

## ACOM brings Apple Pay to its “AC MasterCard” holders

28 April 2022 - ACOM today brings Apple Pay to its “AC MasterCard” holders.

Apple Pay is a safer way to pay contactless where customers do not need to handle cash, plastic card or touch physical buttons. Once “AC MasterCard” is added to Apple Pay, customers can make fast and cashless payments with their iPhone and Apple Watch in QUICPay merchants and MasterCard merchants accepting tap-to-pay.

It also enables you to reload Suica or PASMO cards on Apple Pay and make purchases in apps and online. Customers can easily set their “AC MasterCard” in the Wallet App on iPhone, and automatic cash when using “AC MasterCard” will also continue to apply.

[Overview of this service]

Applicable Card	AC MasterCard (including virtual cards)
How to use	The touch payment function can be used by preparing a compatible terminal and setting an applicable card from the Wallet app.
Where to use	-QUICPay merchants. -MasterCard merchants in Japan and around the globe accepting tap-to-pay. -Apps and website where Apple Pay is accepted.

### - About Apple Pay

Security and privacy are at the core of Apple Pay. When you use a credit or debit card with Apple Pay, the actual card numbers are not stored on the device, nor on Apple servers. Instead, a unique Device Account Number is assigned, encrypted and securely stored in the Secure Element on your device. In addition, the actual card numbers will not be notified to the merchants when using Apple Pay.

Apple Pay is accepted at MasterCard merchants in Japan and around the globe accepting tap-to-pay and in Japan only QUICPay merchants(terminals) across convenience stores, supermarkets, drugstores, large theme parks and more with the device iPhone 7 or later and Apple Watch Series 2 or later.

When shopping in apps or on the web in Safari with Apple Pay, there’s no need to manually fill out lengthy account forms or repeatedly type in shipping and billing information. Every Apple Pay purchase is authenticated with just a glance or a touch with Face ID or Touch ID, or a device's passcode. Also Apple Pay is secure and private, as your credit card information is not passed on to the merchant.
