Urayasu City in Chiba Prefecture Begins Operation of In-Home Medical Care and Long-Term Care Collaboration System Utilizing Kanamic Cloud Services

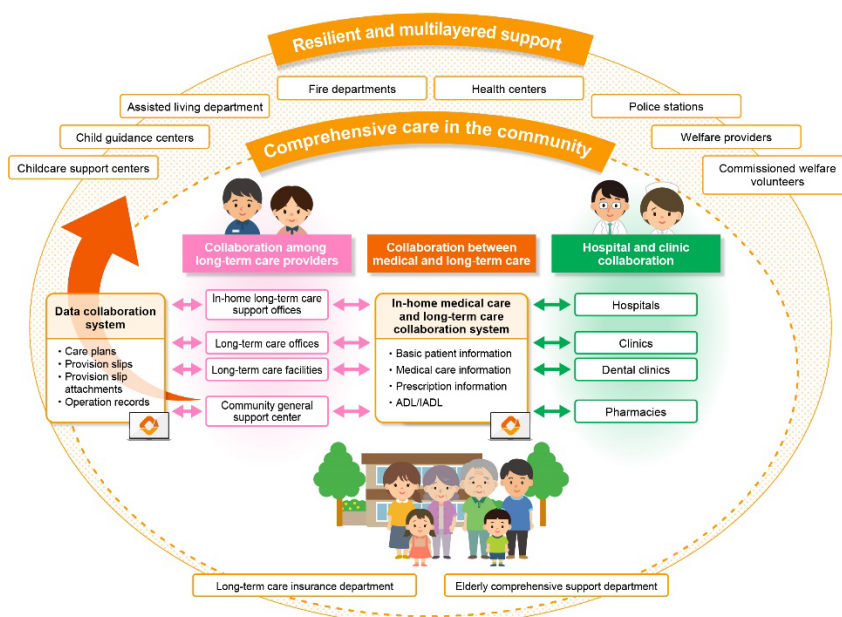

Kanamic cloud services, provided by Kanamic Network Co., Ltd. (head office: Shibuya-ku, Tokyo; Representative Director and President: Takuma Yamamoto; hereinafter, the “Company”), have been adopted by Urayasu City, Chiba Prefecture, as an in-home medical care and long-term care collaboration system.

The Company will utilize the expertise gained through “Kanamic cloud services” to make further contributions to the promotion of collaboration between in-home medical care and long-term care in Urayasu City.

■ About Urayasu City In-Home Medical Care and Long-Term Care Collaboration System

Urayasu City will introduce and operate the Kanamic cloud services information sharing system (hereinafter, the “system”), equipped with a function for sharing information on in-home care patients, in order to support inter-professional medical and long-term care related to these patients. The introduction of this system will improve the quality of life for in-home care patients by shortening the time required for inter-professional information transmission between medical and long-term care professionals, while also improving the accuracy of information transmission through explanations using videos and images, and enhancing systems for providing in-home medical care and long-term care services through improvements to the efficiency of administrative work.

Furthermore, the system enables long-term care providers participating in this collaboration to improve operational efficiency and reduce costs, thereby contributing to a better work environment, by facilitating the exchange of home-based service plans and service provision slips on the system, as a platform for collaboration on care plan data based on the “Standard Specifications for Data Collaboration Between In-Home Long-Term Care Support Offices and Long-Term Care Service Providers, Medical Institutions, etc.” defined by the Ministry of Health, Labour and Welfare.

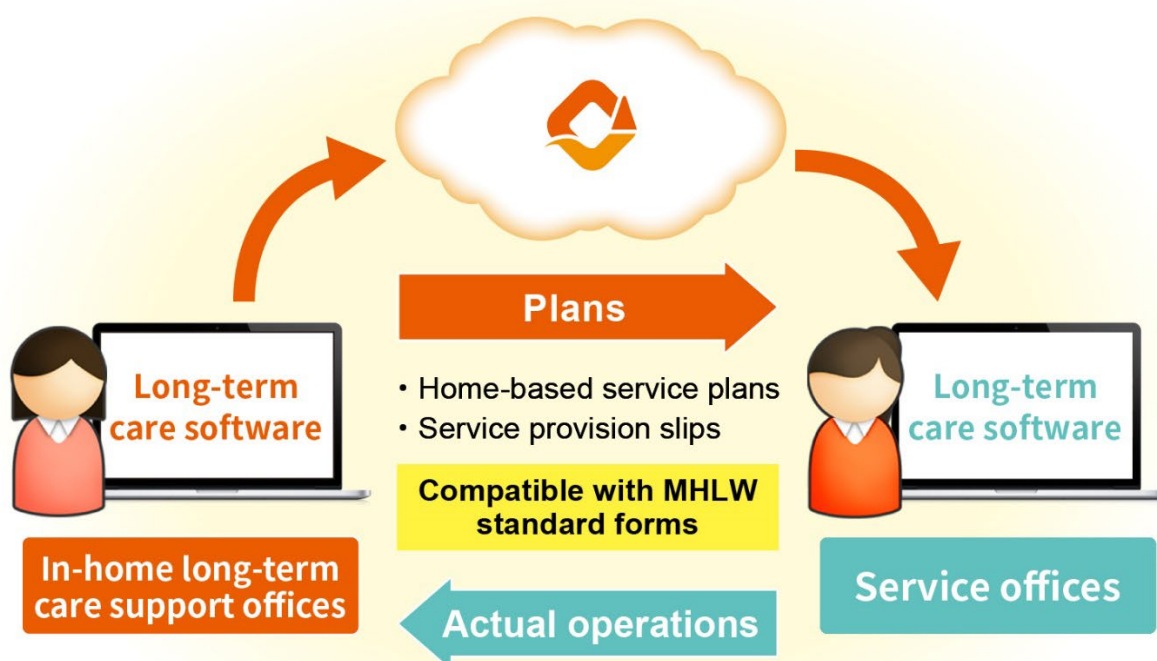

■ Care Plan Data Collaboration System in Kanamic Cloud Services

This system is a platform for collaboration on data between in-home long-term care support offices and long-term care service providers (care plan data collaboration).

It has a function for sending and receiving CSV data in a standard format based on the “Standard Specifications for Information Collaboration Between In-Home Long-Term Care Support Offices and Providers of Home-Visit Long-Term Care and Other Services” announced by the Ministry of Health, Labour and Welfare.

■ About “Kanamic Cloud Services”

Kanamic cloud services are community collaborative services that enable inter-professional communication for local governments, medical associations, and long-term care service providers in order to contribute to the realization of the Community-based Integrated Care System required by a super elderly society. We provide information sharing systems for inter-professional and inter-company communication and business systems for long-term care service providers.
