### The Solar Power Generation and CO2 Reduction Data

Canadian Solar Infrastructure Fund, Inc. (hereinafter referred to as “The Fund”) hereby announce its Solar Power Generation and CO2 Reduction data for November 2022.

#### 1. Monthly Solar Power Generation and CO2 Reduction Data

| FY of December, 2022 |                     |                          |  |  |                            |                             |
|----------------------|---------------------|--------------------------|--|--|----------------------------|-----------------------------|
|                      | Total PV Facilities | Solar Module Output (MW) | Forecast Power Generation (kWh) (A) (*1) | Actual Power Generation (kWh) (B) (*2) | Difference (kWh) (B) - (A) | CO2 Reduction (kg-CO2) (*3) |
| July                 | 25                  | 183.97                   | 19,845,048                               | 19,076,009                             | -769,039                   | 8,182,775                   |
| August               | 25                  | 183.97                   | 21,785,534                               | 21,226,813                             | -558,721                   | 9,101,362                   |
| September            | 25                  | 183.97                   | 18,223,216                               | 16,216,771                             | -2,006,445                 | 6,951,082                   |
| October              | 25                  | 183.97                   | 17,529,993                               | 16,982,382                             | -547,610                   | 7,273,926                   |
| November             | 25                  | 183.97                   | 13,907,250                               | 14,758,314                             | 851,064                    | 6,334,923                   |
| December             |                     |                          | 12,018,474                               |  |                            |                             |
| <b>Total</b>         | -                   | -                        | 103,309,515                              | -                                      | -                          | -                           |

(\*1) Forecast Power Generation is based on the Forecast Power Generation (P50) provided in the independent technical report.

(\*2) Actual Power Generation is based on SCADA (Supervisory Control and Data Acquisition) system data generation.

(\*3) CO2 reduction is calculated as based on adjusted emission coefficient by electric power companies. For more details, please refer to the link (<https://www.env.go.jp/press/104919.html>).

## 2. Solar Power Generation During the Month of November 2022

The Fund portfolio generated actual electricity production of 14,758,314kWh during the month of November 2022, equivalent to 106.12% of the forecasted electricity production.

| Month of November 2022              |                          |                                     |                                   |                              |
