### **Notice Concerning Change in Reporting Segments**

ENECHANGE (hereinafter referred to as the “Company”) announces that the Company resolved at the Board of Directors Meeting held on May 13, 2022, to change the classification of reporting segments, effective from the first quarter of the fiscal year ending December 31, 2022.

#### **1. Details of the Change**

The Company has traditionally had two reporting segments, the "Energy Platform Business" and "Energy Data Business." From the fourth quarter of 2021, in line with the spread of electric vehicles (EVs) which will aid in the realization of a decarbonized society, the Company began offering a new service, "ENECHANGE EV Charging Service," to improve convenience for EV users and increase the value of parking spaces by installing EV chargers.

In light of the steady progress of this business and for the purpose of expanding future information disclosure, we have added the "EV Charging business" to the existing reporting segments and changed to three reporting segments from the fiscal year ending December 31, 2022 (January 1, 2022 to December 31, 2022), in addition to the existing reporting segments.

#### **2. Reporting Segments after the Change**

Before the Change	After the Change
Energy Platform Business	Energy Platform Business
Energy Data Business	Energy Data Business
	EV Charging Business

#### **3. Timing of the Change**

Effective from the first quarter of the fiscal year ending December 31, 2022, the Company will report under the new reporting segment classification.
