AMS AUDIO INTERFACES

RECORDING & STREAMING MADE EASY

The Zoom **AMS Audio Interfaces** are USB audio products providing all necessary input and output sockets for connecting microphones and musical instruments to Mac/ Windows PC and iOS devices. Released in three models, **AMS-22**, **AMS-24** and **AMS-4** are designed for musicians and creators who want to record with music software (DAW), and at the same time be able to livestream on SNS platforms like YouTube, Facebook/Instagram Live.

In particular, AMS-24 and AMS-44 feature our innovative **Music / Streaming** select function which is an industry-first*. When switched to **MUSIC**, users can record separate music tracks into their DAW software; when switched to **STREAMING** all tracks are combined into a single audio channel and easily sent to their favorite streaming software or app.

The AMS-series target home musicians, youtubers and vloggers who will benefit from a truly user-friendly dedicated to improving the user's experience.
