Kudan launched its affordable mobile mapping dev kit for vehicle and handheld

Kudan Inc. (headquartered in Shibuya-ku, Tokyo; CEO Daiu Ko, hereafter "Kudan") is pleased to announce that Kudan launched its own development kit for vehicle mount and handheld mobile mapping applications using Kudan 3D-Lidar SLAM (KdLidar).

1. Background to the release of the products and their details

There have been considerable demands for a packaged solution of hardware and our 3D-Lidar SLAM software so that customers can easily get point clouds using our SLAM software. Even though there are existing mobile mapping solutions in the market, some segments of the geospatial industry are looking for a Dev Kit type of solution with better price-to-performance, increased flexibility of parameter configuration, and easier operation for essential functions. We observed that this requirement is prominent in the academic and research sector, and in order to respond to this market demand, we launched our own mobile mapping dev kit.
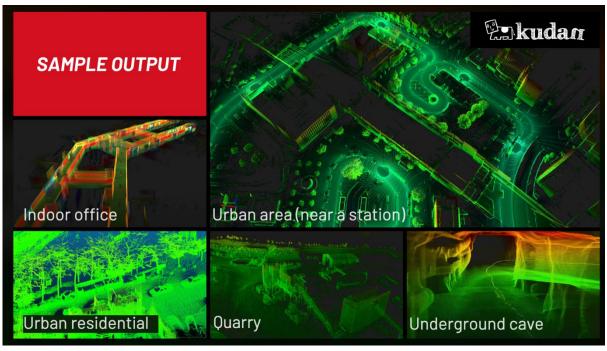

The most noticeable advantages of our dev kit are the following.

1. Excellent return on investment/price for performance: Targets half of the prices of alternative solutions without compromising the quality of point clouds
2. Flexibility: Supports different parameter settings for data collection and point cloud generation to meet the needs of various application use cases.
3. Simplicity: Less than an hour to start scanning after unboxing for handheld, with all essential functionalities supported.

You can find more information about the dev kit on our website, so please visit and send us an inquiry for more details.

- Vehicle mount: https://www.kudan.io/mapping_dev_kit/vehicle_mount_version/

Kudan Mobile Mapping Dev Kit
(Vehicle Mount & Handheld)

SAMPLE OUTPUT

Indoor office

Urban area (near a station)

Urban residential

Quarry

Underground cave

We are continuing to offer our software to enhance existing mobile mapping solutions that rely on INS or other SLAM solutions to enhance their performance.

2. Products release date
November 24th, 2022

3. Special expenditure for the products release
There was no special additional expenditure for the release of the new products and they were mainly research and development expenditure such as personnel costs, etc.

4. Future Outlook

We estimate that this product release will only have a minor impact on the company's financial performance at this time. As the company's financial performance will be affected by the future product sales, we will promptly make an announcement if any event arises that is expected to have a significant impact on the company's financial performance such as increased customer orders.

About Kudan Inc.

Kudan is a deep tech research and development company specializing in algorithms for artificial perception (AP). As a complement to artificial intelligence (AI), AP functions allow machines to develop autonomy. Currently, Kudan is using its high-level technical innovation to explore business areas based on its own milestone models established for deep tech which provide wide-ranging impact on several major industrial fields.
