- We maintain customers first philosophy, providing the best services.
- We aim to earn high marks from shareholders and markets while pursuing creativity and innovation.
- We create a challenging and rewarding workplace where employees think and act on their own.

[Reasons for not Implementing the Principles of the Corporate Governance Code]

The information is based on the revised Corporate Governance Code of June 2021 (except for the principles for the Prime Market, which will be applied from April 2022).

The Company has implemented each principle of the Corporate Governance Code.

[Disclosure Based on the Principles of the Corporate Governance Code]

Our basic views on Corporate Governance, the governance structure, operating policy, and other aspects of corporate governance are set forth in our Corporate Governance Guidelines (hereafter, “Guidelines”), on the Company website. They can be viewed at the following URL:

[Supplementary Principle 2-4 (1)] Ensuring diversity in the appointment core personnel

(1) Approach to Ensuring Diversity

We believe that diversity is a key growth driver and bringing together different strengths, viewpoints and values generates the innovation that creates new value, and leads to sustainable growth for the Group. We are working to promote diversity with the goal of creating a workplace where every employee can maximize their full potential, regardless of age, sex, nationality, sexual orientation, gender identity, race, ethnicity or disability.

Given a background of responding to diversifying market needs, we consider empowering women in the workplace to be a particularly important management priority. To secure talented human resources, we are working on measures to promote roles for women aimed at creating an environment in which women can demonstrate their abilities and play an active role.

(2) Voluntary and Measurable Goals for Ensuring Diversity

The current status (as of the end of November 2021) and targets for women, non-Japanese, and mid-career hires in our company are as follows.

- ① Ratio of female employees in management positions Current: 25.1% / Goal: 30% or more (by end of FY 2021)
- ② Appointment of non-Japanese managers Current: 0 / Goal: About 2 (by the end of FY2030)
- ③ Appointment of mid-career hire managers Current: 135 / Goal: Current status

(3) Human resource development policy and internal environment policy and status to ensure diversity

As the needs of our stakeholders are constantly changing, diversifying and becoming more sophisticated, we believe that each and every one of our diverse employees needs to be able to "think for themselves and make the right choices" in order to realize the mission assigned to them. In addition to on-the-job training (OJT), we provide group training in legal affairs, taxation/accounting, finance, financial analysis, product knowledge, and thinking business skills at a wide range of levels.

In addition, the basic idea of our evaluation system is to fairly and equitably evaluate the achievements of each of our diverse employees and their efforts to develop their abilities and realize their role tasks. In addition to clarifying strengths and challenges through feedback from evaluators and setting new challenges, which leads to employee growth, we have also introduced a "Job Posting System" and a "Job FA System" to encourage autonomous growth and challenges, and to help employees realize their career plans.

The areas (skill matrix) that we expect from each director and audit & supervisory board member, based on their expertise and experience, in order to steadily implement the Group's medium-term management plan and achieve its goals are as shown in Reference Material 2.

The Company will use the skills matrix to determine whether the current Board of Directors is composed of individuals who can fully demonstrate its effectiveness, and will also use it to select future directors, etc.

[Supplementary Principle 4.11 Concurrent Appointments of Directors and Audit & Supervisory Board Members]

[Supplementary Principle 4.11.3 Analysis and Evaluation of Overall Effectiveness of the Board of Directors]

All directors and audit & supervisory board members were surveyed and interviewed as needed to analyze and evaluate the overall effectiveness of the Board of Directors. The results were discussed and recommendations issued by the Nomination and Remuneration Advisory Committee (supported by an advisory attorney who serves as the administrative office), which has a majority of independent directors as committee members. The recommendations were implemented in Board of Directors meetings.

The outline of the analysis / evaluation results for FY2020 is as follows.

1. While the Board of Directors met all evaluation criteria, including size, composition, functions and roles, as well as operation, and was found to be effective, we concluded that we must still steadily implement measures to improve the functioning of the Board of Directors, make those activities part of our daily operations, and continually review the Board's functions to accommodate changes in the internal and external environments.
2. Issues found in in the previous analysis / evaluation were 1) in regards to "Further activation of Board of Director discussions." In addition to enhancing the content of deliberation by integrally reporting the status of related subsidiaries in the progress report of the Medium-Term Management Plan by business domain, we will commence the reporting on the risk management capital situation, and present the minutes in detail to outside officers so that the discussions at the Executive Committee can be conveyed in a realistic manner. 2) in regards to "Further reflection on CSV (Creating Shared Value) / ESG (Environment / Society / Governance) perspectives." A CSV promotion committee will establish a system for reporting the results of deliberations to the Board of Directors from the first half of 2021 and to explain the status of CSV management initiatives in the Group to outside officers and share awareness. 3) in regards to "Further enhancement of information provision to outside officers," By explaining the effects of the novel coronavirus at the Board of Directors, and by building a system to accept questions and answer them in a timely manner according to the concerns of outside officers, and providing external training opportunities to outside officers, etc. at any time, it was confirmed that the effectiveness was improved.

In addition, we recognize it is necessary to further improve diversity, expertise and supervisory functions in the composition of the Board of Directors, further deepen CSV management on a group basis, and further provide information to outside officers. Based on the above analysis and evaluation results, the Board of Directors of the Company will further work to improve the functions and effectiveness of the Board of Directors.

The Company's Board of Directors will take further steps to improve the functioning of the Board of Directors and work toward further improvement in effectiveness, based on the results of the analysis and evaluation described above.

Disclosure of Policy on Determining Compensation Amounts or Calculation Methods

The Company has determined by a resolution of the Board of Directors the method of deciding the "decision policy regarding the content of individual remuneration of directors". When determining individual remuneration for directors, the basic policy is to set the level at an appropriate level based on individual responsibilities. In addition to basic remuneration paid as fixed remuneration, performance-linked remuneration and stock remuneration are introduced as variable remuneration. Regarding the ratio of each remuneration, the ratio of variable remuneration to basic remuneration 1 is set to 0.6 based on the average ratio of listed companies. The breakdown of variable compensation is that the ratio of performance-linked compensation to stock compensation is 5: 7, and the ratio of medium- to long-term incentives is increasing. The basic remuneration is within the range of the remuneration limit approved at the general meeting of shareholders, and the basic remuneration for each individual according to the position is based on the general level of employee remuneration and executive remuneration of the Company and the business condition of the company. The appropriateness and appropriateness of determining the amount is decided by a resolution of the Board of Directors after deliberation and report by the Advisory Board for Nomination and Remuneration. The basic remuneration may be temporarily reduced by a resolution of the Board of Directors after deliberation and report by the Advisory Board for Nomination and Remuneration depending on the company's business performance and other reasons.

Performance-linked remuneration shall be based on 20% to 30% of the annual amount of basic remuneration, depending on the position, within the range of remuneration approved at the general meeting of shareholders, and shall be in accordance with the executive performance-linked remuneration rules separately established by the Company. The amount to be paid is determined by a resolution of the Board of Directors after deliberation and reporting by the Advisory Board for Nomination and Remuneration within the range of 0 to 200% of the standard amount, depending on the consolidated performance of the company in the fiscal year preceding the payment date, the degree of contribution of each person to the company performance, the status of efforts to address medium- to long-term management issues, etc.

It consists of two parts: a part linked to applicable indicators such as the company's consolidated business performance (hereinafter referred to as "applied index linked portion") and a part reflecting the individual evaluation of each director (hereinafter referred to as "individual evaluation portion"). The composition ratio is determined for each position. The "applied index-linked portion" is calculated from financial metrics like balance of operating assets, ordinary income, etc. The "individual evaluation portion" is determined by the president based on the performance and qualitative evaluation of the section of business the director is in charge of.

Performance-linked remuneration may be reduced or not paid if the director inflicts great material loss to the company or if the director is on long-term leave due to illness treatment.

The performance indicators that form the basis for calculating the amount of performance-linked remuneration are "balance of consolidated operating assets," "consolidated ordinary income," and "consolidated ROA," which are important performance indicators in the current medium-term management plan.

[Calculation method of performance-linked remuneration]

Performance-linked remuneration amount = payment standard amount for each position x performance-linked payment coefficient (*)

(*...Performance-linked payment coefficient is calculated by combining the achievement rate compared to the plan and previous year-on-year comparison ratio for each of “balance of consolidated operating assets”, “consolidated ordinary income” and “consolidated ROA” . Within the range of 0 to 200%, the decision is made by a resolution of the Board of Directors after deliberation and reporting by the Advisory Committee for Nomination and Compensation. For directors under the Senior Managing Director, the performance of the business under their jurisdiction and qualitative evaluation are taken into consideration, and the individual evaluation decided by the president is also reflected.

For stock compensation, we have introduced a “stock benefit trust (BBT (= Board Benefit Trust))”, which is based on the directors' stock benefit regulations resolved by the Board of Directors within the compensation limit approved at the general meeting of shareholders. If a director retires after satisfying the eligibility requirements, they will acquire the right to receive benefits of the Company's shares acquired by the Trust according to their position and term of office on the date of resignation. If it is resolved for a director is to be dismissed at a general meeting of the shareholder, or if a director retires during tenor because of certain misconduct, or if there is any inappropriate behavior that might damage the company during tenor, the director will not have the right to receive benefits.

For outside directors and corporate auditors who are supervisors, performance-linked remuneration and stock remuneration are not suitable, so only fixed remuneration is provided.

Regarding the amount of individual remuneration for the directors of the Company, Yasunori Tsujita, Director and CEO, who supervises and controls the business activities of each department as the chief executive officer and evaluates the directors in charge of each department, who based on the resolution of the Board of Directors, is entrusted with the determination of the amount of performance-linked remuneration to be paid to directors and the specific details regarding the timing of payment. After deliberation and report by the Advisory Committee for Nomination and Compensation, the appropriateness of the evaluation method of performance-linked remuneration and the appropriateness of the calculated remuneration amount should be examined and reported so that the authority can be exercised appropriately; the Director and CEO decides the amount and timing of performance-linked remuneration to be paid to each director.
