Notice Concerning Suspension and Resumption of Power Generation at Assets Under Management

Canadian Solar Infrastructure Fund, Inc.(hereinafter referred to as “CSIF”) hereby announces the temporary suspension and resumption of power generation at power plants owned by CSIF, according to the report by Canadian Solar O&M Japan K.K., which is O&M operator for CSIF. Details are as follow.

The operation of CS Daisen-cho Power Plant (A) and Daisen-cho Power Plant (B) were suspended on October 29 due to a burnout of the earthed voltage transformer (EVT) at the extra-voltage substation. The power generation at both plants resumed on November 1.

Regarding the event released in the "Notice concerning the Impact of the Typhoon (14th, named “Nanmadol”)" on September 20th, 2022, in which 11 PCS units under the B feeder at CS Hiji-machi Dai-ni Power Plant were shut down due to a broken wire sheath caused by a fallen tree, the wire replacement work was completed on October 28 and the power generation resumed.

With regard to the suspension of power generation at the CS Hiji-machi Dai-ni Power Plant, in principle, insurance claims can be made against the amount of lost electricity sales during the suspension period. Therefore, the impact of the suspension of power generation on the rent received by CSIF is negligible, and there will be no revision to the CSIF's forecast of management status for the fiscal period ending December 31, 2022 (11th Fiscal Period).

End
