 Director and President
 (Securities code: 3939, TSE Prime Market)

Kanamic Cloud Services Long-Term Care Business Management System to Be Compatible with “Care Plan Data Collaboration”

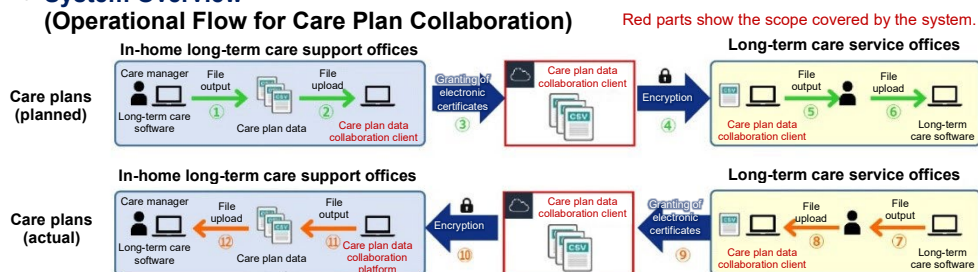

Kanamic Network Co., Ltd. (head office: Shibuya-ku, Tokyo; Representative Director and President: Takuma Yamamoto; hereinafter, the “Company”) will support the “Care Plan Data Collaboration System,” which the All-Japan Federation of National Health Insurance Organizations will begin operating in April 2023.

In addition, the Company will provide functions that enable users and partners of Kanamic cloud services to collaborate on care plans free of charge, even between different long-term care software.

● Proposed Schedule Until Start of Operation

● System Overview (Operational Flow for Care Plan Collaboration)

* Sufficient consideration is given to security measures to ensure information can be exchanged with peace of mind.

■ Care Plan Data Collaboration Can Be Expected to “Reduce Work Hours” and “Reduce Costs”

According to estimates by the All-Japan Federation of National Health Insurance Organizations, the benefits of care plan data collaboration include the following points, and the federation explains that collaboration will lead to further improvements in user support by reducing the operational workload.

- ① **The time** required to share service provision slips **will be around one-third of before.**
- ② **Cost savings of 816,000 yen per year.** (Labor expenses reflecting the reduced time, printing expenses, communications expenses, transportation expenses, etc.)
- ③ Transcription errors will be eliminated, **reducing the psychological burden.**

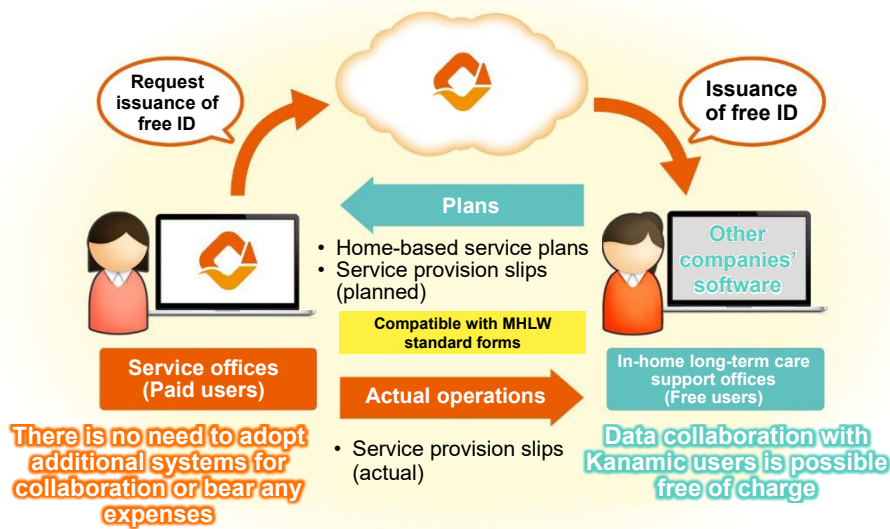

Kanamic cloud services provided by the Company satisfy the criteria for “long-term care software conforming to the Ministry of Health, Labour and Welfare's care plan standard specifications,” which is one of the requirements for using the care plan data collaboration of the All-Japan Federation of National Health Insurance Organizations.

- Collaboration with Different Long-Term Care Software (Care Plan Data Collaboration) Will Be Possible Even Just with Kanamic

Kanamic cloud services have a “care plan collaboration function” as a standard function

With the mission of “using cloud technology to support regional comprehensive care,” the Company has long offered collaboration functions that leverage the advantages of cloud-based services.

Kanamic user partners can use the Kanamic care plan data collaboration function free of charge, and the Company also offers a care plan data collaboration function with no additional fees for collaboration by users as a standard function.

Outline of Kanamic Cloud Services Care Plan Data Collaboration

- About “Kanamic Cloud Services”

Kanamic cloud services are community collaborative services that enable inter-professional communication for local governments, medical associations, and long-term care service providers in order to contribute to the realization of the community-based comprehensive care system required by a super elderly society. We provide information sharing systems for inter-professional and inter-company communication and business systems for long-term care service providers.
