica Chef Corporation posted gains in sales and profit as productivity improved on the back of brisk sales of prepared food and baked bread.

Vox Trading Co., Ltd. posted higher sales due to an increase in successful tenders for MA rice (minimum access rice). However, profit was lower, reflecting sluggish food service demand as the effects of COVID-19 dragged on.

As a result of the above, sales in Other Food Related Business increased 10.1% year on year, to 22,867 million yen, and operating profit declined 13.2% year on year, to 799 million yen. Consequently, the ratio of operating profit to net sales was 3.5%, declining 0.9 percentage point from a year ago.

## **(2) Details of Financial Position**

The consolidated financial situation at the end of the first half of the fiscal year under review is as follows:

Total assets were 369,697 million yen, an increase of 362 million yen from the end of the previous consolidated fiscal year.

Current assets fell 6,996 million yen, to 149,943 million yen mainly due to decreases in cash and deposits and securities, which offset increases in notes and accounts receivable-trade and merchandise and finished goods. Non-current assets increased 7,358 million yen, to 219,753 million yen, mainly due to increases in investment securities and software, offsetting decreases in construction in progress and software in progress.

Liabilities stood at 79,609 million yen, a decrease of 2,843 million yen from the end of the previous consolidated fiscal year.

Current liabilities were down 2,416 million yen, to 49,494 million yen mainly due to decreases in accounts payable - other and income taxes payable, despite an increase in notes and accounts payable - trade. Non-current liabilities declined 427 million yen, to 30,115 million yen, chiefly due to a decrease in deferred tax liabilities.

Net assets stood at 290,088 million yen, an increase of 3,205 million yen from the end of the previous consolidated fiscal year, mainly because of an increase in retained earnings thanks to profit attributable to owners of parent and an increase in foreign currency translation adjustment, offsetting an increase in treasury shares due to the purchase of treasury shares and a decrease in remeasurements of defined benefit plans.

As a result, the equity ratio stood at 70.5% (compared with 69.8% at the end of the previous fiscal year), and net assets per share amounted to 2,615.78 yen (2,559.12 yen at the end of the previous fiscal year) at the end of the first half of the fiscal year under review.

The Company has applied the Accounting Standard for Revenue Recognition (ASBJ Statement No. 29, March 31, 2020), effective from beginning of the first quarter and applied this accounting policy to all prior periods.

### (3) Information on the Future Outlook, Including Consolidated Business Results Forecasts

#### **(4) Notes to Quarterly Consolidated Financial Statements**

##### Notes Relating to Assumptions for the Going Concern

Not applicable.

##### Notes for Case Where Shareholders' Equity underwent Significant Changes in Value

The Company completed the purchase of 1,051,700 treasury shares based on a resolution at the meeting of the Board of Directors held on May 11, 2021. As a result, treasury shares increased by 3,555 million yen during the first six months under review, and treasury shares amounted to 3,566 million yen as of September 30, 2021.

##### Application of Particular Accounts Procedures to the Preparation of Quarterly Consolidated Financial Statements

###### (Calculation of tax expenses)

The Company calculates tax expenses by reasonably estimating the effective tax rate after applying tax effect accounting to profit before income taxes for the consolidated fiscal year and multiplying profit before income taxes for the first half under review by the estimated effective tax rate.

However, if the calculation of tax expenses using the estimated effective tax rate results in a markedly unreasonable outcome, tax expenses are calculated by using the statutory effective tax rate after adding and subtracting important differences that do not fall under temporary differences to and from profit before income taxes.

##### Changes in Accounting Policies

The Company has adopted the Accounting Standard for Revenue Recognition (ASBJ Statement No. 29, March 31, 2020), effective from the beginning of the first quarter and adopted the policy of recognizing as revenue the amount expected to be received upon exchange of goods or services when it transfers control of the promised goods or services to the customer.

As a result, in the case of sale with a right of return, revenue for goods expected to be returned is not recognized at the point of sale and instead revenue is reduced to reflect the expected value of returns and a refund liability is recognized in accordance with the provisions on variable consideration. In addition, the Company deducts from net sales a portion of sales promotion expenses which were previously recorded as selling, general and administrative expenses.

This change in accounting policy is applied retrospectively, in principle, and quarterly consolidated financial statements and consolidated financial statements for the previous year are after retrospective application.

A comparison of consolidated financial statements for the previous fiscal year after retrospective application compared with before shows that merchandise and finished goods increased by 30 million yen and deferred tax assets increased by 155 million yen, accounts payable-other decreased by 6,904 million yen, other current liabilities increased by 7,486 million yen, deferred tax liabilities increased by 10 million yen and the balance of retained earnings at the beginning of the previous period decreased by 340 million yen.

A comparison of financial statements for the first six-month period of the previous fiscal year after retrospective application compared with before shows that net sales decreased by 16,405 million yen, costs of sales decreased by 1,467 million yen, and selling, general administrative expenses decreased by 14,967 million yen, whilst operating profit, ordinary profit, profit before income taxes and profit each increased by 29 million yen.

## Additional Information

(Impacts of COVID-19 on accounting estimates)

In the Company's judgment, the situation does not yet merit any significant change in the assumptions underlying accounting estimates made the previous fiscal year but that uncertainty surrounding the impact of COVID-19 on society and economic activity is likely to persist. When considering impairment losses in relation to the non-current assets pertaining to the Health Food Business and trademark right and contract-related intangible assets which arose on consolidation of Ichibanya Co., Ltd., the Company adopted certain assumptions about the impact of COVID-19. The Group's financial position and operating results may, therefore, be affected in the event of even greater changes than those currently assumed.
