**Re: Resumption of Sales of “HINO Profia”, a Heavy-Duty Truck Equipped with
A09C Engine**

On January 31, 2023, we have received type-approval from the Ministry of Land, Infrastructure, Transport and Tourism (MLIT) for the HINO Profia, a heavy-duty truck equipped with the A09C Engine, which was one of the models subject to cancellation of type-approval, for which we subsequently reapplied. In order to deliver these vehicles to waiting customers, we will promptly prepare for the resumption of sales thereof, and we plan to resume shipping from mid-February.

On January 27, we also reapplied for the type-approval of HINO S'elega, a heavy-duty bus also equipped with the A09C Engine. Upon receipt of type-approval from the MLIT, we will promptly prepare for the resumption of sales of the HINO S'elega as well.

We remain committed to the promotion of structural reforms for consecutive vehicle manufacturing from development through regulatory certification and quality assurance, as well as management reforms to emphasize respect for all Hino staff and promote acting with integrity. In addition, our organizational culture reforms foreground respect for all Hino staff as a core value.

Each and every one of us cares about the link between each of our work products and society, and we aim to fulfill our social responsibilities effectively together.

Hino is currently investigating the impact of these matters on its earnings and will disclose any updates as appropriate in a timely manner.
