Under the “Medium-term Management Plan 2025,” the Group aims to further improve corporate value through activities centered toward realizing the respective goals set forth below for the economic value and social value items.

Corporate Value (Economic Value + Social Value)

Economic Value		Social Value	
Net sales	480 billion yen	GHG (greenhouse gas) emissions	FY2030 (Absolute amount reductions) 42% reduction (compared with FY2020)

*2 Number of victims requiring one or more days off due to workplace accident per 1 million labor hours

*3 Represents the state of mind of employees regarding work, which is measured on a four-point scale for employees

To realize the economic value targets, we will aim to raise the percentage of sales in focused markets, such as automobile, information infrastructure, and industrial equipment, in total sales to 50%. We also plan capital investment of ¥300.0 billion over five years to continuously expand capacity to meet increase in demand as well as to implement proactive initiatives in the areas of environmental measures and upgrading of IT.

Regarding social value, we strengthen our efforts by setting targets for each of our ESG (environment, society, governance) initiatives. On the environmental front, we will strengthen our efforts by setting targets to reduce GHG (greenhouse gas) emissions. We will evaluate climate-related risks and opportunities in our business activities in accordance with TCFD (Task Force on Climate-related Financial Disclosures) recommendations to put measures in place for the global issue of climate change, and we will strive for active information disclosure. On the social front, we will continue to conduct business activities based on the core principle of safety first, while promoting work style reforms and diversity management. In the area of governance, we are working on initiatives to improve management quality and to establish and evolve BCM (Business Continuity Management) to support business growth.

2. Current Status of the TAIYO YUDEN Group

(1) Review of operations and results

During the current fiscal year (April 1, 2022 – March 31, 2023), the business environment surrounding the TAIYO YUDEN Group (“the Group”) experienced rising raw material and logistics costs due to increased geopolitical risk and other factors, and there was a period of stagnation in social and economic activities owing to large-scale lockdowns in some regions as a countermeasure to COVID-19, although there were some signs of a moderate recovery in the global economy. As for the future, it will be necessary to monitor the international situation, fluctuations in financial and capital markets and trends in the global demand environment amid global monetary tightening.

The Group is aiming to increase the proportion of sales in focus markets, primarily automotive and IT infrastructure/industrial equipment, to 50% to achieve the targets set out in Medium-term Management Plan 2025. Moreover, the Group will produce high value-added electronic components with a focus on high-end and high reliability products to achieve further growth in multilayer ceramic capacitors, the Group’s core business, in addition to strengthening inductor and communication device products to establish them as core businesses. We also plan capital investment of ¥300.0 billion over five years to continuously expand capacity to meet increase in demand as well as to implement proactive initiatives in the areas of environmental measures and upgrading of IT.

Consolidated net sales for the current fiscal year totaled ¥319,504 million, which is a decrease of 8.6% compared to the previous fiscal year. Operating profit was ¥31,980 million, a decrease of 53.1% compared to the previous fiscal year. Ordinary profit was ¥34,832 million, a decrease of 51.7% compared to the previous fiscal year, due to foreign exchange gains of ¥1,136 million. Profit attributable to owners of parent amounted to ¥23,216 million, a decrease of 57.3%, from the previous fiscal year, as a result of the recording ¥3,902 million in extraordinary loss, including loss related to Anti-monopoly Act of ELNA CO., LTD. Net sales as well as operating profit, ordinary profit, and profit attributable to owners of parent declined due to lockdowns in some regions and a decrease in production volume and inventory adjustments, primarily in the PC, smartphone, and data center sectors, stemming from concerns over a global economic slowdown.

The average foreign currency exchange rate for the fiscal year under review was US\$1: ¥134.20. This is a depreciation of ¥22.64 as compared to the average realized in the previous fiscal year of US\$1: ¥111.56.

(4) Capital investment, financing and major creditors

i) Capital investment

Capital investment during the fiscal year under review amounted to approximately ¥50,489 million at the acceptance and inspection (previous fiscal year: ¥34,023 million). Major investments were primarily to enhance production capacity for multilayer ceramic capacitors, which are seeing continued strong demand for automotive applications, information infrastructure, and smartphones. The Group intends to continue actively making capital investments, in anticipation of further development in automotive electrification and information infrastructure with spread of 5G (fifth generation telecommunication systems).

Capital investment

ii) Financing

Financing from external sources as of the end of the fiscal year under review consisted of ¥30,200 million in short-term borrowings, ¥17,958 million in current portion of long-term borrowings, and ¥50,777 million in long-term borrowings. In principle, borrowings are procured within Japan at fixed interest rates. In addition, for the purpose of financial stability, a commitment line of ¥30.0 billion effective for three (3) years has been established. However, the Company had not used the line as of March 31, 2023.

(6) Issues to address

From a medium- to long-term perspective, the Group expects that demand for electronic components will expand in the automotive, and information infrastructure and industrial equipment markets, which will require higher quality and higher reliability than ever before. In addition, in the market for smartphones and other communication devices, there will be demand for a large number of cutting-edge electronic components that are smaller, thinner, and have more superior characteristics as devices become more sophisticated and offer higher performance, transmission technologies evolve, and electronic components are packaged and mounted at increasingly higher densities.

In response to these markets, the Group is quickly developing cutting-edge products with a strong competitive advantage that can contribute to the technological evolution of devices. We have positioned automotive and information infrastructure/industrial equipment as focus markets, and we are striving to promote sales of highly reliable products, strengthen system solution proposals, and expand and diversify our commercial distribution channels. We will also continue to make investments essential for future growth, such as increasing production capacity in Japan and overseas to ensure a stable supply. In addition, we will strive to improve our manufacturing capabilities, build a decentralized production system, and improve production efficiency through the use of AI and other technologies.

At the same time, the increasingly uncertain international situation, the COVID-19 global pandemic, and the occurrence of large-scale natural disasters have brought about rapid and wide-ranging changes in the state of society and the business environment. In particular, intensified turmoil in the international situation or a significant decline in the global economy could have effects, such as a slump in demand for electronic components, higher purchasing prices due to surging resource prices, and higher logistics costs due to soaring crude oil prices and changes in air transportation routes. The Group will continue to collect information from multiple perspectives and work closely with customers, suppliers, and other parties to minimize the impact.

The Group has cash and deposits of ¥87,197 million and maintains a sound financial position with an equity ratio of 63.1%. In addition, the Group will continue its operations by securing means to respond to unforeseen circumstances, such as commitment line agreements totaling ¥30.0 billion put in place with several financial institutions.

The Group will continue aiming to enhance its corporate value by increasing its economic value and, at the same time, increasing its social value by meeting the demands and expectations of its stakeholders. In the Medium-term Management Plan 2025, we have established materiality (key issues) tied to the SDGs targets. In particular, we have set numerical targets for reducing greenhouse gas (GHG) emissions as a response to climate change, as well as for the ratio of newly hired female graduates and female managers as a response to achieving diversity, in order to accelerate our efforts to enhance social value.

(7) Basic policy regarding dividends of surplus, etc.

The Company will continue its aim to steadily realize a dividend payout ratio of 30% and conduct a purchase of treasury shares as necessary.

i) Policy to determine the contents of remuneration for directors (and other officers)

1. Basic policy

The remuneration plans for directors (and other officers) of the Company shall be designed to raise motivation for the achievement of the goals for the economic value and social value of the Medium-term Management Plan in accordance with the following basic principles.

- (1) Remuneration plans shall emphasize the linkage with remuneration and the Group's sustainable growth and medium- to long-term corporate value, and be designed to share the same value with shareholders.
- (2) Remuneration shall be set at levels that can attract and retain excellent human resources with global perspective.

3. Composition of remuneration by position

(1) Executive Directors

- Executive Directors receive monthly “basic remuneration” based on one’s position as well as “performance-based bonus” and “stock compensation-type stock options,” which are based on the performance and personnel evaluation for each fiscal year, as an incentive for their business execution.
- Remuneration will consist of 40% of basic remuneration, 40% of performance-based bonus, and 20% of stock compensation-type stock options, when the relevant goal of the Medium-term Management Plan is achieved.

The Company shall provide performance-based bonus linked to consolidated financial results for each fiscal year, using consolidated profit as the relevant performance indicator to establish a clearer linkage between remuneration and factors contributing to the enhancement of corporate value and shareholder value.

The amount of remuneration shall be designed to fluctuate based on the consolidated profit for the fiscal year under review in a manner that the ratio of basic remuneration to performance-based bonus is 1:1 at each position when the relevant goal of the Medium-term Management Plan is achieved. The final amount of bonus is determined by multiplying the performance of the Company by a coefficient representing the performance evaluation results of individual directors, including the degree of the achievement of performance goals at the organizations in his or her charge and the non-financial indicators (ESG elements) of the Medium-term Management Plan.

(3) Stock compensation-type stock options

The Company shall grant stock compensation-type stock options to Executive Directors every year based on his or her position in the form of share acquisition rights that can be exercised on or after the day following the forfeiture of all the positions as Director or Operating Officer of the Company in order to encourage them to manage the Company focusing on the enhancement of medium- to long-term corporate value by sharing the same value with shareholders through the holding of the Company's shares.

The exercise of part of such share acquisition rights will be subject to certain performance achievement conditions to strengthen their function as an incentive. More specifically, they shall be designed in a manner that the number of share acquisition rights that can be exercised fluctuates within the range of 0% to 300% depending on the degree of achievement of the relevant consolidated performance indicator (ROE) of the Medium-term Management Plan.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the Consolidated Financial Statements as a whole are free from material misstatement, whether due to fraud or error, based on the audit carried out by the auditors, and to issue an auditor's report that includes our opinion from an independent standpoint. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Consolidated Financial Statements or, if such disclosures are inadequate, to express our opinion with exclusions. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate whether the presentation and disclosures in the Consolidated Financial Statements are in accordance with accounting standards generally accepted in Japan, the overall presentation, structure and content of the Consolidated Financial Statements, including the disclosures, and whether the Consolidated Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient and appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the Consolidated Financial Statements.
