Initiatives**

**FY22 Apr-Jun
Results**

**FY22
Forecast/
Initiatives**

Summary

Consolidated

Sales were up and OI down YoY.

Auto-ID Solutions Business (Overseas)

Sales were up and OI down YoY.

- **Base business:** Sales increased, as robust demand continued and price revisions covered for increased costs. OI decreased mainly due to higher cost of printer components and raw materials for labels.
- **Primary Labels business:** Sales increased, owing to robust sales to the daily commodities industry and price revisions covering for higher costs. OI decreased mainly due to higher cost of raw materials for labels.

Auto-ID Solutions Business (Japan)

Sales were flat and OI decreased.

Despite robust sales in consumables owing to price revisions, sales overall were flat due to sluggish mechatronics sales. OI decreased due to the same cost factors seen in the Overseas business, together with changes in product mix and increase in R&D costs.

Apr-Jun FY21: JPY 1,033 million (924 million)
Apr-Jun FY21: JPY 58 million (58 million)

* Figures in parentheses exclude the Russian business.

Overview

Sales increased in all regions, owing to efforts to steadily capture robust demand and progress in revising product prices to cover for cost increases. OI decreased due to higher printer manufacturing costs and raw material prices for labels and increase in labor costs.

	YoY	-64.5%	-47.6%	-20.5%	3.2x	5.1x	2.2x	+19.2%	-62.6%	-31.2%

Overview

Consumables sales grew owing to demand mainly from manufacturing and health care sectors, and product prices were revised across markets, yet overall sales remained flat as large mechatronics orders seen last FY in logistics and retail are no longer accounted for. OI decreased due to higher raw material prices, change in product mix, and increased R&D and shipping costs.

(Millions of JPY)

	FY2022	FY2021	Change	
				YoY
Mechatronics Sales	6,501	6,732	-231	-3.4%
Consumables Sales	10,790	10,515	+274	+2.6%
Total Sales	17,291	17,248	+43	+0.2%
Gross Profit	7,914	8,246	-331	-4.0%
Gross Profit %	45.8%	47.8%	-2.0pt	-
Operating Income	-8	585	-594	-
Operating Income %	-	3.4%	-	-

Mechatronics: Hardware (e.g., printers, automatic labelers, scanners, hand labelers), software and maintenance services.

Consumables: Products such as variable information labels, RFID tags, primary labels (product labels) and ribbons.

Note 1: Total Sales is the sum of mechatronics, consumables, and others. Segmentation revised in FY21-Q4.

Note 2: Changes in accounting classifications of maintenance related costs from SG&A to COGS in FY22 lead to lower GPM (approx. 1 ppt).

Major Gains/Losses in OI

* Changes in accounting classifications (P.17) are not taken into account.

(Millions of JPY)

Ref: YoY comparisons *1	
Net increase in material cost *2	Approx. +270
Increase in shipping costs *3	Approx. +190
Growth investments *4	Approx. +80

- *1: Excludes exchange rate effects.
- *2: Net total from higher material costs and price revision.
- *3: Due to use of air freights.
- *4: Developments of a standard printer platform and new IT infrastructure.

Sales by Vertical 1/2

(Millions of JPY)

■ : Mechatronics ■ : Consumables * % indicates YoY change

Manufacturing

Increased demand for semiconductors propelled electrical and electronic component industries. Meanwhile, production in the automobile and related industries were sluggish.

Business environment

Logistics

The e-commerce industry remained brisk. Demand continued to grow for automation and DX in each industry.

SATO

Consumables grew in almost all industries. Mechatronics sales increased due to efforts in capturing automation and RFID demand in response to labor shortages and DX (digital transformation).

Retail

Despite a pause in growth at supermarkets, investments continued for DX, operational efficiency and shift to e-commerce. The e-commerce industry remained brisk.

Consumables sales increased in apparel but declined overall due to a pause in demand growth at supermarkets. Mechatronics continue to see demand from businesses seeking solutions to labor shortages but declined overall, as last FY's figures included large orders that are no longer accounted for.

Sales by Vertical 2/2

(Millions of JPY)

■ : Mechatronics ■ : Consumables * % indicates YoY change

Health Care

Food & Beverage

Public

Business environment

Demand remained firm overall for solutions that improve administrative efficiency and address labor shortages. Investment trends are back, particularly for automation and RFID.

SATO

Consumables rose as demand from hospitals returned and RFID use for improving administrative efficiency increased. Mechatronics grew thanks to automation demand in the pharmaceutical manufacturing industry.

Demand continued to stay strong for traceability, operational efficiency and automation solutions that address legal compliance, higher quality control awareness, and labor shortages.

Despite the strong recovery in demand from restaurants, consumables sales were flat due to decline in beverages. Mechatronics sales grew in food manufacturing from capturing automation needs, but declined overall, as last FY's figures included large orders in restaurants no longer accounted for.

The overall business environment remained stable.

Consumables decreased slightly due to delayed deliveries to large customers. Mechatronics demand generally remained stable and sales slightly increased.

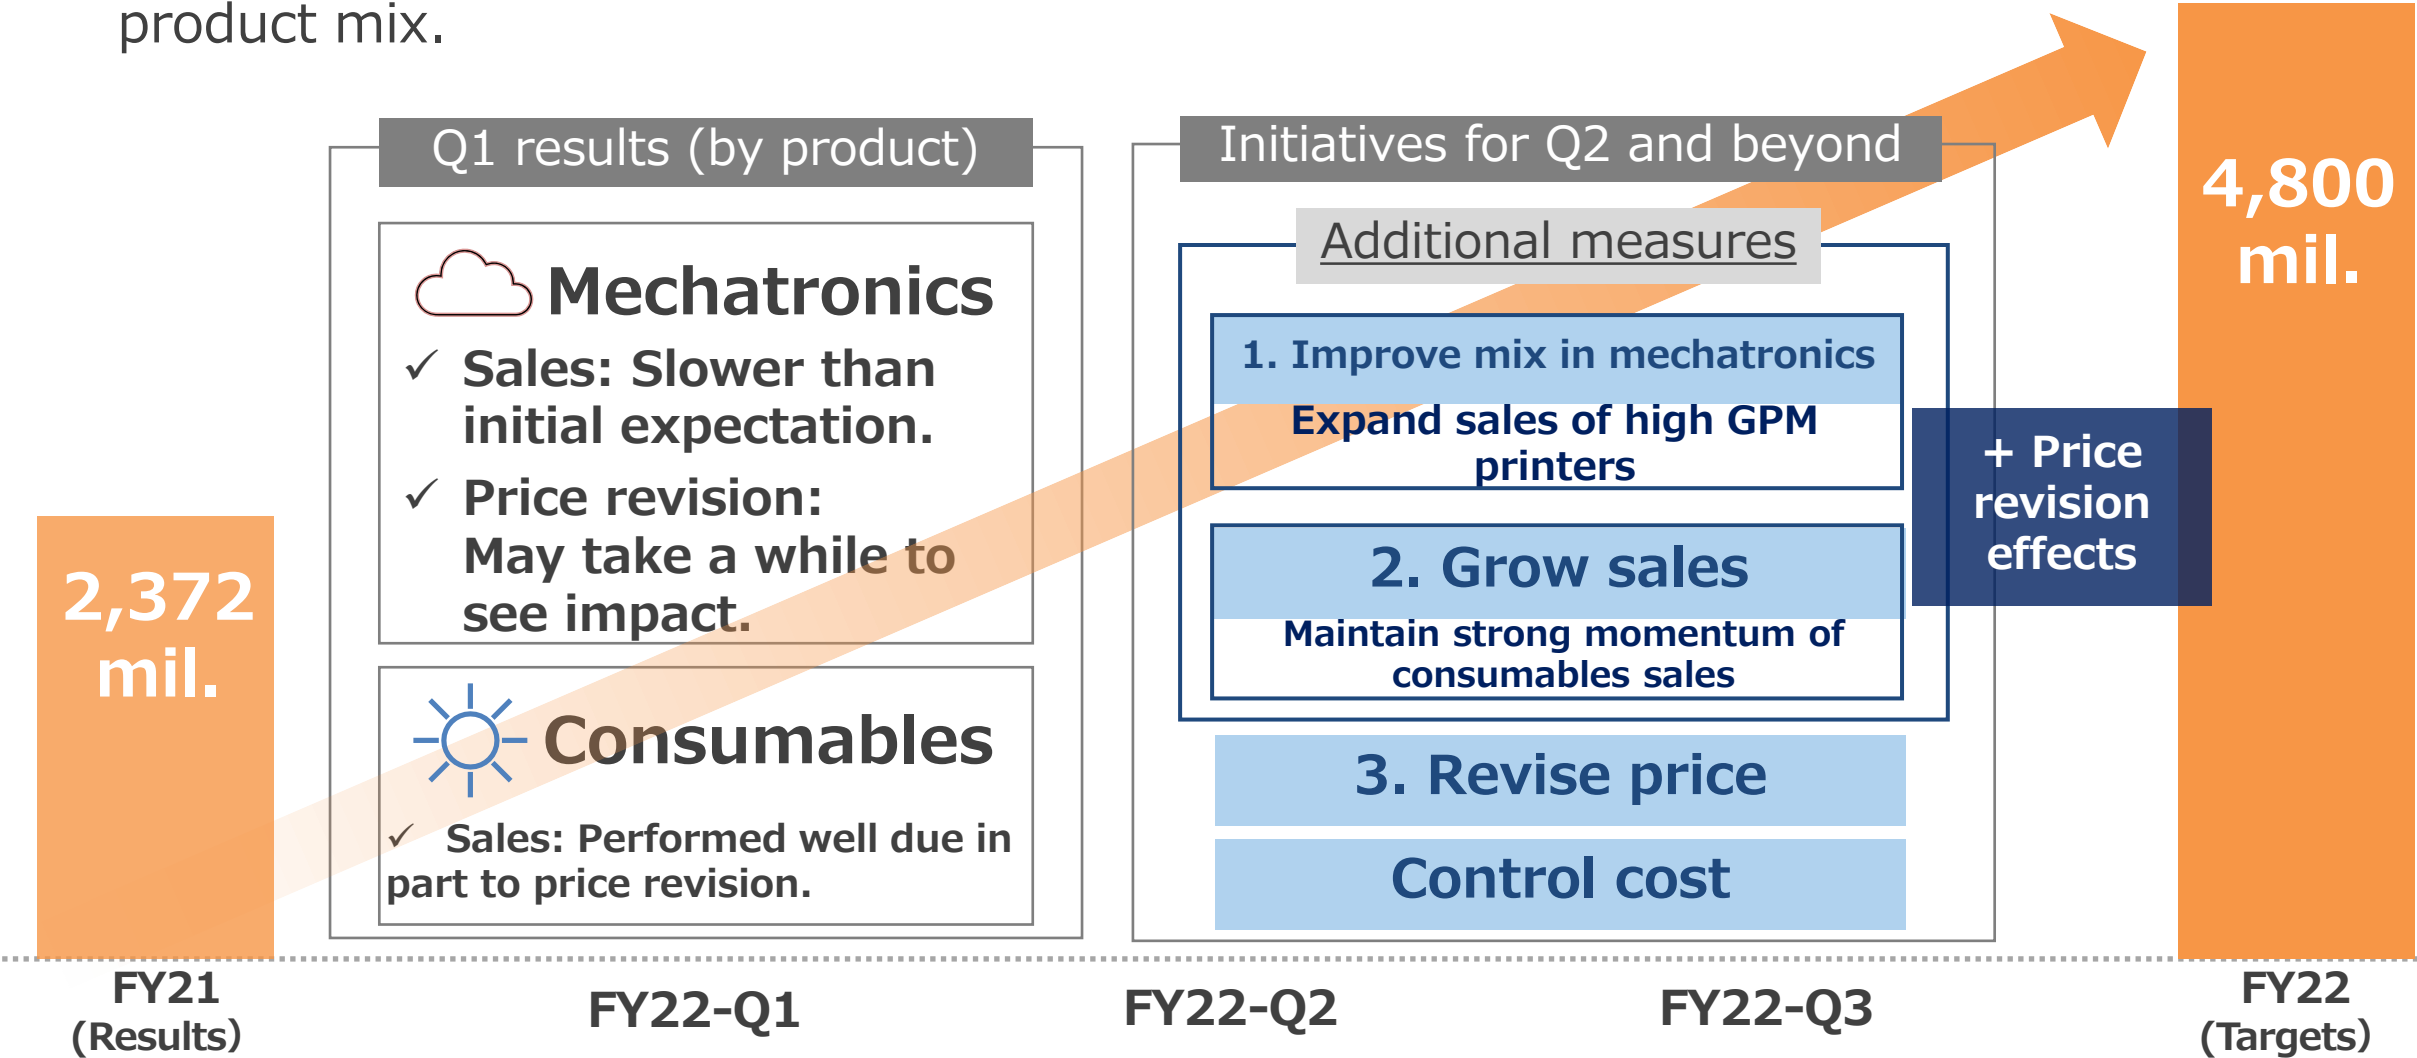

**FY22 Apr-Jun
Results**

**FY22
Forecast/
Initiatives**

Japan: Achievements in Q1 and actions going forward

In Q1, sales of mechatronics were slower compared to our initial forecasts. We are implementing recovery measures, mainly focusing on improving product mix.

Japan Initiatives: 1. Improve mix in mechatronics

We already expect to achieve about 95% of the full-year forecast in mechatronics sales. Based on this pipeline, we hope to improve product mix by expanding sales of high GPM printers (Effects will be evident mainly in the 2H).

* Production, Sales, Inventory

Japan Initiatives: 2. Grow sales

Consumables sales in Q1 of FY22 exceeded those of Q1 FY19 before the pandemic. We will try to keep this momentum up.

We target full-year sales for FY22 to exceed FY19 results by 4–5%, taking advantage of price revisions.

Consumable Sales (FY19–FY22)

(Millions of JPY)

- **Capture strong demand from better-performing industries.**
Manufacturing: Electronics, electronic parts
Logistics: E-commerce
Health care: Medical equipment manufacturers
- **Further promote price revisions that are showing apparent effects.**
- **Control cost**
Standardize operations, reconsider label materials, control PSI, etc.
- **Respond to future cost increases flexibly.**

Japan Initiatives: 3. Revise price (FY22 forecasts are plans as of the beginning of the fiscal)

We are revising product prices to cover for more than 60% of the total cost increase.

Cost increases and price revisions

Mechatronics

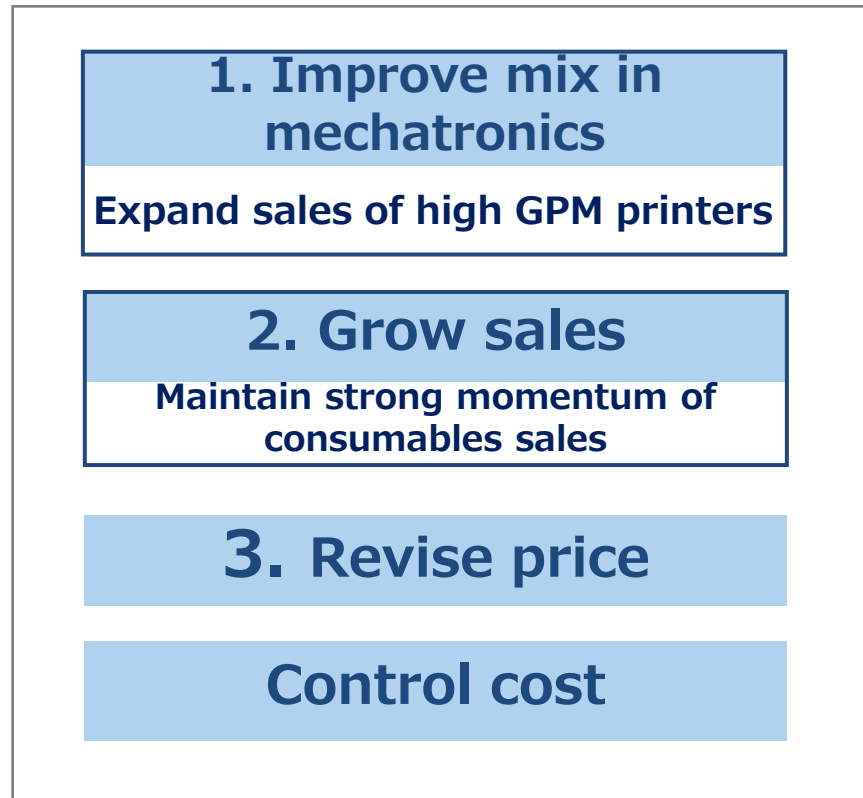

Consumables

(No cost increase in the 1H of FY2021)

Summary

We will achieve our OI target for FY22 by accelerating the three initiatives and controlling cost.

* IDP business: Transferred all shares of DataLase to DataLase Holdings Ltd in Sep 2020

FY2022 Operating Income Forecasts (Consolidated)

- Japan: Sales growth driven by robust demand, improved product mix, price revision and decrease of one-off costs.
- Overseas: Sales growth through region/market specific initiatives, price revision and improved product mix.

- Positive impact
- Negative impact

* Each planned figures are round numbers.

SATO terminologies (1/4)

(*) Underlined terms are described under its own heading

SATO-unique business concepts/initiatives		Description*
1	Auto-ID Solutions business	Our business that carries out <u>DCS & Labeling</u> . It is specifically about integrating barcode printers/labels, software and services designed in-house with products and technologies from partners to resolve customers' worksite issues. This business is separated into Overseas and Japan segments, with the former comprised of the <u>Base</u> and the <u>Primary Labels</u> businesses.
2	Base business	Business of <u>tagging</u> variable information, such as prices, manufactured dates and expiration dates in the form of barcodes and more.
3	Primary Labels business	Overseas business of <u>tagging</u> fixed information via product labels and other media. This business operates from SATO Group companies; <u>Achernar</u> (Argentina), <u>Prakolar</u> (Brazil), <u>Okil</u> (Russia) and <u>X-Pack</u> (Russia). Due to the uncertain external environment, the Russian business is excluded from our forecasts/targets for FY2022 onwards.
4	IDP business	Develops, manufactures and sells materials used mainly in Inline Digital Printing (IDP). SATO Holdings transferred all shares of SATO consolidated subsidiary DataLase Ltd. that conducted the business to DataLase Holdings Limited in September 2020. IDP is a direct marking technology comprised of a special heat-sensitive pigment that can be applied as a coating to virtually any substrate and exposed to a laser beam to create a color change.
5	Koto-uri (Selling the solution, not the product)	Sales approach of selling not the product but combinations of products in the form of solutions that include hardware, <u>consumables</u> , maintenance services and software, together with ROI and other value propositions for the customer. The opposite concept of "Mono-uri", or selling single products.
6	Tagging	The process of physically attaching to something data that identifies and/or locates it. This involves digitizing information of the things it is tagged to so that the tagged data can be fed to and processed by core IT systems. This concept, connecting people and things with information, has remained central to SATO's business, ever since our days of pioneering in hand labelers that attached price and other information to products.
7	DCS & Labeling (DCS: Data Collection Systems)	SATO's business model that incorporates auto-ID technology (such as barcodes and <u>RFID</u>) with barcode printers and labels/labeling services to (a) systematically collect data on people and things at business sites and (b) offer <u>tagging/labeling</u> of information, using accurate, efficient and optimized solutions. In line with increasingly sophisticated user needs, SATO also pursues a policy of open innovation and partnerships to provide value-added technologies such as image/voice recognition, location tracking and sensors to its legacy business model to better solve customer challenges.

SATO terminologies (2/4)

SATO-unique business concepts/initiatives		Description
8	Tagging for Sustainability	Business model set as the next stage of <u>DCS & Labeling</u> that aims to resolve customers' operational and societal challenges geared toward achieving a sustainable world. Shaped using new technologies and media not limited to labels that innovate our traditional domain of <u>tagging</u> .
9	Genbaryoku	Our core competency of going to customer sites to understand their operations and identify the essence of issues to offer optimized solutions. It is our ability to (1) address a wide range of market, industry and application needs with our expertise in sites of operations, (2) integrate products, services and technologies into solutions, working together with strategic partners, and (3) offer maintenance services and solutions continuously to build trust and establish lasting relationships with customers.
10	Teiho	SATO's unique system of reports and proposals in effect since 1976. Employees share new information and ideas they come across on-site every day with top management via the Teiho system. Teiho helps top management gain immediate insight into the internal/external business situation to facilitate quick decision-making and execution of initiatives, while allowing "participation by all" in the management of the company. As Teiho reports are directly addressed to top management, it is also an effective means of compliance monitoring to prevent malpractice and other inappropriate behavior and assist in corporate governance. Some of our global offices have also started Teiho, with more to follow.
Products, services, Technologies		Description
1	Mechatronics	All products that are not <u>consumables</u> , including hardware (e.g., printers, automatic labelers, scanners, hand labelers), software and maintenance services. They generate higher gross profit margin than <u>consumables</u> . Printers are manufactured in Malaysia, Vietnam and Taiwan.
2	Consumables	"Consumable" products such as <u>variable information labels</u> , <u>RFID</u> tags, primary labels (product labels) and ribbons. They generate lower gross profit margin than <u>mechatronics</u> but incur low SG&A expenses ratio as they are typically sold through recurring business.

SATO terminologies (3/4)

Products, services, technologies		Description
3	Auto-ID Solutions	Combination of products such as printers, labels, software and maintenance services using auto-ID technologies to carry out <u>DCS & Labeling</u> . To meet ever complex and diverse customer challenges, SATO also looks beyond its own resources and interests by pursuing partnerships, for example, to enable location technologies to track items by tags and inventory/worker movements in real time for managing manufacturing processes and visualizing productivity on-site.
4	SOS (SATO Online Services)	A cloud-based monitoring service for printers that enables preventative maintenance and on-the-spot troubleshooting. With SOS, users can view the status of their cloud-connected printers at a glance and manage them centrally with ease, while SATO can increase productivity of its service personnel, allowing for even small service teams (as is often the case overseas) to provide improved support.
5	AEP (Application Enabled Printing)	A powerful on-board intelligence which enables customization of printer operation. Printers can link to other systems on a stand-alone basis, without going through any computers.
6	Variable information labels	Blank or pre-printed labels used to print information elements such as barcode, product price and manufactured or expiry date that vary with every customer's site of operation. Unlike fixed information labels that are identical and printed at large quantities in a single run, variable information labels can be printed on-demand as and when needed.
7	RFID (Radio Frequency Identification)	A type of auto-ID technology that uses radio waves to read/write data from/to an RFID tag without making contact. RFID offers faster read rates (from reading multiple tags at the same time) and greater read range than traditional barcode technology. Also, unlike barcodes, RFID tags can be read when covered by another object or stained, and are read/write-capable to enable updates to the encoded data. Because of these key benefits, RFID can significantly improve operational efficiency.

SATO terminologies (4/4)

Key acquisitions since 2012		Description
1	Argox Information Co., Ltd. (Taiwan)	[2012] Company engaging in the development, production and sales of entry level printers.
2	Achernar S.A. (Argentina)	[2012] Company specializing in primary labels.
3	Magellan Technology Pty Ltd. (Australia)	[2013] Company from which SATO acquired its business including PJM (Phase Jitter Modulation), a highly superior <u>RFID</u> technology that can quickly and accurately identify large volumes of tagged items stacked or stored in any physical orientation even in the presence of metals and liquids. Now SATO Vicinity Pty Ltd.
4	Okil-Holding, JSC (Russia)	[2014] Primary labels company in which SATO acquired 75% ownership stake. <u>X-Pack</u> is affiliated with Okil.
5	Prakolar Rótulos Autoadesivos LTDA. (Brazil)	[2015] Company specializing in primary labels.
Overseas subsidiaries founded after 2017		Description
1	X-Pack (Russia)	[2017] A subsidiary producing and selling shrink sleeves, in-mould labels and soft packages in <u>Primary Labels business</u> , owned 60% by SATO Holdings.
2	SATO Productivity Solutions Mexico S.A. de C.V.	[2019] A sales subsidiary, mainly focusing on automobile industry, owned nearly 100% by SATO Holdings.
