

Third quarter of fiscal year ending March 2022 (FY2022)
Financial Report

BlueMeme Inc.
10th February 2022

Contents

- Results for 3Q of FY2022 (Apr.2021 – Dec.2021) ----- P.3
- Major Event in 3Q of FY2022 ----- P.11
- Business Overview ----- P.13
- Appendix ----- P.51
- Notice ----- P.57

*Figures in this document have been rounded down to the nearest whole number, and percentages have been rounded to the first decimal place.

Results for 3Q of FY2022 (Apr.2021 - Dec.2021)

Results for 3Q of FY2022

	Sales	3Q 519 million yen	1Q-3Q total 1,408 million yen	Progress rate (Previous forecast) 72.9%
	Operating Profit	3Q 114 million yen	1Q-3Q total 286 million yen	Progress rate (Previous forecast) 121.1%

- Our Professional services grew as customers became more active in DX and the order price per customer increased.
- The price of orders per employee rose due to an increase in orders from upstream processes.
- Continuous shift to remote working has been improving our engineer's development efficiency.

*Amounts are rounded down to the nearest million yen.

Upward Revision of Full-year Forecasts (1)

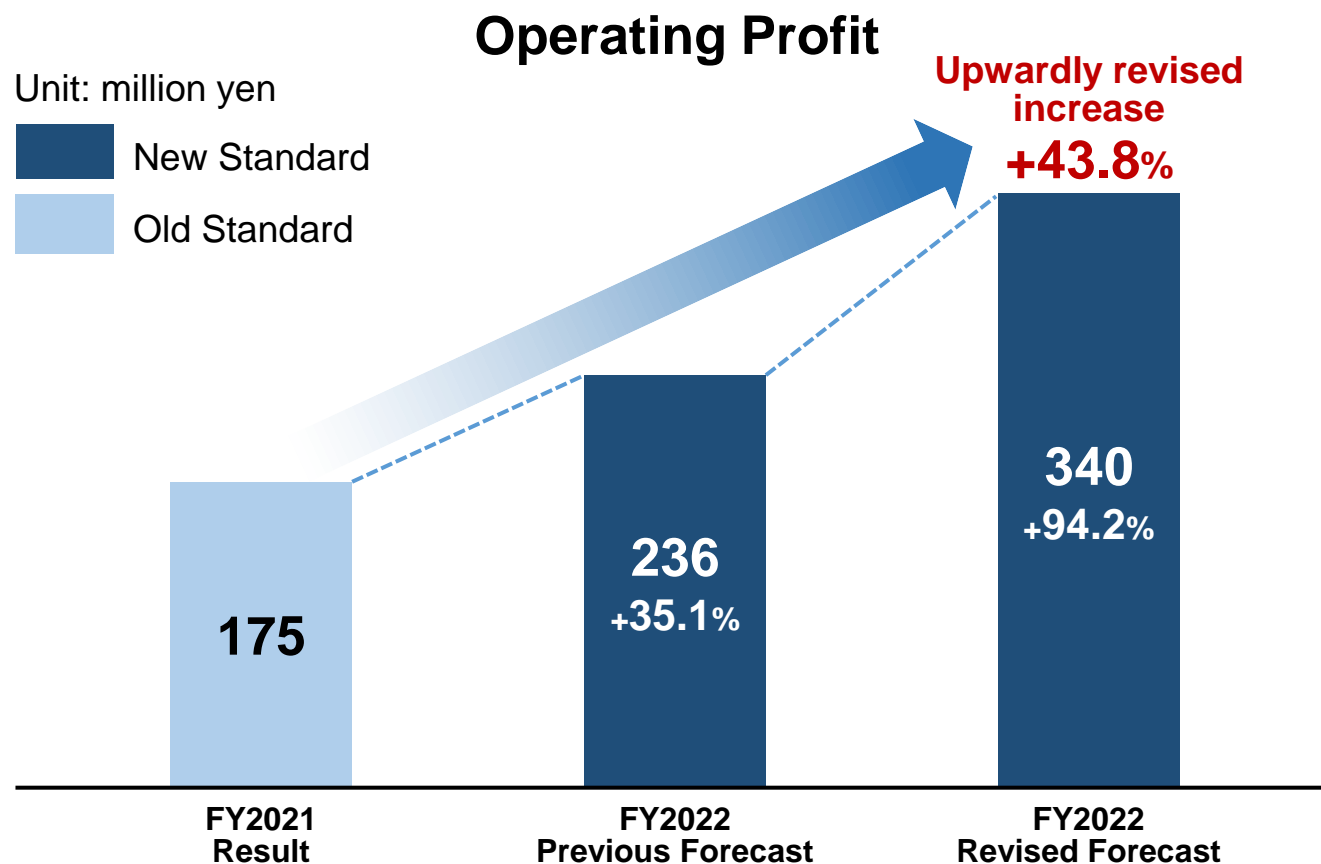

We have made an upward revision based on the cumulative results at the end of Q3 and the forecast for Q4.

New Standard / Unit: million yen

	FY2022			
	Previous forecast	Revised forecast	Changes	Rate
Sales	1,931	1,931	—	—
Operating profit	236	340	104	43.8%

Upward Revision of Full-year Forecasts (2)

Operating profit was revised upwards to approximately **twice** that of the previous year.

Main Factors

- Increase in order price per customer
- Increased order price per engineer

*Operating profit for the FY2021 is stated on the old standard due to difficulties in calculation on the new standard.

Results for the 3Q of FY2022 under the New Standard

Sales increased compared to the Q1 and Q2, achieved solid growth. Operating profit exceeded the full-year forecast.

New Standard / Unit: million yen

	FY2022				Full-year forecast (Previous forecast)	Progress rate (Previous forecast)	Full-year forecast (Revised forecast)	Progress rate (Revised forecast)
	1Q	2Q	3Q	Total				
Sales	426	463	519	1,408	1,931	72.9%	1,931	72.9%
Operating profit	74	96	114	286	236	121.1%	340	84.1%

[Reference] Results for the 3Q of FY2022 under the Old Standard

Net sales increased by **30%** YoY on the old standard.

Old Standard / Unit: million yen

	FY2021						FY2022						
	1Q	2Q	3Q	1Q-3Q Total	4Q	Full-year	1Q	2Q	3Q	Total	YoY	Full-year forecast (Previous forecast)	Progress Rate
Sales	485	540	481	1,507	593	2,101	614	638	692	1,945	+29.1%	2,648	73.5%
Operating profit	0	48	43	91	83	175	81	88	98	267	+193.4%	240	111.3%

*Figures based on the old standard are for reference only as they have not been reviewed by an auditor. Revised forecasts will not be disclosed.

Percentage of Orders Received Based on Customers' Industry

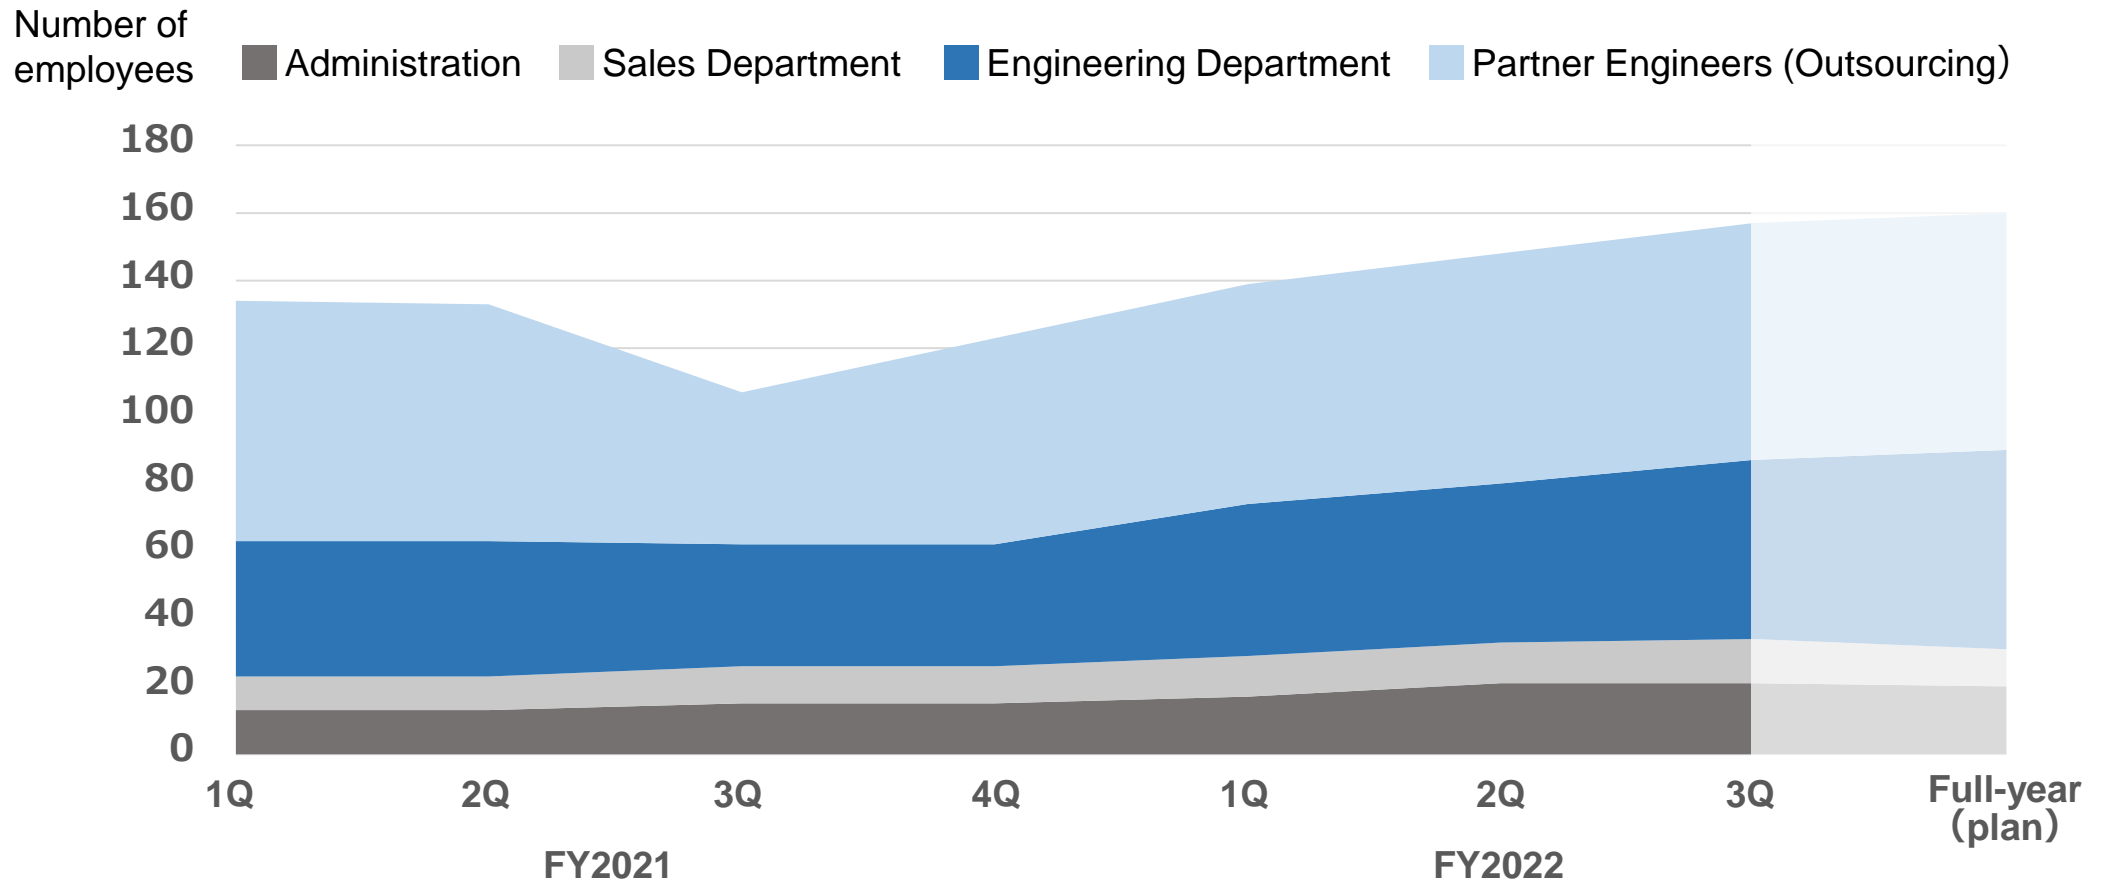

The software and services provided by BlueMeme are used in a wide range of industries, particularly in the manufacturing and construction sectors.

*Customers who participated in the training service are not included, as they represent a small proportion of the total.

Number and Classification of Employees in Our Group

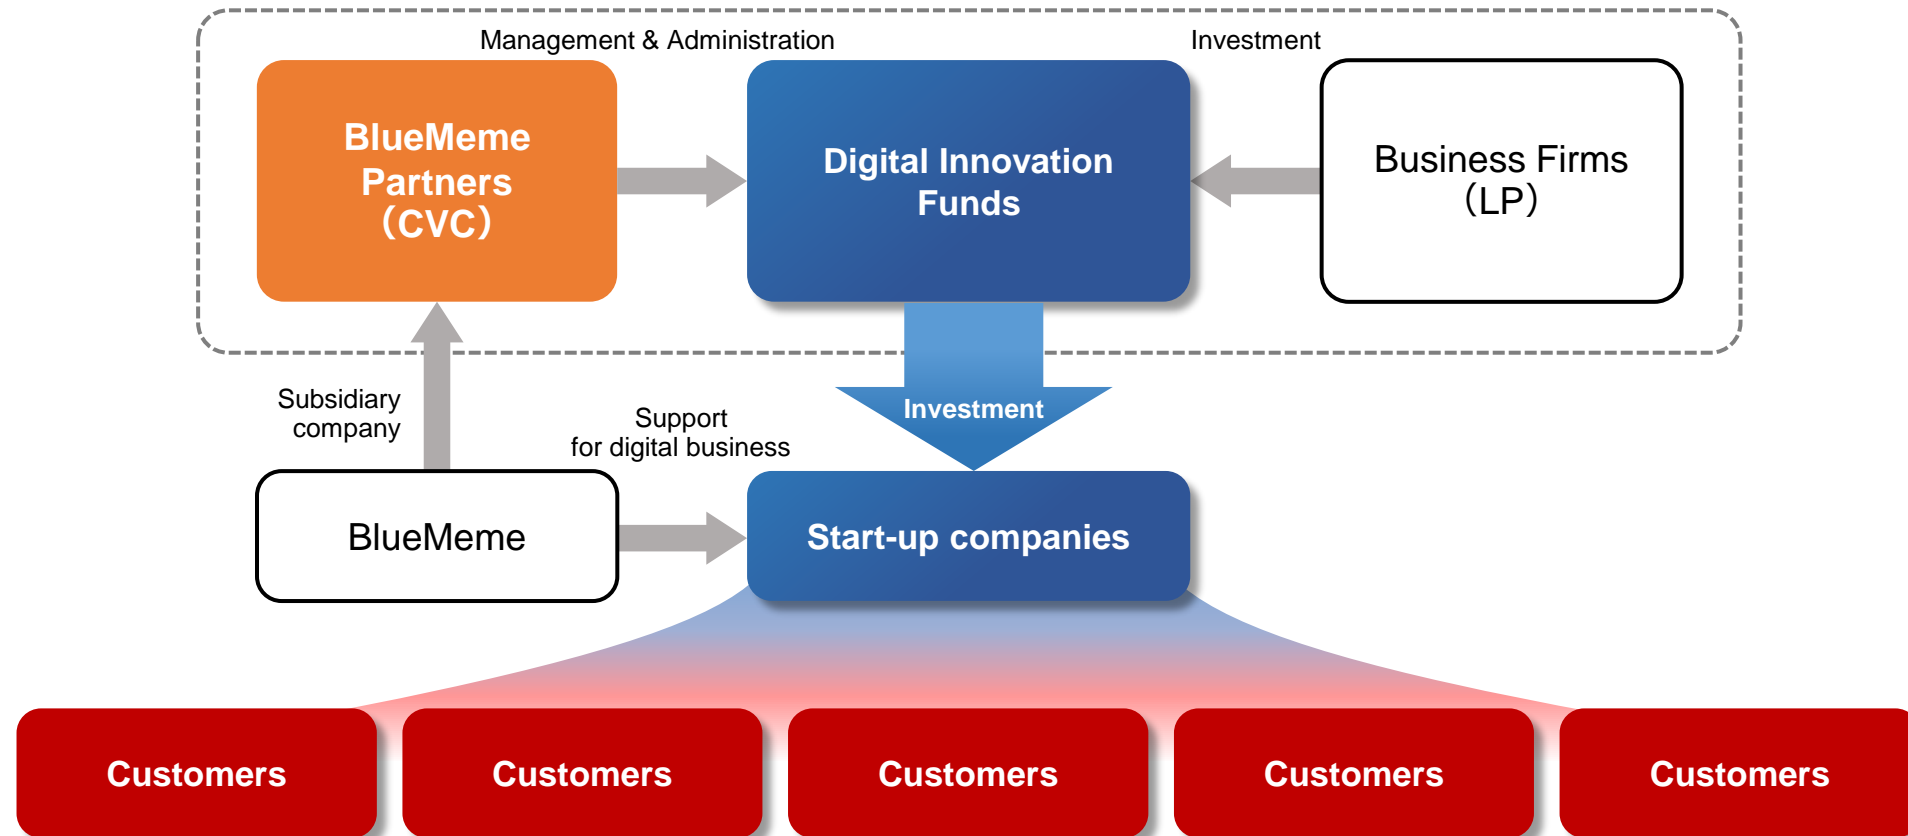

Based on the positive results of the 2Q, we recruited mainly engineers in the 3Q. We plan to procure and train partner engineers to meet current and future demand.

Major Event in 3Q of FY2022

Establishment of BlueMeme Partners, a subsidiary for the investment operations

We will provide start-ups with capital and BlueMeme's expertise in system development to help them accelerate their digital business. The company will be established on 1 April 2022.

We help our customers to improve their global competitiveness by promoting DX

Business Overview

Where does the name BlueMeme come from?

BlueMeme's Philosophy

Create new values, change the norm, evolve the culture

Our company name, BlueMeme, is made up of two words, “Blue”, which derives from the meaning of “shining”, and “Meme”, which means a communicator of information that forms a culture, and expresses our strong philosophy of creating new values to form new cultures, without being bound by conventional norms.

Blue

Shining

Meme

Communicator of information
that forms a culture

What does BlueMeme do?

Business Overview

To achieve the world's most efficient system development, we offer a one-stop system development business, using **our unique “development methodology”** and the most advanced **“automation technology”**

What is efficient system development?

Shorter development period
Build systems quickly

Reduce development volume
Minimize the number of engineers

Prevent unnecessary IT investment
Develop the necessary systems only

What differentiates BlueMeme from System Developers?

Minimize the Number of Engineers and Period

Standard Method

Many engineers develop systems
“manually”

Duration: approx. 12 - 36 months

BlueMeme Method

A small number of engineers
develop systems “automatically”

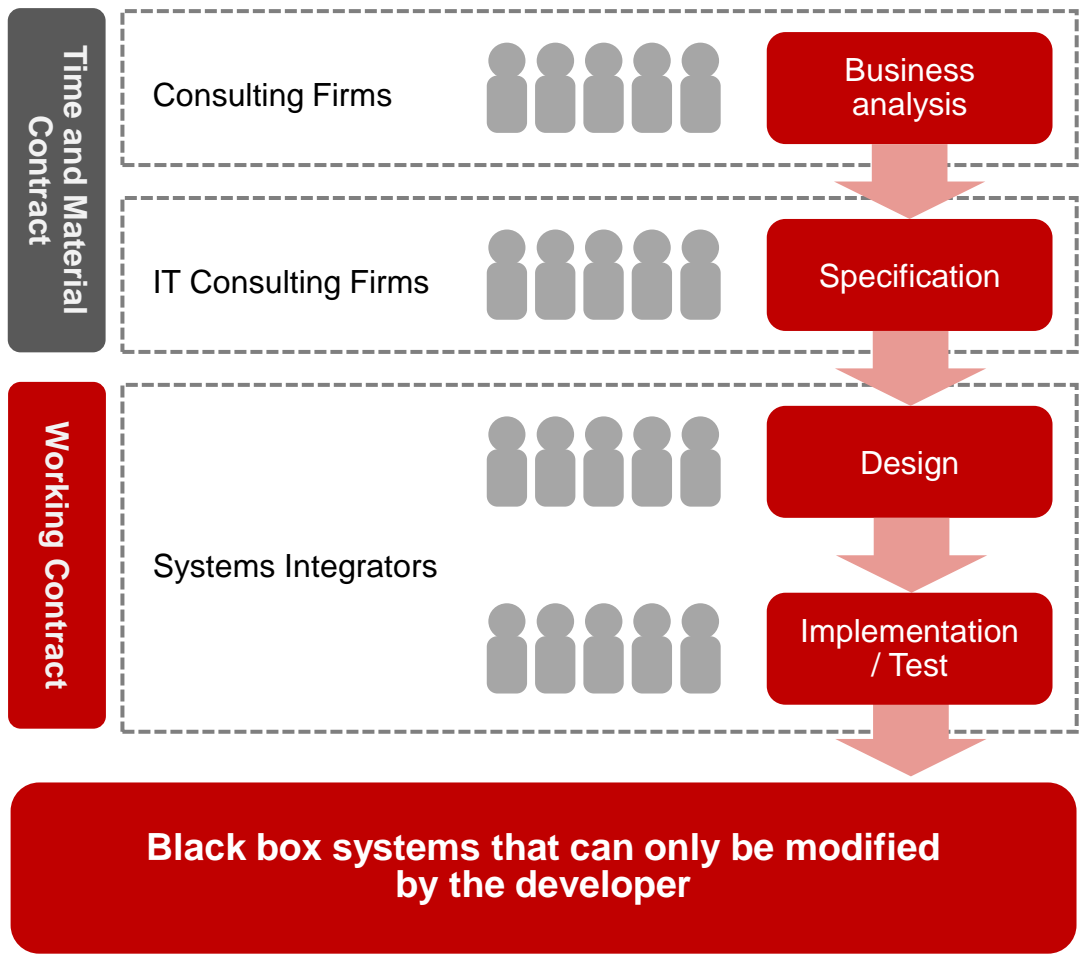

Duration: approx. 0.5 - 12 months

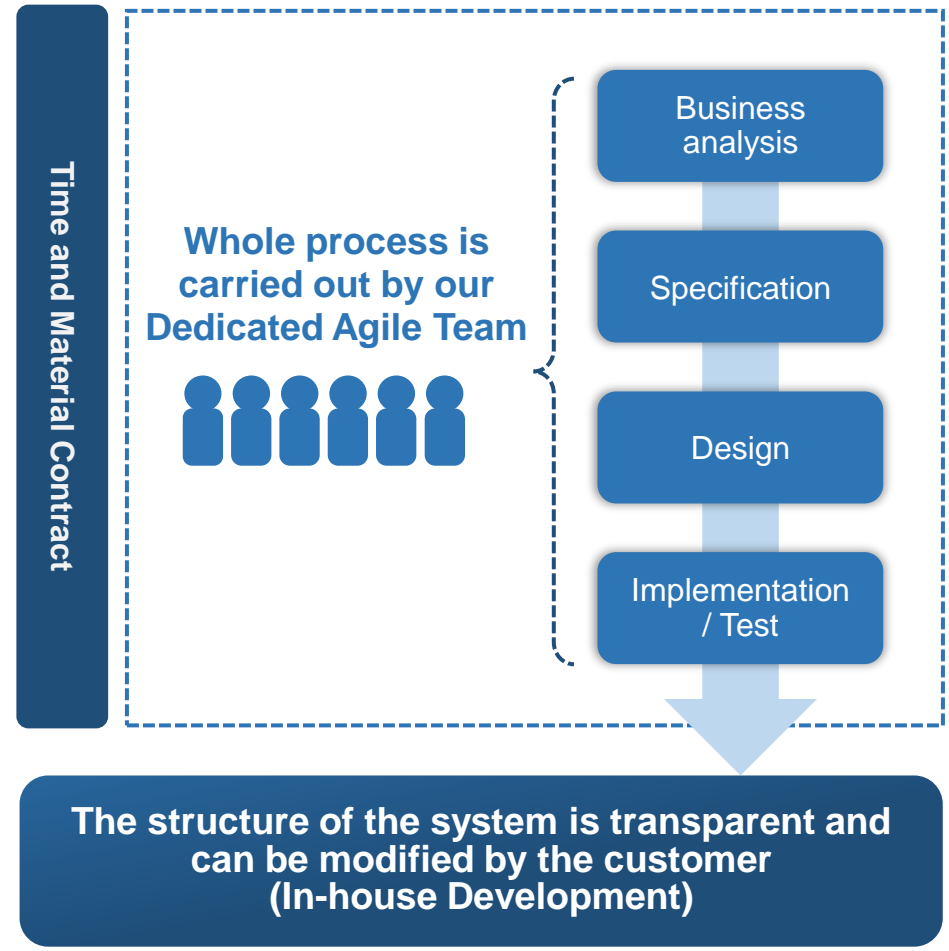

50 - 70% reduction in time and
engineers, and a two- to threefold
increase in development efficiency

Differences between System Developers and BlueMeme

Standard System Development

System Development by BlueMeme

Does low-code platform only reduce man-months?

Paradigm Shift in System Development Brought by Low-code

Key factors in the past

Key question was whether the developed system would work properly

In the past, the system itself was seen as the value, and attention was paid to the system development itself.

Key factors in low-code

Key question is whether the systematized business processes are effective

The operation of the system is guaranteed by the low-code, and the value does not belong to the system itself.

What are the differences between low-code and no-code?

Difference between Low-code and No-code

Classification	Low-code	No-code	Scratch
Target group	Consultants / Engineers	Business User	Engineers / Programmers
Required IT knowledge	Basic programming knowledge	Knowledge of operating a cell phone or PC	Advanced development knowledge
Scale of operations and flexibility	Large / Flexible	Small / Limited	Flexible
Learning Period	3 - 6 months	Days to weeks	3 - 5 years
Implementation costs	Approx. 30% of scratch development	Low	High
Duration of development	3 - 12 months	Days to weeks	1 - 5 year(s)

What does BlueMeme sell?
What is the composition of its sales?

Position in the Industry, Company's Achievements and Business Model

Position in the Industry

We were the first to bring
OutSystems
to Japan

We can deliver
large scale development
with low-code

We can achieve
agile on a large scale

Company's Achievements

Number of customers
440+

Number of services provided
2,600+

Number of low-code engineers trained
4,300+

Business Model

Software sales

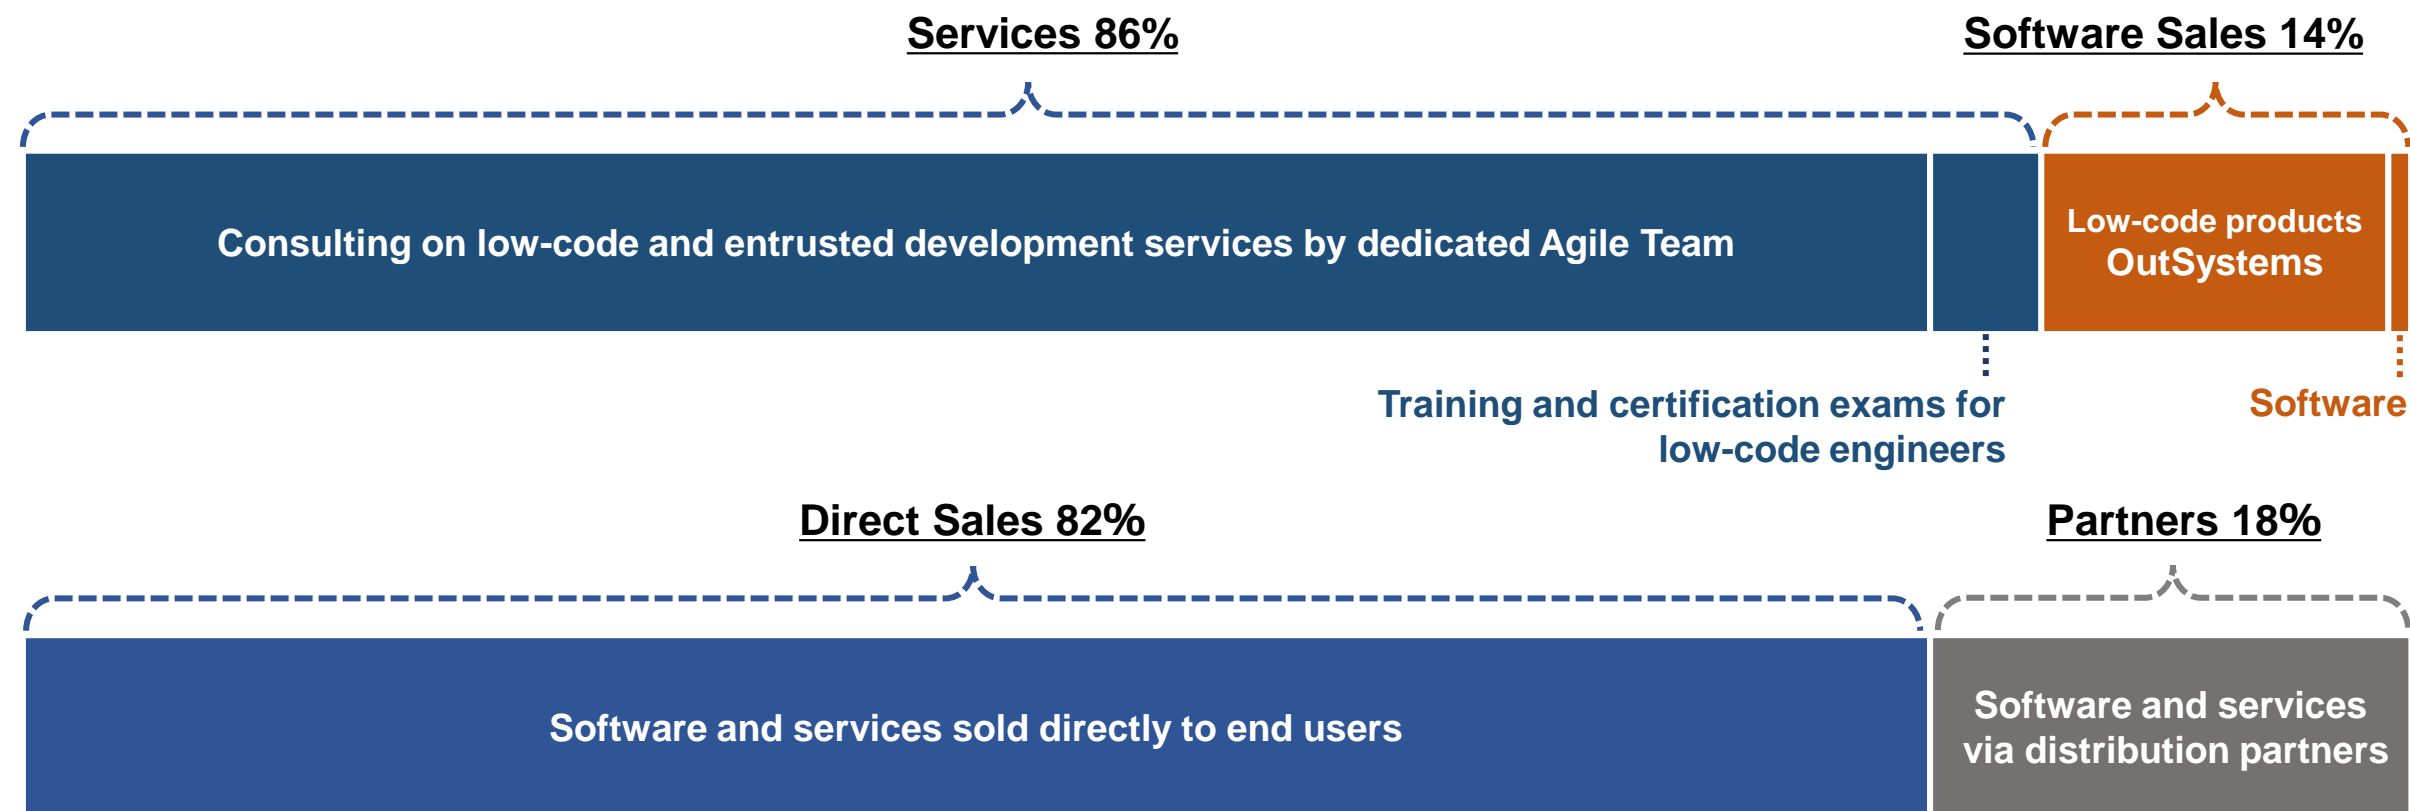

- **OutSystems**
- Omnext Fit4Test
- MarkLogic
- Workato
- Softools

In-house development support services

- **Consulting**
- **Entrusted development**
- **Training**

Composition of sales as of the end of 3Q FY2022

We provide software and services that enable our customers to “**bring their systems development in-house**”

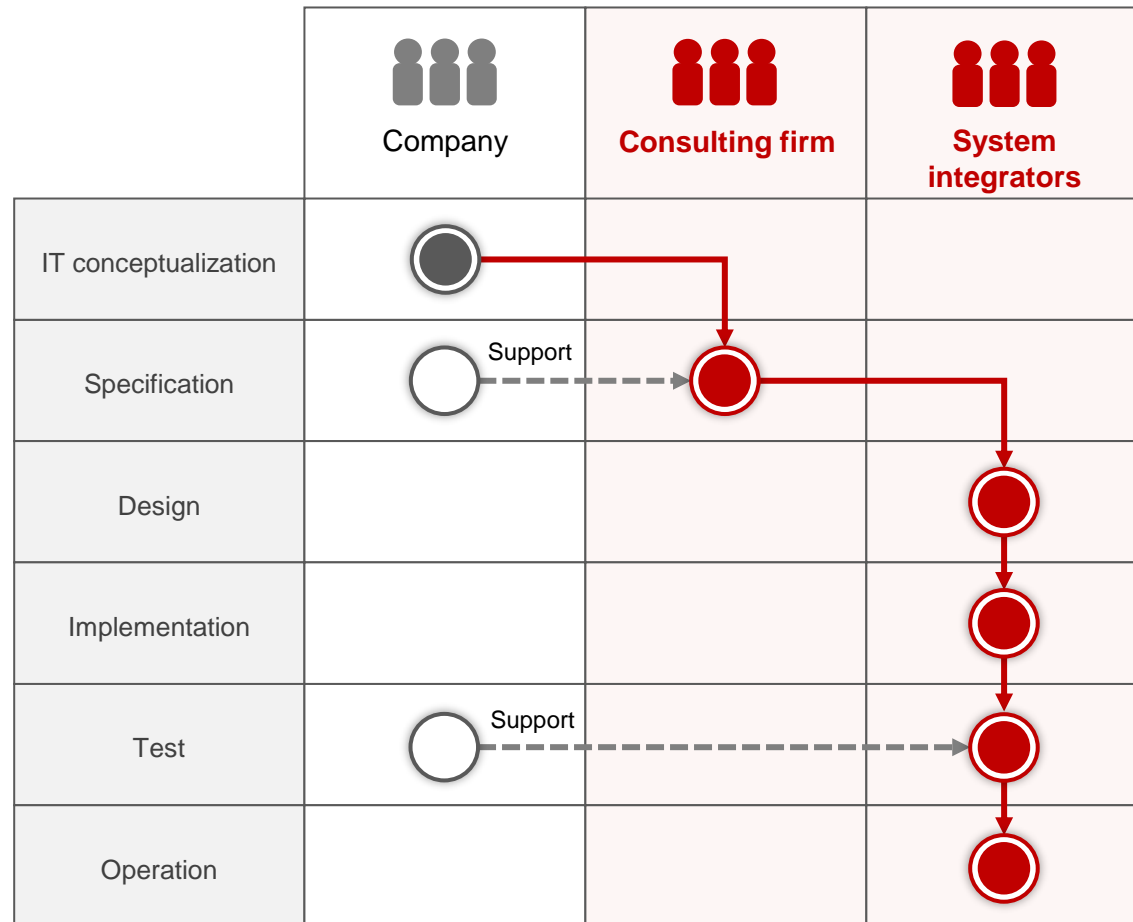

What does “In-House System Development” mean?

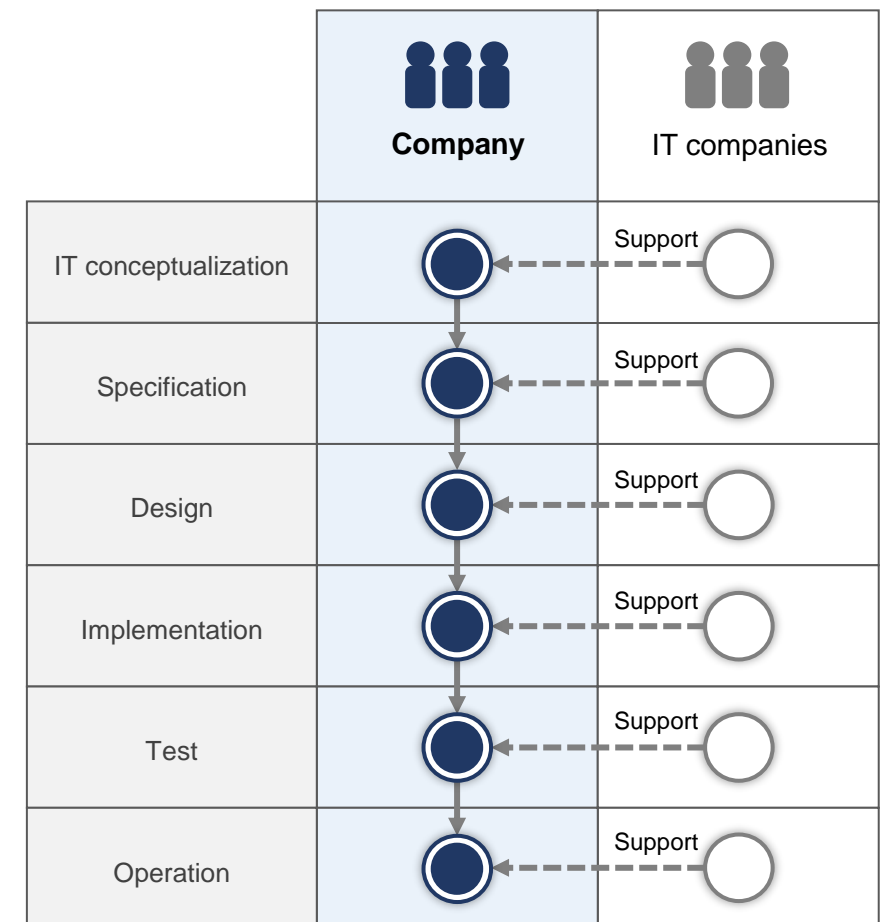

What does “In-House System Development” mean?

Conventionally, system development in Japan has been mostly outsourced, mainly to system integrators

In-house system development allows companies to take the initiative in developing their systems

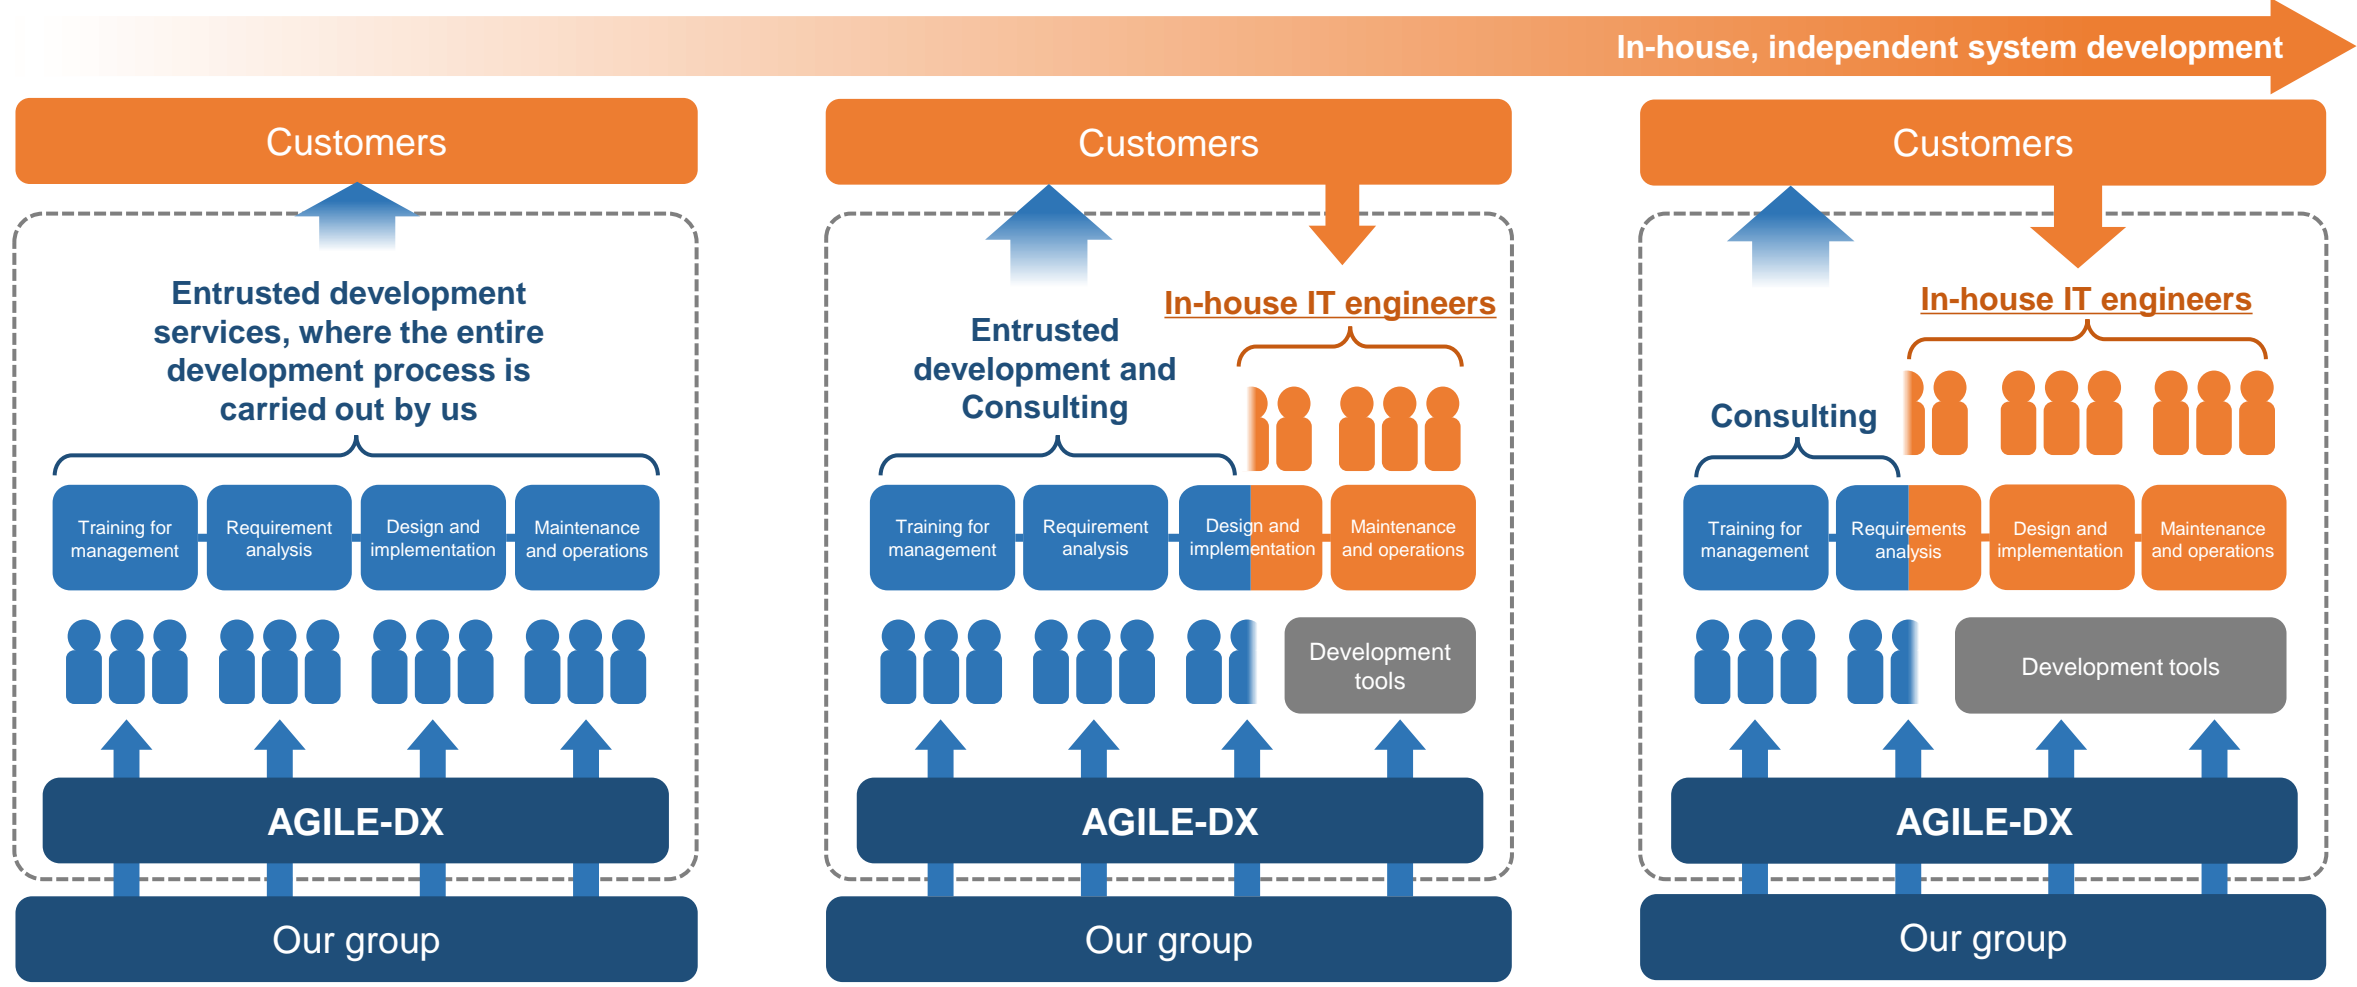

How does BlueMeme support in-house development?

Support Service for “In-House Development” by “AGILE-DX”

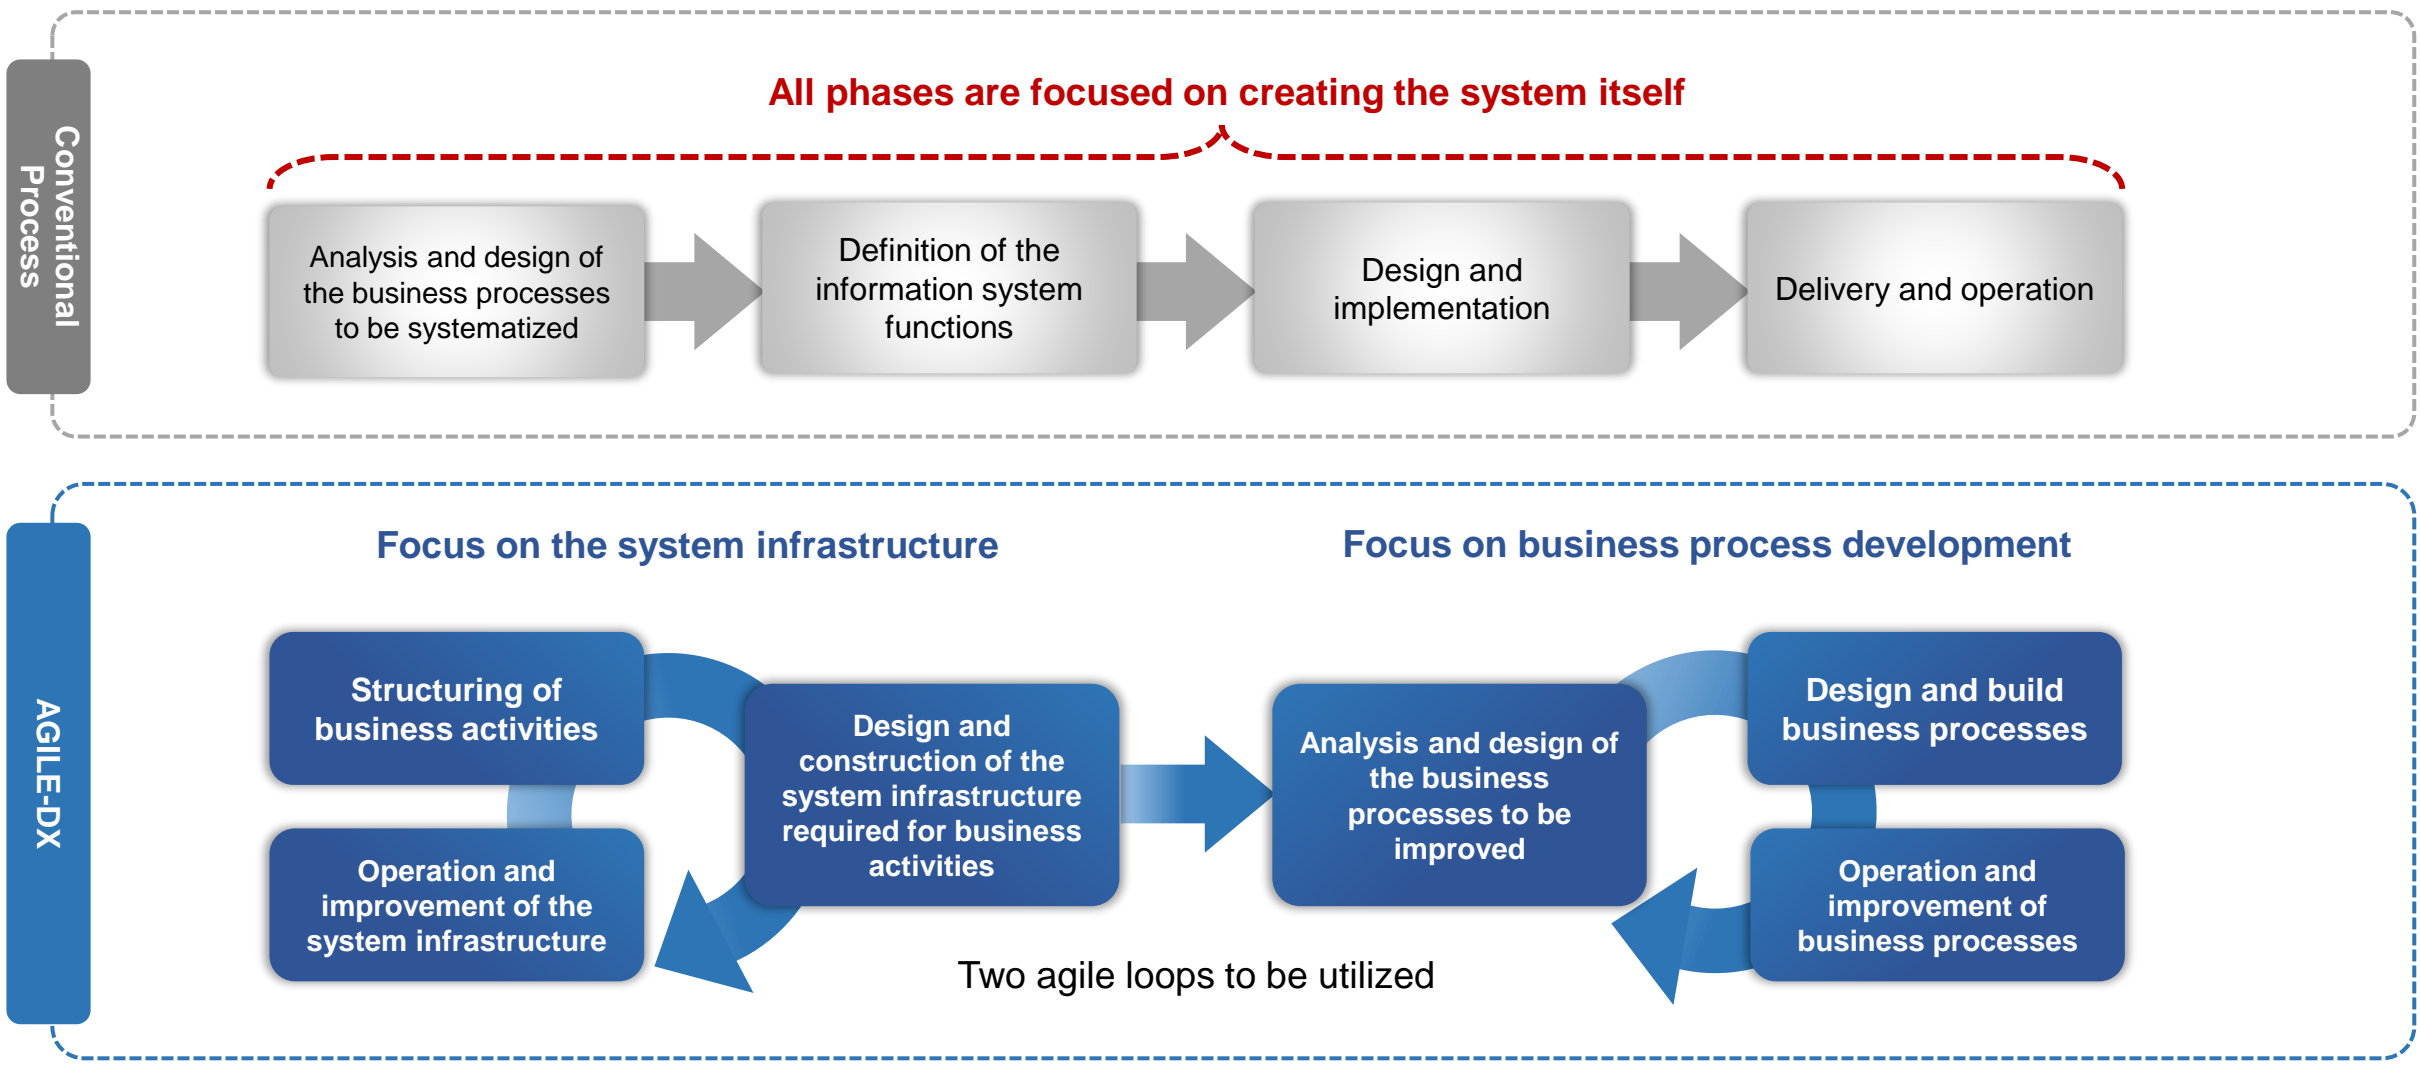

We provide variety of services to support in-house production, depending on the needs of the customer.

What is AGILE-DX?

A methodology that focuses not only on “systems” but also on “business process development”

What are the features of AGILE-DX?

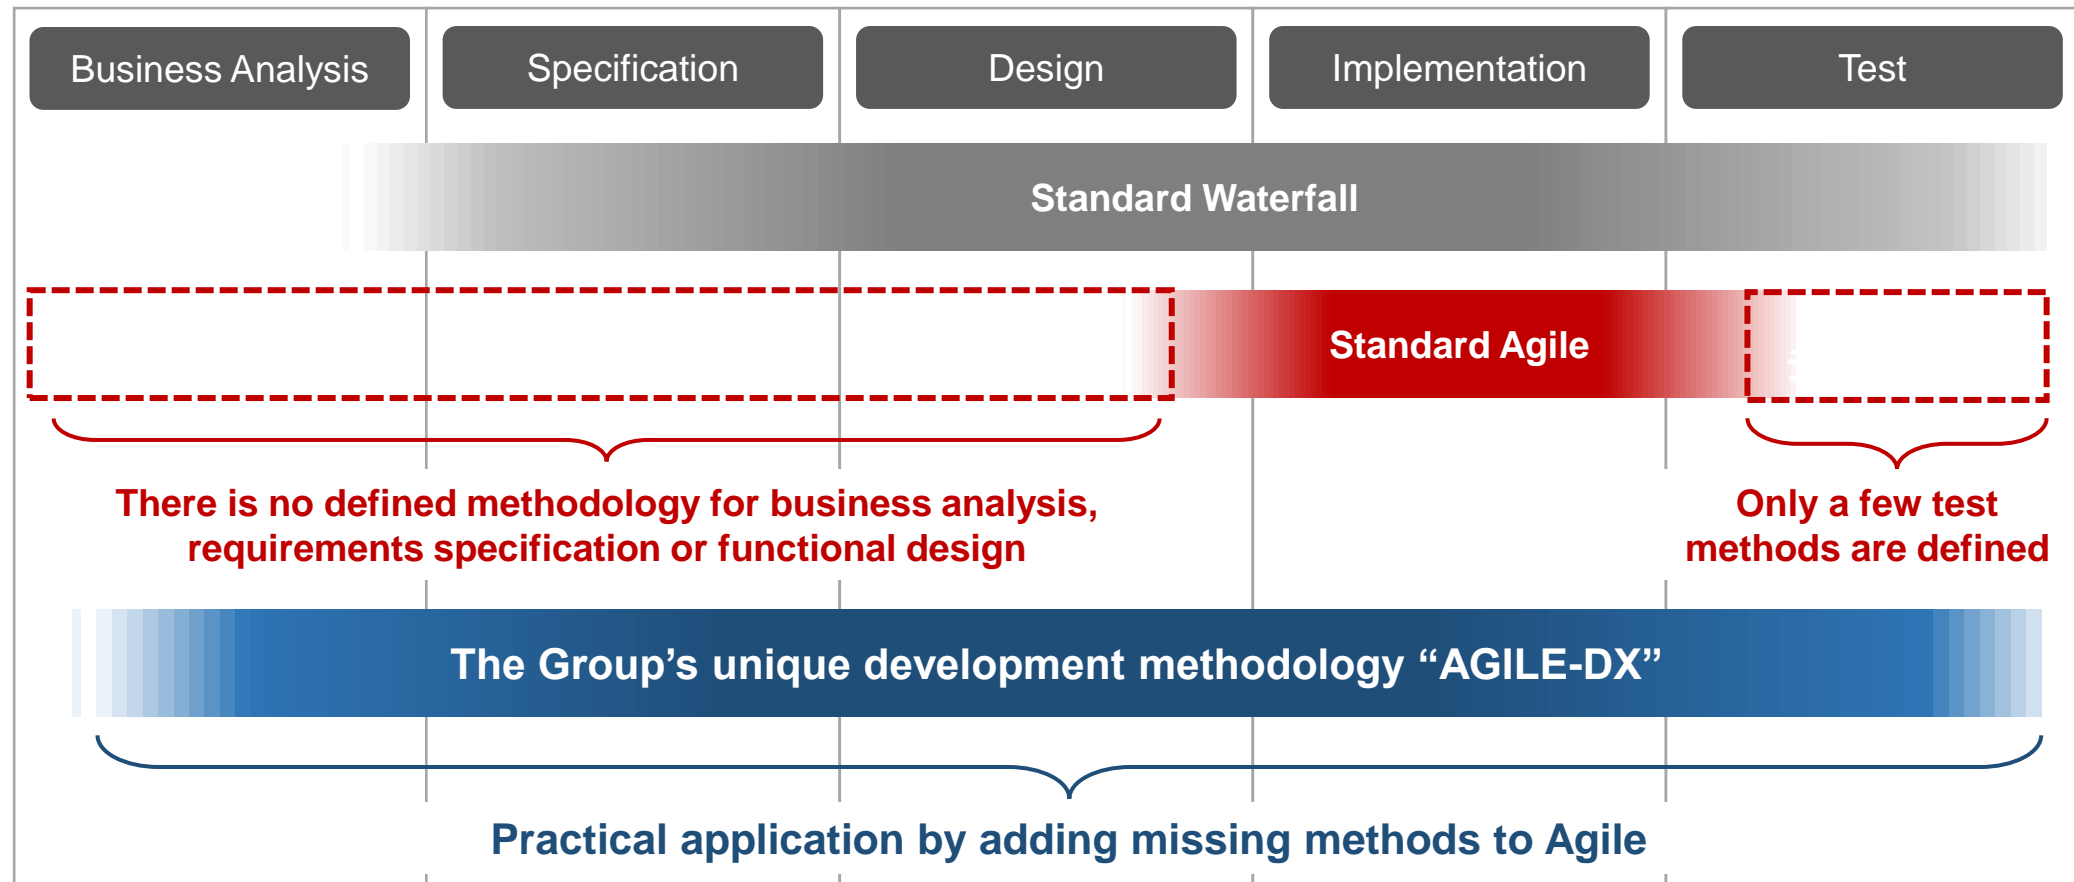

A development methodology that maximizes the speed of low-code development

A development methodology that takes full advantage of the speed of low-code development to shorten “development period”, reduce development man-months, and prevent unnecessary IT investment

Challenges for Agile Development in Japan

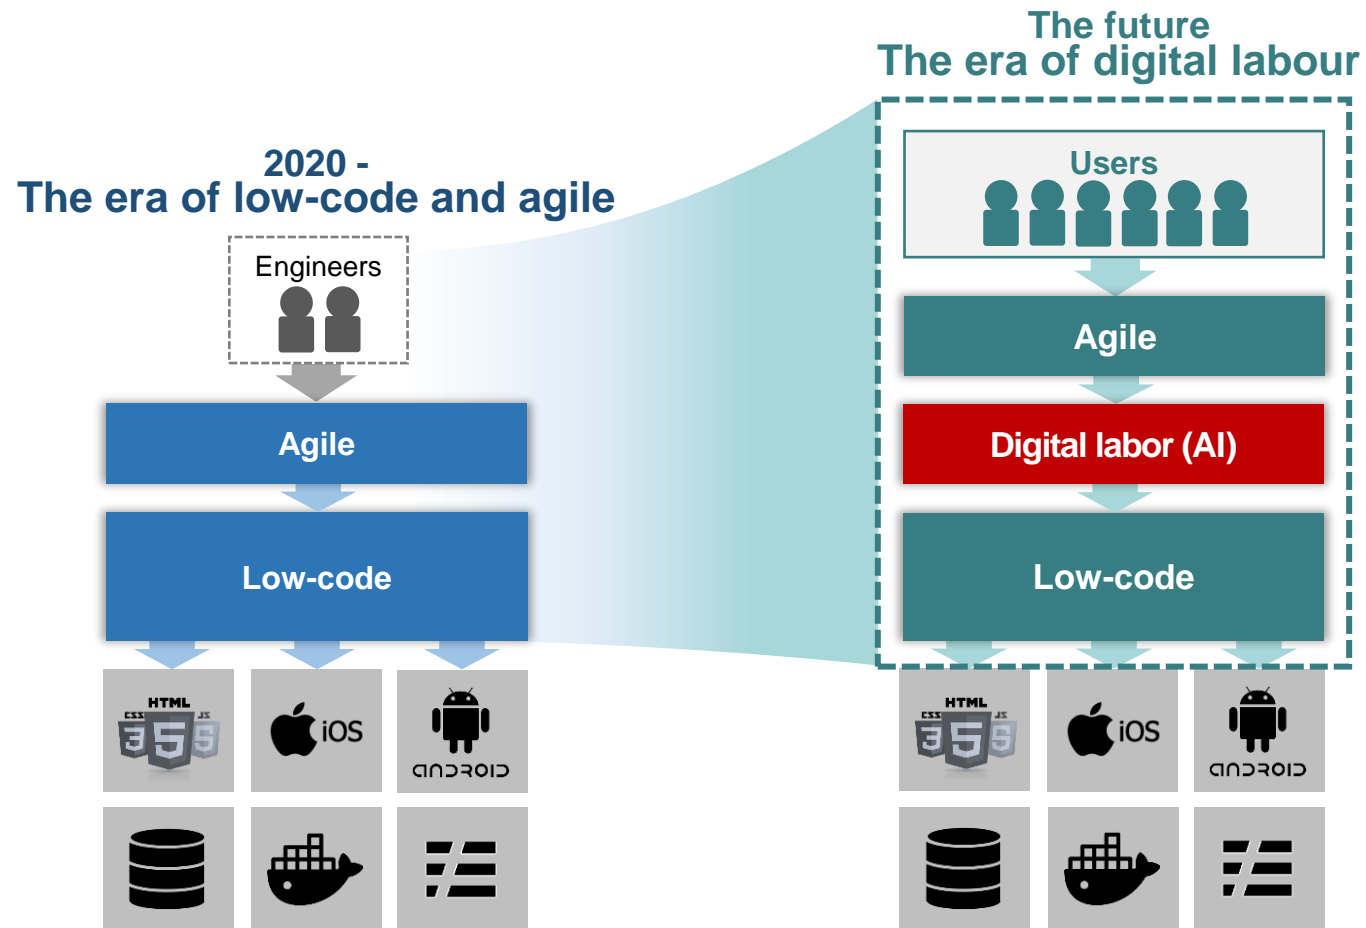

Solving the problems of agile methods by standardizing the methods of business analysis and requirements specification.

Will BlueMeme lose its service business
if the customers moves to in-house development?

In the future, AI will take over a large part of system development

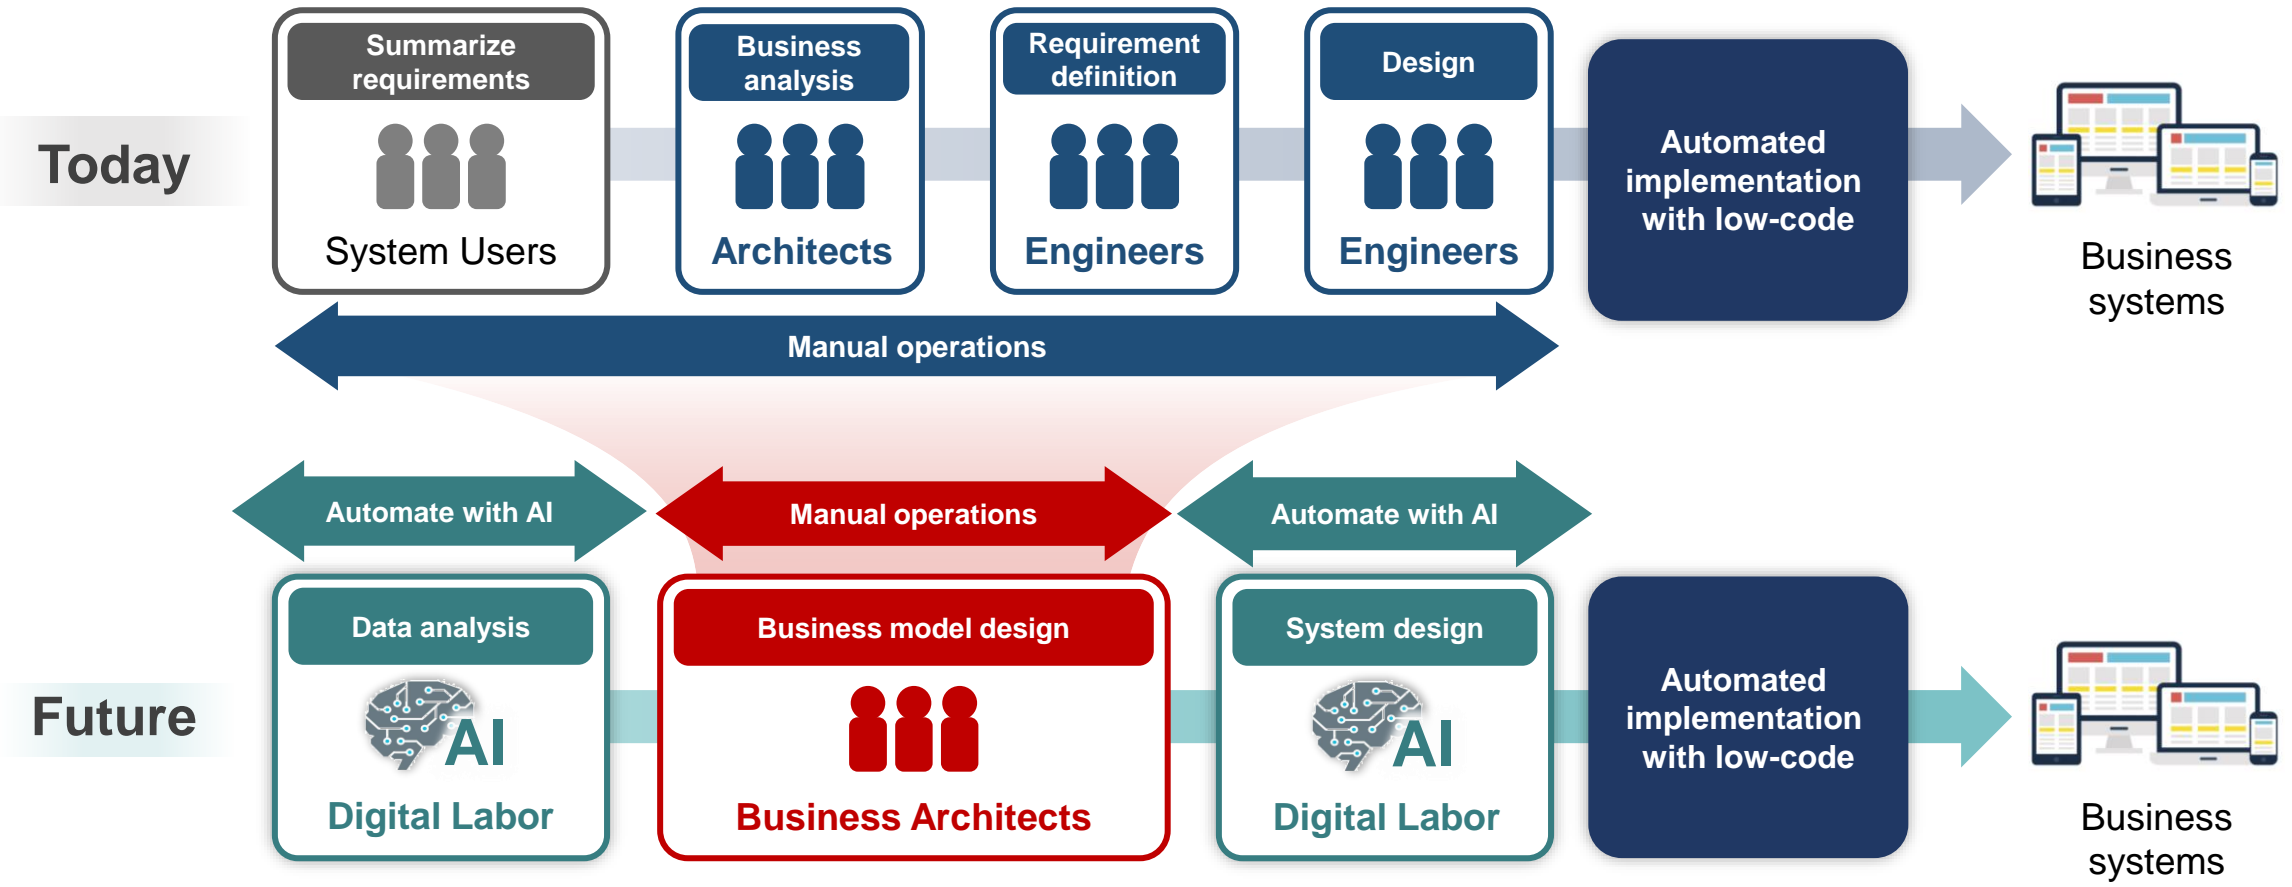

What is the era of digital labor?

In the future, users will be able to use AI to easily develop their own business applications.

The importance of business analysis will increase as digital labor (AI) takes over the development processes.

System Development by Digital Labor and Business Architects

System development will move from a technology-centric era to a “business model-centric” era with AI

Our Business Model in Response to Customers' In-House Development Situation

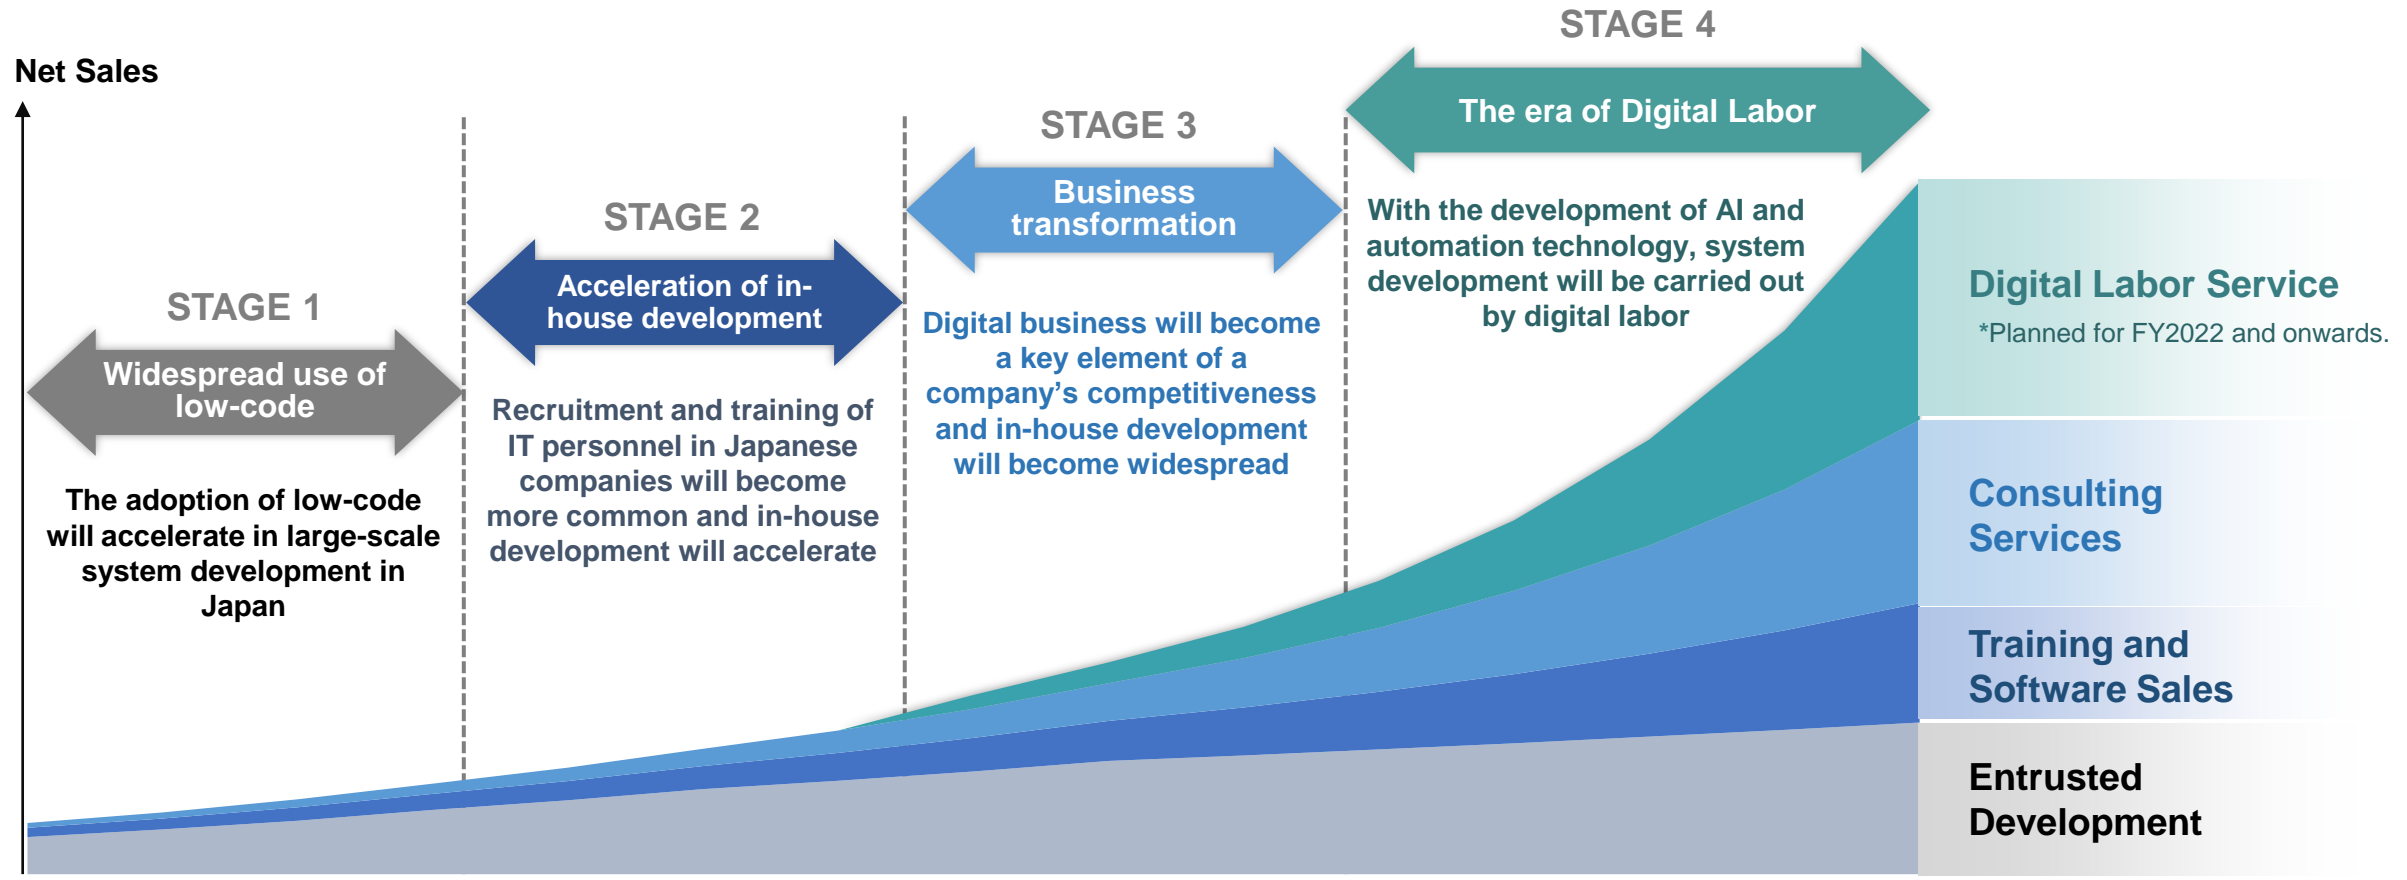

Services we offer		Realization of in-house system development			
		Customers who have not started in-house development	Customers who have started in-house development	Customers in the process of in-house development	Customers who have achieved in-house development
Consulting services for upstream processes	IT Consulting Services	🎯	🎯	🎯	🎯
	Providing Business Architects	🎯	🎯	◯	Internalized
Entrusted development	Providing Application Engineers	🎯	◯	Internalized	Internalized
	Providing Technical Staff	◯	Internalized	Internalized	Internalized
Training services	Providing Technical Training	🎯	🎯	🎯	🎯
Software or/and Cloud Services	Providing of Low-code tools	🎯	🎯	🎯	🎯
	Providing Digital Labor Services to support in-house production *Planned for FY2022 and onwards	—	—	◯	🎯

Digital Business

Growth Strategies and Sales Revenue in line with the Progress of In-House Development

We plan to provide services to promote in-house development and to adapt our services to the progress of in-house development in Japanese companies.

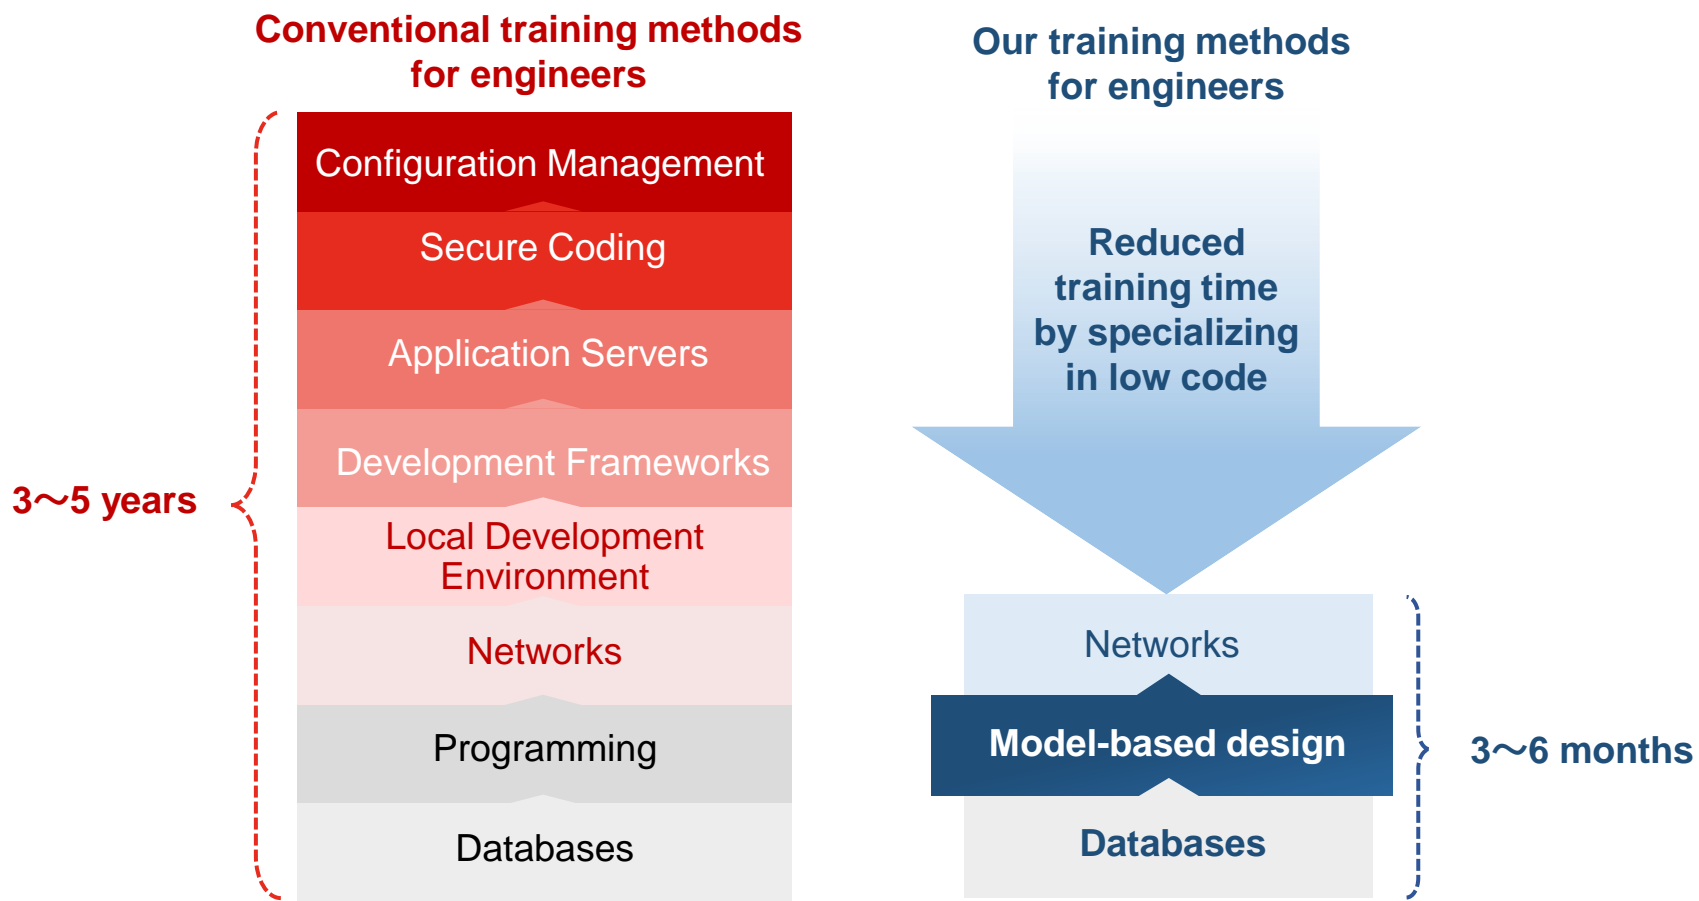

Other companies are struggling to find new engineers, what about BlueMeme?

Our Unique Education System

We have shortened the training period for our engineers from 3 to 5 years to 3 to 6 months. This allows us to quickly train not only our own engineers, but also those of our customers, helping Japanese companies to establish in-house development.

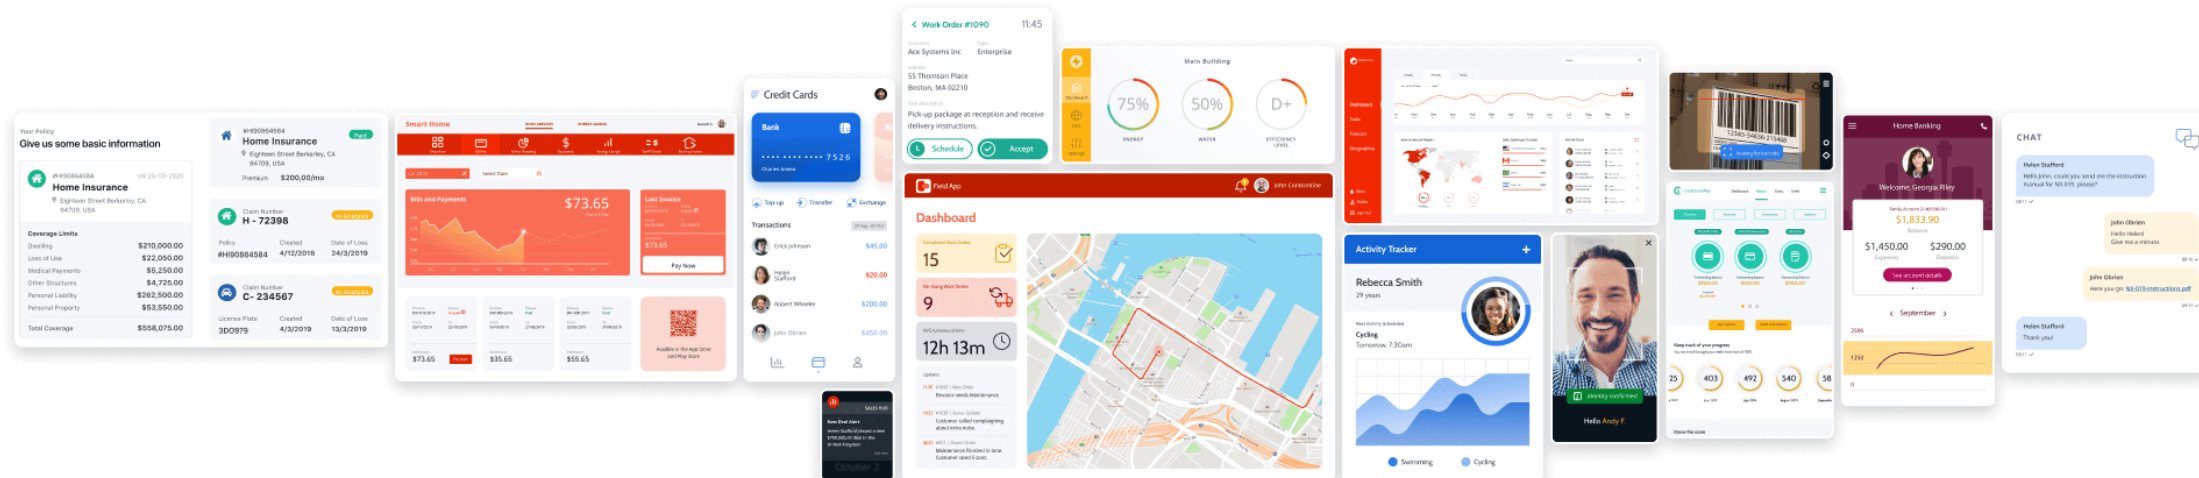

What are the Advantages of OutSystems?

Sophisticated Basic Functions and Design

OutSystems functions are implemented according to the philosophy of **“only implement functions that can be handled intuitively”**, which makes them very easy to understand and to learn.

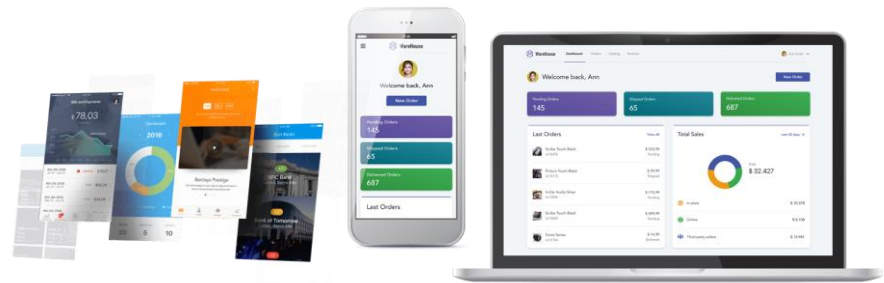

It also incorporates **beautiful user interface design patterns**, allowing engineers with little UI design experience to develop sophisticated applications.

Flexible Model Design and Diverse Range of Applications

OutSystems does not offer as many **advanced templates** or as many **different functional components** as other low or no-code products. Therefore, when developing an application, it is necessary to define a data model from scratch and write logic similar to a programming language, such as IF and FOR statements, in a flowchart.

This slows down the development of applications with limited use compared to other products, but allows **modelling of low-level processing similar to a programming language**, and allows the flexibility to design a wide variety of applications.

FirstName	LastName	BirthDate	Email	Phone	Bio
Patricia	Wesley	1986-12-25	patricia.wesley@example.com	1-555-723-3191	Top-ranked sales manager, contributes to sales growth.
Edward	Williams	1980-10-09	edward.williams@example.com	1-555-491-7917	Sales manager that offers in-depth user support.
Andrea	McCarthy	1986-12-14	andrea.mccarthy@example.com	1-555-445-1521	Experienced and "tearless" cold-caller.
Ann	Olivaria	1978-08-18	ann.olivaria@example.com	1-555-720-9353	A good listener, always looking to establish rapport.
Bridget	Hernandez	1982-11-10	bridget.hernandez@example.com	1-555-843-3944	Strong communication skills, established sales record.
Carla	Hansen	1986-12-30	carla.hansen@example.com	1-555-228-7916	Vast experience in controlling the company's sales pipeline.
Charlotte	Anderson	1982-09-15	charlotte.anderson@example.com	1-555-788-4083	Chartered experienced accountant. Great at analyzing sales data.
Cheryl	Fleet	1980-04-10	cheryl.fleet@example.com	1-555-253-1007	Experience in sales, 2017 last-quarter sales record.

Data logic

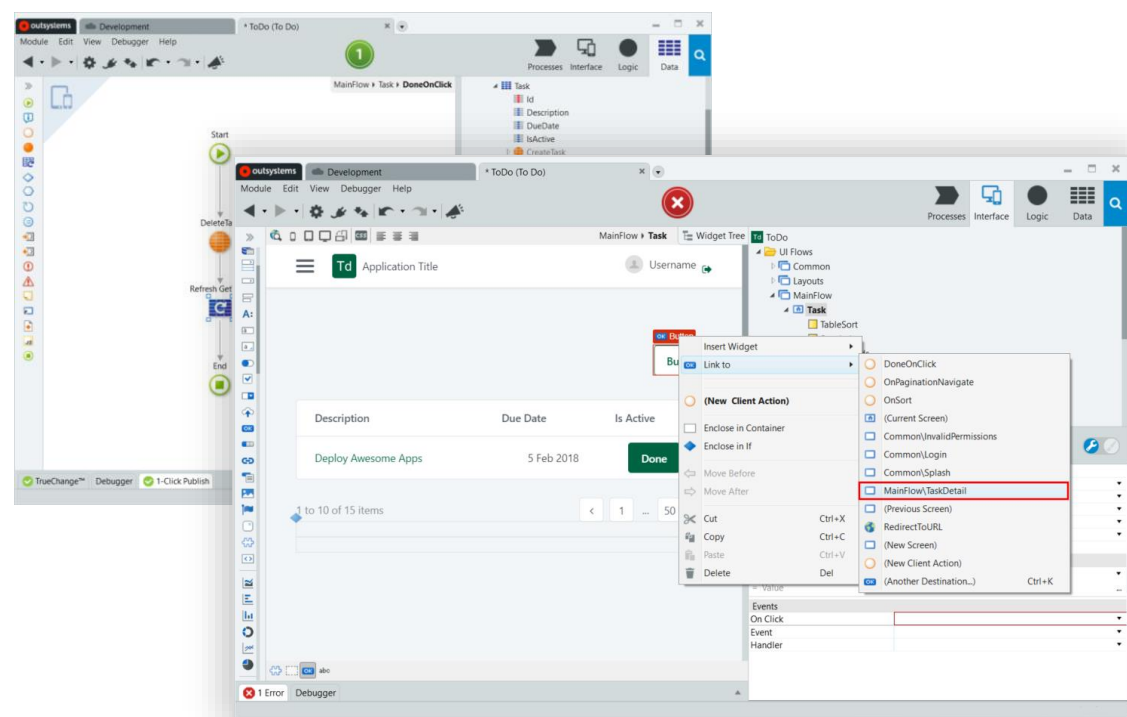

Client Logic

Style sheet

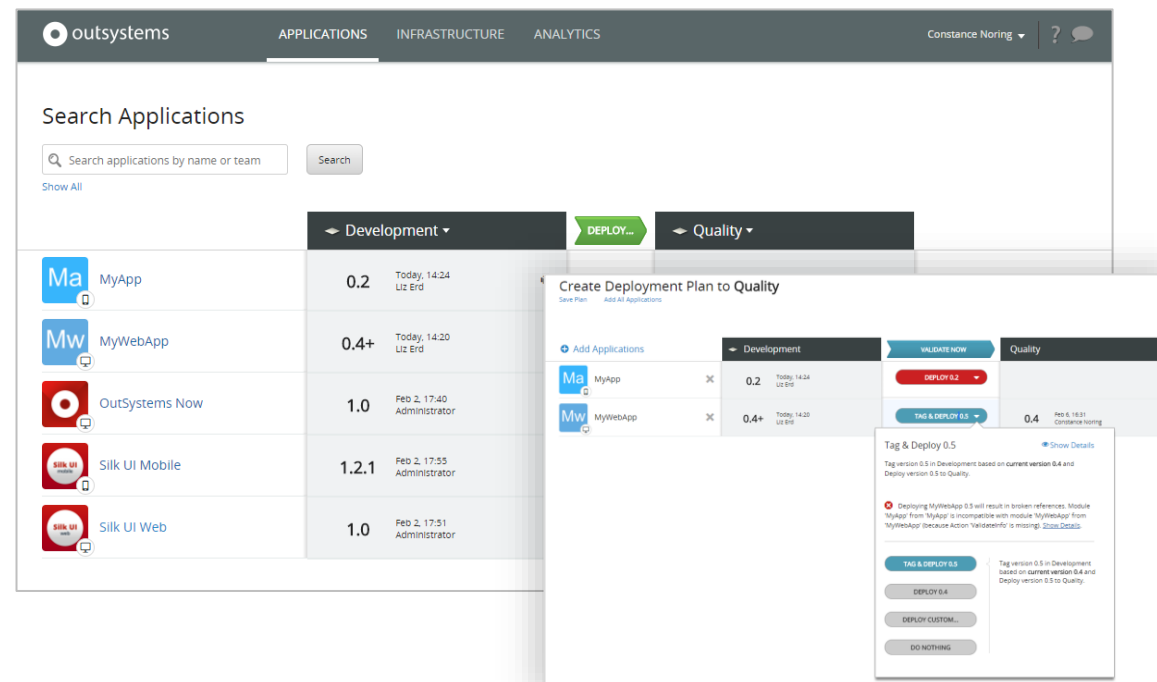

Server Logic with C#

Automatically Generated High Quality Applications and High Security

The application design information is analyzed in real time, so that **if there is incomplete logic or missing essential parameters, the errors and solutions are displayed on the spot.** Warnings are also displayed if there are any performance issues or unnecessary designs, preventing the application from deteriorating.

When an application is distributed from the development environment to the production environment, **the dependencies between modules are analyzed from the application design information and solutions are provided** to prevent application errors due to version differences or inadequate dependencies.

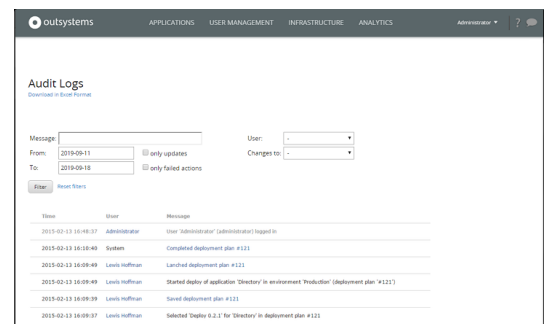

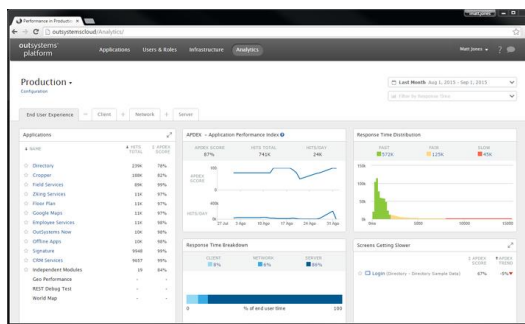

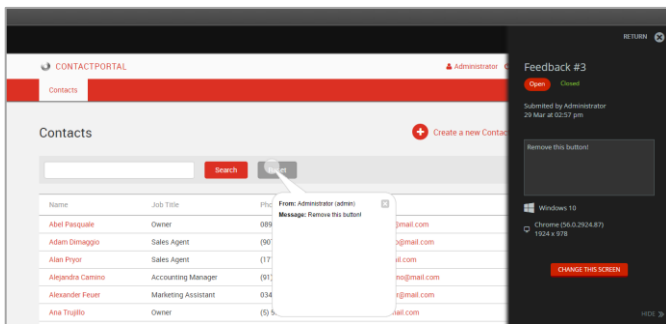

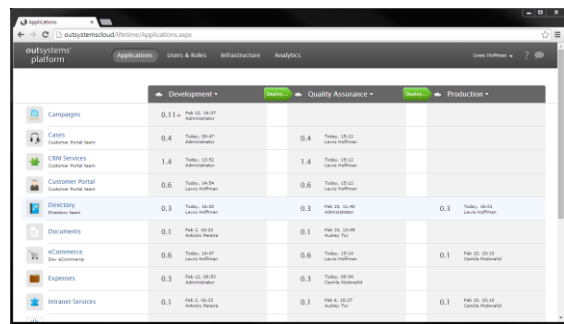

Centralized Application Deployment and Management Functions

Unlike other low-code tools, OutSystems allows you to develop applications that run on standard architectures **without using special runtime engines or frameworks**. Therefore, many steps, usually corresponding to scratch development, are required to deploy the application to the server after the generation of the source code, but OutSystems automates all the work. OutSystems also provides as standard operational management functions such as application **performance analysis, log analysis** and a **feedback function** to manage user requests for improvements.

1 Automate everything from source code generation to server configuration with a single click

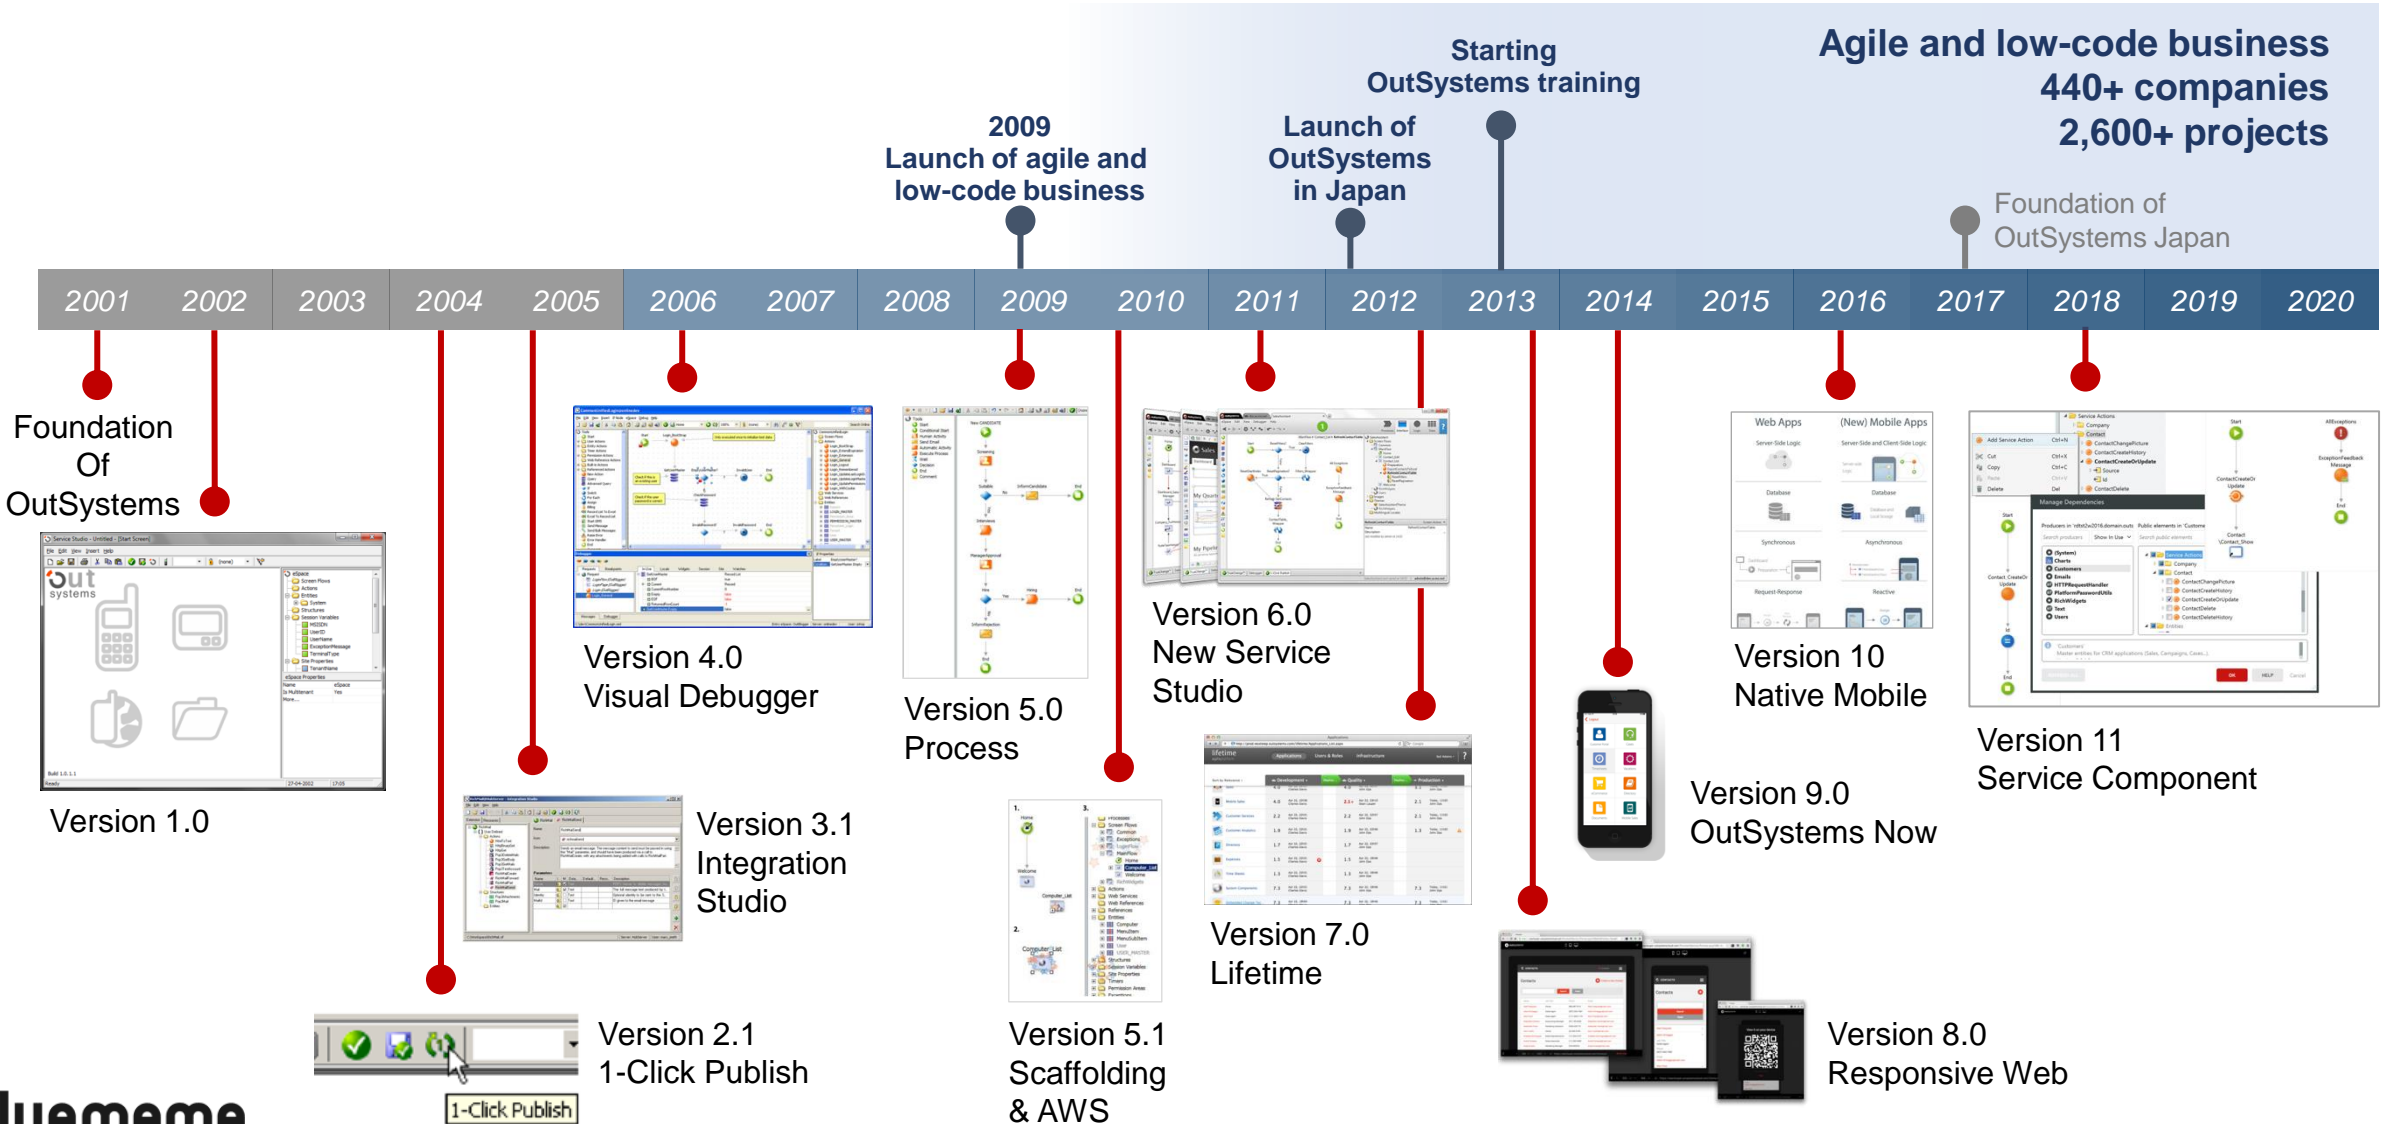

Provides operational functions

What is the relationship between BlueMeme and OutSystems?

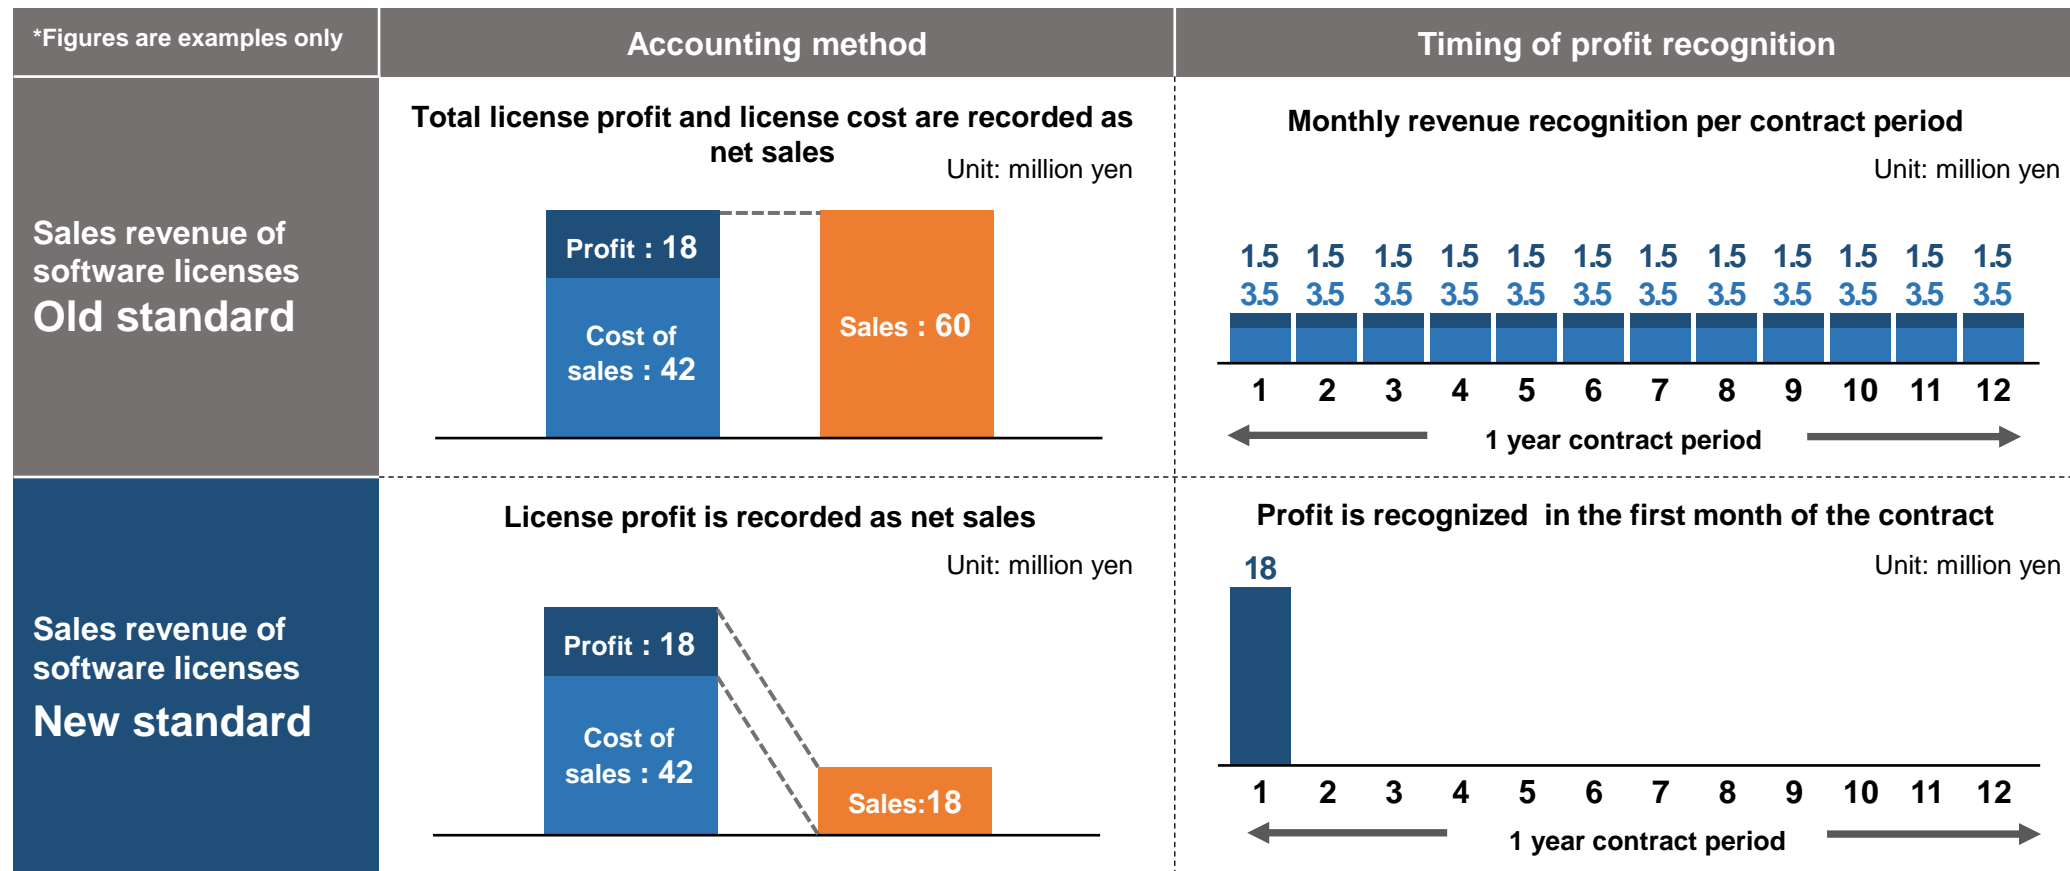

First Introduction of OutSystems in Japan in 2012

Appendix

Application of the New Revenue Recognition Accounting Standard : Overview

A new revenue recognition accounting standard has become effective for FY2022. This will change the method and timing of revenue recognition for software license sales. The impact on “Professional Services” is very small.

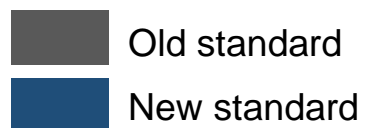

*The cumulative effect of the new standard retrospectively prior to the beginning of the year is added to retained earnings at the beginning of the year.

Impact of the Application of the New Revenue Recognition Accounting Standard

The impact of the adoption of the new standard on 3Q is as follows.

Unit: million yen

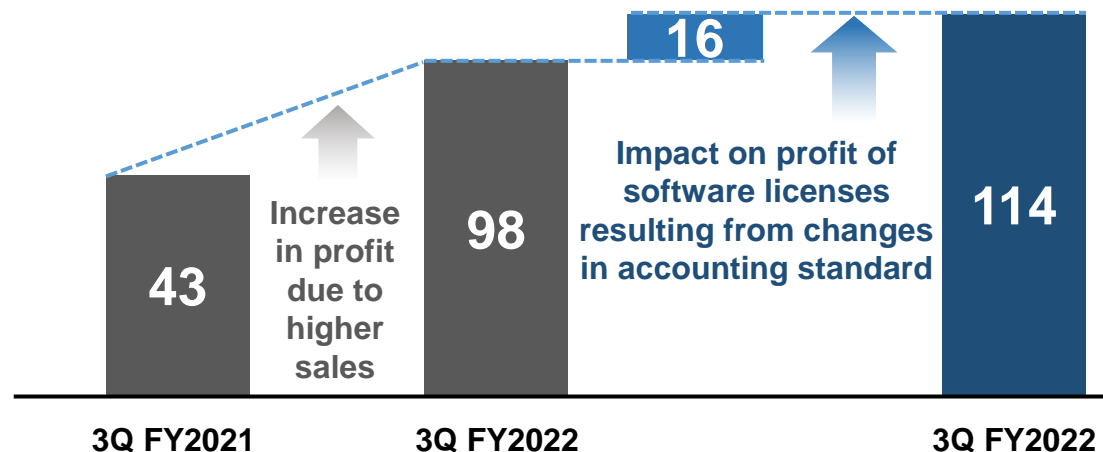

Sales

Impact on sales of software licenses resulting from changes in accounting standard

Operating Profit

Impact on profit of software licenses resulting from changes in accounting standard

*Figures calculated in accordance with previous standard are for reference only as they have not been reviewed by an auditor.

Quarterly Results (New Standard)

Sales have been stable and continue to grow compared to the same period previous year.

Unit: million yen

FY2021
FY2022

Sales

Operating Profit

Operating profit for FY2021 is not disclosed due to difficulties in calculation

*Figures calculated in accordance with the new standard for FY2021 are indicative, as they have not been reviewed by an auditor.
