## **Transfer of coating equipment between subsidiaries**

We would like to inform you that at the meeting of the Board of Directors held today, our subsidiary W-SCOPE KOREA CO., LTD (WSK) will transfer its third factory (14 coating lines and all associated equipment) to our subsidiary W-SCOPE CHUNGJU CO., LTD. (WCP) by the end of August.

Until now, some separators manufactured by WCP used WSK for the coating process. By relocating WSK's 3rd factory (factory dedicated to coating equipment), we have decided to consolidate the manufacturing process to WCP. The purpose of this is to specialize WCP as a lithium-ion secondary battery separator business and WSK as a membrane film (ion exchange membrane) business, and this is the first step.

This will improve separator production efficiency at WCP and reduce internal transactions with WSK. In addition, WSK will concentrate management resources on the membrane film (ion exchange membrane) business through streamlining of management.

The impact on consolidated results for the current fiscal year will be minor.
