## FY2022 Financial Results by Segment

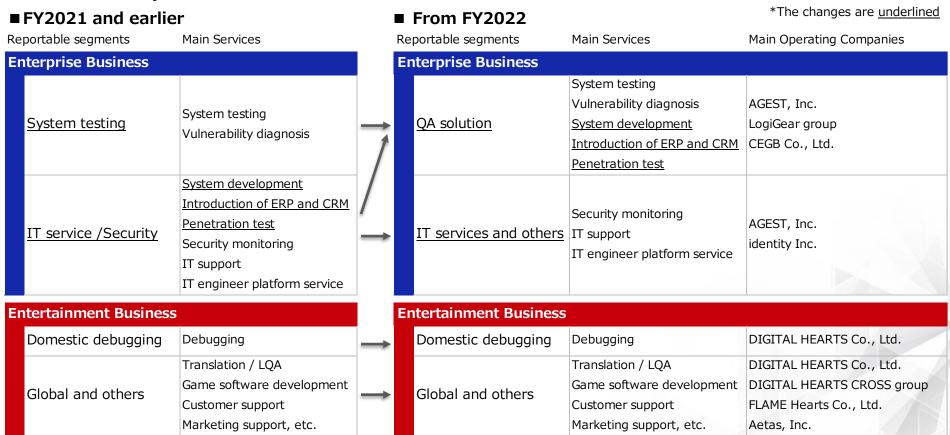

Notice regarding earnings by segment

- Net sales by segment include inter-segment sales or transfers.
   Segment income is based on operating income.
- Some changes were made to the sub-segments of the Enterprise Business in Q1 FY2022. For this reason, the figures for FY2021 and earlier by sub-segments of the Enterprise Business are reclassified to reflect the change in sub-segments for comparison purposes.

## **Changes in Sub-segments**

# Sub-segments in FY2022 are amended to reflect changes made to the services of the Enterprise Business.

#### (Reason for Change)

- Through cross-selling initiatives, increasing in the number of projects providing "one-stop" service including development, testing, and security services.
- Aggressive M&As have led to an expansion in our range of solutions and group synergy improvement.

### **Overview of Global Business**

#### **Market**

- Expansion of needs to support overseas expansion by domestic and overseas game companies
- > Rapid change and globalization, such as worldwide simultaneous launch of large-scale titles
- > Only few companies with a capability to support expansion into all area like Asia, the U.S. and Europe

#### **Services**

- Translation/LQA, localization support
- Marketing support suited to the practices in the new region
- Customer support, audio recording

## Our Position

- > Large potentiality with our current small share compared to the domestic debugging
- Opportunity to utilize strong client ties in debugging service
- ➤ Large number of specialists in each region and language

# Growth Strategy

- Expand global network (Southeast Asia, North America, and Europe)
- Strengthen solution (Localization, customer support, and marketing support)
- Acquire new service functions and overseas bases through aggressive M&As

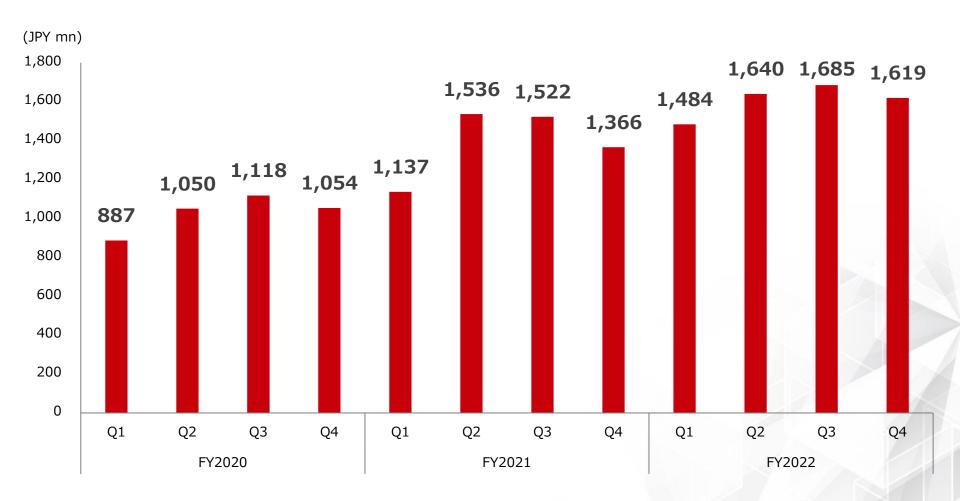

## In-house KPI

- Cross-selling rate
- Global sales ratio
- Number of global human resources

## Sales Trend of the Global and others division

### Rapid growth with expansion of existing businesses and the effects of M&As.

## **Topic of Global Business**

## Cross-selling of our services other than the debugging

Strengthening cross-selling by utilizing our strong ties with game companies through our domestic debugging services. Expanding the number of languages compatible with our localization services.

#### **Cross-selling rate to our top-10 clients**

(FY2022 results)

Category	Cross-selling rate	Average number of service categories per client (*)
Company-wide	80%	2.5
Console game clients	100%	2.7
Mobile game clients	80%	2.0

<sup>\*</sup> Average number of service categories per client indicates the average out of 4 different category types such as debugging and localization.

## **Overview of New Business**

#### **Market**

- Game and app markets using Metaverse, Web3.0 (NFT), etc.
- Diversified services of digital contents such as videos, music, and manga(comics)
- Expectations for rapid expansion of the market

#### **Services**

- Debugging and reviewing services for new-type games and apps
- > Translation, localization, customer support, and marketing for digital content
- > Collaborated development and operation of new digital content and platforms

#### Our Position

- Business results for Metaverse, NFT-game and other debugging needs
- Opportunity to utilize our experiences and human resources for game software business to the new digital content services
- > Strong relationships with game makers and digital content companies

# **Growth Strategy**

- Improve quality of services by "DHQ" (Improve added value)
- Collaborate new businesses with game/non-game apps clients and other partner companies
- Improve service quality and speed by aggressive use of AI(CatGPT, etc.) and other IT technology

### In-house KPI

- Sales ratio of new businesses
- Number of new businesses projects

## **Topic of New Business**

## **Projects related to the Metaverse and Web3.0**

For new type games utilizing Metaverse and blockchain technologies, we have recently seen an increase in demand for services, such as software development support, QA (quality assurance), and customer support services. We aim to contribute game users to enjoy virtual spaces and NFT games with enough security and comfort, by leveraging our expertise and know-how from past rich experiences of game development and debugging.

#### **Projects in the Creative division**

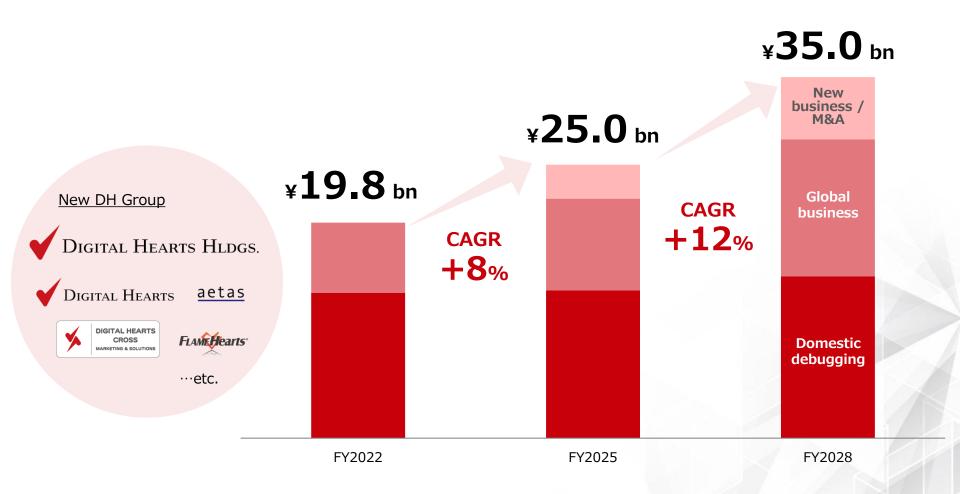

Metaverse	3 projects	We provide wide range of services, such as concept art, character design, 3D modeling, and avatar tool development.
Web3.0	<b>1</b> project	It is an outsourced development of front-end software such as UI and engineering work.

#### QA (quality assurance) and customer support projects

Metaverse	7 projects	game makers and digital contents companies.  We provide QA services from a user's view, to different stages of software development including the post-launch period.
Web3.0	6 projects	We provide QA services, customer support services, and identity verification services for client companies who develop games using blockchain technologies and those who provide NFT platforms.

The projects are for various kinds of Metaverse developed by large

## **Shareholder Returns**

## **Basic Policy to Return Profits to Shareholders**

While securing sufficient internal reserves to invest in business growth and strengthen our management structure, stable dividends to shareholders with a payout ratio of 20% as the minimum target

### **Changes in dividends**

## **Major risks**

#### **Countermeasures**

- Leakage of confidential information
- Prohibiting staff members from bringing personal items into the test room
- Physical security measures including access control with fingerprint authentication and the installation of security cameras
- Introduction of a personal reference system that applies to all registered testers
- Obsolescence of existing services by technological innovation
- -Focusing on the application of the latest technologies, including a test automation project
- -The development of new services to improve added value

- Reduction of productive population in Japan
- -Developing internal training programs that will enable the active participation of members with diverse generational, racial, and other backgrounds
- Strategically acquiring human resources through our overseas offices

- 4. Expansion of corporate acquisition and new businesses
- In-depth market research and due diligence
- Reducing risks by building a system for appropriate business management after acquisition

# (Ref.) Our Aims for Sustainable Value Creation

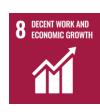

## **Our Major Initiatives and Sustainable Development Goals (SDGs)**

## Human resource

#### To resolve the shortage of IT human resource

- Internal support system for obtaining software test certification of "JSTQB".
- Provide world-class test engineer training program in "AGEST Academy" for employees.
- Provide educational opportunities through collaborations with METI, local governments including Osaka and Gunma prefecture, correspondence high schools, NPOs, and career transition support offices.

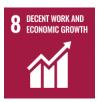

#### Human resource

#### Workplace for diverse human resources

- Provide workplaces for diverse people such as students, part-timers, young actors and musicians, and people with disabilities at test centers with over 3,000 people every day.
- Provide employment opportunities through the operation of the Tokyo Metropolis-Certified Social Firm.
- Employ foreign nationalities of more than 30 countries/areas, such as Asia, Europe and the U.S., who engage in translation/linguistic debugging service, etc.

#### **Technology**

#### To realize a secure and safe digital society

- Established "AGEST Testing Lab. " to promote research on new software testing methods to support the evolving software society through industry-academic collaboration.
- Launched factory cyber security solutions to Japan market collaboratively with four companies including Siemens K.K.

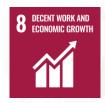

#### Communities

#### To revitalize local community and resolve IT disparities

- Create jobs throughout nationwide test centers (Lab.) and promote teleworking/ work-from-home style by Remote Debugging service.
- Contribute to cyber security measures for local communities and SMEs by acquiring a certification from Information-technology Promotion Agency, Japan (IPA).

Terms	Definition	
Enterprise Business	Our service-based business segment for non-gaming enterprise software, which provides software testing and cyber security. It is the main driver of growth in our corporate group due to the massive digital transformation currently sweeping through society.	
Entertainment Business	Our service-based business segment for the game and entertainment industries, which provides debugging and localization. It is our "cash cow", primary stream of revenue in Japan and continues to see extensive growth in the global market.	
System Testing	This is a term used in our Enterprise Business and the same meaning of software testing. System testing comprises detection of system bugs for enterprise resource planning (ERP) software, websites, business apps, etc.	
Debugging	This is a term used in our Entertainment Business. We run tests and find software bugs from the perspective of the user. Debugging generally refers to the identification and correction of errors, but we specialize in identifying and reporting them.  Mobile games comprise two-thirds of our debugging requests, with console games making up the other third.	
QA	An abbreviation for Quality Assurance. It includes both of software testing and game debugging.	
LQA	An abbreviation for Linguistic Quality Assurance. LQA focuses on finding and fixing in-game linguistical errors that occur when translating from a foreign language.	
Test Engineer	Engineers who conduct software testing. It has not been popular yet in Japan as a job career and Japan currently has a shortage of test engineers, we often recruit IT engineers and provide them the necessary training.	
Tester	Staff members who carry out debugging. Most of our testers are registered part-time workers. Some are trained to work as test engineers or cybersecurity specialists.	
Console Games	A game played using dedicated hardware such as the Nintendo Switch or PlayStation.	
Qualitist	Our uniquely coined term for specialists who contribute to the quality of software. It refers to all IT specialists such as test engineers and cybersecurity specialists in our Enterprise Business, as well as testers, translators, 2D/3D graphic designers, etc. that work in our Entertainment Business.
