## **Kudan and Innoviz announce partnership for the LiDAR-based geospatial mapping solution across various industries and use cases**

Kudan Inc. (headquartered in Shibuya-ku, Tokyo; CEO Daiu Ko, hereafter “Kudan”) is pleased to announce its partnership with Innoviz Technologies (Nasdaq: INVZ, hereafter “Innoviz”), a technology leader of high-performance, automotive-grade LiDAR sensors and perception software. This partnership allows machines to generate 3D maps of surrounding environments and gain autonomous mobility based on Kudan’s perception software and Innoviz LiDARs with superior accuracy, robustness and cost efficiency.

The cooperation between Kudan and Innoviz addresses the growing need for 3D digital mapping solutions leveraging “Simultaneous Localization and Mapping” (SLAM) technology. Since autonomous decisions depend on the quality of the information, perception of the environment is critical for machines. Coupled with Innoviz’s LiDAR scanning, the SLAM technology enables a dynamic mapping of the environment with accurate, high-density, colorized 3D point cloud generation. With the global presence and strong networks of both companies, this partnership is a key enabler for a broad set of uses, including HD maps, robotics, construction, surveying, and “digital twinning” and “industrial metaverse” applications.

In addition to enabling non-automotive applications, Kudan SLAM software also gives autonomous vehicles the ability to view and act upon changes to their environment in real-time, by providing highly accurate, reliable results that allow vehicles to react to their surroundings. Innoviz’s high-performing LiDARs deliver a rich 3D point cloud at distances up to 250 meters. Resilient to sunlight and weather conditions, Innoviz’s LiDARs contribute to the accuracy and reliability of Kudan’s SLAM software for safe automotive and non-automotive applications.

## (Future Outlook)

We estimate that this partnership will only have a minor effect on the company's fiscal performance at this point in time. In the event that any issue arises that needs to be made public, swift notification will be carried out.

“Innoviz is excited to promote our mapping collaboration both in automotive applications and beyond with the Kudan SLAM solution,” said **Omer Keilaf, co-founder and CEO of Innoviz**. “Kudan's SLAM software and related tools are a great fit with Innoviz's products and we see great opportunity in a number of applications, including HD mapping for autonomous driving, robotics, geospatial mapping and surveying. We're also seeing traction in Asia that demonstrates high demand for our LiDAR technology for automotive and non-automotive applications.”

“The need of leveraging LiDAR SLAM-based mapping for digital transformation in various industries has continued to grow and has never been more urgent,” said **Daiu Ko, CEO of Kudan**. “Under this new partnership with Innoviz, we look forward to bringing the best mapping solution to the market in terms of use case coverage and return over investment across different vertical domains.”

Kudan and Innoviz will collaborate on digital mapping projects in Japan and globally, and we will continue to provide updates on our collaboration in the future.

### **About Innoviz Technologies**

Innoviz is a global leader in LiDAR technology, working towards a future with safe autonomous vehicles on the world's roads. Innoviz's LiDAR and perception software “see” better than a human driver and reduce the possibility of error, meeting the automotive industry's strictest expectations for performance and safety. Operating across the U.S., Europe, and Asia, Innoviz has been selected by internationally recognized premium car brands for use in consumer vehicles as well as by other commercial and industrial leaders for a wide range of use cases.

**About Kudan Inc.**

Kudan is a deep tech research and development company specializing in algorithms for artificial perception (AP). As a complement to artificial intelligence (AI), AP functions allow machines to develop autonomy. Currently, Kudan is using its high-level technical innovation to explore business areas based on its own milestone models established for deep tech which provide wide-ranging impact on several major industrial fields.

For more information, please refer to Kudan's website at <https://www.kudan.io/>.
