

Asteria Releases ‘Generative AI Adaptor for ChatGPT’ which Enables No-code Integration of ChatGPT with Systems/Services via Warp

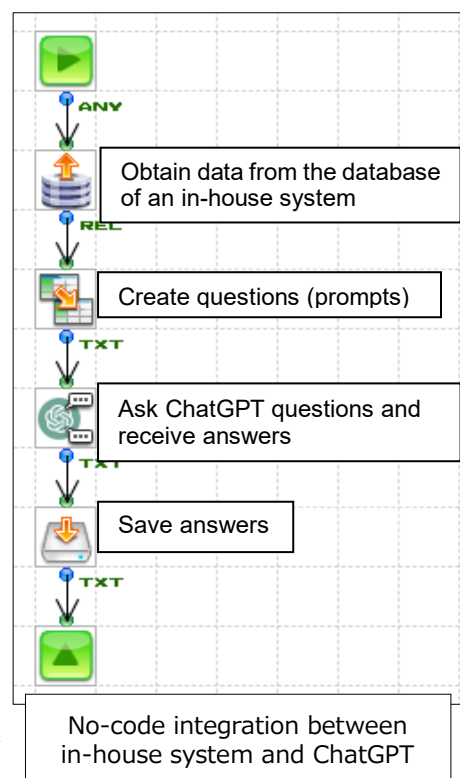

Tokyo -- May 1, 2023 -- Asteria Corporation (Japan listed, Security Code: 3853) announced today the launch of the experimental version of “Generative AI Adaptor for ChatGPT,” which enables integration between the generative AI tool developed by OpenAI and ASTERIA Warp (“Warp”) that has held the largest share of the domestic enterprise data integration software market (EAI/ESB) for the 16th straight year*.

■Background

ChatGPT has attracted attention from all over the world, with more than 100 million users within the first two months of its launch. Many applications that are linked to ChatGPT via API have also been created, and innovations are taking place toward an era in which AI functions can be easily used in business and daily life.

Asteria has emphasized the effectiveness of AI applications in the enterprise area and focused its efforts on research into the use of AI, including the establishment of an AI subsidiary Asteria ART, LLC. led by SONODA Tomoya in 2019. Soon after the launch of ChatGPT, Asteria began working to develop functions that allow its software products to collaborate with ChatGPT. As a first step, it developed a Warp adaptor, “Generative AI Adaptor for ChatGPT (experimental version).”

The adaptor enables the integration between ChatGPT and in-house systems or cloud services without coding. The Asteria Group will continue to explore the potential application of ChatGPT and other generative AI platforms, enhance the function to collaborate with its own products, and help user companies build innovative systems that incorporate the latest technology.

■Overview of “Generative AI Adaptor for AI”

Name	Generative AI Adaptor for ChatGPT (experimental version)
Feature	-Link data input from an in-house system with ChatGPT via API -View answers from ChatGPT on an in-house system via API
Product website	https://www.asteria.com/jp/warp/blog/20230501/129882.html (in Japanese only)

*: According to the “Overview of software marketing in 2022 -- the EAI/ESB market edition” published by Techno Systems Research Co. EAI/ESB stands for Enterprise Application Integration and Enterprise Service Bus, respectively, and is the enterprise data integration product category.

■ About ASTERIA Warp

ASTERIA Warp, the No. 1 EAI/ESB product in the Japanese market for 16 consecutive years, is middleware that allows data from different computer systems to be linked without coding. The product has been highly received for its ability to implement complex logic needed to connect and convert data between systems -- from mainframes and cloud servers to spreadsheet software -- without programming. The subscription version, ASTERIA Warp Core, is also available for a minimum monthly fee of 30,000 yen with no initial fees required. Core, with its select functions of ASTERIA Warp, enables business automation and data utilization by quickly linking with systems and services.

■ About Asteria Corporation

Established in 1998 as Infoteria Corporation, Asteria developed its first no-code product in 2002. It sells software and services which connect a variety of in-house computers and devices. Its key product, ASTERIA Warp, is middleware which integrates data in different computer systems without coding. As of end-December 2022, 9,879 companies, mainly large and medium ones, had introduced the product. Another product, Handbook, allows users to carry around materials used for sales activities and meetings as well as product catalogues in electronic files on smartphones and tablets. A total of 1,676 companies and public institutions had adopted the product through end-December 2022.
