Reasons for Non-compliance with the Principles of the Corporate Governance Code

The Company complies with every principle of the Corporate Governance Code.

Disclosure Based on the Principles of the Corporate Governance Code

Principle 1.4: Cross-shareholdings

Cross-shareholding policy

The Company holds shares in its customers' and business partners' firms for the purpose of maintaining and developing medium to long-term business relationships and also for the purpose of collecting information in anticipation of future business alliances.

Verifying the suitability of cross-shareholdings

To verify the suitability of holding these cross-shareholdings, the Board of Directors examines and deliberates on the appropriateness of the purpose of each of the holdings every year. If any circumstances change in the future which lead us to determine that a cross-shareholding is no longer appropriate, we will review and reduce it.

Criteria for exercising voting rights pertaining to cross-shareholdings

With regard to exercising the voting rights pertaining to the shares it holds, the Company believes that exercising these voting rights appropriately will help improve the medium to long-term value and sustainable growth of the stock issuer. The Company thus strives to comprehensively assess the advantages and disadvantages of the agenda proposals based on the financial and non-financial conditions of the issuing company.

Principle 1.7: Related Party Transactions

The Company's Rules for the Board of Directors stipulate that any transactions between related parties must be approved by the Board of Directors in advance and that a report shall be submitted to the Board of Directors after any transaction has taken place. In addition, each Director is required to report regularly on the concurrent appointment as officer at other companies and any transactions between related parties, among other matters, and to promptly report any changes in those circumstances so that we have a system in place that can constantly manage the latest information.

Supplementary Principle 2.4.1: Appointing women, non-Japanese and mid-career professionals to middle managerial positions

The Company is working to promote the active participation of women through three target goals: boosting the ratios of women employees to 22%, women managerial candidates to 10%, and women managers to 6%. As of April 1, 2023, the Company's ratios of women employees, women managerial candidates, and women managers are 20.0%, 8.1%, and 3.8%, respectively.

With particular reference to promoting the active participation of women in the workplace, the Company is building more flexible working environments in terms of working hours and locations in order to eliminate the gender gap regarding employment continuity and workplace activities, which are major issues, and to maximize the abilities of each individual. The Company is also working on training all employees, creating opportunities for interaction, and developing and promoting women employees based on an analysis of their roles and business assignments. Since fiscal 2022, promoting two women employees to general managers, the Company is continuously seeking to revitalize our whole organization and encourage corporate growth. These individual targets and results are disclosed in our integrated report.

(Integrated Report: <https://www.dts.co.jp/ir/library/report/>)

Furthermore, in order to grow the DTS Group, we believe we urgently need to foster and secure human resources with direct experience of business promotion in new fields, such as digital transformation (DX) in particular. The Company always bears in mind the need to ensure diversity and are striving to secure human resources who will help expand and promote our business.

Regarding non-Japanese or mid-career professionals, there is no special difference between candidates appointed as managers with reference to their nationality or when they were hired, and as of April 1, 2023, the ratio of mid-career professionals in managerial positions was 32.5%, and the number of non-Japanese manager was one. The Company will keep the present ratio of mid-career professionals in managerial positions, and appoint non-Japanese managers, taking into account the ratio of non-Japanese employees in all employees.

Principle 2.6: Roles of Corporate Pension Funds as Asset Owners

In recognition of the fact that management of corporate pension affects the stable asset formation of employees and the Company's financial position, the Company works hard to assign and properly train human resources with the necessary qualities to ensure the department in charge is able to appropriately monitor the pension management organization.

The Company also regularly discusses the status of pension management with the financial institutions entrusted to manage the corporate pension assets, monitors management results on a monthly basis, and makes decisions each year on whether to continue the pension management package or not.

Principle 3.1: Full Disclosure

- (i) The Company has formulated DTS Group WAY consisting of four elements, Philosophy, Vision, Credo, and Code of Conduct, and, in April 2022, renewed Vision toward 2030. For its details and the management strategy, etc., please refer to our website.

- (ii) The Company's basic approach to corporate governance is described in the Basic Views (I.1) section of this report.
- (iii) The compensation of Directors who are not Audit and Supervisory Committee Members of the Company (excluding Outside Directors) consists of fixed compensation, performance-linked compensation, and stock-based compensation. Performance-linked compensation is paid in the form of a bonus. When determining the payment ratios, the ratio of fixed compensation (basic compensation) shall decrease the higher the position, and the ratios of performance-linked compensation (bonuses) and non-monetary compensation (stock-based compensation) shall increase the higher the position. The amount of compensation, etc. for officers and the calculation method thereof shall be determined upon the comprehensive consideration of past payment records and the Company's performance.
- The performance-linked compensation shall be paid as a bonus and calculated by determining the amount of consolidated ordinary income as a standard, comparing consolidated ordinary income in the year in which the bonus is paid, and multiplying the performance-linked base amount by the growth rate. In addition to the results, the degree of achievement of the performance forecast and the degree of achievement of the medium-term management plan (financial and non-financial KPI) shall be taken into account in the calculation. However, in the event that business performance deteriorated significantly, the bonus may not be paid. As non-monetary compensation, the Company has also introduced the restricted stock compensation plan for Directors who are not Audit and Supervisory Committee Members of the Company (excluding Outside Directors) for the purpose of giving incentives for continuously improving our corporate value and further sharing value with shareholders.
- The role of Outside Directors (excluding Directors who are Audit and Supervisory Committee Members) and Directors who are Audit and Supervisory Committee Members is to supervise management or fulfill an auditing function from an independent standpoint. For this reason, they do not receive any performance-linked compensation (bonuses) or non-monetary compensation (stock-based compensation).

Supplementary Principle 3.1.3: Sustainability initiatives

The DTS Group is stepping up its ESG efforts to help realize a sustainable society, such as by becoming carbon neutral.

We promote our ESG initiatives in line with the three pillars of stepping up efforts for the environment, promoting employee engagement and diversity, and enhancing governance and information disclosures. We have set KPIs for each of these pillars.

In addition, to urge our people to take on challenges and speed up management decision making, we will continue working to reform our management foundation by overhauling operational processes and leveraging cutting-edge technologies.

Through hard work, we aim to grow sustainably with society, achieving sustainable corporate growth while helping realize a sustainable society through these initiatives.

We established the new Sustainability Committee in April 2022 to further strengthen the Group's environmental and social initiatives.

The Sustainability Committee is chaired by the Representative Director and President under the supervision of the Board of Directors, and its members mainly comprise directors and executive officers.

The committee deliberates sustainability related basic policies and targets, the formulation of action plans, the evaluation and management of progress toward targets, and individual measures, and regularly reports and offers advice to the Board of Directors. In this way, the committee will continue working to address various social issues, such as conserving the global environment and creating jobs.

<Investment in human capital and intellectual property, etc.>

The DTS Group has set a total investment limit of ¥25 billion over three years, as shown in our medium-term management plan, and we will fund human resources, R&D, equipment, and M&A.

With regard to human resource investment, we will heavily invest in training personnel who will play instrumental roles in our shift to new fields, such as the development of advanced human resources and the strengthening of mid-career and new graduate recruitment, and have earmarked a cumulative ¥7.5 billion for training over the three years of the current plan.

With regard to investment in intellectual property, we will invest approximately ¥2 billion in R&D, including the creation of new solutions and services through R&D, in order to secure and utilize intellectual property, which is our management resource.

We will make capital investment of approximately ¥3 billion to enhance security and strengthen the operation and monitoring center business and other businesses.

The DTS Group has the basic policy of growing its existing businesses organically, but we will invest approximately ¥10 billion to supplement the development of new business areas and the strengthening of DX businesses through M&A.

<Impacts of climate risks and revenue opportunities on our company's business activities and revenue, etc.>

The DTS Group recognizes that preservation of the global environment is an important priority for all of humanity. As a company that is responsible for the society of the future, we have created an environmental policy and are taking steps to carry it out. In carrying out our business activities, we are implementing a variety of initiatives, such as reduction of resource and energy consumption, promotion of recycling, reduction of waste, and provision of new social infrastructure based on IT.

In particular, we position action on climate change problems as an important management issue. We will continue expanding disclosure of climate change-related business risks and opportunities in line with the recommendations of the Task Force on Climate-related Financial Disclosures, which we support.

Regarding Scope 1, 2, and 3 emission reduction goals, we plan to apply for certification by the Science Based Targets (SBT) initiative in fiscal year 2024.

In order to achieve the goal of less than 2°C rise in global temperature, we have set targets for reducing CO2 emissions. With the target years for achieving net zero emissions of 2030 for Scope 1 and 2 and 2050 for Scope 3, we aim to achieve carbon neutrality.

Please refer to our website for details of each initiative.

In addition to matters stipulated by laws and regulations and the Company's Articles of Incorporation, the Board of Directors determines the management policies of the Company and the Group, as well as other matters that affect corporate value over the medium to long term.

The Management Council, chaired by the Representative Director and President and composed of members nominated by the Representative Director and President, serves as an organization that deliberates on important matters related to business execution by the Company and the Group, and also organizes and examines matters for discussion by the Board of Directors in advance in order to facilitate active questioning of issues in Board of Directors' meetings.

The Board of Directors pays maximum heed to those reports when making final decisions on director compensation and the nomination of candidates for Director.

Supplementary Principle 4.11.1: Board of Directors' Approach to Balance, Diversity, and Scale

In addition, the Company has been analyzing and evaluating the effectiveness of the Board of Directors since fiscal 2018 with the aim of improving the functions of the Board and enhancing corporate value. The outline of that analysis is as follows:

--	--

Supplementary Explanation for Applicable Items

The compensation of Directors who are not Audit and Supervisory Committee Members of the Company (excluding Outside Directors) consists of fixed compensation, performance-linked compensation, and stock-based compensation. Performance-linked compensation is paid in the form of a bonus. When determining the payment ratios, the ratio of fixed compensation (basic compensation) shall decrease the higher the position, and the ratios of performance-linked compensation (bonuses) and non-monetary compensation (stock-based compensation) shall increase the higher the position. The amount of compensation, etc. for Directors who are not Audit and Supervisory Committee Members (excluding Outside Directors) and the calculation method thereof shall be determined upon the comprehensive consideration of past payment records and the Company's performance.

The performance-linked compensation shall be paid as a bonus and calculated by determining the amount of consolidated ordinary income as a standard, comparing consolidated ordinary income in the year in which the bonus is paid, and multiplying the performance-linked base amount by the growth rate. In addition to the results, the degree of achievement of the performance forecast and the degree of achievement of the medium-term management plan (financial and non-financial KPI) shall be taken into account in the calculation. However, in the event that business performance deteriorated significantly, the bonus may not be paid.

In relation to the indicators for performance-linked compensation, the Company has adopted the consolidated ordinary profit as an indicator to ensure a medium- and long-term healthy earnings structure for the entire DTS Group, and the consolidated net sales, the consolidated profit, and an estimated value of ROE announced in public as indicators related to short-term business growth and improvement of corporate value. The Company has established internal rules on how to determine the specific amount of performance-linked compensation.

As non-monetary compensation, the Company has also introduced the restricted stock compensation plan for Directors who are not Audit and Supervisory Committee Members of the Company (excluding Outside Directors) for the purpose of giving incentives for continuously improving our corporate value and further sharing value with shareholders. The summary of the system is as follows:

- [Recipients] Directors who are not Audit and Supervisory Committee Members (excluding Outside Directors)
- [Transfer-restricted period] 30 years from the payment date (the transfer restriction shall be lifted at time of resignation)
- [Total amount of monetary compensation claims] No more than 45 million yen per year
- [Upper limit of total number of common shares to be issued or disposed of] No more than 26,000 shares per year

The base amount for calculation is determined in advance according to the position, and the base amount for each position is revised every year based on the evaluation of corporate value (relative TSR to TOPIX), achievement level of performance forecasts, and achievement level of the medium-term management plan.

The restricted share compensation system has been introduced also for Executive Officers of the Company.

The role of Outside Directors (excluding Directors who are Audit and Supervisory Committee Members) and Directors who are Audit and Supervisory Committee Members is to supervise management or fulfill an auditing function from an independent standpoint. For this reason, they do not receive any performance-linked compensation (bonuses) or non-monetary compensation (stock-based compensation).
