#### 2. Reasons for the Revision

The Company has been working to expand business performance in the current fiscal year in order to cover the decrease in sales related to the Tokyo 2020 Games and the increase in system-related expenses in the previous year. However, amid the slow recovery in demand in the security and facility management business, there was also the impact of semiconductor supply constraints, sales for the consolidated cumulative third quarter have been sluggish, and annual sales are expected to fall short of the previous forecasts.

In terms of profits, operating income, ordinary income, and profit attributable to owners of parent are all expected to fall short of the previous forecasts due to the sluggish sales growth, the increase

in cost of goods due to price hikes, and the increase in labor costs due to the COVID-19 pandemic. Regarding the dividend, there is no change from the previous published value.
