1. Qualitative Information on Quarterly Consolidated Financial Performance

(1) Explanation of Results of Operations

In the nine months ended December 31, 2022 (April 1–December 31, 2022), the Japanese economy showed signs of gradual recovery despite the impact of the protracted COVID-19 pandemic. However, the outlook remained uncertain due to a slowdown in the global economy and the ongoing need to pay close attention to the COVID-19 trends in Japan and abroad.

Under these economic conditions, the Nihon Chouzai Group, a healthcare company with the mission "To give people the closest possible support," strove to provide quality healthcare services and pharmaceutical products while taking thorough measures to prevent infections. At the same time, the Group as a whole continued working to curb costs.

In December 2022, the Group drafted guidelines and policies to further promote sustainable management. We also decided on items to be disclosed under the four themes of governance, strategy, risk management, and metrics and targets, based on the recommendations of the Task Force on Climate-Related Financial Disclosure (TCFD) we endorsed in June 2022, and published these matters on the Group's sustainability site.

In the Dispensing Pharmacy Business, three of our group pharmacies located across two regions participated in the pilot project for implementing electronic prescribing led by the Ministry of Health, Labour and Welfare from October 31, 2022. The participating pharmacies verified the operational processes of issuing and handling electronic prescriptions by medical institutions and pharmacies, and collected reports of issues to be addressed and successful case studies. Further, the electronic medication notebook Okusuri Techo Plus was linked to Mynaportal (an online portal operated by the Japanese government to streamline various administrative procedures), the first for an electronic medication notebook, enabling centralized viewing and management of drugs prescribed or dispensed by multiple medical institutions and pharmacies. The app allows patients to check their medication history and use this information to manage their health. It also enables Nihon Chouzai pharmacists to centrally view and maintain a good grasp of patients' medication history as family pharmacists and provide more advanced and specialized drug therapy.

In the Pharmaceutical Manufacturing and Sales Business, we continued to prioritize quality management and a stable supply of generic drugs. At the same time, we invested in R&D to expand the lineup of in-house manufactured products, including those newly added to the NHI reimbursement list, and to increase productivity. We had limited shipment volumes for many of our products due to industry-wide supply chain disruptions and the 2021 fire at the West Japan logistics center. However, we are gradually resuming normal shipments for these products, starting with the ones for which a stable supply system has been put in place. Since May 2022, we have resumed normal shipments for more than 160 items, and we are continuing to strive to fulfill our duties as a supplier.

In the Medical Professional Staffing and Placement Business, COVID-19 vaccination-related demand for the physician placement business ran its course. Meanwhile, the mainstay pharmacist staffing and placement business, which was negatively affected by the pandemic, got on a recovery track.

Net sales for the first nine months of the current consolidated fiscal year were 232,844 million yen (+4.2% YoY), operating profit was 5,829 million yen (+0.0% YoY), ordinary profit was 5,836 million yen (-3.7% YoY), and profit attributable to owners of the parent was 4,289 million yen (+291.2% YoY).

Looking ahead, the Group will take all necessary measures to prevent the spread of COVID-19 so that customers

and patients can continue to safely use its quality healthcare services and products.

Segment-specific earnings are as indicated below.

1) Dispensing Pharmacy Business

In the first nine months of the current consolidated fiscal year, the Dispensing Pharmacy Business reported net sales of 208,076 million yen (+5.4% YoY) and operating profit of 10,601 million yen (+16.4% YoY).

The total number of pharmacies at the end of December came to 716 stores as a result of 31 new store openings and 12 store closures during the period. Despite the ongoing impact of the Covid-19 pandemic, net sales and operating income increased due to the contribution of store openings in the previous fiscal year and growth in the number of prescriptions filled. The Group met the government's target of having generic drugs account for over 80% of all drugs (on a sales volume basis) in each prefecture of the country by the end of FY2023, as its sales volume of generic drugs exceeded 80% in every prefecture as of the end of December 2022. The group-wide average was 89.3% (discontinued products have been excluded from calculations). In addition, the percentage of the Group's pharmacies that provide at-home medical care (at least 12 visits annually) was 95.4%.

2) Pharmaceutical Manufacturing and Sales Business

In the first nine months of the current consolidated fiscal year, the Pharmaceutical Manufacturing and Sales Business reported net sales of 29,316 million yen (-16.9% YoY) and operating loss of 456 million yen (operating profit of 1,294 million yen same period a year ago).

While sales of products newly added to the NHI drug price list in 2019 and later continued to be brisk, this could not cover the downturn caused by a drop in the prices of existing products following the drug price revision of April 2022, costs incurred for measures to secure stable supply of products undergoing limited shipment due to the 2021 fire at a contract logistics center in western Japan, and the increase of R&D expenses. Net sales and operating profit declined as a result. As of the end of December 2022, the number of products being sold by the Group came to 611 (including two over-the-counter drugs), reflecting revisions to product offerings and the launch of eight newly NHI-listed products in June and in December.

3) Medical Professional Staffing and Placement Business

In the first nine months of the current consolidated fiscal year, the Medical Professional Staffing and Placement Business reported net sales of 5,909 million yen (+13.5%YoY) and operating profit of 602 million yen (+42.1% YoY).

Sales related to COVID-19 vaccination programs (mainly in the physician business) declined, but sales in the pharmacist staffing and placement business, which had been hurt by the spread of COVID-19, increased year-on-year. Net sales and operating profit grew as a result.

(2) Explanation of Financial Position

Total assets at the end of the third quarter of the current consolidated fiscal year came to 187,619 million yen, an increase of 5.0%, or 8,866 million yen, from 178,753 million yen at the end of the fiscal year ended March 2021. Growth in assets was mainly due to increases in merchandise and finished goods.

Total liabilities were 131,292 million yen, an increase of 4.3%, or 5,415 million yen, from 125,876 million yen at the end of the previous fiscal year. This was mainly due to an increase in Short-term loans payable and Long-term loans payable.

Total net assets were 56,327 million yen, an increase of 3,450 million yen from 52,876 million yen at the end of the previous fiscal year. As a result, the equity ratio came to 30.0%.

(3) Explanation of Consolidated Forecast and Other Forward-looking Statements

There are no revisions to the full-year consolidated forecast for the fiscal year ending March 2023 announced on April 28, 2022.

In our consolidated earnings forecast for the fiscal year ending March 31, 2023, we continue to factor in the impact of the pandemic on earnings for the full year. If any significant changes occur in business conditions that necessitate a revision to the forecast, we will disclose this promptly.
