## 1. Qualitative Information on Quarterly Financial Results

(1) Explanation of Operating Results

During the first quarter of the fiscal year ending March 31, 2024, the Japanese economy showed a gradual trend toward recovery due to positive corporate results and an increase in demand for domestic goods and services by foreign tourists to Japan as well as service consumption as people grew accustomed to coexisting with COVID-19, despite the surge in energy costs triggered by the situation in Russia and Ukraine and a slowdown in overseas economies resulting from global inflation.

In the real estate leasing industry, the vacancy rate is expected to remain high as demand for offices is declining in conjunction with workstyle reforms and the proliferation of remote working, and due to expectations of increased competition with the successive completion of new office buildings.

Under such circumstances, the Company focused on building stronger relationships with tenants through meticulous building management. Thanks to these efforts, the Company maintained a high occupancy rate, with the vacancy rate as of June 30,2023 at $1.77 \%$. In addition, as part of expansion of assets in the Tokyo metropolitan area, the Company proactively worked on new investments based on its Long-Term Management Plan, including the acquisition of the Asakusa Ekimae Building, a commercial building in Asakusa, Taito-ku, Tokyo, in June 2023.

For the three months ended June 30, 2023, consolidated net sales increased by 388 million yen ( $8.5 \%$ ) year-on-year to 4,962 million yen due to the enhanced occupancy rate of the OBP Building, which was completed in April 2021, among other factors.

However, with respect to cost of sales, mainly due to an increase in repair expenses for existing facilities and an increase in power utilities costs as a result of increased datacenter building occupancy rates, operating profit decreased by 61 million yen ( $4.2 \%$ ) year-on-year to 1,399 million yen and ordinary profit decreased by 63 million yen ( $4.3 \%$ ) to 1,415 million yen. Profit attributable to owners of parent amounted to 1,276 million yen, a decrease of 456 million yen ( $26.3 \%$ ) year-on-year, chiefly due to not recording gain on sale of investment securities in extraordinary income, which had been recorded in the same period of the previous fiscal year.

Keihanshin Building Co., Ltd. ("the Group") operates under a single segment of the "Building lease business," which is primarily engaged in the leasing of land and buildings. The status of each business division operated by the Group is as follows.

|  | Three months ended June 30, 2022 |  | Three months ended June 30, 2023 |  |
| :--- | ---: | ---: | ---: | ---: |
|  | Net sales (million yen) | Rate (\%) | Net sales (million yen) | Rate (\%) |
|  | 1,076 | 23.5 | 1,126 | 22.7 |
| Datacenter building business | 2,382 | 52.1 | 2,588 | 52.2 |
| WINS building business | 869 | 19.0 | 978 | 19.7 |
| Commercial buildings, <br> logistics warehouses, and other <br> properties business | 245 | 5.4 | 269 | 5.4 |
| Total | 4,574 | 100.0 | 4,962 | 100.0 |

1) Office Buildings Business

The Group owns and leases a total of eight office buildings, mainly in business areas of Osaka and Tokyo. Our newest properties are equipped with advanced BCP functions based on our expertise in datacenter building operations. Even in older buildings, we strive to provide comfortable and safe business spaces that compare favorably with those in newly constructed buildings through planned facility renovations and maintenance.

There are concerns about rising office vacancy rates due to a combination of the reexamination of the ideal form of office resulting from the progress of workstyle reform and supply of newly-completed large-scale
properties. However, the impact on the Group's office building business has been minimal and we have maintained high occupancy rates.

Due in part to proceeds from the land in Minamiaoyama, which was acquired during the previous fiscal year, consolidated net sales from the office building business for the three months ended June 30, 2023 amounted to 1,126 million yen, an increase of 50 million yen (4.6\%) year-on-year.

## 2) Datacenter Buildings Business

The Group owns and leases a total of eight datacenter buildings in the heart of the Osaka central area. The datacenter buildings, which operate 24 hours a day, 365 days a year, ensure high reliability through advanced disaster-prevention functions with seismic isolation structures, stable electric power supply with large emergency-use generators, and advanced security systems, etc. Our extensive maintenance and management services, based on over 30 years of experience in the datacenter leasing business, are also highly regarded.

Mainly owing to increased occupancy rates for equipment rooms of datacenter buildings, consolidated net sales from the datacenter building business for the three months ended June 30, 2023 amounted to 2,588 million yen, an increase of 206 million yen ( $8.6 \%$ ) year-on-year.
3) WINS Buildings Business

WINS buildings refer to the facilities that sell off-track betting tickets for Japan Racing Association (JRA) races held all over Japan. The Group owns and leases a total of five WINS buildings in the central area of the cities of Kyoto, Osaka, and Kobe. The WINS buildings business dates back to the Company's founding, and has been one of our core businesses that generate stable revenue for many years.

Although the share of sales at WINS buildings is in a declining trend as online betting is spreading, the impact on the business performance is minor as the buildings are leased at fixed rents. Consolidated net sales from the WINS building business for the three months ended June 30, 2023 amounted to 978 million yen, an increase of 108 million yen (12.5\%) year-on-year.

## 4) Commercial Buildings, Logistics Warehouses, and Other Properties Business

The Group owns and leases seven commercial buildings, logistics warehouses, and other properties in the country, particularly in the Tokyo metropolitan area and the Kansai area. We are working on information gathering activities targeting prime locations for transportation access, such as locations near terminal stations for commercial facilities and trunk roads for logistics warehouses, in order to acquire profitable properties. Under our Long-Term Management Plan, we are striving to expand our assets by acquiring more conveniently located properties, including new assets types such as housing and healthcare facilities.

Consolidated net sales from the commercial buildings, logistics warehouses, and other properties business for the three months ended June 30, 2023 amounted to 269 million yen, an increase of 23 million yen ( $9.6 \%$ ) year-on-year, due in part to proceeds from the Sekime-Takadono Apartment Building, which was acquired during the previous fiscal year.

## (2) Explanation of Financial Condition

Total assets at the end of the three months ended June 30, 2023 amounted to 159,719 million yen, an increase of 7,397 million yen ( $4.9 \%$ ) from the end of the previous fiscal year. This was mainly due to an increase of 5,849 million yen in property, plant and equipment due to the recording of buildings in trust and land in trust in conjunction with the acquisition of the Asakusa Ekimae Building and an increase of 1,896 million yen in investment securities due to rising stock prices.

Total liabilities at the end of the three months ended June 30, 2023 amounted to 87,136 million yen, an increase of 5,685 million yen ( $7.0 \%$ ) from the end of the previous fiscal year. This was mainly due to an increase of 5,802 million yen in interest-bearing debt in conjunction with financing for the acquisition of the Asakusa Ekimae Building.

Total net assets at the end of the three months ended June 30, 2023 amounted to 72,582 million yen, an increase of 1,711 million yen ( $2.4 \%$ ) from the end of the previous fiscal year. This was mainly due to an
increase of 395 million yen in retained earnings and an increase of 1,316 million yen in valuation difference on available-for-sale securities due to the recording of 881 million yen in dividends of surplus, despite the recording of 1,276 million yen of profit attributable to owners of parent.
(3) Explanation of Consolidated Financial Results Forecast and Other Forward-looking Information

There is no change in the consolidated financial results forecast announced on May 12, 2023. The consolidated financial results at the end of the three months ended June 30, 2023 are as originally planned.

In the real estate leasing industry, it is necessary to keep a close watch on the rise in vacancy rates resulting from the downsizing of office spaces triggered by the COVID-19 and the large supply of new office buildings to be completed in the future, and we cannot be optimistic about the future outlook. However, the impact of COVID-19 on the Group's business performance has been currently minimal as the number of tenant departures and requests for rent reductions by tenants have been limited.

At the moment, it is unclear how the continued high electricity price caused mainly by surging resource prices triggered by the situation between Russia and Ukraine will affect our business in the future. We will continue to keep a close watch on the situation and, going forward, properly disclose information if there is any change.
