[Release of Reality Metaverse AI World Generator 'Genesis' Beta Version]

'Genesis' is an AI that automatically generates Worlds in the "Reality Metaverse" that the company is striving to create. It has been developed as a core technology in the company's Metaverse business. When you enter a phrase, a World (virtual space) is generated in the Metaverse (Speech to World).

As the company has confirmed that it has reached a certain level of accuracy, MATRIX has decided to release it as a beta version.

The product is scheduled to be released in the latter half of June.

[Regarding the Invitation-only Release]

Due to the high computational power required for this technology, it will be released on an invitation-only basis for the time being. The company plans to gradually expand the public release while monitoring users' usage behavior.
