Introducing the ZOOM F3

2-Track Professional Field Recorder

Featuring dual A/D converters and low-noise preamps found on Zoom's pro-acclaimed F-Series, the **Zoom F3 Field Recorder** brings 32-bit float recording technology to all-new levels. Built in a sturdy metal casing with durable side bars and slide-resistant rubber feet, the new F3 can even be conveniently attached directly onto a boom microphone stand by common Velcro straps.

The F3 is a 2-channel / 2-track audio portable recorder that records directly to microSD cards (up to 1TB of memory) and can operate continuously for over 8 hours with two AA alkaline batteries. Thanks to its high-performance specifications, the F3 allows for recording audio at full dynamic range and free from any clips or distortion. It provides 2 inputs with locking XLR connectors and high-quality preamps for connecting professional microphones.

The F3 is the latest addition to the Zoom F-series of professional field recorders.

In 2021, the F-series contributed to a significant growth for Zoom in the broadcasting and pro audio/video markets, which recovered from the start of the pandemic. The introduction of the new F3 is expected to expand further Zoom's market share in the sector of professional audio.

More details about the new F3 with lifestyle photography and creators' videos will be unveiled on Zoom Global Website on 18th February 2022. The F3 will initially ship in Japan and USA only. Distribution worldwide will start from April.
