Yes

Disclosure of Policy for Determining the Remuneration Amount or the Calculation Method

As stated in I.1. Basic Policy, the Company's corporate vision is "Better Systems, Better World" and its goal is to redesign the structure and value chain of conventional industries with the help of the Internet. Since transformation requires a long period of time, the Company believes it is of the utmost importance to establish corporate governance that contributes to achieving long-term growth and corporate value enhancement.

Individual remuneration for the Company's directors is also determined based on the above concept. In addition, as a company in the process of growth, the Company will continue to pursue corporate governance that functions as a viable system according to the company stage with flexibility towards changes.

Details of the decision-making policy are as follows.

(Policies for Determining the Amount of Individual Remuneration, etc. or the Method of Calculation)

The Company grants restricted stock as non-monetary remuneration in addition to fixed monetary remuneration.

Fixed monetary remuneration is determined by taking into account the responsibilities of each director, the Company's performance, contributions to the building of corporate value over the medium to long term and acquiring talent. Regarding executive directors, the Company emphasizes decision-making and execution in order to realize discontinuous growth aimed at realizing its vision.

With respect to non-executive directors, in order to realize its vision, the Company emphasizes the monitoring aspect (check and balance) that secures diversified and sound risk-taking from an independent standpoint.

Non-monetary remuneration, restricted stock, is granted for the purpose of providing an incentive to continuously improve corporate value and increasing the willingness to contribute to higher stock price and corporate value. The number of shares granted is determined by taking into account the Company's share price level in addition to the factors considered in the previous section.

The percentage of fixed monetary remuneration and non-monetary remuneration (restricted stock) is generally 1:1, assuming a monetary valuation based on the Company's stock price at the time of determination.

(Policy on Determination of Timing and Conditions of Remuneration etc.)

Based on the business results from the previous fiscal year, the Company considers and determines the remuneration between the end of the fiscal year and the first meeting of the Board of Directors after the Ordinary General Meeting of Shareholders.

Fixed monetary remuneration is paid in a fixed monthly amount, and non-monetary remuneration in the form of restricted stock is paid in a lump sum around every November in an amount equivalent to the remuneration for the execution of duties over the following three fiscal years.

(Method of Determining the Content of Individual Remuneration, etc. of Directors)
