Kudan Inc.

German Accelerator facilitates Artisense debut in Singapore

Kudan Inc. (headquarters in Shibuya-ku; CEO Daiu Ko; hereafter “Kudan”), an artificial perception research and development company, is pleased to announce that Artisense GmbH (hereafter “Artisense”), Kudan’s group company, has completed another major milestone towards bringing the groups SLAM offering to the world’s largest robotics market: Asia-Pacific, with Singapore in particular in this first step.

German Accelerator empowers German startups to scale globally. They take high potential companies on a fast-paced learning journey to understand, discover, and access the world’s leading innovation hubs in the U.S. and Asia. German Accelerator is run by German Entrepreneurship GmbH and is proudly financed by the German Federal Ministry for Economic Affairs and Energy (BMWi).

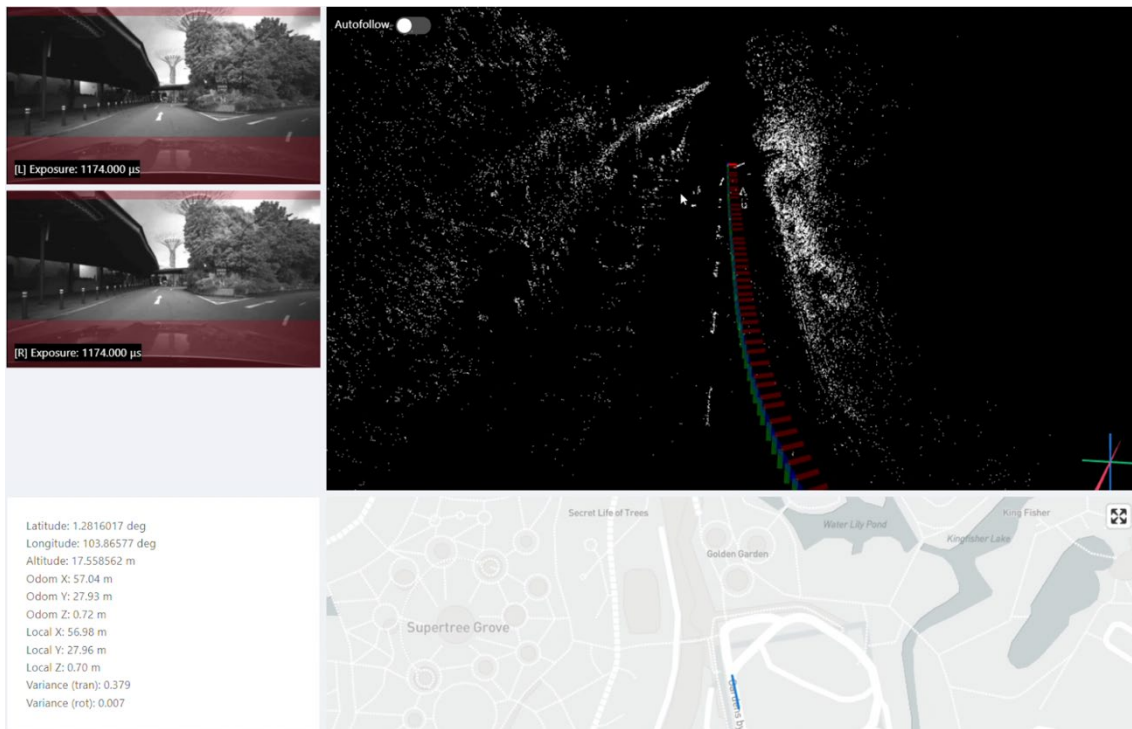

The Asia Market Access Program is a highly-customized program that provides mentoring from dedicated experts and access to their vast network of business partners and investors.

This program is aimed to aid German Startups like Artisense with their market entry to Singapore and Southeast Asia.

With the support of German Accelerator, in-depth analysis and conversations with local partners have been conducted over the past 3 months to plan the market entry to Singapore. Over the course of the past week, the Artisense management team visited Singapore to meet almost 20 leading startups, technology and engineering firms, as well as stakeholders from government and academia, to identify relevant opportunities and how artificial perception can help local companies grow even faster.

Part of the visit included testing ArtiSLAM in local conditions, both outside and inside, including vehicle and hand-held demonstrations for customers and partners:

Artisense keeps working on scaling its business globally by closely cooperating with the partners as well as Kudan.

About Artisense Corporation

Artisense is a computer vision and sensor fusion software company that develops an integrated positioning platform using cameras as a lead sensor for the automation of robots, vehicles, and spatial intelligence applications. On a mission to accelerate the adoption of autonomous robots and machines, Artisense provides products and technology for highly accurate, robust, safe, and low-cost navigation in any space.
