

NEWS RELEASE

Solasia acquires episil® oral liquid business from Camurus

TOKYO, JAPAN, and LUND, SWEDEN July 8, 2022 - Solasia Pharma K.K. (TSE: 4597, hereinafter “Solasia”) and Camurus AB (NASDAQ STO: CAMX, hereinafter “Camurus”) jointly announced today that they have entered into an agreement in which Solasia has acquired episil® oral liquid (episil, SP-03, hereinafter “episil”), a unique and effective treatment for intra-oral pain associated with e.g. oral mucositis, from Camurus and been granted relevant IP rights.

Under the terms of the agreement, Solasia has obtained the assets and relevant worldwide licensing rights to continue developing, manufacturing and commercializing episil.

“We are pleased to announce the transfer of ownership of episil from Camurus to Solasia”, said Yoshihiro Arai, President and CEO of Solasia. “Specializing in innovative oncology treatments, episil is an important product for Solasia for which we now have secured long-term market supply”.

“Today’s agreement with Solasia secures the further development and access for patients to episil for treatment of oral mucositis”, said Fredrik Tiberg, President and CEO of Camurus. “Solasia, with its oncology and oncology supportive care focus, is well positioned to further develop episil, while allowing Camurus to focus on its core products and pipeline programs within CNS and rare diseases”, he continues.

During a transition period up to May 2024, Camurus will continue to provide certain assistance services at Solasia’s request.

About episil

episil uses the patented FluidCrystal topical bioadhesive technology from Camurus AB, Sweden. It is a lipid-based, preservative-free liquid that adhere to the oral mucosa. Clinically demonstrated, episil has been shown to rapidly (within minutes) and effectively reduce oral pain for up to 8 hours*. It provides physical protection to the oral sensitive and ulcerated epithelium. episil is the only ready-to-use, pocket-sized medical device that manages and relieves oral mucositis, expected helping patients suffering from oral pain to improve the quality of life (QOL). episil was first registered in Europe in 2009 and is now launched in the United States, Europe, Japan and other countries. episil oral liquid is registered as Class I medical device in Europe, 510(k) medical device in the United States, and approved as Class II medical device in Japan, China and South Korea.
