

Consolidated Financial Results

Second Quarter, 2022

(August 4, 2022)

Hideki Somemiya, CFO
Director & Managing Corporate Officer

SHOWA DENKO K.K.

Summary

1. In the first half of 2022, the Showa Denko Group's net sales decreased by 37.3 billion yen from the same period of the previous year due partly to the sluggish automobile production and the effect of the transfer of businesses implemented in 2021, despite positive impact of the yen's depreciation, continued strong sales in the Semiconductor and Electronic Materials segment, and shifting increased raw material costs onto product prices to some extent. The Group's operating income decreased 10.5 billion yen due partly to a decrease in net sales caused by the two factors mentioned above, and non-recurrence of gain from the devaluation of graphite electrode inventory caused by an application of the "lower of cost or market" accounting method in 2020, which was once recorded in 2021.
*Within ongoing businesses, net sales increased by 65.7 billion yen, but operating income decreased by 2.4 billion yen.
2. Regarding the performance forecast for full-year 2022, the Group's net sales increased 150 billion yen from the previous forecast announced in February 2022 while we left operating income of 84.0 billion yen as it was, reflecting the yen's depreciation further than expected, the delay in the recovery of automobile production, and a steep rise in prices of raw materials exceeding our forecast.
3. As a part of preparation for the integration of corporate statuses scheduled for the beginning of the next year, the company repurchased preferred stock of a subsidiary for 275.0 billion yen earlier than we planned by utilizing a fund financed through a subordinated loan.

Sales and Operating Income by Segment (1H, 2021 vs. 1H, 2022) Semiconductor and Electronic Materials

(Unit: Billions of Yen)

	1H, 2021	1H, 2022	Increase/ decrease		Performance Overview
Sales	196.2	220.4	24.1	12%	<p>Although the segment was affected by the transfer of the Printed Wiring Board business in 2021 and a rise in raw material costs, sales of semiconductor-related materials, HD media, and SiC epitaxial wafers increased due to strong demand. Thus sales and operating income of the segment increased.</p> <ul style="list-style-type: none"> •Front-end Semiconductor Materials: Sales of high-purity gases for electronics and CMP slurry increased due to strong demand for semiconductors. •Back-end Semiconductor Materials: Sales increased due to good sales of die bonding materials and copper clad laminates caused by strong demand for semiconductors. •Device Solutions: Sales significantly increased due to steady demand for HD media for use in data centers and an increase in shipment volumes of SiC epitaxial wafers.
Front-end Semiconductor Materials	37.7	47.9	10.1	27%	
Back-end Semiconductor Materials	88.7	98.1	9.4	11%	
Device Solutions	38.6	57.0	18.4	48%	
Others	31.2	17.4	(13.8)	(44%)	
Operating Income	21.2	26.8	5.6	27%	

[Main Products]

- Front-end Semiconductor Materials : High-purity gases for electronics, CMP slurry
- Back-end Semiconductor Materials : Epoxy molding compounds, Die bonding materials, Copper clad laminates, Photosensitive dry films, Photosensitive solder resists
- Device Solutions : HD media, SiC epitaxial wafers, Compound semiconductors

Sales and Operating Income by Segment (1H, 2021 vs. 1H, 2022)

Mobility

(Unit: Billions of Yen)

	1H, 2021	1H, 2022	Increase/ Decrease		Performance Overview
Sales	89.6	86.7	(2.9)	(3%)	<p>Sales decreased due to sluggish production of cars caused by short supply of semiconductors and the Shanghai lockdown due to the spread of COVID-19 infection. In addition, there are soaring raw material prices and amortization of goodwill and intangible assets, resulting in an operating loss.</p> <ul style="list-style-type: none"> •Automotive Products: While car production was sluggish, sales of powder metal products decreased. However, sales of plastic molded products and friction materials increased. •Lithium-ion Battery Materials: Sales of carbon nanofiber additives for cathodes and anodes of LIBs increased. However, sales of carbon anode materials and aluminum laminate film (SPALF™) decreased.
Automotive Products	68.1	69.3	1.2	2%	
Lithium-ion Battery Materials	20.0	16.6	(3.4)	(17%)

Innovation Enabling Materials / Chemicals

(Unit: Billions of Yen)

		1H, 2021	1H, 2022	Increase / decrease		Performance Overview
Innovation Enabling Materials	Sales	65.6	70.0	4.4	7%	Due to a rise in product prices caused by soaring raw material prices, sales of aluminum specialty components and functional chemicals increased, but profit of the segment decreased because of a time lag between a rise in raw material costs and passing it on to the prices of products.
	Operating Income	8.3	5.4	(2.9)	(35%)	
Chemicals	Sales	191.3	224.5	33.2	17%	<ul style="list-style-type: none"> •Petrochemicals: Once-in-four-year shutdown maintenance took place. Sales increased due to a rise in product prices caused by a rise in raw naphtha prices, and profit decreased due to a decline in shipment volumes caused by the shutdown maintenance. •Basic Chemicals & Industrial Gases: Sales increased due to a rise in product prices caused by a rise in prices of raw materials and fuel, but profit decreased due to a time-lag between cost increase and price hike, etc. •Graphite Electrodes: Sales and profit increased due to increases in shipment volumes and product prices.
	Petrochemicals	123.8	132.5	8.7	7%
