### 3. Consolidated Financial Results Forecast for the Fiscal Year Ending March 31, 2023 (April 1, 2022 to March 31, 2023)

(% indicates changes from the previous corresponding period.)

	Net sales		Operating income		Ordinary income		Profit attributable to owners of parent		Earnings per share
	Million yen	%	Million yen	%	Million yen	%	Million yen	%	Yen
Full year	210,000	15.4	500	-	2,500	27.3	(2,000)	-	(44.99)

Note : Revision to the financial results forecast announced most recently ... Yes

#### 4. Notes

(1) Changes in significant subsidiaries during the period under review

(changes in specified subsidiaries resulting in changes in scope of consolidation): None

New: - (Company name); Excluded: - (Company name)

(2) Accounting policies adopted specially for the preparation of quarterly consolidated financial statements: None

(3) Changes in accounting policies, changes in accounting estimates and retrospective restatement

1) Changes in accounting policies due to the revision of accounting standards: Yes

2) Changes in accounting policies other than 1) above: None

3) Changes in accounting estimates: Yes

4) Retrospective restatement: None

(4) Total number of issued shares (common shares)

1) Total number of issued shares at the end of the period (including treasury shares):

First Nine Months of FY2022 44,741,433 shares

FY2021 44,741,433 shares

2) Total number of treasury shares at the end of the period:

First Nine Months of FY2022 997,190 shares

FY2021 288,324 shares

3) Average number of shares during the period:

First Nine Months of FY2022 44,200,630 shares

First Nine Months of FY2021 44,571,214 shares

Notes: The Company has adopted a BIP (Board Incentive Plan) trust, assuming the number of shares held by the trust are included in the number of treasury stock of "(4) Total number of issued shares (common shares)".

## 1. Qualitative Information on Quarterly Financial Results for the Period under Review

### (1) Explanation of Operations Results

Forward-looking statements supplied below are forecasts Mitsubishi Paper Mills Limited and its consolidated subsidiaries (the “Group”) made as of the last day of the period under review.

#### (1) State of Operating Results

In the nine months ended December 31, 2022, economic activities continued to recover to a certain extent, assisted by efforts to prevent COVID-19’s spread consistent with those activities. Meanwhile, uncertainties remained high over matters such as prolongation of the situation in Ukraine and steep rises in raw material and fuel prices, as well as exchange rate fluctuations.

Sharp rises in the prices of fuels, such as crude oil, coal, natural gas, and wood chips, affected the Group significantly while the environment surrounding the Group shift to post-COVID-19’s.

Under these circumstances, the Group worked to improve productivity by maintaining production systems in line with demand trends in each business and, in term of sales, strived to revise product prices and expand sales of new products.

The Group also began executing the Medium-Term Management Plan (for the fiscal year ending March 31, 2023 to the fiscal year ending March 31, 2025) in the ongoing fiscal year, adopting “Creation of a New Mitsubishi Paper Mills Group” as a slogan.

The basic policy of the Medium-Term Management Plan (for the fiscal year ending March 31, 2023 to the fiscal year ending March 31, 2025) is as follows.

- (i) Strengthen our revenue base through selection and concentration strategies and expansion of new business
- (ii) Contribution to a green society
- (iii) Organizational change to improve sustainability

In line with the policy of the Medium-Term Management Plan, the Group decided to sell the business it operated at the Flensburg Mill of its Germany subsidiary on January 30, 2023. On April 1, 2023, we plan to reorganize the group, including the integration of our company and our subsidiaries at the Kitakami Site. Going forward, we will continue to promote selection and concentration as a measure to improve profitability and reform the organization of the group.

As a result, consolidated net sales amounted to 154,522 million yen (up 17.1% year on year) in the first nine months under review due to revision of product prices in response to a steep rise in the prices of raw materials and fuel.

Profitability was significantly affected by surging raw material and fuel prices, despite the effect of cost-cutting initiatives linked mainly to product price revisions, fixed cost reduction and the improvement of carbon intensity. Consequently, consolidated operating loss came to 1,325 million yen (compared with operating income of 192 million yen in the first nine months of the previous fiscal year), consolidated ordinary income was 653 million yen (compared with consolidated ordinary income of 1,200 million yen in the first nine months of the previous fiscal year) due in part to foreign exchange gains, and loss attributable to owners of parent stood at 4,818 million yen primarily due to provision of allowance of loss on business transfer as a result of the sale of the business operated at the Flensburg Mill of the Germany subsidiary.

Operating results by segment are as follows:

In the first three months, the Company changed reportable segments to match its internal organization. Specifically, the Company added the warehouse and transportation business to the paper and pulp business to create the paper materials business segment and set up the functional materials business segment by integrating the imaging media business with the specialty materials business.

(Million yen)

		Net sales			Operating income (loss)		
		Nine months ended December 31, 2021	Nine months ended December 31, 2022	Change (%)	Nine months ended December 31, 2021	Nine months ended December 31, 2022	Change (%)
Reportable Segments	Paper materials	103,644	122,897	18.6	(2,152)	(4,258)	–
	Functional materials	36,627	43,842	19.7	2,414	2,956	22.4
	Total	140,272	166,740	18.9	262	(1,301)	–
Others		4,449	4,160	(6.5)	38	96	152.4
Total		144,721	170,900	18.1	300	(1,205)	–
Adjustment (Note)		(12,793)	(16,378)		(107)	(120)	
Total		131,927	154,522	17.1	192	(1,325)	–

(Note) Adjustment is mainly related to internal transactions.

(Paper materials business)

In Japan, the sales volume fell below the previous fiscal year's level. However, the sales value increased given the positive effects of price revisions. In terms of exports, sales volume also fell below the level in the previous fiscal year, although the value of sales increased partly due to the positive effects of foreign exchange rates.

Regarding commercial pulp, the sales value increased, reflecting the implementation of selling price revisions due to a steep rise in international market prices, although the sales volume remained flat.

At Germany subsidiaries, while sales volume decreased year on year, selling prices were revised in response to sharp rises in the prices of raw materials and fuel such as natural gas and pulp, which resulted in higher sales value.

However, the above price revisions could not compensate for the rises in raw materials and fuel prices, and the paper materials business resulted in an increase in sales and a decrease in profit.

In addition to the penetration of the third price increase, optimization of the production system, and consolidation of brands that we are currently working on, we will expand the lineup of new materials such as bleached kraft pulp, kraft paper, and barrier paper made from 100% domestic softwood. We aim to transform our product portfolio and stabilize earnings at an early stage.

Germany subsidiaries will continue to aim to create a structure which enables stable revenue to be secured. To do this, the Group will continue its efforts to pass on cost increases appropriately through product prices, while simultaneously continuing to work to reduce costs by rebuilding its production systems.

(Functional materials business)

In the functional materials business, sales of water treatment membrane supporting bodies, decorative laminate base paper, tape base paper, etc. rose steadily, however, sales fell year on year for filters and backing paper for wall paper. Sales of electronics-related products increased year on year, reflecting higher overseas sales for battery separators and electronics industry materials.

The Group enhanced its lineup of melt blown non-woven fabrics by providing fabrics for use in face masks and high functional air filter filtration materials while also expanding sales of original alcohol-based sanitizer/disinfectants with a focus on educational facilities and medical institutions.

The sales volume of imaging media-related products fell below the previous fiscal year's level, although the value of sales remained flat from the previous year due to the impact of sales price revisions and foreign exchange rates.

As a result, the functional materials business achieved growth in both sales and profit overall due to price revisions and the expansion of sales of growth items, despite the impact of the sharp increase of prices of raw materials and fuel.

In the functional non-woven fabrics-related business, which is a priority business area in the Medium-term Management Plan, the Group seeks to expand sales of items such as heat-resistant non-woven fabrics and melt blown non-woven fabrics, while also seeking to acquire new users of water treatment membrane supporting bodies and new applications for them for special membranes by accurately addressing demand for water-related businesses overseas. In electronics-related products, it will focus on sales of electronics industry materials, starting with battery separators and special dry resists for automobiles, energy-saving devices and communication devices. It will strive to further expand sales of decorative laminate base paper, tape base paper whose sales remain strong.

Regarding imaging media-related products, the Group will focus on expanding exports while at the same time striving to improve profitability by continuing to review production systems for items with decreasing demand.

## (2) Explanation of Financial Position

Assets at the end of the first nine months under review amounted to 231,333 million yen, up 15,454 million yen from the end of the previous fiscal year, mainly due to increases in accounts receivable - trade and inventories.

Total liabilities came to 164,800 million yen, up 18,534 million yen from the end of the previous fiscal year, chiefly attributable to a growth in notes and accounts payable - trade and commercial papers.

Net assets decreased 3,080 million yen from the end of the previous fiscal year, to 66,533 million yen, mainly reflecting the posting of loss attributable to owners of parent.

The equity ratio was 28.8%, down 3.4 percentage points from the end of the previous fiscal year.

## (3) Explanation of Consolidated Financial Results Forecast and Other Forward-looking Information

In conjunction with consolidated results forecasts for the fiscal year ending March 31, 2023, the Group has revised the results forecasts announced on November 14, 2022. For details, please see the Notice Regarding Revisions to Consolidated Results Forecasts released today.
