The Mitsui Fudosan Co., Ltd., corporate governance system is described below.

I. Basic Views on Corporate Governance, Capital Structure, Corporate Profile and Other Basic Information

1. Basic Views

The Mitsui Fudosan Group takes a standpoint of sound, transparent and efficient management in the aim of building optimum corporate governance to earn the trust of all stakeholders.

Mitsui Fudosan has established the Compensation Advisory Committee and Nomination Advisory Committee to enhance transparency regarding compensation for managing directors and nomination of managing directors and corporate auditors. It has also adopted a corporate officer system to enhance the soundness and efficiency of management by separating and strengthening management and executive functions. Mitsui Fudosan also invites and appoints outside directors to strengthen the oversight functions of the managing directors and enhance management transparency.

In addition, corporate auditors conduct audits to evaluate the status of business execution by managing directors while coordinating with the Internal Audit Department, which serves as the Company's internal auditing department, as well as with the certified public accountant.

Moreover, steps have been taken to put in place the Mitsui Fudosan Group Compliance Policies, as well as a structure that will ensure that Group managing directors and employees engage in business activities in an appropriate manner.

Reasons for Non-Compliance with the Principles of the Corporate Governance Code

Mitsui Fudosan complies with all Principles of the Corporate Governance Code issued on June 11, 2021.

Disclosure Based on the Principles of the Corporate Governance Code

[Principle 1-4 Strategic Shareholdings]

•Strategic shareholding policy

In overall consideration for business strategy and relationships with business partners, to improve the Group's corporate value, Mitsui Fudosan holds shares considered effective for management strategies as shares for purposes other than net investments (strategic shareholdings) from a medium- to long-term perspective.

Furthermore, Mitsui Fudosan continuously reviews shareholding status. Upon confirming the significance of shareholdings based on the quantitative rationality of holdings and relationships with business partners, we have decided to reduce our shareholdings. In fiscal 2021, we sold four stock brands worth a total of ¥50.7 billion.

•Verification by the Board of Directors

When verifying the rationality of shareholdings, we verify whether or not the benefit, risk, etc., associated with the shareholdings are commensurate with the capital cost. Furthermore, in addition to confirming the significance of shareholdings from the perspectives of transaction performance, stable funding, and creation of business opportunities, we also verify whether or not the holdings contribute to improving the medium- to long-term corporate value of the Group.

At a meeting held on May 13, 2022, the Board of Directors verified appropriateness with regard to the significance of strategic shareholdings based on the quantitative rationality of holding and relationships with business partners for each stock brand.

As a result, for stocks for which the rationality of holding or significance of holding has decreased, we will examine selling by considering factors such as impact on the stock market.

•Standard for exercising voting rights

In exercising voting rights, Mitsui Fudosan makes comprehensive decisions based on viewpoints including whether it will lead to improved shareholder returns or enhanced corporate value of the company invested in over the medium- to long-term. In addition, regarding important matters such as those indicated below, Mitsui Fudosan conducts individual examinations based on internal standards and appropriately determines the approval/disapproval of each matter. (Appropriation of surplus, appointment/dismissal of managing directors and corporate auditors, director compensation and retirement benefits, changes to the Articles of Incorporation, etc.)

[Supplementary Principle 2-4-1 Ensuring of Diversity in Core Human Resources]

• (Female human resources) Many of our products and services are purchased by female customers, and Mitsui Fudosan is more than ever aware of the necessity to adopt female perspectives and creativity and encourages active participation and empowerment of female employees. Although the ratio of female management in our organization is 6.8%, we aim to increase it to 10% by 2025 and 20% by 2030.

(Mid-career employment) Employees with diverse values exercise their uniqueness based on their experiences and abilities, and Mitsui Fudosan actively hires such people as the driving force for innovation in the real estate industry. Although the ratio of mid-career professionals involved in management is 13.3%, we aim to increase it further.

(Foreign human resources) Mitsui Fudosan actively hiring new graduates and mid-career employees with foreign nationalities and global experiences will expand such employment further for the drastic growth of the overseas business. Although the ratio of foreign resources involved in management is 0.3%, we aim to increase it further.

Mitsui Fudosan evaluates and adopts motivated and capable employees with diverse skills, experiences, and values regardless of their race, nationality, religion, gender, age, disability, gender identity, and sexual orientation.

• As for human resource development and work environment development, in order to achieve the two goals of encouraging each individual to improve professional knowledge and capabilities to strengthen the ability to create additional value and fusing diverse values and capabilities into a driving force as a team, Mitsui Fudosan considers *engaging with individual employees and setting the stage for them* is the basis of human resource management. By combining four human resource development opportunities of OJT, career vision interview, job rotation, and training program to extend human resource capabilities as the basic policy, we develop human resources who are capable of adapting to continuously changing environments by improving their diverse and wide range of knowledge and capabilities specifically through job rotation and training programs.

• In order to establish work environments where diverse human resources are fairly evaluated and individual employees recognize each other and demonstrate their individual capabilities to the fullest, Mitsui Fudosan strives to improve the organization's productivity and to help improve employee work-life balance by promoting work-style reforms and improving personnel systems.

The Company also appoints its outside auditors with the expectation that they will bring an objective stance to auditing the managing directors in the performance of their duties, based on their expert knowledge and extensive experience.

Currently, two out of a total of seventeen managing directors and corporate auditors are women (11.8%). The Company will continue to make efforts to ensure further diversity on the Board of Directors as a whole by having at least one female managing director.

The Company is able to dismiss senior management in the event of impropriety or serious violations of laws or the Articles of Incorporation occurring within or outside the execution of duties by senior management.

Considering the business area of Mitsui Fudosan as a real estate developer, we are seeking to obtain trademark and patent rights in an appropriate manner.

·Based on the principles of harmony and coexistence, linking diverse values, and realization of a sustainable society as symbolized by the "&" mark, the Mitsui Fudosan Group has adopted &EARTH as its Group vision and is contributing to social and economic development and the preservation of the global environment. In recent years, global concern about climate change and the importance of measures to mitigate it have become even more important as shown in the Paris Agreement, an international treaty on climate change, and the government's new goal for decarbonization released in April 2021. In response to this trend, the Mitsui Fudosan Group has set a target of achieving net-zero greenhouse gas emissions from the entire Group by FY 2050 and a 40% reduction from the FY 2019 level by FY 2030, as well as formulating the Group Action Plan for the Realization of a Decarbonized Society. The main initiatives to achieve the target for FY 2030 include achieving the ZEB/ZEH level environmental performance in all our new properties in Japan and actively improving the environmental performance of our existing properties, actively utilizing renewable energy sources such as green power in all our facilities in Japan*, expanding the mega solar business (by approximately five times), and strengthening partnerships for decarbonization throughout the supply chain. In addition, in order to raise the awareness of the entire Group toward decarbonization, we introduced internal carbon pricing system in FY 2022, which values the CO2 emissions of newly developed properties and quantitatively visualize their environmental impact. Furthermore, with the goal of achieving net-zero greenhouse gas emissions by FY 2050, we will promote open innovation for the creation of new technologies, including energy creation projects such as offshore wind and geothermal power, research and development with the University of Tokyo, other academia, and construction companies, investment in venture companies, and the provision of demonstration test sites. By combining these initiatives, we aim to realize urban development that promotes the decarbonization of not only our facilities but also the entire area. For details, please see our website:

Supplementary Explanation

【Restricted stock compensation system】

At the 108th Ordinary General Shareholders' Meeting held on June 26, 2020, the introduction of a restricted stock compensation system to managing directors of the Company, other than outside directors, in place of stock options was approved. Stock acquisition rights which have already been granted as stock options but have not yet been exercised will continue to exist. However, no new stock options will be granted.

Furthermore, we have also introduced a restricted stock compensation system to managing officers and Group officers who do not concurrently serve as managing directors.

【Policies relating to the determination of payment ratios for performance-based compensation and other forms of compensation】

Compensation for directors consists of a bonus and restricted stock compensation, which are performance-based compensation, and basic compensation, which is compensation other than performance-based compensation. The payment ratio for performance-based compensation is around 45% - 50%, and around 50% - 55% for other forms of compensation.

【Indexes relating to performance-based compensation, reasons for selecting indexes for performance-based compensation, and method used to determine the amount of performance-based compensation】

In regard to the bonus and restricted stock compensation – i.e. performance-based compensation – comprehensive consideration is given to factors such as performance for the current term, status of ESG-related initiatives, redistribution of profits among shareholders based on our returns policies, progress of “VISION 2025,” our Group's long-term management policies, the economic climate, and the business environment. In regard to the reasons for selecting these indexes, this is to increase the interrelationship between director compensation and performance and stockholder value. The amount of performance-based compensation is determined by the Board of Directors following consultations with the Compensation Advisory Committee, instead of leaving determination to the sole discretion of the President.
