Reasons for Non-Compliance With the Principles of the Corporate Governance Code

Aeon Mall adopts and implements every principle defined under the Corporate Governance Code.

[Disclosure Based on the Principles of the Corporate Governance Code] **UPDATE**

[Principle 1-4. Cross-Shareholdings]

The Aeon Mall policy on cross-shareholding is to hold shares for the purpose of contributing to improved Aeon Mall Group corporate value over the medium and long term. This policy considers a number of factors including business strategy and business relationships.

Our board of directors meets to review individual cross shareholdings on an annual basis, considering the purpose for holding shares, risks involved in holding shares, the cost of capital, and other economic rationale on a comprehensive basis, determining the reasonableness for cross-shareholdings. We consider selling shareholdings when deemed as having little significance, considering the impact of such sales on the markets. We disclose the results of such sales publicly. When exercising voting rights of cross-held shares, we verify whether each proposal contributes to the medium- and long-term improvement in Aeon Mall corporate value and whether said proposal holds the potential to damage our corporate value. As necessary, we hold discussions with the issuing company as part of our overall decision-making process.

[Principle 1-7. Related-Party Transactions]

Aeon Mall has established a system to ensure transactions with officers or major shareholders (related-party transactions) do not infringe on the interests of the Company or our shareholders.

1. We engage in prior deliberations via the Governance Committee, consisting of independent outside directors, and carefully consider in board of director deliberations whether competitive transactions by directors and transactions involving conflicts of interest between directors and Aeon Mall infringe on the interests of the Company and our shareholders. Our investigations include consulting with experts regarding the reasonable nature of the transactions in question. The Company ensures fairness in this process through a number of means, including recusing directors having special interests in transactions with the Company from voting in the resolution.

2. When the company enters into transactions with related parties, we clarify the identity of such parties in our Related Party List according to the provisions of our Rules for Managing Related-Party Transactions. We ensure objectivity in transaction terms through rules that include providing comparison tables in period-end financial reports that show examples of transactions with non-related parties. According to the importance and nature of the transaction in question, we comply with our Authority Rules in soliciting opinions from outside directors and members of the Audit & Supervisory Board during board of director meetings regarding the rationality (business purpose) and reasonable nature of the transaction terms. On an annual basis, we investigate the rationality and reasonableness of transactions, issuing a report on the annual increase or decrease in transactions with related-party companies.

[Principle 2-4. Ensuring Diversity, Including Empowering Women]

Aeon Mall respects human rights and is committed to diversity management that allows each individual, regardless of gender or nationality, to fully express their abilities, and we aim to secure higher levels of diversity within our organization. Specifically, we encourage an awareness of internal and external systems for female employees from maternity leave to recommencement of work, we expand the presence of AEON Yume-Mirai Nursery Schools within our facilities, and increase training and other educational opportunities to foster motivation and career aspirations for women. In addition to encouraging women, we also encourage male employees to take childcare leave. We urge male employees to report to their supervisors or the Human Resources Department when their spouse is pregnant and for such male employees to take leave. We strive to eliminate the stereotyped roles of men and women, pursuing the empowerment of women by spreading an understanding among superiors and in workplaces regarding the advancement of women to executive positions. We believe that our greatest intellectual property is the practice of management based on the principle that *The Customer Comes First*, as described in our basic philosophy. Aeon Mall belongs to a corporate group headed by Aeon Co., Ltd. (pure holding company). The Aeon Basic Principles defines the group position of “Pursuing peace, respecting humanity, and contributing to local communities, always from the customer’s point of view,” and we engage in activities guided by the Aeon Code of Conduct (codified in April 2003) to build a brand of trust. We manage and operate approximately 200 facilities in Japan and overseas based on these Aeon brands and values. Our unique strengths include our overwhelming scale of operations and ability to attract more than 1 billion customers annually, a strong network of approximately 8,000 specialty store companies, mutual cooperation with local governments through disaster-response agreements, and operational expertise to provide customers safety, security, and comfort.

(Responding to Climate Change)

As a decarbonization initiative based on AEON Decarbonization 2050, we aim to reduce total CO₂ and other emissions from our businesses in Japan to zero by the year 2040. We continue to engage in energy conservation activities that include installation of solar power generation systems and EV chargers. In addition to these reduction measures, we aim to convert electricity used at approximately 160 malls in Japan to renewable energy sources by FY2025 through direct renewable energy contracts in each region. We will then shift over time from procuring effectively CO₂-free electricity through direct renewable energy contracts in each region to locally produced and locally consumed renewable energy (including PPA). By fiscal 2040, we aim to operate 100% of our directly managed malls using locally produced and locally consumed renewable energy. We will accelerate our efforts to achieve a decarbonized society in Japan and overseas, aiming to reduce the total amount of CO₂ and other emissions from all our business activities to zero.

(Disclosures Based on TCFD Recommendations)

In June 2020, we declared our support for the Task Force on Climate-related Financial Disclosures (TCFD), a task force for information disclosure of business risks and opportunities posed by climate change. Utilizing the recommendations of the TCFD, we disclose in our integrated report our progress in each measure within four frameworks: Governance, strategy, risk management, and metrics and targets. Integrated Report 2022 (P55-59): https://www.aeonmall.com/en/ir/i_report.html

In conducting scenario analysis, we referenced the climate change scenarios in the Fifth Assessment Report of the United Nations Intergovernmental Panel on Climate Change (IPCC), and selected the 2°C scenario and the 4°C scenario. The time frame of our analysis encompasses the impact of climate change in the year 2050. We are conducting scenario analyses based on these assumptions to estimate the impact of climate change. To identify risks and opportunities, we used outside information to organize the major climate change risks and opportunities in Japan, China, and parts of ASEAN where we conduct our mall business. We then collected future forecast data in connection with each risk and opportunity. Based on this analysis, we examined the risks and opportunities associated with the transition to a decarbonized society. We also examined the physical risks and opportunities arising from climate change. In this way, we identified the key risks and opportunities that could affect our business as we head toward the year 2050. We have evaluated and identified the financial impact and time horizon to materialize for each of the risks and opportunities that we consider to be of high importance to our shopping mall business. We communicate these specific efforts through ESG reports, integrated reports, ESG data books, and IR materials for investors.

-----------------------------	------------------

Supplementary Explanation **UPDATE**

The percentage of total compensation is set at around 10%, with a higher weighting depending on the responsibility. The number of stock options allocated is determined based on the performance for the relevant fiscal year in relation to the standard number of stock options by position, and the fair value of the performance-linked stock options is limited to 100 million yen per year as approved by the General Meeting of Shareholders (resolution of the 96th Annual General Meeting of Shareholders held on May 17, 2007). Disclosure of Policy on Determining Remuneration Amounts and Calculation Methods

The company has established a policy regarding determinations and calculation methods of remuneration amounts, etc., for directors, the details of which are as follows.

a. Director remuneration provides strong motivation to carry out management policies, is linked to business performance, and is designed to ensure objectivity and transparency.

b. Director remuneration consists of basic compensation, performance-linked compensation, and stock options.

i. Basic Compensation

Basic compensation is paid on a monthly basis, as determined by individual evaluation and within the standard amount established for each title.

ii. Performance-Linked Compensation

Performance-linked compensation is weighted at approximately 30% of total cash compensation (basic compensation plus performance-linked compensation), weighted according to individual responsibility. Performance-linked compensation paid to each director (individual basis) is calculated according to performance-linked amount and performance-linked payout ratio, reflecting a payout ratio based on corporate earnings (0% to 170%) and an evaluation of individual performance. We have selected budget-to-actual for the beginning of ordinary income as the most appropriate indicator of normal business performance for the company. The budget-to-actual indicator for ordinary income for the current fiscal year was 70.2%.

Evaluations of individual director performance are conducted by independent outside directors serving as members of the Nomination and Compensation Committee, based on an annual performance report of the individual director in question. These evaluations finalized after an additional evaluation by the president of the company. The president of the company provides the final results of director evaluations and performance-linked payout ratios to the independent outside directors. Performance-linked compensation is paid once a year within three months after the end of the fiscal year.

iii. Stock Options

Our aim is to increase the motivation and morale toward medium- and long-term sustained earnings and corporate value improvement through the allocation of stock acquisition rights as stock options reflecting corporate earnings. We accomplish this by strengthening the relationship between share prices, earnings, and compensation, ensuring directors share the same benefits of share price increases and risk of share price decreases with shareholders.

Allocation amounts are determined based on performance for the fiscal year in question with respect to standard allocation amounts determined by position. The fair value of Performance-Linked Stock Options was limited to a maximum ¥100 million per fiscal year as approved at the meeting of general shareholders (resolution of the 96th regular meeting of shareholders held on May 17, 2007). If ordinary income for the grant year is less than 80% of budget, half of planned options will be granted. Allocation timing is determined at the board of directors meeting held yearly in April.

c. Outside directors are paid a fixed compensation only. Company earnings and individual performance evaluations are not considered as part of this compensation.

d. The remuneration limit for directors as the combined monetary total of basic compensation and performance-linked remuneration was limited to a maximum ¥600 million per fiscal year as approved at the 96th regular meeting of shareholders, held May 17, 2007. The company had a total of 20 directors serving at the time of the resolution.

e. The board of directors determines the amount of each director's individual remuneration. The content of the authority and the scope of discretion will be the portion relating to the amount of each director individual remuneration (base remuneration + performance remuneration). The board of directors approved the establishment of the Nomination and Compensation Advisory Committee at November 2018 meeting and the committee began operating in January 2019. The Nomination and Compensation Committee consists of five independent outside directors as of February 28, 2023. Performance compensation is determined by the Board of Directors based on the Company's performance and the Committee's report, as

well as each director's individual performance evaluation within a determined range, based on the President and CEO's proposal..

f. Given their independent position in supervising the execution of duties by directors, members of the Audit & Supervisory Committee are paid only fixed compensation. This level of remuneration is necessary to ensure the appropriate people play a central role in establishing and operating high-quality corporate governance. The remuneration limit for directors was limited to a maximum ¥50 million per fiscal year as approved at the 91st regular meeting of general shareholders, held May 8, 2002, finalized subsequent to negotiations with the members of the Audit & Supervisory Board. The company had a total of four members of the Audit & Supervisory Board serving at the time of the resolution.

The following outlines policies related to remuneration of members of the Audit & Supervisory Board:

i. Basic Compensation

The company pays a fixed amount according to the experience, insight, and title of each member of the Audit & Supervisory Board.

ii. Performance-Linked Compensation

The company does not offer performance-linked compensation to members of the Audit & Supervisory Board.

iii. Stock Options
