< Investment in Human Capital and Intellectual Property >

As stated in the integrated report, we recognize that intangible assets, including human resource development and DX promotion, are indispensable to the improvement of corporate value over the medium-to long-term, as they are one of the capitals that form the basis of our value creation process. We are developing a system that aims for active investment in human capital and intellectual property by establishing departments related to human resources strategy and innovation creation, but we have not yet formulated an easy-to-understand investment strategy in accordance with the management strategy. Particularly regarding investment in intellectual property, we will consider the future disclosure of specific investment strategies and utilization

strategies while consulting the content of the “Guidelines on Disclosure and Governance of Investment and Utilization Strategies for Intellectual Property and Intangible Assets” formulated by the Cabinet Office.

[Supplementary Principle 4-2-2]

We have established a Sustainability Policy as a basic policy regarding the Company’s sustainability efforts. Under this policy, we have established 7 Sustainable Key Themes (Material Issues) incorporating the perspective of the SDGs, as priority long-term measures.

On the other hand, regarding the business portfolio strategies that include investment in human capital and intellectual property, the Board of Directors will consider a system for appropriate supervision after formulating strategies in an easy-to-understand manner.

[Principle 1-3]

The Company strives to strengthen its financial standing, placing great emphasis on the balance between interest-bearing debt and cash flows. We have also been making efforts to achieve the sustainable growth of corporate value while promoting investment that contributes to the improvement of profitability in the future. With respect to the return of gains to shareholders, the Company intends to pay stable dividends to its shareholders. The Company will disclose quantitative targets (consolidated operating income, the ratio of consolidated net interest-bearing debt to EBITDA) in the medium term business plan.

[Principle 1-4]

If the Company determines that a business relationship with any party contributes to the improvement of the Group’s corporate value in the medium to long term, the Company holds strategic shareholdings with a view to maintaining and strengthening such business relation.

Shares currently held as strategic shareholdings are reviewed every year at the Board of Directors’ meeting where they are examined quantitatively using the Company’s cost of capital as the standard. If the rationality of strategic shareholding is deemed to be weak for certain stocks, the Company shall reduce the number of shares held as swiftly as possible.

With respect to the exercise of voting rights, in cases such as the following where there will be a significant impact on the issuing company’s corporate value or on its transactions with the Company, the Company shall determine whether it is for or against proposals based on dialogues, etc. with the issuing company as necessary.

- When a significant worsening of business performance has persisted for a period of time

[Principle 1-7]

With regard to conflict-of-interest transactions by Directors, the Company requires an approval of the Board of Directors in compliance with the laws and regulations. The outline of the results shall be reported promptly at the Board of Directors’ meeting following the execution of such transaction. However, the outline of the results concerning conflict-of-interest transactions on a recurring basis shall be reported on a quarterly basis. In addition, with regard to transactions with major shareholders (those holding voting rights equivalent to 10% or more of the total voting rights), the Company takes the same measures as those required for conflict-of-interest transactions by Directors at the Board of Directors’ meeting. The Board of Directors shall deliberate on the relevant matters impartially with a view to ensuring the common interests of the Company and its shareholders.

[Supplementary Principle 2-4-1]

The Company believes that it is essential to respect and actively utilize diversity within the organization in order to respond flexibly to changes in business environment and grow sustainably. Thus, the Company will endeavor to promote diversity in various ways, such as by hiring women, mid-career recruits and foreign employees.

In addition, specific and measurable targets for achieving this will be set as follows, taking into consideration the Company's business characteristics.

- Maintain the standard as of FY2021 (7.4%) or more for the percentage of mid-career recruits in managerial positions

Regarding foreigners in managerial positions, we will consider promoting foreign workers depending on their training situation and business plans.

As a human resources development policy that aims to ensure diversity, we will build an environment wherein employees can select various career plans based on their own volition and actively engage in self-development activities based on those career plans. In doing so, we strive to develop human resources with diverse abilities and ways of thinking. Moreover, from the viewpoint of work-life balance, we have introduced a work system that allows employees to select start and end times according to work convenience as well as a reduced working hours system for childcare. Through the introduction of various work systems, we will strive to reform corporate culture and further develop a working environment that enables flexible working styles that are not restricted by time or location.

< Outline and results of assessments in fiscal 2021 >

■ Assessment items

(1) The following matters regarding the Board of Directors for fiscal 2021

- Operation of the Board of Directors as a Company with an Audit & Supervisory Committee
- Deliberations (frequency, duration, materials, explanations) on the next medium term business plan
- Expansion of matters to be reported (risks, internal audit, sustainable management)

(2) Utilization of IT tools (online meetings, utilization of Teams)

■ Summary of analysis and assessment results

Although Directors were unanimous in providing a positive assessment of the operation of the Board of Directors in what was the first year since transitioning to a Company with an Audit & Supervisory Committee, selection of the agenda and deepening and expanding deliberations from the perspective of strengthening the supervision of business execution were identified as future issues, with many of the responses calling for further enhancement of the response to issues surrounding risk management and sustainability than contained in the report, while others presented new themes and issues that the Board of Directors should supervise. In addition, the majority of assessments were that the frequency and duration of deliberations on the next medium term business plan were appropriate. However, from this fiscal year, we believe that it is necessary for the Board of Directors to strengthen their reviews of the progress of the plan, and to be conscious of deliberations that require a more in-depth approach depending on theme during the course of these reviews.

In addition, holding and attending online meetings utilizing IT tools has become established, and an environment for information sharing through Teams is in place. Therefore, it is recognized that the development of rules is an issue in all cases in order to further improve operational aspects.

Disclosure of Policy on Determining Remuneration Amounts and Calculation Methods

[Details of the Policy and Decision Method for Determining the Amount or Calculation Method of Officers' Compensation]

The Company has established the following policy on determining the amount of individual officers' compensation or the method used to calculate this amount, based on resolutions made at the Board of Directors' meeting held on May 12, 2022 and the 104th Annual General Meeting of Shareholders held on June 25, 2021.

Compensations for Directors (excluding Director serving as Audit & Supervisory Committee Member) and Corporate Officers with Special Titles (Corporate Officers at the level of Senior Corporate Officer or above) are composed of the supervision payment and the execution payment.

(1) Supervision Payment

Directors are paid a fixed amount monthly in cash, determined according to responsibilities.

(2) Execution Payment

Corporate Officers with Special Titles are paid an amount comprising basic compensation, bonuses and stock compensation.

The proportions of basic compensation, bonuses and stock compensation are set at 60:25:15 respectively, with the purposes of increasing incentives for enhanced performance and promoting the penetration of management awareness of shareholder value and stock price.

1) Basic Compensation

A fixed amount is paid in cash, according to individual duties and responsibilities.

2) Bonuses

Lump-sum payments will be made in cash after the conclusion of each fiscal year, of an amount calculated based on the Company's performance and individual performance during the respective fiscal year.

The proportions based on the Company's performance and individual performance are 70:30 respectively.

However, the President's bonus is calculated based on the Company's performance alone.

i. Company's performance portion

The Company's performance portion will be calculated and paid according to the achievement of the target index, provided the predetermined conditional index is cleared. However, the details and levels, etc. of the conditional index and target index may be treated differently if the Compensation Committee recognizes significant changes in the business environment, or in the case of any other significant requirements.

(i) Conditional index

The achievement of a fixed level of profit for each fiscal year and the ability to maintain stable dividend payments to shareholders will be considered conditions for the payment of the Company's performance portion. Profit attributable to owners of the parent will be the conditional index. The Company's performance portion of bonuses will not be paid if the profit attributable to owners of the parent for the respective fiscal year is less than 70% of the average for the previous five years, excluding the years with the highest and lowest profit.

(ii) Target index

In order to increase the incentive for achieving the goals of Nankai Group Management Vision 2027, the target index will be the Company's consolidated operating income, which is a quantitative target for the vision above. The amount of the Company's performance portion of bonuses will be directly proportional to the achievement of the budget established at the beginning of each fiscal period, within the range from 80% to 120%. The actual amount to be paid varies within a range from 50% to 150% of the standard amount of the Company's performance portion of bonuses. No bonus for the Company's performance portion is paid if the achievement rate of the target index is below 80%.

ii. Individual performance portion

The President will evaluate the overall level of achievement of the targets set out by individual officers each fiscal year, on a scale of 1 to 4, based on which the amount of bonus to be paid for the individual performance portion will be determined. The actual amount of the individual performance portion of bonuses to be paid varies within a range from 70% to 130% of the standard amount of the individual portion of bonuses, or otherwise no amount is to be paid, depending on the President's evaluation.

3) Stock Compensation

The Company will introduce a stock compensation plan for Corporate Officers with Special Titles with the aim of further clarifying the linkage of compensation for Corporate Officers with Special Titles to the Company's performance and share value, having the officers share with shareholders both the benefits and risks of fluctuation in share prices, and thus raising the officers' motivation to contribute to enhancing the Company's performance and corporate value over the medium- to long-term.

The stock compensation plan delivers the Company's shares to the Corporate Officers with Special Titles in office during the period from the conclusion of the 102nd General Meeting of Shareholders until the conclusion of an Annual General Meeting of Shareholders pertaining to the last fiscal year ending within 3 years from this General Meeting of Shareholders (hereinafter, the "Applicable Period"). Under the plan, the Company's shares are acquired through a trust using cash contributed by the Company, through disposal of treasury stock or through the stock market (including off-auction trading), and a number of the Company's shares are delivered through the Trust to Corporate Officers with Special Titles corresponding to the number of points they have been awarded.

In principle, Corporate Officers with Special Titles will receive delivery of the Company's shares upon their retirement from office.

In addition, the Board of Directors may decide to extend the Applicable Period within a period of five years.

[Targets and results for indicators associated with performance-linked remuneration in fiscal 2021]

Following the decision by the Compensation Committee at its meeting held on October 29, 2021 to suspend the application of the conditional index for the abovementioned determination policy provided that profit attributable to owners of parent is recorded when calculating the payment amount of bonuses for officers (the Company's performance portion) for fiscal 2021, and to set the payment ratio at 50% for all officers as an exceptional measure for fiscal 2021 even if the achievement rate of the target index is below 80%, the Compensation Committee approved the revision of the determination policy and the payment amount of bonuses for officers for fiscal 2021 at its meeting held on April 28, 2022.

Profit attributable to owners of parent, which is the conditional index for performance-linked remuneration, was 4,021 million yen for fiscal 2021. In addition, compared to the initial budget of 14,300

million yen for consolidated operating income, which is the target index, the result for fiscal 2021 was 12,190 million yen, and the achievement rate was 85.25%.

IV. Matters Related to the Internal Control System

1. Basic Views on Internal Control System and the Progress of System Development Updated

(1) Basic views

We recognize that the strengthening of corporate governance functions is an important management issue. For this reason, we have strived to implement strict adherence to laws and regulations. Additionally, we have been making efforts to achieve transparent management, fair and rational decision-making, and reinforcement of functions to oversee these operations.

(2) Progress of development

1) System to ensure that the execution of duties by Directors, etc. of the Company and its subsidiaries conforms to laws, regulations, and the Articles of Incorporation

For the sound growth of the Company and group companies and for the establishment of business ethics, in addition to creating Code of Business Ethics, we have created a dedicated organization responsible for the promotion of internal auditing and compliance-based management.

As a guideline to deepen the spirit of our Code of Business Ethics, the Company formulated a Compliance Manual which specifies the particular business operations and conducts required for each officer and employee of the Company and group companies. By conforming ourselves to the Compliance Manual and providing training sessions, we are committed to achieving the instilment of the philosophy of compliance-based management as well as the elimination of relationships with anti-social forces. We have also established a Corporate Ethics Hotline System where officers and employees can send reports or receive consultations, with the aim of early detection or correction of legal and ethical issues.

In addition, the Risk Management Committee deliberates various measures for the promotion of compliance-based management, and in the event of a serious compliance violation, will make proposals for corrections and recurrence prevention measures.

Moreover, in addition to properly establishing and operating systems which are necessary for ensuring the reliability of financial reporting, we will be committed to maintaining and improving such systems through evaluations of their effectiveness by the Internal Audit Department.

2) Systems related to storing and managing information concerning the execution of duties by Directors

Documents related to the execution of duties by Directors and Corporate Officers, including circulated draft plans and the minutes of the Board of Directors' meetings and other important meetings, are prepared appropriately, stored and managed in accordance with our Document Regulations and other in-house company rules. In addition, we have established a Security Policy and arranged systems where we can appropriately safeguard our information resources and secure their "confidentiality," "completeness," and "availability."

3) Regulations and other systems related to the management of loss risk for the Company and its subsidiaries
The Company has established the Risk Management Committee with the aim of avoiding or reducing risks that may have a significant impact on the Group's management, including compliance violation, by conducting comprehensive and centralized risk management within the Group, and has established a system to report the status of risk management to the Board of Directors.

The Company has established the Crisis Management Guidelines as comprehensive standards to prevent the occurrence of crises (excluding serious accidents and disasters) as well as to minimize damage to the Company, its officers and employees, travelers and customers should they occur. In addition, we have established the Disaster Countermeasure Regulations with the aim of fulfilling our corporate social responsibilities particularly by taking measures to minimize damage such as regulating a countermeasure organization and emergency handling procedures for occurrence or potential occurrence of major accidents and disasters, efforts for early recovery of the Company's operations, as well as commitment to secure the safety of travelers, customers, and our officers and employees.

Moreover, in the Group Company Management Regulations, it is stipulated that we shall work to grasp crisis information across group companies and conduct crisis management for group companies in accordance with our Crisis Management Guidelines.

In the railway business, for the purpose of securing transportation safety, the Company has established the Safety Management Regulations and the Safety Promotion Committee. Going forward, we will be committed to the further promotion of safety management.

With respect to risk management accompanying the respective business operations of each of the Company's departments and group companies, the relevant departments and companies have been taking measures such as the provision of training sessions, the development of manuals and regulations, etc., as necessary.

4) System to ensure the efficient execution of duties by Directors and others in the Company and its subsidiaries

In order to realize the systematic and efficient conduct of our business activities, in our in-house company rules, we have clearly stipulated the business organizations and the assignment of duties as well as the responsibilities, authorities, duties and other roles of the employees assigned to the respective positions.

Moreover, we have adopted the structure of a Company with an Audit & Supervisory Committee, delegating decisions regarding important business execution to Representative Directors, and a system of Corporate Officers, giving Corporate Officers responsibility for business execution, and enhancing the agility of business execution by clearly separating the Company's executive and supervisory functions. Based on the fundamental management policies established by the Board of Directors, a Management Committee, which is comprised of Corporate Officers with Special Titles and other Corporate Officers appointed by the President and CEO, meets once a week to discuss matters on important business execution. Through this and other efforts, we seek to comprehensively control business execution and optimize decision-making on management.

For the execution of duties by Directors of Nankai group companies, based on our Group Company Guidance Policy, we have stipulated basic policies for organizational form and institutional design after considering their business scales, special qualities and characteristics while keeping in mind their agility and autonomy in management. Moreover, with the aim of ensuring the reliability of financial reporting and achieving the higher efficiency in business operations, we have adopted shared services for accounting operations.

In addition, for the purpose of enhancing management effectiveness, particularly in order to accurately understand the state of business operations and promote their improvement, we have established a system where the Internal Audit Department can systematically implement internal audits including audits for group companies, and report the results to the Board of Directors and the Audit & Supervisory Committee.

5) Systems related to reporting to the Company about items concerning the execution of duties by subsidiary company Directors and other staff

Based on the Group Company Guidance Policy and the Group Company Management Regulations, we maintain close contact for mutual understanding between the Company and our group companies. We also require group companies to obtain advance approval from the Company for items of a certain importance on management such as important facility investments, and ask for reporting as appropriate.

6) Systems to ensure the propriety of business conducted by other group members

While we strive for unified management and effective control as a corporate group by dispatching our officers and employees to serve as officers and management personnel in our group companies, we seek to strengthen the functions of Auditors of our group companies and enhance their information sharing through the placement of Associate Auditors and discussions at the Group Company Auditor Counsel.

Furthermore, in addition to stipulating the IT Management Regulations for the establishment of IT control, the Company's Examination Committee has prepared strict screening procedures for the execution of financing to group companies in order to optimize the business operation of the Group as a whole.

7) System to ensure that the auditing by the Audit & Supervisory Committee is conducted effectively

We have established the Secretariat of Audit & Supervisory Committee as an organization dedicated to work related to the Audit & Supervisory Committee. In accordance with the Company Regulations, the Secretariat of Audit & Supervisory Committee is clearly separated from the command structure of the President and other Corporate Officers, and its staff members follow the directions and orders of Audit & Supervisory Committee Members. In addition, the consent of full-time Audit & Supervisory Committee Members shall be obtained regarding personnel changes and evaluations of members of the Secretariat of Audit & Supervisory Committee.

The Company's President, other Corporate Officers and employees request that full-time Audit & Supervisory Committee Members attend the Management Committee and other important meetings where they report about issues that are important to the management of the Company and the Group, including the status of business execution, operating results, and financial conditions. We have also arranged a system for full-time Audit & Supervisory Committee Members where they can receive important information, etc., including draft

plans after approval and internal auditing reports, for review. Moreover, in response to requests from the Audit & Supervisory Committee or full-time Audit & Supervisory Committee Members, we conduct exchanges of opinions related to individual management issues.

For the operation of the Corporate Ethics Hotline System, the Corporate Ethics Hotline System Rules declare that officers and employees shall not treat informants disadvantageously or unfairly, nor shall they conduct acts of retribution or discrimination. Moreover, we have established a system whereby reports about the status of the operation are made regularly to full-time Audit & Supervisory Committee Members and the Board of Directors.

While setting a budget for ordinary auditing expenses based on the audit plans of the Audit & Supervisory Committee, when expenses are claimed outside of the budget for special circumstances such as for when Audit & Supervisory Committee Members consult lawyers, certified public accountants, and other experts outside the Company for their opinions for the purpose of executing their duties, the Company shall not unreasonably withhold payment except for cases where the claimed expenses are deemed unnecessary for the execution of the duties of the Audit & Supervisory Committee.

2. Basic Views on Eliminating Anti-Social Forces

(1) Basic views

For the sound growth of the Company and group companies and for the establishment of corporate ethics, the Company has formulated the Code of Business Ethics. The Code of Business Ethics specifies our intention to reject all contact with organizations involved in activities in violation of the law or accepted standards of responsible social behavior, and represents our efforts to break off any relationships with anti-social forces.

(2) Progress of development

The Company has formulated the Compliance Manual in an effort to break down the spirit of the Code of Business Ethics to the level of operations and behaviors of each officer and employee. In order to eliminate anti-social forces, the Company has set up the Compliance Management Promotion Department, which is manned full-time by a former member of the police.

In addition to the aforementioned matters, the specific progress of internal system development and measures are as follows.

- 1) The President expresses the spirit of the Code of Business Ethics and gives statements in every possible occasion inside and outside the Company in order to deepen the spirit of the Group as a whole and each officer and employee.
- 2) If unreasonable demands are posed by anti-social forces, immediate reporting and consultation shall be made to the Compliance Management Promotion Department. In response, the Compliance Management Promotion Department shall not succumb to demands from anti-social forces, but support the initiatives to break off relationships by giving advice and instructions. Additionally, the Company has built close collaborations with external specialized organizations (the police, lawyers, the Osaka Center for Removal of Criminal Organizations, etc.), which enables us to consult them and receive advice as necessary.
- 3) Counterparties shall always be monitored whether they fall under anti-social forces by utilizing the Company's own database, information from external specialized organizations, etc. In addition, in the event of occurrence of any relationship with anti-social forces without prior knowledge, the Company shall promptly terminate the relationship after discovery or concerns to that effect.
- 4) In order to prevent damage in cases where anti-social forces become our business partners or shareholders and pose unreasonable demands, the Company has taken measures to include "clauses for the exclusion of organized crime groups" in contracts, trade agreements, and similar documents.
- 5) The Company participates in community activities and meetings hosted by the Osaka Prefectural Center for Removal of Criminal Organizations, the Osaka Corporate Defense Countermeasures Federation, etc. to eliminate anti-social forces including crime syndicates.
- 6) In the event that any damage is caused due to unreasonable demands, the Company shall clearly declare inside and outside the Company that it will not succumb to unreasonable demands, and diligently file a damage report to the police without hesitation to prevent the further spread of damage.

V. Other

1. Adoption of Anti-Takeover Measures

| | |
|------------------------------------|-------------|
| Adoption of Anti-Takeover Measures | Not Adopted |
|------------------------------------|-------------|

| Supplementary Explanation Updated |
|--|

(1) Basic Policy

The Company believes that the decision in response to a takeover proposal involving a transfer of the Company's control shall be ultimately made based on the intent of our shareholders as a whole. Furthermore, the Company will not deny all large-scale purchases of the Company's shares if such purchases contribute to corporate value and thus the common interests of shareholders.

However, some large-scale purchases do not actually contribute to the corporate value of their target companies or the common interests of shareholders. These include acquisitions with aims that obviously do harm to corporate value and the common interests of shareholders, those that effectively force existing shareholders to sell their holdings, and those that do not provide sufficient time or information for the Board of Directors and shareholders of the target company to consider the details of the large-scale purchase, or for the Board of Directors to present an alternative proposal.

In particular, in order to secure and enhance corporate value, it is necessary for the Company to maintain and strengthen its positive relationship of trust with its customers, centered around those who live close to its lines, and the local community. Furthermore, it is imperative that the Company ensures safe transportation, its greatest responsibility as a railway company. While it is of course necessary for any large-scale buyer of the company's shares to understand details of the Group's finance and business, it is also vital for such a buyer to understand the source of the Company's corporate value, secure and enhance it over the medium and long term. If this is not the case, then the Company's corporate value and the common interests of shareholders will be damaged.

The Company believes that if a large-scale buyer does not contribute to the Company's corporate value and the common interests of shareholders, it is not appropriate for that buyer to control the Company's finance and business policy. In response to large-scale purchases of this nature, we believe it is necessary to engage appropriate measures, in accordance with the Financial Instruments and Exchange Act, the Companies Act and other relevant laws and regulations, to secure the Company's corporate value and the common interests of shareholders.

(2) Summary of the Details of Efforts to Realize the Fundamental Policy

1) Special efforts contributing to the realization of the fundamental policy

In an effort to enhance corporate value, the Group has established Nankai Group Management Vision 2027, as well as the medium term business plan Kyoso136 Plan, spanning the three years from fiscal year 2018 to fiscal year 2020, and Management Plan for FY 2021, as initiatives to realize this vision.

With the completion of Management Plan for FY2021, the Group has formulated a new Nankai's Corporate Image in 2050, in addition to the Nankai Group Management Vision 2027, and we have formulated and started our new medium term business plan, Kyoso 140 Plan, covering the next three years (FY2022 to FY2024) aimed at their realization.

In this medium term business plan, as described on the Company's website (https://www.nankai.co.jp/en/ir/management/medium-term_management_plan), we will carry out three business strategies, human resource strategies, and financial strategies, with the aim of achieving sustainable growth and the enhancement of corporate value over the medium and long term.

2) Efforts to prevent decisions on the Company's financial and business policy being controlled by those who are inappropriate in light of the fundamental policy

In an effort to prevent decisions on the Company's financial and business policy being controlled by those who are inappropriate in light of the fundamental policy, the Company will request any party intending to undertake a large-scale purchase of the Company's shares to provide information necessary for shareholders and the Board of Directors to consider the details of the purchase. Based on this information, the Board of Directors will discuss and negotiate with the buyer as necessary, and present the opinion of the Board of Directors to shareholders. In addition, the Company will engage appropriate measures, in accordance with the Financial Instruments and Exchange Act, the Companies Act and other relevant laws and regulations,

including working to ensure that shareholders have sufficient time to make an appropriate decision on the purchase.

(3) The decision of the Board of Directors and its reasons concerning each effort described above

The initiatives mentioned in 1) of (2) above, have both been established as concrete measures to continuously and sustainably enhance corporate value of the Company and the common interests of shareholders, and clearly contribute to the realization of the fundamental policy.

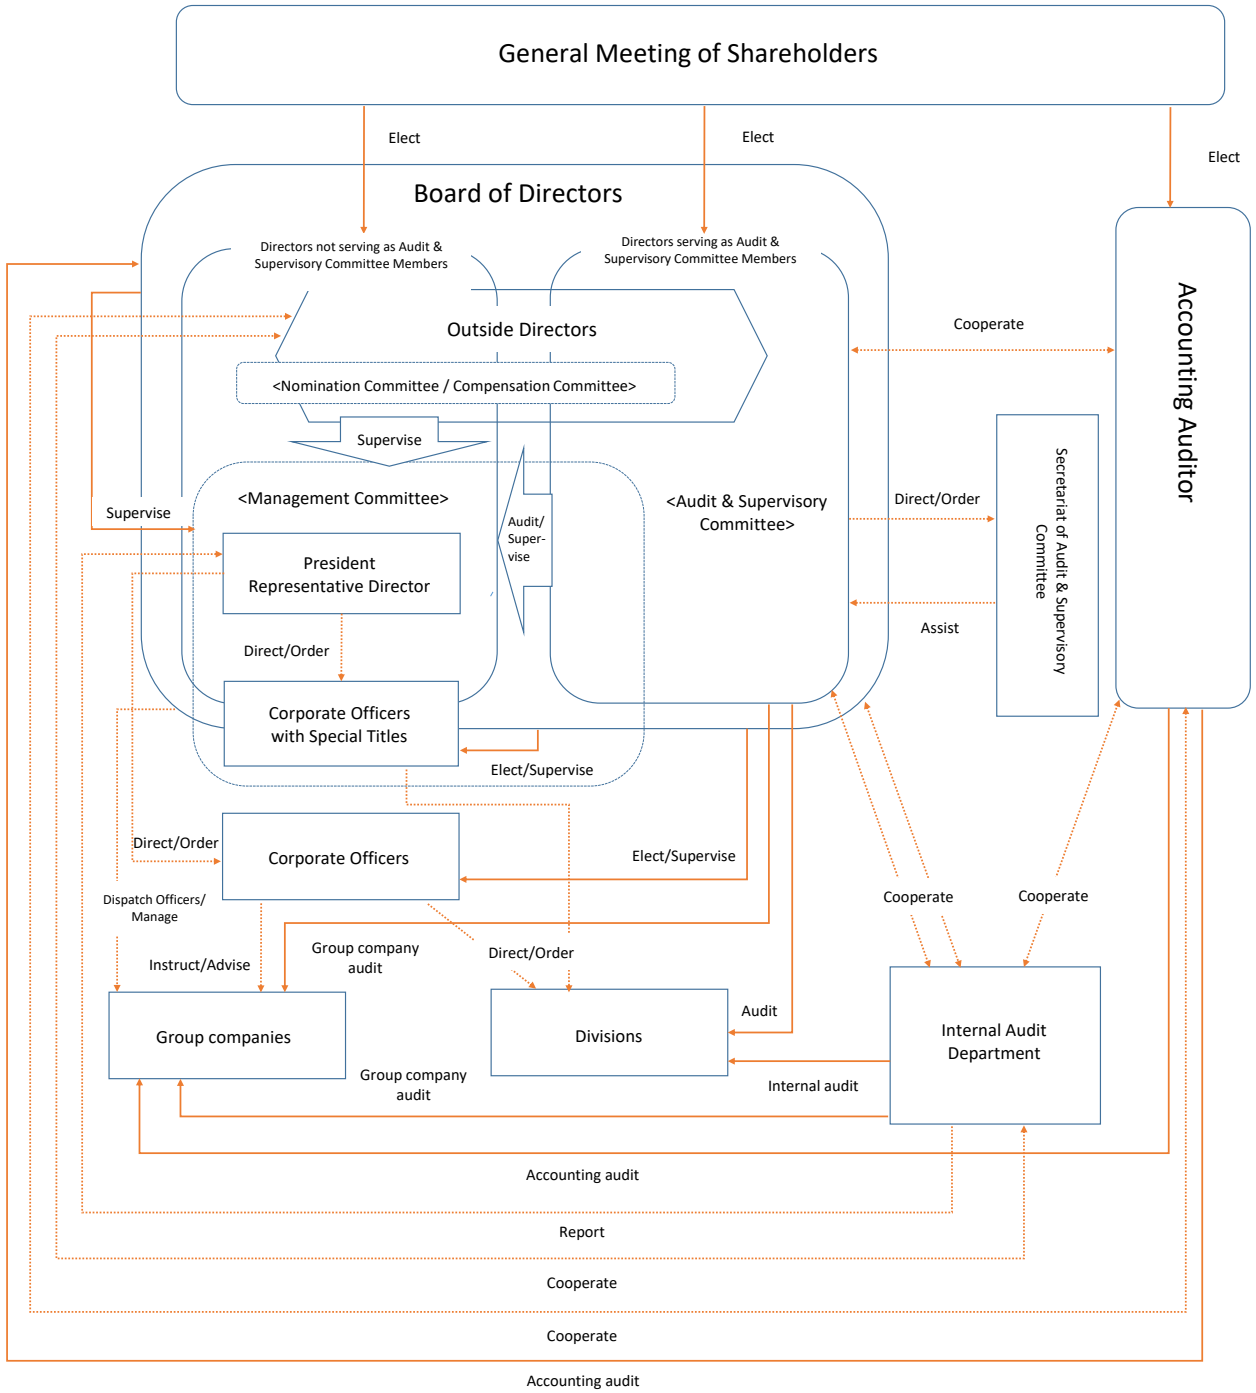

Likewise, the efforts described in 2) of (2) above are aimed at warding-off acquisitions that are detrimental to corporate value and the common interests of shareholders, thus securing and enhancing corporate value and the common interests of shareholders, by ensuring sufficient time and information for all shareholders to make an appropriate decision, as well as securing an opportunity for negotiation with the potential buyer, if a large-scale acquisition of the company's stock is attempted.

Therefore, these efforts and measures conform to the fundamental policy and the common interests of shareholders of the Company, and are not aimed at maintaining the status of the Company's officers.
