Notice for Providing Automatic Data Interface between Accounting freee and PRONEXUS (DMP) Disclosure Management Platform

PRONEXUS INC. announced today the provision of an interface within the PRONEXUS WORKS disclosure management platform optional service WORKS-i. The interface directly accepts accounting data from Accounting freee (*) to WORKS-i via web transaction.

* The accounting system provided by freee K.K. .

1. Background

Due to workstyle reforms in recent years, companies must now promote advanced business operations that reduce overtime hours and function through remote working. Improving operational efficiency and accuracy has become a major issue in the financial statement disclosure operations of the IPO preparatory companies and listed companies supported by PRONEXUS.

In this environment, there is growing demand from clients for a way to transfer data seamlessly between accounting systems and disclosure management platforms. In response to this demand, PRONEXUS has released a new interface that directly accepts accounting data from Accounting freee to WORKS-i via web transaction.

2. Interface Overview

This data interface automatically imports figures and accounting line items from balance sheets and income statements stored on Accounting freee to WORKS-i by executing an API for external data links on the same system.

This eliminates manual output and importing target files for each client disclosure document creation process, and is expected to strengthen internal controls, including fewer human errors, as well as improve efficiency.
