(ii) Basic views and policy on corporate governance

Please refer to "1. Basic Views" of "Basic Policy."

(iii) Policy and procedures for determining the remuneration of senior management and directors

The Company has established the following Policies for Determining Officer Remuneration:

Policies for Determining Officer Remuneration

1. Basic Policy

The basic policy of the Company is to adopt a remuneration system that is linked to the interests of shareholders, in order to ensure that remuneration for its officers (directors and executive officers) functions sufficiently as an incentive to sustainably enhance corporate value, while also ensuring that, when making decisions about the remuneration of individual officers, this remuneration is at a level appropriate to their respective responsibilities.

Specifically, remuneration for directors, excluding outside directors, and executive officers consists of basic salary as fixed remuneration and bonuses as performance-based remuneration. Remuneration for outside directors, who perform a supervisory function, consists only of basic salary, from the perspective of ensuring the impendence of their performance of duties.

2. Policies Related to Determination of the Amount of Basic Salary for Individuals

The basic salary of officers of the Company is a monthly fixed remuneration, and is determined in accordance with their position, responsibilities, and years in office, based on basic salary tables determined after comprehensively taking into consideration the level of remuneration at peers, the business performance of the Company, salary levels for employees, and other factors.

CORPORATE GOVERNANCE

3.Policies Related to Determination of the Content of Short-Term Performance-Based Remuneration and Method of Calculating Its Amount

In order to enhance officials' awareness of enhancing business performance each business year, short-term performance-based remuneration is cash-based remuneration that reflects performance indicators. An amount corresponding to the level of achievement of performance indicators is paid at a certain time each year. The Company selects performance indicators that it prioritizes in its corporate strategy, such as business profit and profit attributable to owners of parent company. The values of these indicators are determined when plans are formulated, in a way that is consistent with the mid-term managerial plan, and are revised as necessary in accordance with changes in the environment, taking into consideration any recommendations from the Nomination and Remuneration Committee.

When determining the allocation to each individual, the individual's position, operational duties, level of responsibility, level of achievement of key targets within departments under his or her supervision, level of contribution to business performance, and other factors are taken into account, also taking into consideration a medium- to long-term perspective.

4.Policies Related to Determination of the Content and Amount of Medium- to Long-Term Incentive Remuneration

The medium- to long-term incentive remuneration shall be the Company's shares with restrictions on share transfer, until retirement due to reasons that the Company's Board of Directors deems justifiable. The aim is to provide an incentive for members to sustainably enhance the corporate value of the Company and further promote sharing of value between directors and shareholders. The number of shares shall be determined in accordance with the recipient's position based on the stock compensation table determined by comprehensively taking into consideration the level of other companies, the level of employees' salaries, etc.

5.Policies Related to Determining the Proportion in the Amount of Remuneration for Individuals

The proportion of each type of remuneration for directors, excluding outside directors, and executive officers is structured such that the weighting of incentive remuneration is higher for officers with higher positions than lower positions. The proportion is considered by the Nomination and Remuneration Committee, taking into consideration remuneration levels benchmarked against companies of a similar business scale to the Company or in a related industry or business format.

The Board of Directors (the Representative Director and President delegated as described in item 6.) determines the details of remuneration for individual officers within the scope of the proportion of remuneration for each type of remuneration indicated in the recommendation of the Nomination and Remuneration Committee, while also respecting the content of this recommendation.

Furthermore, in terms of general amounts for the proportion of each type of remuneration, the ratios of "fixed remuneration (basic salary)" to "short-term performance-based remuneration (bonus)" to "medium- to long-term incentive remuneration" are 75:20:5 for directors, excluding outside directors, and 80:20 for executive officers. (If the level of achievement of performance indicators is 100%)

However, the payment ratio will fluctuate as follows, because the actual performance remuneration to be paid fluctuates depending on consolidated business profit, etc.

Position	Fixed Remuneration (Basic Salary)	Short-term Performance-based Remuneration (Bonus)	Medium- to Long-term Incentive Remuneration (Stock Compensation)
Director	72–95%	0–20%	5–8%
Officer other than director	80–100%	0–20%	-

6.Matters Related to Delegation of Details of Remuneration, etc. for Individual Officers

The Representative Director and President is delegated to determine the specific content of the amount of remuneration for individuals by resolution of the Board of Directors. The content of the delegated rights includes determining the amount of basic salary for officers and appraising and allocating bonuses based on officers' operational responsibilities.

CORPORATE GOVERNANCE

In order to ensure that the Representative Director and President appropriately exercises these rights, the Board of Directors consults the Nomination and Remuneration Committee regarding a draft proposal and receives a recommendation. The Representative Director and President delegated as described above must make a decision in accordance with the content of this recommendation.

(iv) Policy, etc. for the appointment, dismissal, and nomination of director and audit & supervisory board member candidates

1) Director candidates are nominated based on consideration of whether they can contribute to the continuous enhancement of the corporate value of the Company, including factors such as their contribution to achieving effective corporate governance and the diversity of the members of the Board of Directors in terms of knowledge and experience.

2) Audit & supervisory board member candidates are nominated based on consideration of whether they can perform their duties fairly, such as audits of the execution of directors' duties, for the sake of all stakeholders including shareholders from an independent and objective standpoint, in order to contribute to the Company's sustainable growth.

3) The nomination of director and audit & supervisory board member candidates is determined based on objective and fair consideration by the Nomination and Remuneration Committee, the majority of whose members are independent outside officers and upon a recommendation of the Board of Directors.

4) When a reason arises that is confirmed to make it difficult for directors or audit & supervisory board members to appropriately execute their functions, such as serious violation of laws, ordinances, or articles of the incorporation, the Board of Directors consults the Nomination and Remuneration Committee and after obtaining its report, holds an examination and makes a decision on dismissal from the position of the person in question, other penalties, or submission of a dismissal proposal to the general meeting of shareholders.

Disclosed Policy for Deciding the Amounts or Calculation Method of Remuneration

The Company has established the following Policies for Determining Officer Remuneration:

Policies for Determining Officer Remuneration

1. Basic Policy

The basic policy of the Company is to adopt a remuneration system that is linked to the interests of shareholders, in order to ensure that remuneration for its officers (directors and executive officers) functions sufficiently as an incentive to sustainably enhance corporate value, while also ensuring that, when making decisions about the remuneration of individual officers, this remuneration is at a level appropriate to their respective responsibilities.

Specifically, remuneration for directors, excluding outside directors, and executive officers consists of basic salary as fixed remuneration and bonuses as performance-based remuneration. Specifically, remuneration for directors, excluding outside directors, and executive officers consists of basic salary as fixed remuneration and bonuses as performance-based remuneration. **Stock compensation is paid to directors, excluding outside directors, as a medium- to long-term incentive**, while remuneration for outside directors, who perform a supervisory function, consists only of basic salary, from the perspective of ensuring the independence of their performance of duties.

2. Policies Related to Determination of the Amount of Basic Salary for Individuals

The basic salary of officers of the Company is a monthly fixed remuneration, and is determined in accordance with their position, responsibilities, and years in office, based on basic salary tables

CORPORATE GOVERNANCE

determined after comprehensively taking into consideration the level of remuneration at peers, the business performance of the Company, salary levels for employees, and other factors.

3. Policies Related to Determination of the Content of **Short-Term** Performance-Based Remuneration and Method of Calculating Its Amount

In order to enhance officials' awareness of enhancing business performance each business year, **short-term** performance-based remuneration is cash-based remuneration that reflects performance indicators. An amount corresponding to the level of achievement of performance indicators is paid at a certain time each year. The Company selects performance indicators that it prioritizes in its corporate strategy, such as business profit and profit attributable to owners of parent company. The values of these indicators are determined when plans are formulated, in a way that is consistent with the mid-term managerial plan, and are revised as necessary in accordance with changes in the environment, taking into consideration any recommendations from the Nomination and Remuneration Committee.

When determining the allocation to each individual, the individual's position, operational duties, level of responsibility, level of achievement of key targets within departments under his or her supervision, level of contribution to business performance, and other factors are taken into account, also taking into consideration a medium- to long-term perspective.

4. Policies Related to Determination of the Content and Amount of Medium- to Long-Term Incentive Remuneration

The medium- to long-term incentive remuneration shall be the Company's shares with restrictions on share transfer, until retirement due to reasons that the Company's Board of Directors deems justifiable. The aim is to provide an incentive for members to sustainably enhance the corporate value of the Company and to further promote sharing of value between directors and shareholders. The number of shares shall be determined in accordance with the recipient's position based on the stock compensation table determined by comprehensively taking into consideration the level of other companies, the level of employees' salaries, etc.

5. Policies Related to Determination of the Proportion of the Amounts of Basic Salary and Performance-Based Remuneration in the Amount of Remuneration for Individuals

The proportion of each type of remuneration for directors, excluding outside directors, and executive officers is structured such that the weighting of performance-based remuneration is higher for officers with higher positions than lower positions, and is considered by the Nomination and Remuneration Committee, taking into consideration remuneration levels benchmarked against companies of a similar business scale to the Company or in a related industry or business format. The Board of Directors (the Representative Director and President delegated as described in item 6.) determines the details of remuneration for individual officers within the scope of the proportion of remuneration for each type of remuneration indicated in the recommendation of the Nomination and Remuneration Committee, while also respecting the content of this recommendation.

Furthermore, in terms of general amounts for the proportion of each type of remuneration, the ratios of "fixed remuneration (basic salary)" to "short-term performance-based remuneration (bonus)" to "medium- to long-term incentive remuneration" are 75:20:5 for directors, excluding outside directors, and 80:20 for executive officers. (If the level of achievement of performance indicators is 100%)

However, the payment ratio will fluctuate as follows, because the actual performance remuneration to be paid fluctuates depending on consolidated business profit, etc.

Position	Fixed Remuneration (Basic Salary)	Short-term Performance-based Remuneration (Bonus)	Medium- to Long-term Incentive Remuneration (Stock Compensation)
Director	72–95%	0–20%	5–8%
Officer other than director	80–100%	0–20%	-

6. Matters Related to Delegation of Details of Remuneration, etc. for Individual Officers

The Representative Director and President is delegated to determine the specific content of the amount of remuneration for individuals by resolution of the Board of Directors. The content of the delegated

CORPORATE GOVERNANCE

rights includes determining the amount of basic salary for officers and appraising and allocating bonuses based on officers' operational responsibilities.

In order to ensure that the Representative Director and President appropriately exercises these rights, the Board of Directors consults the Nomination and Remuneration Committee regarding a draft proposal and receives a recommendation. The Representative Director and President delegated as described above must make a decision in accordance with the content of this recommendation.

[Support System for Outside Directors (Outside Audit & Supervisory Board Members)]

Outside directors and outside audit & supervisory board members receive explanations in advance about the content of matters that have been submitted for deliberation by the Board of Directors so that they can sufficiently check and review such matters submitted.

Outside audit & supervisory board members receive explanations on the content of important in-house meetings at the Audit & Supervisory Board, and conduct their audits after receiving reports and explanations from the internal audit office, an internal control department, the executive officers in charge of business execution and the accounting auditor, which are done in a timely manner. The results of the above audits and opinions and proposals given by each outside audit & supervisory board member are appropriately reflected on the internal audit, the audit & supervisory board members' audit and the accounting audit to enhance the effectiveness of these audits.
