I. Basic Stance on Corporate Governance, Shareholder Composition, Corporate Data and Other Basic Information

1. Basic Stance on Corporate Governance

See “Disclosure Based on Principles of Corporate Governance Code” Principle 3-1 (ii) e. for the basic stance on corporate governance of Mitsubishi Corporation (the Company).

[Reason for Not Implementing Principles of Corporate Governance Code]

Based on the above basic stance, Mitsubishi Corporation is working to strengthen corporate governance on an ongoing basis, thus it is implementing all the principles of the Corporate Governance Code.

[Disclosure Based on Principles of Corporate Governance Code]

Mitsubishi Corporation’s approaches to corporate governance are described in this report, the Notice of Ordinary General Meeting of Shareholders, Annual Securities Report, Integrated Reports, Mitsubishi Corporation’s website, and others. See these documents for more information.

The followings are the details of the disclosure items based on the principles of the Corporate Governance Code.

a. Principle 1-4

■ Stance on Acquisition, Holding and Reduction in Listed Stocks

Mitsubishi Corporation may acquire and hold shares acquired for other than pure investment as a means of creating business opportunities and building, maintaining and strengthening business and partner relationships. When acquiring these shares, Mitsubishi Corporation confirms necessity of its acquisition based on the significance and economic rationale of the purchase. Also, Mitsubishi Corporation periodically reviews the rationality of continuing to hold the shares and promotes reducing holdings of stocks with decreased significance. In the fiscal year ended March 31, 2022, Mitsubishi Corporation sold approximately 0.1 trillion yen of its shareholdings (market value basis), a decrease of just over 10% from the previous fiscal year.

[Verification policy for holding individual shares]

The Board of Directors verifies all of the listed shares held by Mitsubishi Corporation from the perspectives of

(Translation)

both economic rationale and qualitative significance of holding them every year.

The economic rationale is confirmed by whether or not the related earnings from each stock, such as dividends and related business profits on transactions, exceed Mitsubishi Corporation's target capital cost (Weighted Average Cost of Capital) for the market price of each individual share.

The qualitative significance is confirmed by the achievement or status of progress of the expected purpose for holding the stock, etc.

[Matters verified by the Board of Directors]

Verification was conducted by the Board of Directors for all listed shares held by Mitsubishi Corporation as of March 31, 2022 (market price was approximately 0.5 trillion yen). As a result of verification from the perspectives of both economic rationale and qualitative significance of holding them, numerous shares were identified as candidates for reduction due to a decreased importance of the expected purpose and significance for holding them, etc.

■ Stance on Exercising Voting Rights Relating to Listed Stocks

Mitsubishi Corporation attaches great importance to dialogue and communication with its investment destinations through various channels, aiming to create business opportunities and build, maintain and strengthen business and partner relationships, and from the perspective of raising the mid- and long-term corporate value of Mitsubishi Corporation and these companies. Mitsubishi Corporation considers exercising voting rights to be an important approach. For this reason, when exercising voting rights relating to an investment destination including the listed shares acquired for purposes other than for pure investment purposes, the department responsible for the oversight of the company reviews its business conditions (earnings, capital efficiency, etc.) from both quantitative and qualitative standpoints in accordance with internal regulations. These regulations stipulate matters to be considered, etc., when determining whether to vote for or against proposals such as appropriation of surplus, election of Directors and Audit & Supervisory Board Members, and revision of executive remuneration. Then Mitsubishi Corporation exercises its voting rights appropriately for individual matters for resolution. Furthermore, with regard to the proposals for the election and dismissal of Outside Directors and Outside Audit & Supervisory Board Members of listed subsidiaries, Mitsubishi Corporation's internal regulation also stipulate that their independence from Mitsubishi Corporation is to be examined before exercising voting rights.

b. Principle 1-7

■ Transactions between Related Parties

By formulating the Board of Directors Regulations and the criteria for matters to be deliberated, Mitsubishi Corporation requires a resolution of the Board of Directors concerning, transactions between Director and Mitsubishi Corporation (self-dealing, indirect transactions), transactions between Executive Officer and Mitsubishi Corporation (self-dealing, indirect transactions) and transactions between major shareholders and Mitsubishi Corporation.

c. Supplementary Principle 2-4 (1)

(Translation)

■ Ensuring Diversity in Promotion to Core Human Resources

See “Other” under III. 3. Measures Concerning Respect of the Standpoint of Stakeholders in this report.

d. Principle 2-6

■ Roles of Corporate Pension Funds as Asset Owners

In an effort to utilize personnel with experience in markets and investment, those responsible for pension management are appointed from the Finance Department of Mitsubishi Corporation and serve concurrently as employees of the Mitsubishi Corporation Pension Fund. The basic policy and management guidelines for safe and efficient management of the reserve are drafted and issued to institutions contracted to undertake management, which are then monitored constantly. Marked with the responsibility for autonomous allocations it holds, the fund has announced its acceptance of Japan’s Stewardship Code and requires the institutions entrusted with management of the assets to perform stewardship activities.

e. Principle 3-1 (i)

■ Corporate Philosophy

Mitsubishi Corporation’s corporate philosophy is enshrined in the Three Corporate Principles, the company's motto since its foundation. The Three Corporate Principles were formulated in 1934, as the action guidelines of Mitsubishi Trading Company (now Mitsubishi Corporation), based on the teachings of Koyata Iwasaki, the fourth president of Mitsubishi. Even today, the Three Corporate Principles serve as the cornerstone of Mitsubishi Corporation as it grows its business and fulfills its responsibility toward the global environment and society.

Corporate Responsibility to Society "Shoki Hoko": Strive to enrich society, both materially and spiritually, while contributing towards the preservation of the global environment.

Integrity and Fairness "Shoji Komei": Maintain principles of transparency and openness, conducting business with integrity and fairness.

Global Understanding Through Business "Ritsugyo Boeki": Expand business, based on an all-encompassing global perspective.

■ Strategic Direction and Management Plan

In May 2022, Mitsubishi Corporation announced its new three-year management plan, entitled “Midterm Corporate Strategy 2024 - Creating MC Shared Value.”

In recent years, escalating geopolitical risk has created greater uncertainty throughout the Company’s operating environment; a challenge that is being compounded by the restructuring of global supply chains as well as the progress of digitalization and decarbonization. These increasingly diverse and complex societal and industry needs call for keen foresight.

Midterm Corporate Strategy 2024 will organically connect intelligence that takes advantage of the Company’s far-reaching industry expertise and global network, thereby strengthening the unique and collective capabilities of the Mitsubishi Corporation Group.

• Business Management [Connecting Our Businesses to the Future with Disciplined Growth]

Under Midterm Corporate Strategy 2024, Mitsubishi Corporation will develop systems that encourage its business groups to be both disciplined and proactive about strengthening their management practices. This work will help to strengthen the business groups' development capabilities and cross-industry connections.

Mitsubishi Corporation's HR policy under Midterm Corporate Strategy 2024 shall focus on creating a corporate culture that embraces diversity. Through the strategic allocation of its human resources, Mitsubishi Corporation will strive to invigorate and unlock the full potential of its organization.

Mitsubishi Corporation's unique definition of “materiality” covers a set of crucial societal issues to address through its business activities. In addition to classifying the Company's businesses based on climate transition risks and opportunities, Mitsubishi Corporation will monitor their progress and work to decarbonize them through various measures.

f. Principle 3-1 (ii)

■ Basic Stance and Policy on Corporate Governance

Mitsubishi Corporation's corporate philosophy is enshrined in the Three Corporate Principles. Through corporate activities rooted in the principles of fairness and integrity, Mitsubishi Corporation strives to continuously raise corporate value. Mitsubishi Corporation believes that by helping to enrich society, both materially and spiritually, it will also meet the expectations of shareholders, customers, and all other stakeholders.

In order to achieve these goals, Mitsubishi Corporation recognizes strengthening corporate governance on an

(Translation)

ongoing basis as an important management issue as it is foundation for ensuring sound, transparent and efficient management. Mitsubishi Corporation, based on the Audit & Supervisory Board Member System, is thus working to put in place a corporate governance system that is even more effective. This includes strengthening management supervision through such measures as appointing Outside Directors and Outside Audit & Supervisory Board Members who satisfy the conditions for Independent Directors or Independent Audit & Supervisory Board Members, and establishing advisory bodies to the Board of Directors where the majority of members are Outside Directors, Outside Audit & Supervisory Board Members and other experts from outside Mitsubishi Corporation. At the same time, Mitsubishi Corporation uses the Executive Officer System etc. for prompt and efficient decision-making and business execution.

In accordance with the above basic stance, Mitsubishi Corporation has set forth the Selection Criteria for Outside Directors and Outside Audit & Supervisory Board Members, which clarify the functions and independence of Outside Directors and Outside Audit & Supervisory Board Members, and also require that the number of Outside Directors who satisfy the criteria for independence be a third or more of the number of all Directors.

The Governance, Nomination and Compensation Committee with Outside Directors in the majority, deliberates and reviews the composition of the Board of Directors and the Audit & Supervisory Board, the policy on appointment of and proposals for appointment of Directors and Audit & Supervisory Board Members, the requirements of President and CEO and basic policy on the appointment and dismissal, personnel proposals of President and CEO, the remuneration system including the policy for setting remuneration and appropriateness of remuneration levels and composition, and evaluation of the effectiveness of the Board of Directors.

Furthermore, the President's Performance Evaluation Committee has been established as a subcommittee to the Governance, Nomination and Compensation Committee, comprising the same Chairman and Outside Directors as the parent committee to deliberate the assessment of the President's performance. In this way, Mitsubishi Corporation develops systems and mechanisms that ensure the effectiveness of management supervision by independent Outside Directors and Outside Audit & Supervisory Board Members.

As part of its policy to communicate with shareholders, Mitsubishi Corporation communicates with shareholders and investors in a proactive manner, and discloses information about business conditions including the progress in management plans, quantitative financial information, and non-financial information such as for corporate governance and sustainability & CSR affairs in a timely and appropriate manner. In addition, Mitsubishi Corporation is committed to gain credibility and reputation from stakeholders, including shareholders and investors, by improving the environment that allows shareholders to execute their rights.

For specific policies and approaches of above basic stance and basic policy, see the corresponding items in this report.

For the appointment of President and CEO, the requirements of the role, the basic policy on appointment, and selection of individual candidates are deliberated and reviewed by the Governance, Nomination and Compensation Committee where Outside Directors and Outside Audit & Supervisory Board Members have a majority (5 Outside Directors out of 8 Committee Members). Appointments are then decided by the Board of Directors, which also appoints and assigns duties to Executive Officers. Moreover, the policy and process for appointment and all appointment proposals of Directors and Audit & Supervisory Board Members and each appointment proposal are deliberated by the Governance, Nomination and Compensation Committee and resolved by the Board of Directors, before being presented at the Ordinary General Meeting of Shareholders. Supplementary explanation regarding applicable item

At their meeting held on May 17, 2019, the Board of Directors approved revisions to the package of remuneration for Executive Directors (Directors for business execution, excluding the Chairman of the Board and Outside Directors, hereinafter the same) of Mitsubishi Corporation effective from the fiscal year ended March 31, 2020, after the continuous deliberations of the Governance, Nomination and Compensation Committee and other meetings. Furthermore, at the 2019 Ordinary General Meeting of Shareholders, held on June 21, 2019, it was resolved to set limits on remuneration for Directors in accordance with the revisions of their remuneration package. Under the new remuneration package, remuneration for Executive Directors comprises base salary, annual deferral for retirement remuneration, individual performance bonus, performance-linked bonus (short term), performance-linked bonus (medium to long term), and stock-based remuneration linked to medium- and long- term share performances (stock options with market conditions). Of these, individual performance bonus, performance-linked bonus (short term), performance-linked bonus (medium to long term), and stock-based remuneration linked to medium- and long- term share performances are variable remuneration linked to factors such as individual performance, consolidated financial results (relevant fiscal year plus medium to long term), and share price. Under the new remuneration system, to strengthen the performance-linked component, remuneration shall not only be based on the relevant single-year's business results, but also be in line with medium-to-long-term corporate value. Remuneration composition shall be commensurate with the enhancement of medium-to-long-term corporate value based on a new stock-based component (with market conditions) that strengthens the link with shareholder value in addition to the cash component. Furthermore, the revised design raises the percentage of performance-linked remuneration based on the consolidated financial results (relevant fiscal year plus medium to long term) and growth in Total Shareholder Return (TSR). See "Detail of Policy for Setting Remuneration Amounts and Calculation Method" under II 1. [Disclosure Concerning Directors' Remuneration] for details.

Supplementary explanation regarding applicable item

(Translation)

Stock options as remuneration are granted to Executive Directors and Executive Officers from the perspective of aligning Directors' and Officers' interests with those of shareholders and providing incentives to enhance corporate value and to increase the Company's share price over the medium to long term. In principle, all stock options allocated cannot be exercised for a three-year performance period. The number of stock options that can be exercised at the end of the performance period varies depending on the share growth rate (calculated as TSR divided by the TOPIX benchmark growth rate over the same period). The basic policy is that Directors are obliged to hold any shares including those acquired through the exercise of stock options while in office. Sales of such shares are restricted until their aggregate market value exceeds approximately 200% to 300% of the base salary of each position.

The total number of shares to be issued for the purpose of stock acquisition rights on March 31, 2022 (including shares held by retirees) is as follows.

Stock-option-based remuneration (through the fiscal year ended March 31, 2007: granted to Directors and Executive Officers, 1 right=100 shares, from the fiscal year ended March 31, 2008 through the fiscal year ended March 31, 2019: granted to Directors, Executive Officers and Senior Vice Presidents ("Riji"), 1 right=100 shares, from the fiscal year ended March 31, 2020: granted to Directors and Executive Officers; 1 right=100 shares): 4,240,700 shares

Details of Policy for Setting Remuneration Amounts and Calculation Method

■ Policy for Setting Directors' and Audit & Supervisory Board Members' Remuneration

In line with the Basic Policy on Corporate Governance, Mitsubishi Corporation has established a remuneration package for Directors and Audit & Supervisory Board Members to ensure a sustainable increase in corporate value, and to ensure that their respective roles are fulfilled properly according to business execution and management supervision functions.

Mitsubishi Corporation's basic approach to its remuneration package for Directors and Audit & Supervisory Board Members is as follows.

● Remuneration levels

Levels of remuneration are set based on the functions and roles of the Directors and the Audit & Supervisory Board Members, the company's performance level and others. Furthermore, based on performance targets, Mitsubishi Corporation makes the level of remuneration globally competitive as management remuneration to foster a desire for growth among human resources bearing the next generation of management and to improve organizational vitality.

● Remuneration composition

With regard to remuneration for Executive Directors, to strengthen the performance-linked component, remuneration shall not only be based on the relevant single-year's business results, but also be in line with medium-to-long-term corporate value. Remuneration composition shall be commensurate with the

(Translation)

enhancement of medium-to-long-term corporate value based on a new stock-based component (with market conditions) that strengthens the link with shareholder value in addition to the cash component. From this perspective, consolidated net income (single year and medium to long term), the share price and share growth rates (medium to long term) are adopted as key performance indicators.

For the Chairman of the Board and Outside Directors, who are performing a supervisory function for management, and for Audit & Supervisory Board Members, who undertake audits, there is a need to ensure their independence so that they can properly assume their respective roles. For this reason, they are paid only fixed base salary and are not paid variable remuneration.

- Governance of remuneration

The Governance, Nomination and Compensation Committee(*1), which comprises a majority of Outside Directors and Outside Audit & Supervisory Board Members, continuously deliberates upon and monitors the policy for setting Directors and Audit & Supervisory Board Members' remuneration, the appropriateness of remuneration levels and composition including remuneration items(*2) which are subject to the clawback policy, the operating status of the remuneration package, and other matters.

*1 See "Details of Establishment, Members, and Attribute of Chairperson" and "Notes" under II 1. [Directors] in this report for details.

*2 To enhance the management from the longer-term perspective, Mitsubishi Corporation has adopted a clawback policy, applicable to the individual performance, performance-linked bonuses (short term) and performance-linked bonuses (medium to long term) of Executive Directors.

In addition, non-payment or reduction of the amount is possible by resolution of the Board of Directors in the event of serious violation of a delegation agreement etc, regarding annual deferral for retirement remuneration.

(1) Remuneration package for Directors and Audit & Supervisory Board Members (fiscal year ended March 31, 2020 onward)

i) Executive Directors (who also serve as Executive Officers)

The remuneration for Executive Directors (who also serve as Executive Officers) is as follows.

- Base Salary

An amount determined by board of directors according to position, paid monthly.

- Annual Deferral for Retirement Remuneration

Annual deferral for retirement remuneration is set aside from the base salary in a certain amount every year as consideration for the performance of duties, and the accumulated amount is calculated and paid in full upon retirement of a Director by resolution of the Board of Directors. If a Director makes a serious violation of the appointment contract between the Company and the Director with regard to the Directors' duties during the term of office, the Board of Directors may resolve to reduce or not to pay the accumulated amount.

- Individual Performance Bonus

For Executive Directors, individual performance bonuses are determined and paid on an individual basis after the President's yearly performance assessment of each Director for the relevant fiscal year (The Board of Directors delegated authority to the Presidents for decision of individual payment amounts). The assessment on the President's performance is deliberated and decided by the President's Performance Evaluation Committee, a subcommittee to the Governance, Nomination and Compensation Committee. The subcommittee comprises the

(Translation)

Chairman, who also serves as the Chairman of the Governance, Nomination and Compensation Committee, and Outside Directors sitting on the committee. The main evaluation points for the President's performance evaluation include the status of progress on management strategy, the status of achievement of forecast earnings, and the status of other business management. Results of performance assessments are reported to the Board of Directors and the Governance, Nomination and Compensation Committee.

· Performance-linked Bonus (Short term)

Performance-linked bonuses (short term) are paid in amount determined in line with consolidated net income in the relevant fiscal year based on a formula resolved by the Board of Directors after deliberation by the Governance, Nomination and Compensation Committee. If consolidated net income (attributable to owners of Mitsubishi Corporation) for the relevant fiscal year exceeds the level of earnings that leads to enhanced corporate value (the consolidated capital cost), the amount to be paid will be adjusted in line with business performance. Meanwhile, if consolidated net income is below the consolidated capital cost, no bonuses will be paid. Moreover, the total amount to be paid is capped.

· Performance-linked Bonus (Medium to long term)

Performance-linked bonuses (medium to long term) are paid in amount determined in line with consolidated net income over the medium to long term based on a formula resolved by the Board of Directors after deliberation by the Governance, Nomination and Compensation Committee. If the average of consolidated net income (attributable to owners of Mitsubishi Corporation) over the relevant fiscal year and subsequent two fiscal years exceeds the average of consolidated capital cost over that same period, the amount to be paid will be adjusted in line with business performance over the medium to long term. Meanwhile, if the average consolidated net income is below the average consolidated capital cost, no bonuses will be paid. Moreover, the total amount to be paid is capped.

· Stock-based Remuneration Linked to Medium- and Long-term Share Performances

Stock-based remuneration is paid to Executive Directors and Executive Officers from the perspective of aligning Directors' and Officers' interests with those of shareholders and providing incentives to enhance corporate value and to increase the Company's share price over the medium to long term. The board of directors determines the number of shares allocated to each person.

All stock options allocated cannot be exercised for a three-year performance period. The number of stock options that can be exercised at the end of the performance period varies depending on the share growth rate (calculated as TSR divided by the TOPIX benchmark growth rate over the same period).

The basic policy is that Directors are obliged to hold any shares including those acquired through the exercise of stock options while in office. Sales of such shares are restricted until their aggregate market value exceeds approximately 300% of the base salary of each position.

ii) Chairman of the Board, Outside Directors, and Audit & Supervisory Board Members

The Chairman of the Board and the Outside Directors, who do not also serve as Executive Officers, must fulfill a supervisory function for management in an appropriate manner, while the Audit & Supervisory Board Members must perform audits appropriately. Accordingly, there is a need to ensure their independence. For this reason, they are paid only fixed monthly remuneration, which does not have a component linked with business results.

(Translation)

(2) The Method for setting remuneration for Directors and Audit & Supervisory Board Members

i) Directors

The Governance, Nomination and Compensation Committee deliberates and the Board of Directors decides the policy for setting Directors' remuneration and the remuneration amount (actual payment amount).

The total remuneration amount (actual payment amount) and individual payment amounts for Directors, excluding individual performance bonuses, are determined by a resolution of the Board of Directors within the upper limits for each type of remuneration decided by resolution of the Ordinary General Meeting of Shareholders held on June 21, 2019. Base salary and annual deferral for retirement remuneration, forms of fixed remuneration, are paid in amounts determined by the Board of Directors. As for variable remuneration, payments of performance-linked bonuses (short term), performance-linked bonuses (medium to long term) and stock-based remuneration linked to medium- to long-term share performance are determined, while reflecting key performance indicators (KPIs), based on a formula set by the Board of Directors following deliberation by the Governance, Nomination and Compensation Committee.

Mitsubishi Corporation has adopted a clawback policy,* applicable to the individual performance bonuses, performance-linked bonuses (short term) and performance-linked bonuses (medium to long term) of Executive Directors, revising the regulations for executive officers by resolution at the Board of Directors' Meeting held on February 18, 2022.

* In the event that an Executive Officer causes any loss or damage to the Company from willful misconduct or negligence, a serious violation of a delegation agreement, or a serious accounting error or act of misconduct resulting in an ex-post revision of a financial report by resolution of the Board of Directors, non-payment or reduction of the amount/reclaiming of the paid amount is possible by resolution of the Board of Directors. The Governance, Nomination and Compensation Committee continuously deliberates and monitors the appropriateness of remuneration compositions, including remuneration items which are subject to the clawback policy.

The payment amounts of individual performance bonuses paid to Directors based on their individual performance assessment, including qualitative assessment, are determined and paid on an individual basis, reflecting the President's yearly performance assessment of each Director for the relevant fiscal year (the Board of Directors delegates authority to the President for deciding the individual payment amounts). Performance evaluations of Executive Directors comprehensively take into account their contributions to the organizations and businesses they oversee; their contributions to management of the entire Company, Corporate Staff Section, Business Groups and offices; the achievement of triple-value growth; and the state of sustainability initiatives from an ESG perspective.

The annual assessment on the President's performance is decided by the President's Performance Evaluation Committee, which is delegated this authority by the Board of Directors (and is a subcommittee of the Governance, Nomination and Compensation Committee). The subcommittee is comprised of the Chairman of the Board, who also serves as the chair of the Governance, Nomination and Compensation Committee, and Outside Directors sitting on the committee (see page 26). Results of the performance assessment are reported to the Board of Directors and the Governance, Nomination and Compensation Committee to ensure objectivity, fairness and transparency.

(Translation)

Based on the policy for determining remuneration packages (including methods for calculating performance-linked bonuses) that was approved at the ordinary meeting of the Board of Directors held on May 17, 2019, and the extraordinary meeting of the Board of Directors held on June 21, 2019, each year, the Governance, Nomination and Compensation Committee deliberates and the Board of Directors makes a resolution determining that the total amount of director remuneration packages and methods for deciding payments to individual directors are consistent with said policy for determining remuneration packages. Each year, the Governance, Nomination and Compensation Committee deliberates and monitors the appropriateness of the remuneration levels, compositions including remuneration items which are subject to the clawback policy and the status of implementation. The remuneration levels and composition are analyzed based on compensation data provided by the external consulting firm Willis Towers Watson (WTW).

The assurance of independence is necessary for the Chairman of the Board and Outside Directors, who undertake functions of management oversight, in order for them to appropriately perform their respective roles. For this reason, Mitsubishi Corporation will pay them only fixed monthly remuneration, and not remuneration that is linked with business results.

ii) Audit & Supervisory Board Members

The total amount of remuneration and individual payment amounts for Audit & Supervisory Board Members are determined by discussions by the Audit & Supervisory Board Members within the upper limits for Audit & Supervisory Board Member remuneration decided by resolution of the 2019 Ordinary General Meeting of Shareholders, held on June 21, 2019.

The assurance of independence is necessary for Audit & Supervisory Board Members, who undertake audits, in order for them to appropriately perform their respective roles. For this reason, Mitsubishi Corporation will pay them only fixed monthly remuneration, and not remuneration that is linked with business results.

[Support System for Outside Directors (Outside Audit & Supervisory Board Members)]

To ensure that the Directors and Audit & Supervisory Board Members are able to perform their management supervision and audit functions adequately, the Board of Directors' Office and the Audit & Supervisory Board Members' Office have been established, and have been providing necessary and support information appropriately and in a timely manner for them to perform their duties.

Prior to each Board of Directors meeting, opportunities are created for the management of the Corporate Staff Section and Business Groups to provide explanatory summaries of the agenda items for which they are responsible to Outside Directors and Outside Audit & Supervisory Board Members in order to facilitate substantive deliberations at the meetings (totaling 28 hours in the fiscal year ended March 31, 2022). The sessions are also utilized to appropriately share timely information that helps enhance deliberations at the meetings. The offices also provide an orientation to newly appointed Outside Directors and Outside Audit & Supervisory Board Members, as well as ongoing opportunities to deepen their understanding of the businesses and strategies of Mitsubishi Corporation including site visits of business investees, opportunities for dialogue with the management executives, for dialogue with Business Group CEOs, Business Division COOs and General Managers, and small group discussions with Executive Vice Presidents. Furthermore, to enhance the effectiveness of the Board of Directors, Mitsubishi Corporation holds meetings of the Governance, Nomination and Compensation Committee and the President's Performance Evaluation Committee which comprise a

(Translation)

majority of Outside Directors and Outside Audit & Supervisory Board Members in their memberships. Also, Mitsubishi Corporation holds exclusive meetings of Independent Outside Directors and Outside Audit & Supervisory Board Members at least four times a year to facilitate the exchange of information and sharing of ideas from an independent and objective standpoint in order to sustain growth and enhance corporate value over the medium and long term. These discussions are reported to the Board of Directors as necessary.

(See V 2. for the framework of Mitsubishi Corporation's Corporate Governance System.)

(1) Board of Directors

The Board of Directors is responsible for making decision concerning important management issues and overseeing business execution. In-house Directors utilize their rich experience of working within Mitsubishi Corporation and Outside Directors utilize their practical, objective and professional perspectives to ensure appropriate decision-making and management oversight.

In the fiscal year ended March 31, 2022, 13 Board of Directors meetings (11 ordinary meetings, 2 extraordinary meetings) were held, and all in-house Directors and Audit & Supervisory Board Members were present at all meetings of the Board of Directors during their terms of office, and the attendance status of all Outside Directors and Outside Audit & Supervisory Board Members at the Board of Directors meetings is described on page 85-86 of the Notice of 2022 Ordinary General Meeting of Shareholders (English version), which is posted on the website below.

https://www.mitsubishicorp.com/jp/en/ir/adr/sh_meeting/

The size and composition of the Board of Directors and the policy and process for appointing nominated Directors are deliberated at the Governance, Nomination and Compensation Committee with Outside Directors in the majority and then decided by the Board of Directors as follows:

a. Size and Composition of the Board of Directors and the Policy for Appointing Nominated Directors

To ensure Mitsubishi Corporation's decision-making and management oversight are appropriate for Mitsubishi Corporation which is involved in diverse businesses and industries in a wide range of fields, and from the perspective of ensuring diverse standpoints, several Directors are appointed from both within and outside Mitsubishi Corporation with the depth of experience and high levels of knowledge and expertise needed for fulfilling their duties.

More specifically, in addition to Chairman of the Board and the President and CEO, Mitsubishi Corporation's In-house Directors are appointed from Executive officers (Senior Executive Vice Presidents & Executive Vice Presidents) responsible for companywide management so that they can fully leverage their abundant business experience to ensure appropriate decision making and robust management supervision by the Board of Directors. Outside Directors are appointed from those who possess a practical perspective founded on a wealth of experience and those who possess an objective and professional perspective with a deep insight on global situation and socio-economic trends. These individuals thus contribute to appropriate decision making and robust management supervision by the Board of Directors as they bring diverse perspectives into its deliberations.

The composition and size of the Board of Directors is appropriately determined to help it maintain transparent, fair, timely and decisive decision-making and carry out effective oversight, with one third or more being made up of Outside Directors.

In addition, matters requiring resolution in accordance with laws and regulations, and loan and investment proposals exceeding a monetary threshold standard set by the Company are deliberated and resolved with an emphasis not only on the economic aspects, but also on ESG perspectives. Mitsubishi Corporation has also constructed appropriate internal control systems, and checks their operational status every year in order to work toward their continuous improvement and strengthening.

Business execution other than these matters for resolution by the Board of Directors is entrusted to Executive Officers by appointing the President as the Chief Executive Officer responsible for business execution, and the Executive Committee (meets twice monthly) as a management decision-making body.

Throughout the fiscal year ended March 31, 2022, the Board of Directors reviewed Midterm Corporate Strategy 2021 both at its meetings and using other opportunities for discussion on a supplementary basis. The Audit & Supervisory Board comprises all of the Audit & Supervisory Board Members responsible for auditing the decision-making processes and management performance of Directors according to the Companies Act and other laws and regulations, Mitsubishi Corporation's Articles of Incorporation and internal rules and regulations. Full-time Audit & Supervisory Board Members conduct audits based on many years of experience working within Mitsubishi Corporation, while Outside Audit & Supervisory Board Members conduct audits from a neutral and objective perspective based on extensive experience in their respective fields of expertise, to ensure that management is sound. In addition, the Audit & Supervisory Board passes resolutions on matters required by law and other important issues, and each Audit & Supervisory Board Member reports and shares information on the status of audit activities.

The size and composition of the Audit & Supervisory Board and the policy and procedure for appointing nominated Audit & Supervisory Board Members are deliberated by the Governance, Nomination and Compensation Committee with Outside Directors in the majority, and then, decided by the Board of Directors as follows:

a. Size and Composition of the Audit & Supervisory Board and the Policy for Appointing Nominated Audit & Supervisory Board Members

To ensure Mitsubishi Corporation's sound business development and improve its social credibility through audits, several Audit & Supervisory Board Members are appointed from within and outside Mitsubishi Corporation with the depth of experience and high level of expertise needed for conducting audits.

More specifically, full-time Audit & Supervisory Board Members are appointed from those with knowledge and experience in corporate management, finance, accounting, risk management or other areas. 3. Reason for Selecting Present Corporate Governance System

Mitsubishi Corporation recognizes strengthening corporate governance on an ongoing basis as its important subject concerning management as it is foundation for ensuring sound, transparent and efficient management. Mitsubishi Corporation, based on the Audit & Supervisory Board Member System, is thus working to put in place a corporate governance system that is even more effective. This includes strengthening management supervision by appointing Outside Directors and Outside Audit & Supervisory Board Members who satisfy the conditions for Independent Directors or Independent Audit & Supervisory Board Member, and establishing advisory bodies to the Board of Directors where the majority of members are Outside Directors and Outside Audit & Supervisory Board Members and other experts from outside Mitsubishi Corporation. At the same time, Mitsubishi Corporation uses the Executive Officer System etc. for prompt and efficient decision-making and business execution. The concept and system of corporate governance were deliberated in the Governance, Nomination and Compensation Committee where Outside Directors and Outside Audit & Supervisory Board Members had a majority, and Mitsubishi Corporation confirmed their effectiveness in the existing system. As noted in I 1. m.
