Supplementary Explanation for Applicable Items Updated

The current officer remuneration system is based on the basic remuneration for each position plus a performance-linked portion.

As the indicators for the performance-linked evaluation, the Company adopts consolidated operating profit because it will motivate an increase in corporate value through the improvement of business performance. In addition to this, the Company uses consolidated profit before income taxes, in which the results of investment and loans are reflected. To obtain the performance evaluation for the following fiscal year's officer remuneration, the Company has the framework in which, with regard to these two indicators, the ratio of the target value of the relevant fiscal year to the actual results of the relevant fiscal year and the ratio of the actual result of the relevant fiscal year to the actual result of the previous fiscal year are scored based on the table in the Officer's Remuneration Rules and will be reflected on the amount of remuneration.

From FY2022, the Company has introduced the restricted stock compensation plan with the aim of strengthening corporate governance and fostering management awareness from the perspective of investors.

------------------------------------	-------------

Supplementary Explanation for Applicable Items	Updated
--	---------

With respect to the basic policy for dealing with shareholders who hold a number of shares with resolutions that are capable of controlling the decision-making of the Company's management policy, the Company believes that it should ultimately be up to the shareholders to decide whether or not to accept persons who intend to hold such number of shares with resolutions. If an attempt is made to acquire the Company by a person who is not suitable in terms of securing or enhancing the corporate value of the Company or the common interests of its shareholders, the Board of Directors of the Company will take appropriate measures to prevent such an attempt from having an adverse effect on many shareholders or investors because it has the responsibility for shareholders to do so. In such cases, the Corporate Value Improvement Committee (composed of outside directors and outside Audit and Supervisory Board members of the Company, etc.) will be established in the Company to carefully study and examine, from an independent standpoint, the impact of such purchase or proposal on the Company's corporate value and the common interests of shareholders, based on the acquirer's business content,
