

## Bio-Diesel Fuel to Be Delivered to ap bank fes '23

Daiseki Eco. Solution Co., Ltd. (“the Company”) will deliver bio-diesel fuel manufactured by the Company as fuel for power generators to be used in the ap bank fes '23: With Society, Life, and Music, which is held at Tsumagoi Resort Sai no Sato in Shizuoka Prefecture from July 15 to 17, 2023.

\*The ap bank fes promotes, as part of its environmental efforts, various types of recycling, initiatives to reduce food loss and waste, and sales of sundries and official goods produced in the manufacturing process that places as little burden on the environment as possible, and encourages event attendees to bring their own chopsticks, cutlery, cups, and bottles. Bio-diesel fuel is also used as a raw material for the electricity to be used in mist showers.

ap bank fes '23 official website: <https://fes23.apbank.jp/contents/eco> (only available in Japanese)

The Company is making efforts to realize carbon neutrality through the production of bio-diesel fuel made of waste cooking oil. Bio-diesel fuel is used as a carbon neutral substitute for diesel fuel in a variety of applications, including in vehicles, construction machinery, forklifts, power generators, and airport pushback tugs, as well as for marine fuel. Demand for the fuel is expected to be high in future.
