COXIO

The market for fraud detection services is expected to grow further as society's demand for fraud countermeasures continues to increase.

- In response to the rapid increase in fraud damage, regulations regarding anti-fraud measures have been tightened year after year, including revisions to the Installment Sales Act and updates of credit card security guidelines.

Cacco Evolutionary Purpose

Shaping the "Let's Do It" for a next game changer

The Cacco Evolutionary Purpose embodies our desire to contribute to the development of the Japanese economy by supporting people and companies that are taking on the challenge of making the world a better place.

When the company was founded, there was little fraud in Internet transactions, and there were no fully functional fraud detection services in the world. But we believed that in the near future, there would be a wide variety and high volume of fraudulent activities in all Internet transactions, including e-commerce.

Almost a decade later, as we predicted, fraudulent activity is occurring in all kinds Internet transactions, and the methods are becoming more complex, evolving and expanding. Since the release of O-PLUX in 2012, we have continued to develop it so that it can adequately respond to evolving threats, and as a result, it is currently the No. 1* installed security solution in Japan.

As a company that creates new value through security, payment, and data science technologies, Cacco will continue to strive to realize the Cacco Evolutionary Purpose and sustainably increase its corporate value.

Summary of Financial Results

Core fraud detection service achieved quarterly sales of 206 million yen, a record high.

Ordinary income reached 25.2% of the full-year forecast.

◆ Due to the steady acquisition of new O-PLUX customers, fraud detection service sales reached 206 million yen (+8.5% YoY), a record high for quarterly sales. Overall sales were 245 million yen (+10.2% YoY).

◆ Ordinary income was 49 million yen (+4.5% YoY) due to revenue growth, although the profit margin declined 1.1 pt YoY due to depreciation related to the renewal of the O-PLUX architecture and higher personnel costs associated with the increase in staff.
Our core fraud detection service achieved record quarterly sales of 206 million yen (+8.5% YoY).

- Overall sales grew 10.2% YoY.

12

Operating income decreased 2.8% YoY, and the operating margin was 19.8% (down 2.6 pt YoY).

- Despite a decline in gross profit margin due to an increase in depreciation (see previous page) and an increase in personnel expenses due to an increase in the number of employees, the operating profit margin exceeded the FY2022 forecast (17.4%), and we expect further improvement in the profit margin due to cost containment effects from the upcoming renewal of the O-PLUX architecture.

Growth Strategy

COCCO
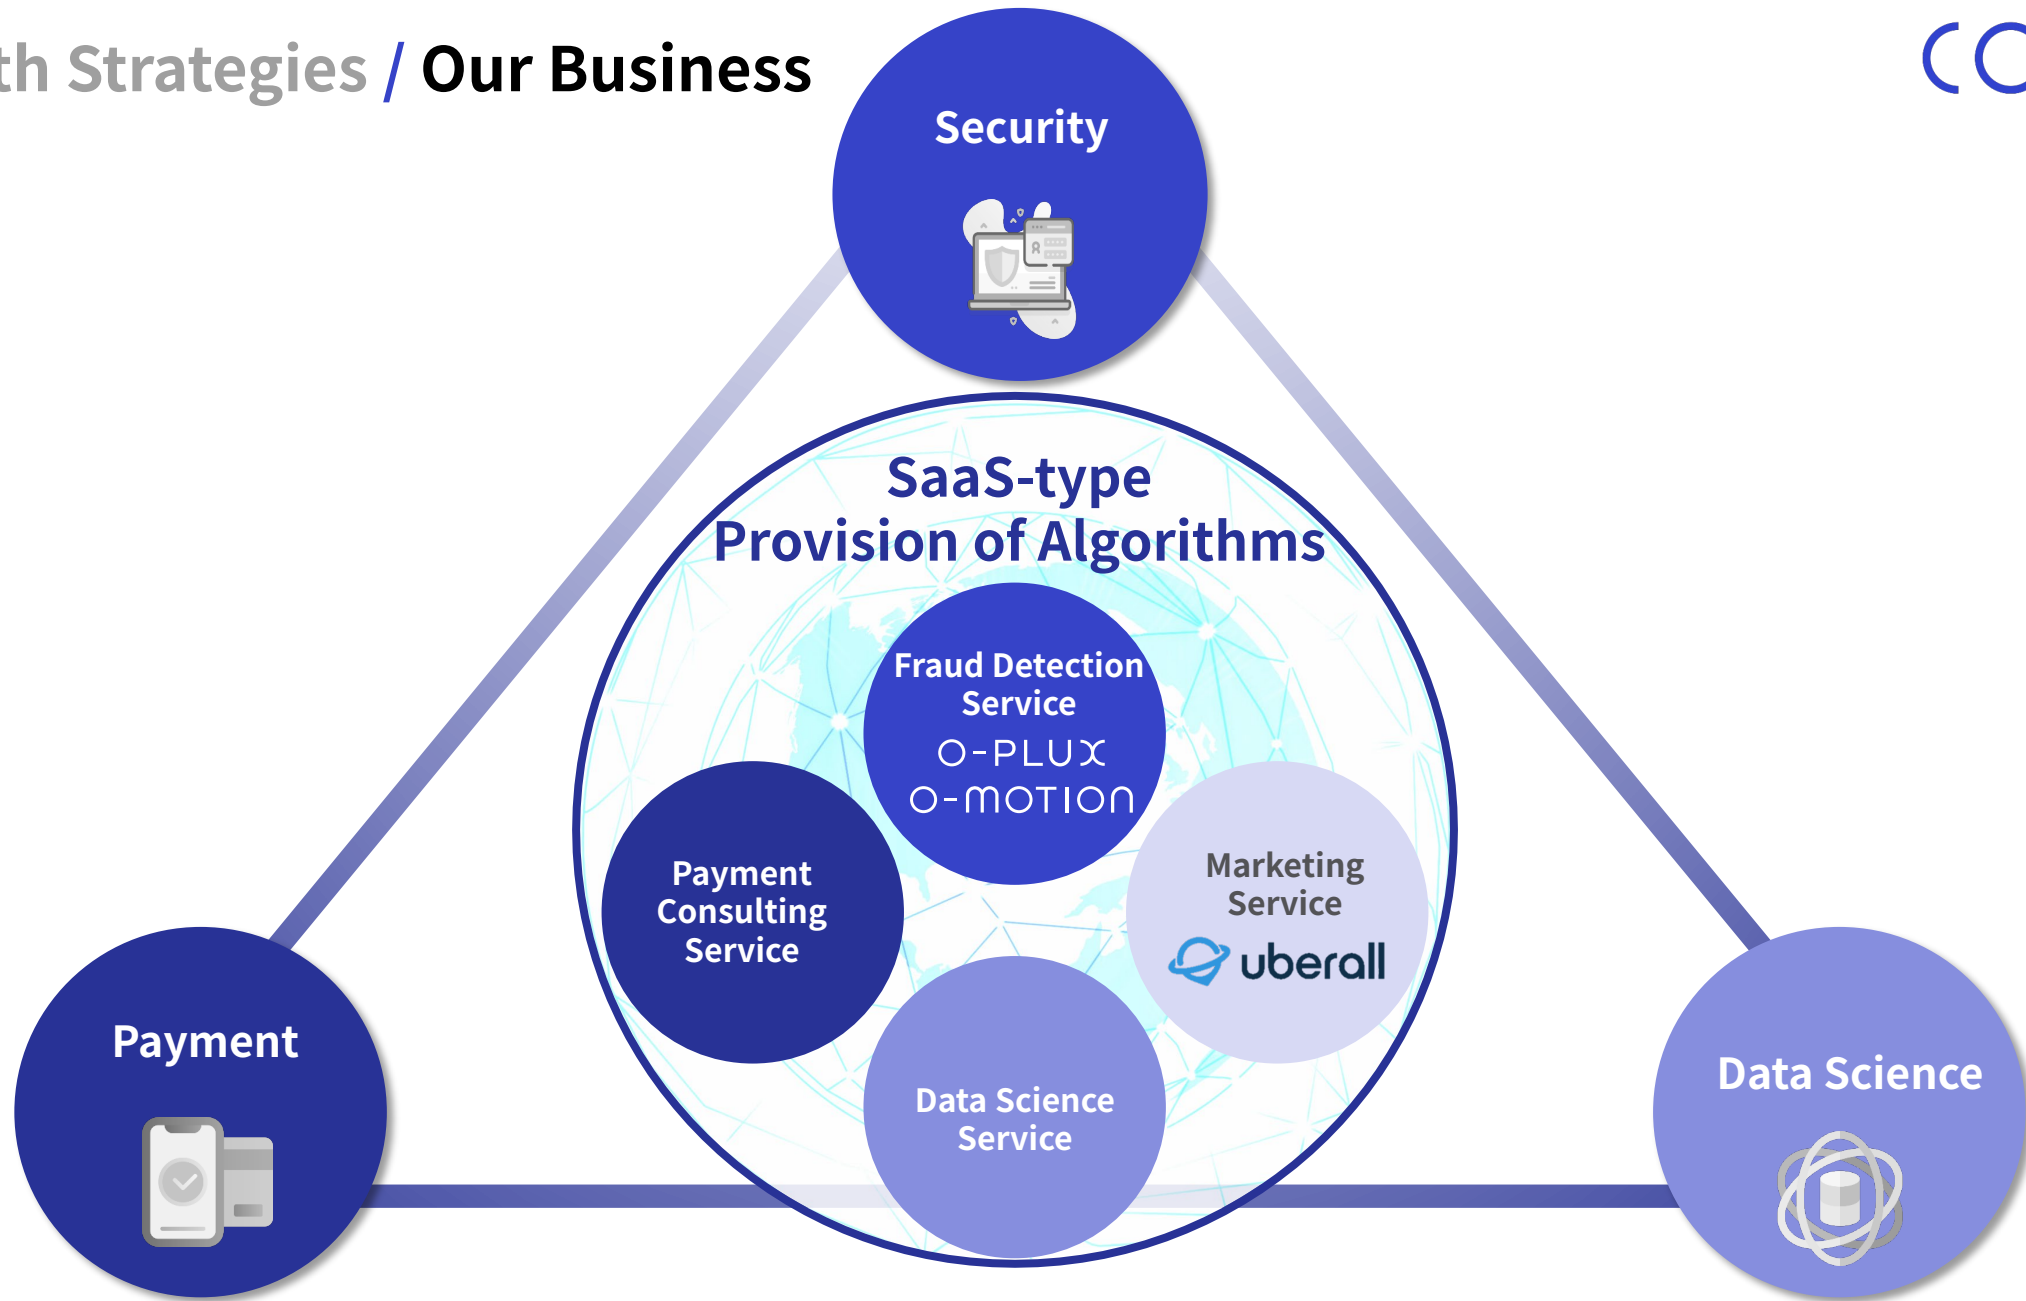

Utilizing our technology and know-how in security, payments, and data science, we develop and provide SaaS-type algorithms to support game changers with their various challenges.

Fraud Detection Service

Fraudulent Order Detection Service

O-PLUX

No.1
Actual Introduction in 2021

Detect fraudulent orders such as payments in arrears in EC payments and resale in real time.

Unauthorized Access Detection Service

O-MOTION

Real-time detection of unauthorized access and login at financial institutions and member sites, etc.

We hold three patents in the area of fraud detection.
Patent No. 6534255
Patent No. 6534256
Patent No. 6860156

* BNPL: Abbreviation for Buy Now Pay Later, post-payment settlement

Payment Consulting Service

Provide payment systems and consulting services for the BNPL business, mainly for BNPL operators. Use **O-PLUX** as the screening engine.

SaaS-type BNPL system

By providing a SaaS-type settlement system that requires no initial investment, the company aims to further develop the BNPL market.
(Scheduled for release in the second half of 2022)

Marketing Service

uberall

Integrated management of store information and word-of-mouth information to support MEO measures such as increasing the number of store visits by improving local search rankings.

(C) Cacco Inc. All Rights Reserved.

Data Science Service

Develop and provide data analysis and algorithms using AI, statistics, and mathematical optimization techniques.
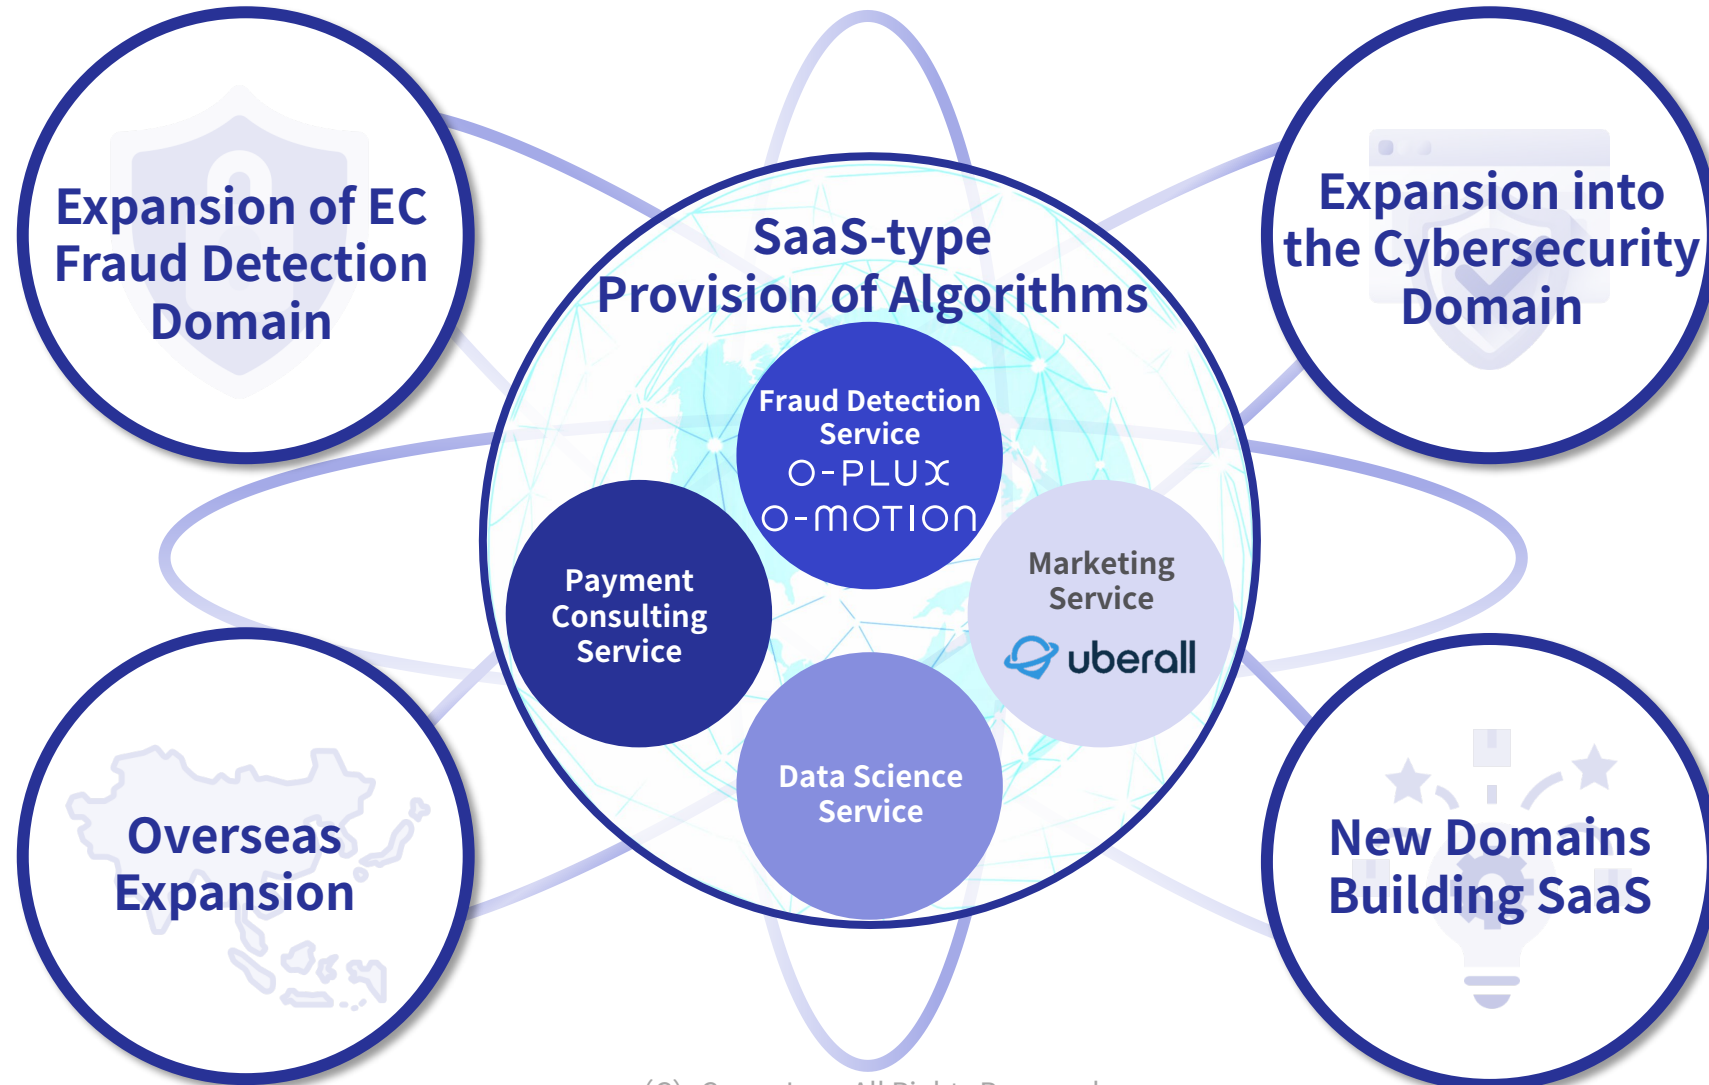

SAKIGAKE KPI

Our service includes data aggregation and visualization, factor analysis, KPI calculation, analysis reporting, and subsequent proposals. A data analysis service that provides up to 100 million records in 30 business days at a cost of 2 million yen.

Growth Strategies / **Four Strategies for Business Expansion**

Through the four growth strategies, we will accelerate business expansion with a focus on fraud detection services and creating our own market.

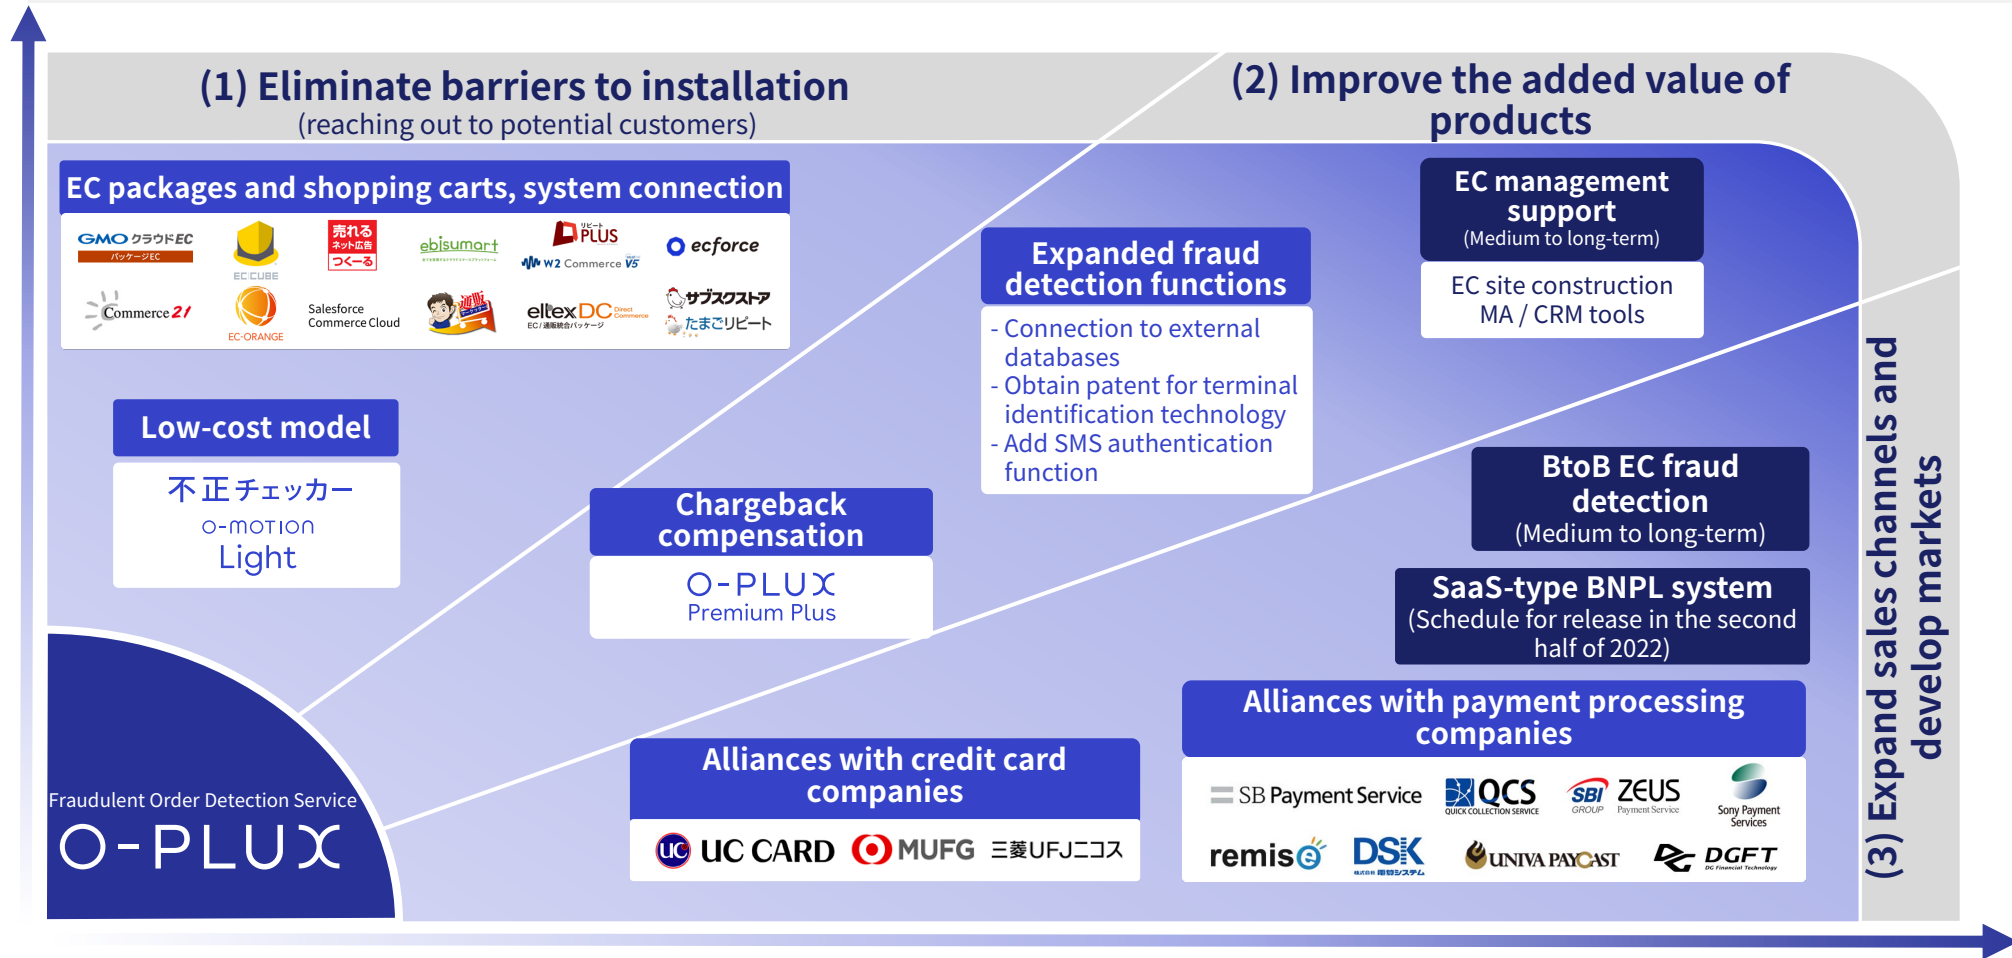

Expansion of EC Fraud Detection Domain

Expansion into the Cybersecurity Domain

SaaS-type Provision of Algorithms

## Examples of Damage Caused by Unauthorized Access (Extract from 2022)

Time of occurrence	Business affected	Description
March 2022	Local financial institution	A cyberattack may have resulted in the possible leakage of approximately 96,000 pieces of information on employment applicants and shareholders, approximately 125,000 pieces of employee and personnel information, as well as clinical trial-related documents and sales data.
March 2022	Major confectionery company	Multiple servers were illegally accessed, possibly resulting in the leakage of personal information (names, addresses, contact information, etc.) of more than 1,648,000 customers.
February 2022	Major payment service company	A cyberattack may have resulted in the leakage of 460,395 entries for credit card information, payment information for convenience stores and Pay-easy, and participating merchants' information.
February 2022	Major cosmetics company	The company's website was subjected to a cyberattack, possibly resulting in the leakage of 103,935 entries for credit card information of users who had made credit card payments, etc.
January 2022	Major education and learning company	A cyberattack on the server where the company's website data is stored may have resulted in the leakage of a maximum of over 280,000 entries of personal information.
January 2022	Major cosmetics company	The company's website was illegally accessed and 46,702 users' credit card information may have been leaked.
January 2022	Major education and training company	Unauthorized access to internal storage. Approximately 20,000 entries for personal information of training course participants was leaked.
January 2022	Major musical instrument seller	Unauthorized access to the web server may have resulted in the leakage of 98,635 email addresses of registered users.

Forecast of Financial Results for FY2022

Forecast Financial Results of the Fiscal Year
Ending December 31, 2022

CΩ£[O

(Unit: million yen)

	FY2021 Actual	FY2022 Forecast	YoY change
Net sales	951	**1,102**	+15.9%
(Net sales of fraud detection services)	773	**875**	+13.2%
Operating income	178	**191**	+7.1%
(Operating income margin)	18.8%	**17.4%**	-1.4 pt
Ordinary income	170	**195**	+14.5%
(Ordinary income margin)	18.0%	**17.7%**	-0.2 pt
Net income	120	**137**	+14.3%
EPS (yen)	45.90 yen	**52.28 yen**	+13.9%

Net sales +15.9% YoY

By expanding sales in new lineups and expanding sales channels through alliances, we expect sales of fraud detection services to increase by 13.2% YoY.

In addition, with the expansion of earnings from settlement consulting services and data science services, overall sales are expected to increase by 15.9% YoY.

Ordinary income +14.5% YoY

Although the profit margin is expected to decline slightly due to an increase in depreciation expenses related to software (O-PLUX architecture renewal and SaaS-type BNPL system), we expect ordinary income to grow by 14.5% YoY due to revenue growth.

2021	August	Entry into marketing service (Capital and business alliance with Recovery Co., Ltd.)

SaaS-type Provision of Algorithms

- Fraud Detection Service — O-PLUX, O-MOTION
- Payment Consulting Service
- Marketing Service — uberall
- Data Science Service

* BNPL: Abbreviation for Buy Now Pay Later, post-payment settlement

1 **Expertise in data science and advanced technical capabilities in the security domain**

(Three patents obtained: Patent #6534255, Patent #6534256, and Patent #6860156)

**2** **Top* selling services in the EC and payment domains in Japan**

(*Based on "Survey on the number of EC sites in Japan introducing paid fraud detection services" (as of the end of May 2021) performed by TOKYO SHOKO RESEARCH, LTD.)

3 **Steady growth in recurring revenue due to increased use of O-PLUX, our core service**

(**Recurring revenue accounted for 74.2%** of our total sales in FY2022 1Q)

CACCO
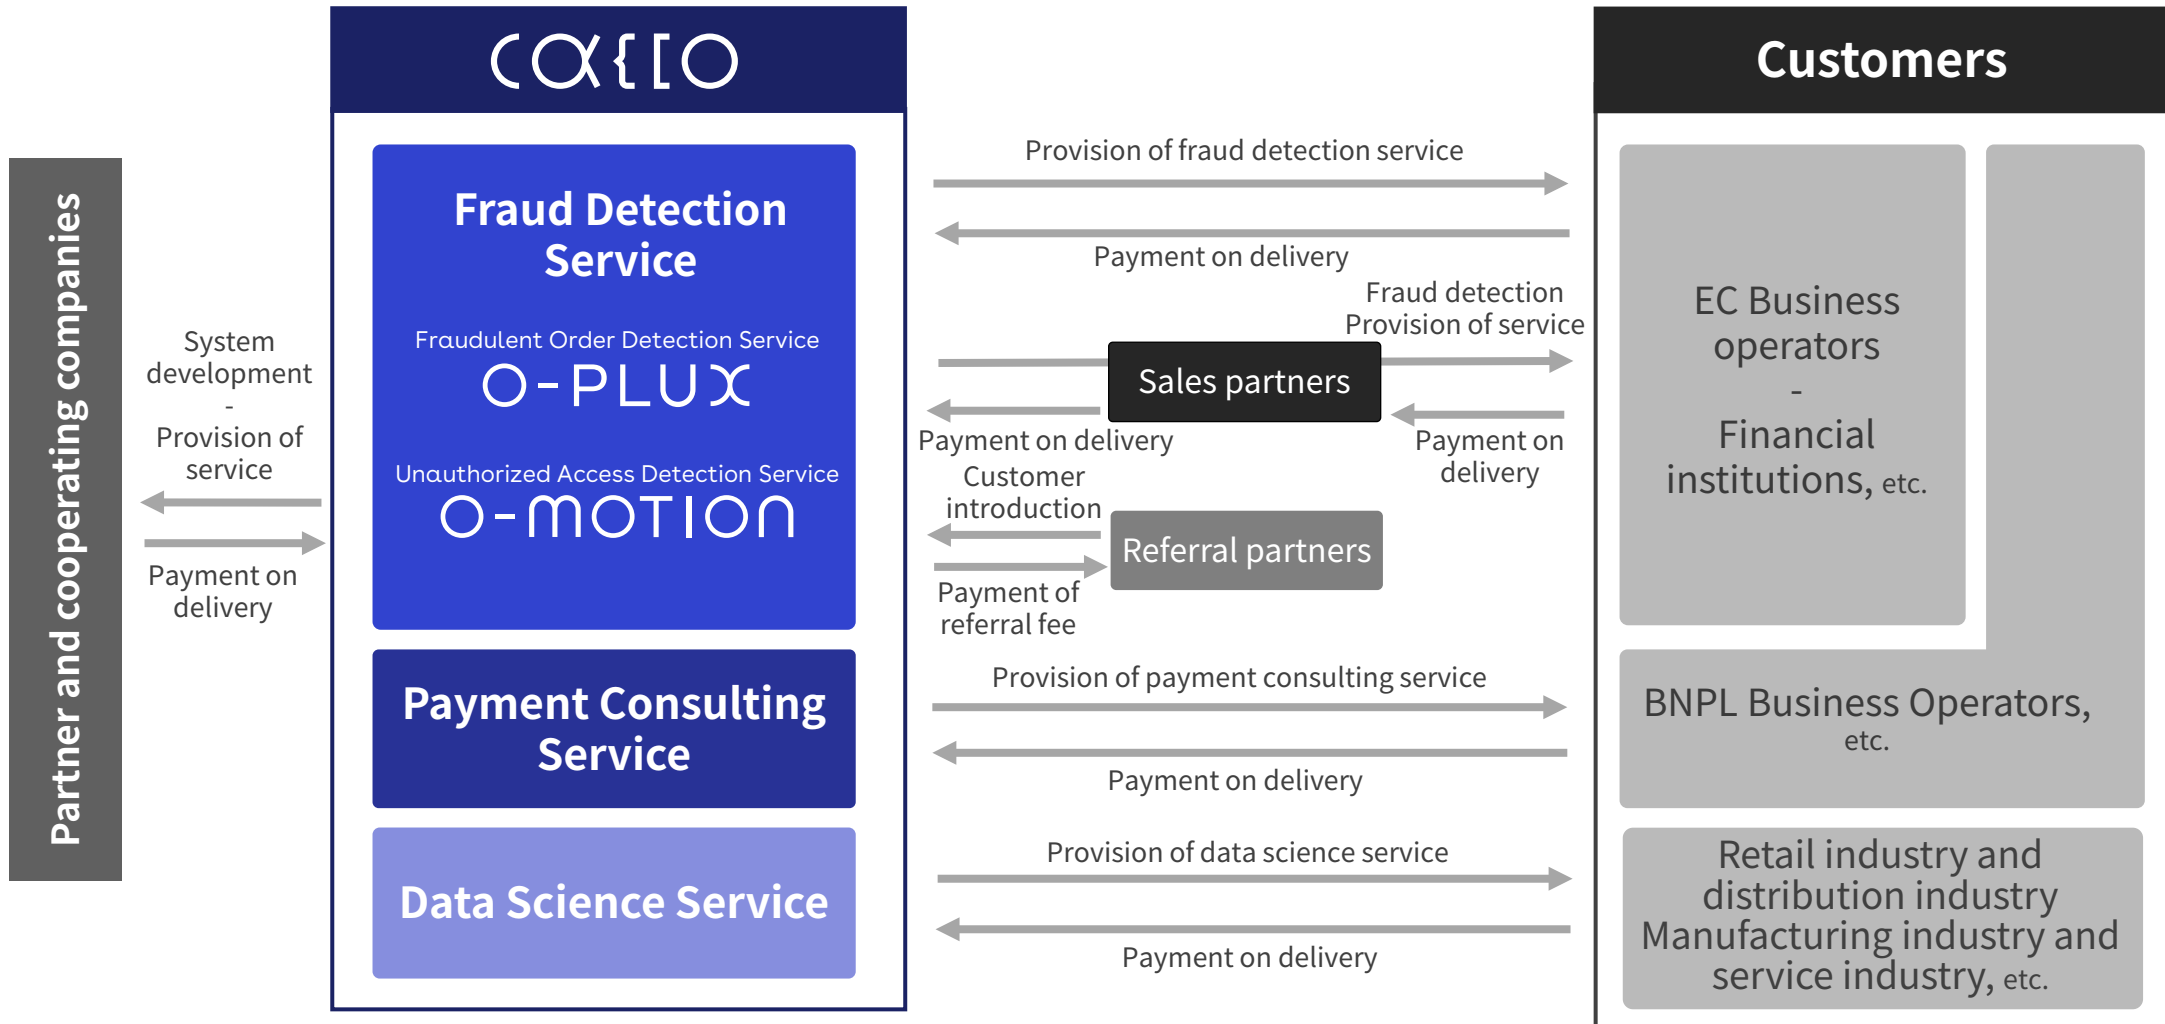

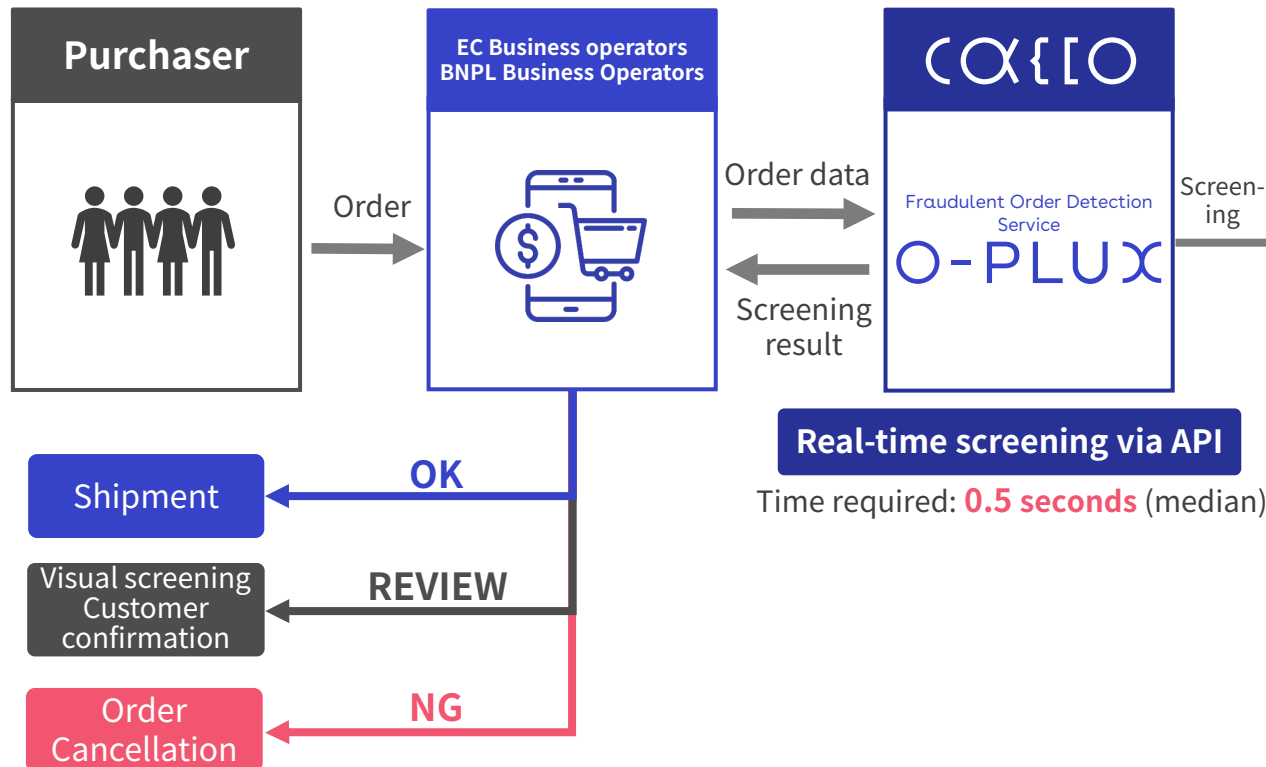

Fraudulent Order Detection Service
O-PLUX

SaaS-type service that uses a unique screening model to detect fraudulent orders in real time such as payments in arrears in EC.

Screening Process

Purchaser

Order →

**EC Business operators
BNPL Business Operators**

Order data →
← Screening result

CACCO
Fraudulent Order Detection Service
O-PLUX

Screen-ing →

Real-time screening via API

Time required: **0.5 seconds** (median)

OK → **Shipment**

REVIEW → **Visual screening Customer confirmation**

NG → **Order Cancellation**

Main Screening Functions

Normalization of name and address notation

1-chome, 5-ban Akasaka
1-5 Akasaka
Saito
Saito

Utilize the same address and last name with different notation after normalization process.
ex: 3-2, Akasaka 4-chome
     4-3-2 Akasaka

Device Information

- Identification by IP and cookies
- Detection of access from overseas
- Detection of impersonation by a non-Japanese person based on language setting, time zone, etc...

External DB Linkage

- Vacancies detection (weekly apartments or hotels)
- Detection of overseas forwarding services
- Validation of phone numbers, etc...

Behavioral Analysis

Detection of fraudsters by analyzing information and behavioral patterns that are characteristic of fraudsters, such as large numbers of purchases over a short period of time and identity theft.

Shared Negative Data

Finding matches with the negative database shared among user companies.

Differentiating Factors in Products

1 **High fraud detection accuracy through possession of a large volume of domestic fraudulent order data**
*No. 1 in Japan in terms of number of installations

2 **Building a unique detection model with data science, security technology, and know-how**

3 **Speedy and flexible monitoring and support system that only domestic and in-house products can provide**

Positive Growth Cycle in which Competitive Advantage is Maintained

In terms of installation *

40

COLLO

A stable revenue structure in which about 70% of total sales comes from recurring revenue, which is the sum of pay-per-use and fixed fees.
In addition, the pay-per-use billing system enables us to capture the upside potential associated with the expansion of the EC market and BNPL market.

Fraudulent Order Detection Service
O-PLUX

Three Reasons Why Recurring Revenue of O-PLUX Is Growing

Number of Clients

BNPL business operators
— EC Business operators
— EC Business operators
— EC Business operators

（t）Continued growth in use by EC business operators through BNPL business operators.

EC Business operators (Direct sales clients)

（t）① Eliminate barriers to installation ② Improve the added value of products ③ Further increase market share by expanding sales channels and developing markets

×

Unit Price per Client

Screening Fee (Pay-per-use)

Monthly Fee (Fixed price)

As the number of screening cases expands in proportion to the growth of the EC market and BNPL market, the screening fee, which is charged on a pay-per-use basis, is expected to increase.

×

Cross Selling

Unauthorized Access Detection Service
O-MOTION

Marketing Services
uberall

×

Payment Consulting Services

Data Science Services

We will further expand earnings by cross-selling each service.

41

Fraudulent Order Detection Service O-PLUX

O-PLUX has detected approximately 250 million yen in fraudulent credit card use in EC over a five-year cumulative period.

General Retailing	
Annual distribution amount	**7 billion yen per year**
Challenges faced by customers	**Fraudulent use of credit cards in EC (Maximum 10 million yen per month)**
Achievement	**Detected fraudulent uses worth 100 million yen in the first year of installation** **Cumulative total of approximately 250 million yen was detected over a period of approximately five years.**

Significant reduction in the amount of losses caused by fraud

Ongoing screening will reduce the number of fraudulent orders themselves and prevent fraudsters from accessing the sites

Continuous fine-tuning of rules to reduce the number of checking steps

Legend: Amount of fraud detected (10,000 yen) ■ Amount of fraudulent damage (10,000 yen) ● REVIEW rate
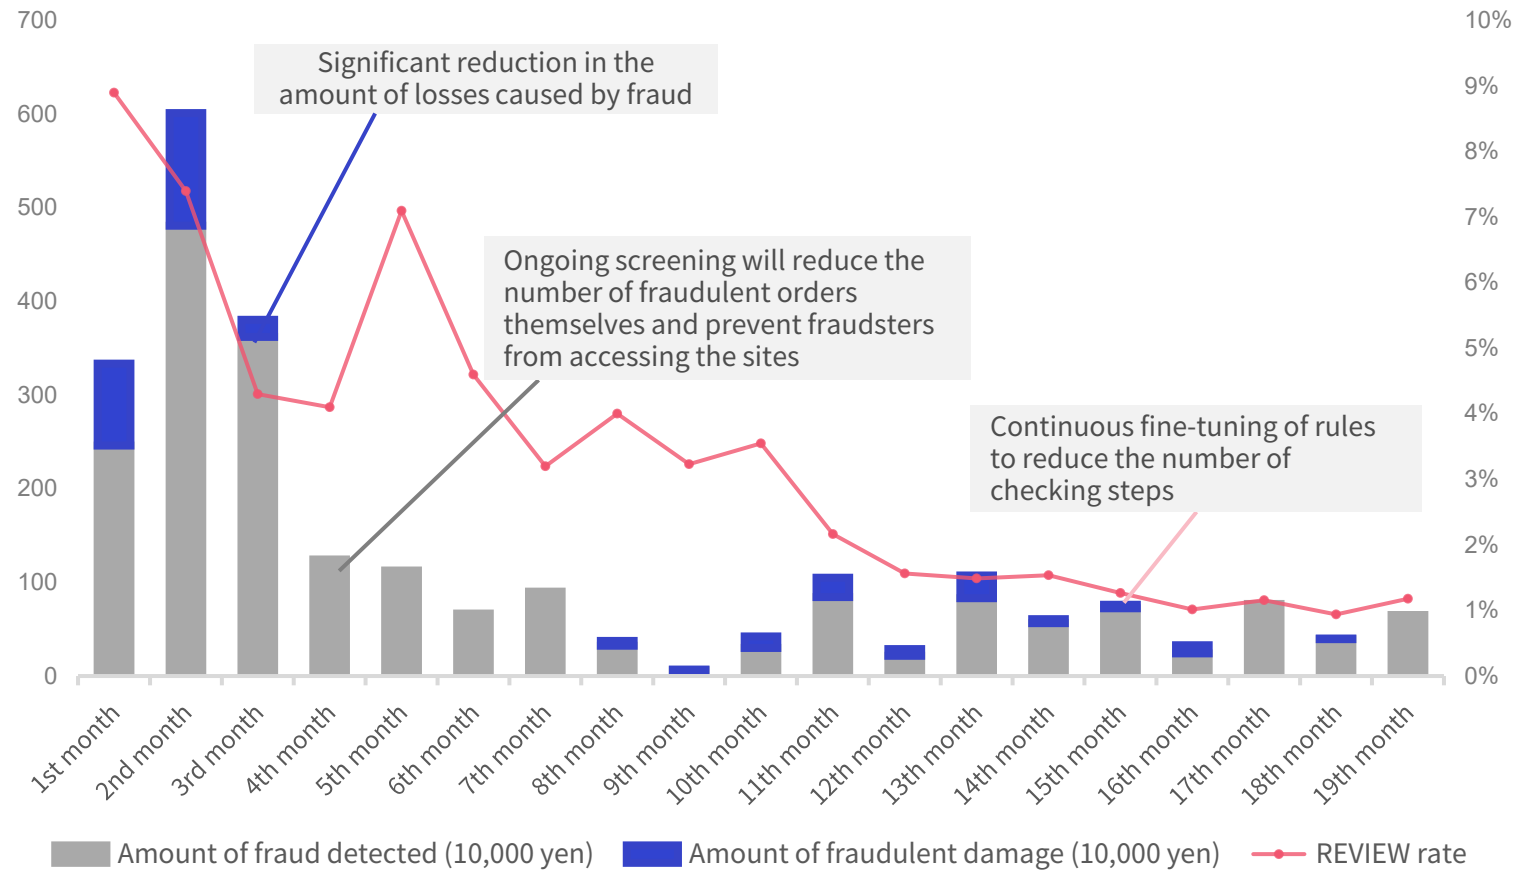

* The amount of fraud detected is the total amount of transactions that are confirmed as fraudulent (negative registration) before chargeback due to failed screening results, card attribute discrepancies in "REVIEW" screening results, and failed identity verification before shipment.
* The REVIEW rate is the ratio of the number of REVIEWs to the total number of screening results.

Fraudulent Order Detection Service
O-PLUX

O-PLUX has been installed in various industries and is the No. 1 solution in terms of the number of installations in Japan (*1). It promotes the development of a safe infrastructure for e-commerce by preemptively preventing losses from fraudulent orders.

uberall

CACCO

Formed a capital and business alliance with Recovery Co., Ltd., the Japanese general agency for Uberall, a solution for MEO and local search optimization. Entered the SaaS business in the marketing domain.

All the Management Required for MEO is Done by Uberall.
— **More than 1.35 million stores worldwide are using the service.** —

uberall

A cloud system that allows you to manage not only your Google Business profile, but also all of your store information, including your Facebook, Instagram, and more than 125 other social media, as well as your company website

Used in **1.35** million stores
Used by restaurants and retailers around the world!

Connected to **over 125** social networking sites and platforms such as **MAP**!

As we are a **recommended Google** partner, you can take advantage of all the latest functions!
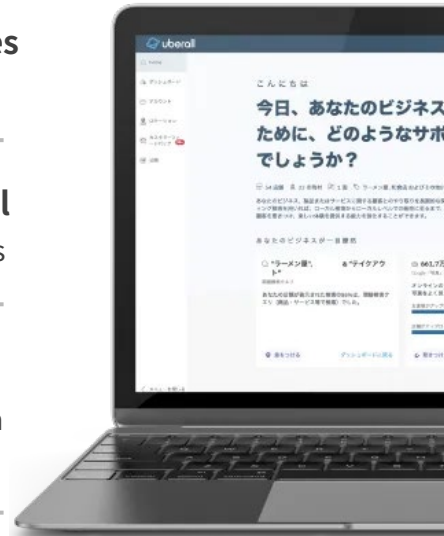

Centralized management of all store information
Thanks to the ability to centrally manage store information for all media, operations are significantly streamlined.

Excellent citation effects
Store information will be synchronized with many SNS media, which is expected to improve display rankings.

Easy to track and reply to comments
You can keep track of all the comments and respond to them efficiently.

Manage and maintain your own website as well
Centralized management of the company's website. Automatic generation of structured data is effective for getting high rankings.

We will always be right there for you.
We back up your own operations by providing the world's standard MEO method.

CACCO

We provide one-stop support for the establishment and launch of BNPL, including service construction, payment system development, and operational support.
We offer the O-PLUX fraudulent order detection service as the screening engine.

Investigation and development of BNPL business

▼

Payment system development

▼

Operational support

▼

Providing screening engine
O-PLUX

✕

Point 1 **Experience in setting up and developing systems for multiple BNPL businesses**

- Experience in constructing payment systems that handle several million transactions per month
- Experience in supporting the launch of BNPL businesses (business planning, preparation of various requirement definitions, etc.)
- Experience in post-launch support (credit lines, operation process development, etc.)

Point 2 **Support from consultants with experience in BNPL operations**

Consultants with extensive experience in BNPL operations provide optimal proposals from the customer's perspective.

Point 3 **Fraudulent order detection using O-PLUX, the No. 1 solution in terms of the number of installations in Japan***

No.1
Actual Introduction in 2021

We have achieved a great deal of success in fraud detection in the financial and settlement fields, where strict accuracy is required. O-PLUX, our fraudulent order detection service, is the No. 1 solution in terms of installation numbers in Japan*.

* As of the end of May 2021 (TOKYO SHOKO RESEARCH, LTD., "Survey on the number of EC sites in Japan introducing paid fraud detection service")

COILO

Based on the technologies of AI, statistics, and mathematical optimization, we develop and provide algorithms that contribute to the core of corporate activities, such as modeling predictions and automation by applying machine learning.

Our approach

SAKIGAKE KPI

Our service includes data aggregation and visualization, factor analysis, KPI calculation, analysis reporting, and subsequent proposals. A data analysis service that provides up to 100 million records in 30 business days at a cost of 2 million yen.

Data Science Branch Office

Data science resources that can be utilized on a monthly contract basis as if it were a company division. It realizes the concept of a "data science branch office" to meet all kinds of analysis needs at various stages.

Algorithm development

Development of algorithms that seek to increase profits by processing business operations, including optimization beyond the employees' own experience, productivity improvement through automated processing, and forecasting of demand and risk.

Case studies

Optimization

Wall material manufacturer with annual sales of 119 billion yen

Created production plans for 1,700 products and 12 production lanes. Made a production order plan to maximize production volume and minimize losses while observing complex conditions.

Annual cost reductions of up to 130 million yen

Statistics AI

Stationery manufacturer with annual sales of 5.5 billion yen

Developed algorithms for demand forecasting and production instructions that can maximize profits on calendars, organizers, and stationery. Minimized opportunity losses due to shortages.

70% reduction in sales opportunity losses

Optimization

Call center

Established automatic prediction of demand on a daily and hourly basis for the following month and generated a staffing plan to satisfy multiple constraints such as management indicators, employee work preferences, and working conditions.

Annual cost reductions of 60 million yen

Support in breaking away from the resource-intensive industrial model by promoting DX

By supporting DX with data science services, we promote the optimization and efficiency of production, sales, and distribution, and contribute to breaking away from the resource-intensive industrial model.
Building a secure infrastructure for EC and online transactions

Our fraud detection services detect fraudulent activities such as spoofing and unauthorized access for credit cards, and contributes to the creation of a secure infrastructure for EC, online transactions, and cashless payments.

Strengthen corporate governance and compliance systems

We believe that it is essential for sustainable growth to improve management efficiency and at the same time, to enhance the soundness, transparency and compliance of management to fulfil the trust of society. We are committed to strengthening corporate governance on a daily basis based on the recognition that the results of such efforts will enhance corporate value and lead to the return of profits to various stakeholders, including shareholders, creditors, and employees.

Supporting the career development of diverse human resources Creating a rewarding work environment

We were selected as a "Best Workplace" for our efforts to support the activities of our diverse human resources, including foreign nationals, women raising children, and intern students, as well as for our efforts to improve our telecommuting environment and online communication.
