### **Notice Concerning Suspension of Power Generation at Asset Under Management**

Canadian Solar Infrastructure Fund, Inc.(hereinafter referred to as “CSIF”) hereby announce regarding power plant owned by CSIF that, according to the report by Canadian Solar O&M Japan K.K.(hereinafter referred as “CSO&M”), which is O&M operator for CSIF CS Ena-shi Power Plant has been stopped generating power. Details are as follow.

A cable fire occurred at the CS Ena-shi Power Plant on June 2 at around 1:00 p.m. The fire was extinguished and the situation was checked by the fire department and police after CSO&M's local representative was notified. There was no external damage as a result of the fire.

The operation was stopped on June 2 and the next day, a general inspection of the power plant revealed that a short circuit in the DC cable was the likely cause, and emergency measures were taken to identify the extent of the damage. On June 9, the power plant was partially restored and restarted at approximately 30% of the total output, and is currently procuring cables and other materials for full restoration.

The expected restoration is scheduled for early July after the damaged parts are replaced.

In terms of the rent revenue for CS Ena-shi Power Plant, CSIF could receive a portion equivalent to 70% of the monthly power generation forecast from the lessee as a basic rent. Therefore, the impact of the suspension of power generation on the rent received by CSIF is negligible, and there will be no revision to the CSIF's forecast of management status for the fiscal period ending June 30, 2022 (10th Fiscal Period) and the fiscal period ending December 31, 2022 (11th Fiscal Period).

End
