## Summary

## <FY21 ending March, 2022 Result>

- Both sales and core OP of FY21 were increased significantly YoY. Toward FY22, the Semiconductor materials and Life Sciences business are expected to drive the growth.
- Compared to the projection, sales of FY21 were almost in line, but core OP of FY21 underperformed.
- 3.8 billion yen was accounted for impairment loss of the cleans facility in the US in FY21Q4.

## <Digital Solutions Business>

- Sales of SEMI achieved + 16\% growth YoY. The growth of EUV resist including Inpria, 100\% subsidiary, increased by $90 \%$ YoY.
- Due to a delay of a start-up of the cleans facility in the US, impairment loss was accounted in FY21Q4. Stable operations are continuing, and it's planned to make a quick recovery by increasing operations.
- Although Display materials was affected by operation adjustments of panel manufacture in FY 21 H 2 , the restructuring of the business was completed, which leads to stable growth.
-With continuous strong demand for SEMI, $+17 \%$ sales growth is expected for FY22. There is no change in the growth story as stated in the management policy.

## <Life Sciences Business>

- Achieved strong sales growth of $+31 \%$ YoY. Each sub-segment's sales expanded due to competitive products and services as well as strong market demand.
- Due to a decline in CDMO's sales and OP in FY21Q4, OP target for FY21 was not achieved. Start up costs increased for the readiness of operations at new facilities.
- Strong sales growth is continuously expected for overall LS business in FY22. In particular, new CDMO manufacturing operations in the US and Europe will start contributing and improving FY22's profit margin.

## Future Outlook

## Digital Solutions

- SEMI

The significant growth of EUV resist including Inpria is expected. Demand for semiconductor will continue and sales expansion of our advanced products with a broad product portfolio is expected.

## - Display materials

We see that operation adjustments of the customer industry will continue for a while. But sales and OP are expected to be the same level as FY21 due to a completion of the Taiwan plant's withdrawal and sales expansion of alignment films and passivation coats to China.

## - Edge Computing

A recovery of the smartphone market and gain of new customers are expected.

## - Life Sciences

Expected strong demands in CDMO, CRO, and BPM contributes to sales growth. And new CDMO facility in the US will ramp up commercial operation in FY22Q1.

## ■ Plastics

A recovery of automobile production is expected. We'll drive a shift to high valueadded products. An increase in our price was announced in March in response to costs increase of raw materials and logistics.

## ■ Other adjustments

FY22 includes some temporary costs related to a start-up of new EPR.
Also, includes a portion of the impact of the decrease in sales and profit associated with the divestment of the Elastomers business.
