I. Basic Views on Corporate Governance, Capital Structure, Corporate Profile and Other Basic Information

1. Basic Views

We maintain an awareness that our corporate group is a member of society at large with the duty to fulfill our corporate social responsibility and contribute to society as we develop our business, in addition to fulfilling our financial responsibility of earning adequate profits by providing high quality products through fair competition while maintaining flight safety, which is our core business, and providing unparalleled service to our customers.

Taking this into account, we have established JAL Philosophy in accordance with the JAL Group Corporate Policy, "The JAL Group will pursue the material and intellectual growth of all our employees, deliver unparalleled service to our customers, and increase corporate value and contribute to the betterment of society." We will strive to increase corporate value and achieve accountability by establishing a corporate governance system that results in high management transparency and strong management monitoring, while at the same time engaging in speedy and appropriate management decision making.

The Board of Directors has established corporate governance by adopting the Fundamental Policies of Corporate Governance as a key set of rules subsequent to the Companies Act, relevant laws and regulations and the Articles of Incorporation, and reviews it at least once a year.

[Reasons for Non-compliance with the Principles of the Corporate Governance Code]

The JAL Group have implemented all principles of the Corporate Governance Code revised on June 11, 2021 and have established a corporate governance system. We will continuously work to increase corporate value.

[Disclosure Based on the Principles of the Corporate Governance Code]

[Principle 1.3 (Basic Strategy for Capital Policy)]

(Fundamental capital strategy policy)

In order to plan for future corporate growth and adapt to changes in the management environment in order to be prepared for business risks unique to the air transport business, the JAL Group strives to secure net assets required for capital expenditures and to keep the equity ratio stable.

Furthermore, it has established a system to secure diverse and flexible means of procuring capital and strives to maintain a good credit rating to realize this.

We are also aware of cost of equity and to achieve a level of capital efficiency that exceeds the costs, establishes a management plan and financial targets and discloses and explains them including concrete measures to achieve its targets.

(Policy on shareholder return)

We regard shareholder returns as one of our most important management matters. Our fundamental policy is to actively implement shareholder returns through continuous and stable dividends and flexible share repurchases, while securing internal reserves for making investments for corporate growth in the future and changing business environments and to build a strong financial structure.

The company's financial position was significantly affected by the prolonged impact of COVID-19. Accordingly, we are currently in the financial rebuilding phase, in which we will prioritize the rebuilding of the financial base and the strengthening of risk resilience and aim to resume dividend payments by the end of the fiscal year ending March 2023. On rebuilding the financial base as quickly as possible, we will move to the sustainable growth phase, in which we will gradually shift to allocation to profit distribution to shareholders and investments in line with the recovery of our cash-flow generating capacity.

In the sustainable growth phase, the dividend amount will be decided with emphasis on continuity, stability and predictability, targeting a dividend payout ratio of around 35%. In addition, we will actively and flexibly consider share repurchases, taking into account the company's financial situation and other factors. As a result, we will strive to keep the total payout ratio within the range of around 35% to 50%, based on the sum of dividends paid out and share repurchases, by appropriately allocating profits and managerial resources to our stakeholders.

At the same time, we continuously strive to improve capital efficiency through monitoring return on equity ratio, which is calculated by dividing the sum of total dividends paid out and share repurchases by shareholders' equity. We make efforts to maintain this ratio at approximately 3% or above. The Articles of Incorporation state that the Company may pay an interim dividend after approval by the Board of Directors, based on a record date of September 30.

[Principle 1.4 (Cross-Shareholdings)]

(Principle on holding shares of listed companies)

Building cooperative and collaborate relationships over a broad range of fields such as sales, procurement, and service provision, and maintaining good relationships with local communities are indispensable in operating the air transport business. It is necessary to strengthen relationships with partners in various areas to survive in global competition and achieve growth. To achieve these goals, we may buy and hold shares in other companies. In these cases, we will carefully select and hold shares of companies that will contribute to enhancing our corporate value, on the precondition of maintaining trusting relationships with our stakeholders.

The fundamental policy of holding shares in listed companies is that we will hold the minimum number shares to meet the above goals.

We will always verify the degree of contribution to corporate value enhancement of holding shares. Specifically, we compare profit on transactions attributable to dividends received and shares held with target capital cost, conduct quantitative study and take into consideration qualitative factors.

We also pay attention to market value. If we judge that it is meaningless to hold certain shares in terms of enhancing our corporate value, we will consider selling them, while taking into account the impact on the market and other business matters.

We confirmed the appropriateness of continuing to hold shares of listed companies at the Board meeting on February 25, 2022 and reconsidered and implemented partial reduction of shares.

(Standards for exercising voting rights)

Regarding our principle on exercising voting rights of shares we own in a company, we will exercise voting rights in order to contribute to sustainable growth and medium to long-corporate value enhancement of the invested company, on the major premise of contributing to enhancing our corporate value.

[Principle 1.7 (Related Party Transactions)]

Transactions between related parties, such as Directors and major shareholders, etc. are approved by the Board according to Regulations of the Board of Directors. The Board monitors transactions by approving individual transactions.

Matters concerning Directors who have transactions in competition with the Company and transactions with third parties where there is a conflict of interest between the Company and Directors are also approved by the Board according to Regulations of the Board of Directors. Regulations of the Board of Directors stipulate that a Director who has a special interest in any proposal that is deliberated by the Board of Directors shall not be entitled to vote on such matter.

[Supplementary Principle 2.4.1 (Ensuring Diversity, Including Active Participation of Women)]

Accordingly, we have set targets for the ratio of female managers as a management target in the JAL Group Medium Term Management Plan for FY2021-FY202 and have established a HR development policy and a policy to develop an environment that ensures diversity in employment of core

personnel, including appointment of non-Japanese and mid-career hires to management positions. These policies and status of implementation are provided on the JAL website.

Changes to the fundamental policy and implementation of new investments require resolutions by the Board of Directors and Board of Representatives. Employees with appropriate qualities are elected as Directors and Representatives.

Disclosure of Policy on Determining Remuneration Amounts and Calculation Methods

Fundamental policies

- (1) The Company will encourage the performance of duties consistent with our Corporate Policy and management strategies and provide strong incentives for the achievement of specific management targets, with the aim of sustainable and steady growth of the Company and the Group, and of medium to long-term improvement in corporate value.
- (2) The Company will establish appropriate proportions for annual incentive (performance-linked bonus) linked to fiscal year performance and, for the purpose of further promoting the aligning of interests with shareholders, a long-term incentive (performance-linked share-based remuneration) linked to corporate value in accordance with medium to long-term performance, in order to contribute to the demonstration of sound entrepreneurial spirit.
- (3) The Company will provide treatment that is appropriate to the management team of the Company, in accordance with the Company's business performance.

Remuneration levels and remuneration composition ratios

- (1) The Company will set appropriate remuneration levels with reference to objective market data on remuneration and based on the business conditions of the Company.
- (2) Taking into account factors including the content of the Company's business and the effectiveness of incentive remuneration, the Company sets the proportions of (1) amount of fixed basic remuneration*, (2) amount of annual incentive (performance-linked bonus) to be paid according to the degree of achievement against targets, and (3) amount of long-term incentive (performance-linked share-based remuneration) to be issued according to the degree of achievement against targets, as follows.

Guideline for the case of 100% achievement against targets: (1):(2):(3) = 50%:30%:20%

The above ratio is meant to be a guideline only, and changes may be made to reflect changes in the share price of the Company's shares or for another reason.

- * The amount excludes the amounts of allowances in cases in which an Executive Officer serves concurrently as Director, and the amounts of allowances when the Executive Officer has representative authority.

Framework for incentive remuneration

Performance indicators for performance-linked bonus and performance-linked share-based remuneration are reviewed as appropriate in accordance with changes in the business environment and the roles of each officer. We will review the performance indicators for performance-linked bonus and performance-linked share-based remuneration in order to powerfully drive, from FY2022, our finance strategy, business strategy and ESG strategy, which are the three pillars of management strategy in the Medium Term Management Plan. (resolution passed by the Board of Directors on December 15, 2021 and April 20, 2022)

- (1) The amount of performance-linked bonus paid each fiscal year will range from 0 ~ 150 depending on the achievement level, on the basis that the amount to be paid when performance targets are achieved is 100. Performance indicators utilized are EBIT and Individual Performance Indicators for Each Officer (* 1), taking into consideration the achievement level of aviation safety targets.
- (2) The number of shares to be granted each fiscal year as performance-linked share-based remuneration will range from 0 ~ 150 depending on the achievement level, on the basis that the number of shares to be granted when performance targets are achieved is 100 (*2). The performance evaluation period (vesting period) is three fiscal years and performance over three consecutive three fiscal years will be evaluated each fiscal year. Performance indicators utilized are TSR (ratio to TOPIX including dividends), consolidated ROIC, the number of ESG stocks selected, and carbon emissions per revenue ton-kilometers, which are priorities in the Medium-Term Management Plan.

(*1) Individual Performance Indicators for Each Officer will not be set for the Chairperson or the President. Performance evaluation will be based on net profit attributable to owners of parent until FY2021 and EBIT from FY2022.

(*2) The number of shares granted in the final fiscal year of the Medium-Term Management Plan will be adjusted, ranging between 0 ~ 200 depending on the achievement level of targets in the Medium Term Management Plan.

In view of the severe business environment, the Board of Directors has decided at the Boarding meeting on February 17, 2022 not to provide performance-linked bonuses for the performance evaluation period of FY2021.
