Upon formulation of the Mid-Term Management Plan , we, in addition to purposes that serve as the basis as well as discussions of mid- to long-term strategies and company-wide strategies (resource allocation over business portfolio and others, capital policies, and so on), realized that we need to further clarify goals we should aim to achieve in the Mid-Term Management Plan and monitoring in light of setting appropriate KPIs. To secure deliberation time for important agenda items that should be prioritized at the Board meeting, we acknowledged that we need even more effective meeting management through measures such as securing opportunities for focused discussions and enhancing individual briefing and simplification of explanation of agenda items at the meeting for the purpose of information sharing and limiting it to confirmation in writing. At the same time, continuous activities to improve quality of discussions by reviewing the time of the meeting and improving meeting materials are also necessary.

8. Efforts for human capital investment

(1) Ensuring diversity in hiring of core human resources (Principle 2.4, Supplementary Principle 2.4.1,3.1.3)

PERSOL Group (hereinafter referred to as “the group”), under its Group Vision of “Work, and Smile,” considers promotion of diversity as an important initiative upon aiming for the realization of a society where everyone can work and smile. The group, in January 2019, announced Diversity, Inclusion & Equality (hereinafter referred to as “DI&E”), the diversity policy of the group for realizing the vision, thereby establishing the basic concepts and set forth a policy to accept diversity of various values and leverage diversity of abilities. We will support the group members to constantly grow themselves by continuing to brush up and develop their own abilities. We provide an environment that facilitates synergy effects by improving workplace environment for all human resources and combining diversity of abilities.

The human resource development policy of the group focuses on “working individuals” and respects their diverse values. It attaches importance to all employees’ continuing to grow autonomously and developing human resources who play an active part even under the present highly uncertain business environment. Under this policy, the group has been conducting DI&E literacy training (e-learning; started in May 2019; a total of about 26,000 participants) and awareness reform training for all managerial staff (started in October 2021; a total of nine sessions are planned; about 1,600 participants). It also has been offering monthly in-house events to spread DI&E to promote development of culture that accepts diverse attributes and values such as female participation, sexual minorities, and age difference (started in July 2020; held 23 times in total; about 2,200 participants).

The in-house environment development policy is to develop a workplace environment that is friendly for all employees. The group is developing such an environment by introducing a side job system that leads to growth of employees, realization of their visions, and social contributions as well as flexible working time and liberalization of dress code as a rule aimed at realizing a comfortable workplace environment, while establishing systems and offering trainings to enable employees to select workstyle that addresses their respective needs. The group also leverages telecommuting and the level of its utilization differs from company to company: the highest utilization ratio is 100% and 60% of our group companies shows that at the employees utilize it at least once a week. Reflecting diversification of their human resources, some of the group companies have introduced systems to enable employees to flexibly select the number of working days, hours, and place as well as leaves

in order to respond to individual employees' various needs such as child rearing, nursing of elderly, seeking higher studies, studying abroad, hobby and leisure activities, community activities, social activities, and health issues.

The group also follows the approach to accept and leverage diversity in employees' promotion to management, which is the core of its business activities, and promotes personnel irrespective of the category with which the employee joined the company, their gender, or their nationality.

The ratio of female employees in management positions is about 22.9% for the group as a whole, compared with about 37% it aims to achieve in fiscal 2030. In September 2021, the group established Gender Diversity Committee to accelerate its concerted efforts for further promoting female participation. The group also promotes foreign employees to managerial positions based on the diversity concept irrespective of their nationality. Of about 520 foreign national employees of the group working in Japan, 18 have been promoted to managerial positions and the group intends to maintain the current level. The ratio of mid-career hires among employees in managerial positions exceeds 80% at group companies in Japan, and the group plans to maintain the current level, which is sufficient.

The group will continue to leverage viewpoints and values of its diverse human resources throughout the group thereby sustainably growing itself.

See the company website for the group's diverse human resources and its policy for human resource development.
