Vision Inc. is opening Shinjuku East Exit PCR Center.

To meet demand for end of year travel, there is “PCR testing”, an essential part of social infrastructure for life during the COVID-19 pandemic.
First part of a partnership with Idogojusantsugi Clinic.

Vision Inc. (Headquarters: Shinjuku-ku, Tokyo, President and CEO: Kenichi Sano, hereinafter Vision), which handles the GLOBAL WiFi business and the Information and Communications Service business for corporations, will begin offering PCR tests at Shinjuku East Exit PCR Center (Shinjuku San-chome) which will be open for a limited time starting today, November 29, 2021 until September 30, 2022.

We hope you will take advantage of this service to ensure safety and security when traveling domestically, such as for returning to your hometown at the end of the year.

To celebrate the opening of the clinic, we will be offering discounted prices.

This is the first in a series of initiatives to provide various PCR testing services, an essential social infrastructure service for during and after the pandemic, in partnership with Idogojusantsugi Clinic Medical Corporation (Shinagawa-ku, Tokyo, President: Koichi Aida, Chief Physician: Yasunari Kageyama, hereinafter referred to as Idogojusantsugi Clinic).

■ Features

1. The service smoothly guides you through testing, results, and issuance of negative certificates.
2. A testing service that combines the know-how of service operations and marketing of Vision with the PCR testing of Idogojusantsugi Clinic, a medical institution.
3. Highly reliable inspection by real time PCR method
4. Notification of results on the same day at the earliest. If not on the same day, results are given on the next day as a rule.

■ Background for Offered Services

Vision has a large number of existing customers for our overseas Wi-Fi router rental service “GLOBAL WiFi”, our corporate Information and Communications Service business, and other travel-related services. Considering that such social infrastructure services are needed for many people in their social lives, we have decided to provide PCR testing services by utilizing our expertise in service provision, location management, and backyard operations such as the delivery of goods.

As a medical institution, the Idogojusantsugi Clinic was one of the first to provide PCR tests in the private sector, and as a clinic specializing in infectious disease control, it has diagnosed many COVID-19 infections based on PCR test results. They have strong experience with PCR testing, and through this partnership, we will be able to provide more people with safe and reliable test results.

Through the partnership, we will establish a system to receive testing and result certifications quickly and inexpensively, and build a highly convenient service that can be used as the social infrastructure during and after the COVID-19 pandemic.
