## **Notification concerning the launch of our new business, “Kudan Solution”**

Kudan Inc. (headquartered in Shibuya-ku, Tokyo; CEO Daiu Ko, hereafter “Kudan”), a leading provider of Artificial Perception / SLAM technology across a variety of applications, is pleased to announce that Kudan has launched its new business, “Kudan Solution”. Kudan Solution supports the realization of various solutions / platforms that synchronize multiple products incorporating Kudan's Artificial Perception technology and expand the applications of products using Kudan’s technology.

Kudan has been providing development support and licenses to allow its customers to commercialize their products by incorporating Kudan’s technology, with the aim of large scale adoption of Kudan’s technology in the fields of robotics, Metaverse, and next-generation digital maps. In this fiscal year ending March 2023, Kudan expects to achieve the commercialization of several customers' products that have incorporated Kudan's technology. Using this achievement as a foothold, Kudan Solution will support more advanced solutions and platforms to further spread Kudan’s technology and expand its applications.

Specifically, Kudan supports the realization of robot platforms that enable advanced robot operations through synchronous localization in an environment where multiple types of robots are used, as well as digital twins that improve the efficiency of maintenance and simulation in the industrial and public sectors, and Metaverses that merge simulations in virtual spaces with real world operations. In addition, Kudan will support platform building that will lead to the greater integration of these technologies in the future.

In order to accelerate the commercialization of solution-type projects that have been in high demand toward the expansion of such product applications, Kudan will expand technological collaboration and joint business development with various partner companies by strengthening its internal structure. We aim to dramatically expand Kudan's license income over the mid- to long-term by expanding the solution platform.

#### About Kudan Inc.

Kudan (Tokyo Stock Exchange securities code: 4425) is a deep tech research and development company specializing in algorithms for artificial perception (AP). As a complement to artificial intelligence (AI), AP functions allow machines to develop autonomy. Currently, Kudan is using its high-level technical innovation to explore business areas based on its own milestone models established for deep tech which provide wide-ranging impact on several major industrial fields. For more information, please refer to Kudan's website at <https://www.kudan.io/>.
