< Investment in Human Capital and Intellectual Property >
As stated in the integrated report, we recognize that investment in intangible assets, including human resource development and DX promotion, are indispensable to the improvement of corporate value over the medium-to long-term, as they are one of the capitals that form the basis of our value creation process. Further, in order to accelerate efforts to help innovation creation, such as new business development, we are developing a system that aims for active investment in intangible assets, such as the establishment of dedicated departments. However, as

we have not yet formulated an easy-to-understand investment strategy in accordance with the management strategy, we will continue to consider the formulation and disclosure of such.

[Supplementary Principle 4-2-2]

We have established a Sustainability Policy as a basic policy regarding the Company's sustainability efforts. Under this policy, we have established 7 Sustainable Key Themes (Material Issues) incorporating the perspective of the SDGs, as priority long-term measures.

On the other hand, discussions among those responsible for execution concerning the formulation of business portfolio strategies are underway; however, the strategies have yet to take shape. However, the outline of the results concerning conflict-of-interest transactions on a recurring basis shall be reported on a quarterly basis. In addition, with regard to transactions with major shareholders (those holding voting rights equivalent to 10% or more of the total voting rights), the Company takes the same measures as those required for conflict-of-interest transactions by Directors at the Board of Directors' meeting. The Board of Directors shall deliberate on the relevant matters impartially with a view to ensuring the common interests of the Company and its shareholders.

As a human resources development policy that aims to ensure diversity, we will introduce a system (career course systems, career end-goal surveys) wherein employees can select their future goals based on their own aspirations and aptitude, and build an environment wherein employees can actively engage in skills-development activities based on those career plans. In doing so, we strive to develop human resources with diverse abilities and ways of thinking. Moreover, from the viewpoint of work-life balance, we have introduced a work system that allows employees to select start and end times according to work convenience as well as a reduced working hours system for childcare. Through the introduction of various work systems, we will strive to reform corporate culture and further develop a working environment that enables flexible working styles that are not restricted by time or location. Disclosure of Policy on Determining Remuneration Amounts and Calculation Methods

[Details of the Policy and Decision Method for Determining the Amount or Calculation Method of Officers' Compensation]

The Company has established the following policy on determining the amount of individual officers' compensation or the method used to calculate this amount, based on resolutions made at the Board of Directors' meeting held on March 31, 2023 and May 12, 2022 and the 104th Annual General Meeting of Shareholders held on June 25, 2021.

Compensations for Directors (excluding Director serving as Audit & Supervisory Committee Member) and Corporate Officers with Special Titles (Corporate Officers at the level of Senior Corporate Officer or above) are composed of the supervision payment and the execution payment.

(1) Supervision Payment

Directors are paid a fixed amount monthly in cash, determined according to responsibilities.

(2) Execution Payment

The Chairman (limited to Executive Directors; the same applies hereinafter) and Corporate Officers with Special Titles (hereinafter, the Chairman and Corporate Officers with Special Titles shall be collectively referred to as "Executive Corporate Officers with Special Titles") are paid an amount comprising basic compensation, bonuses and stock compensation.

The proportions of basic compensation, bonuses and stock compensation are set at 60:25:15 respectively, with the purposes of increasing incentives for enhanced performance and promoting the penetration of management awareness of shareholder value and stock price.

1) Basic Compensation

A fixed amount is paid in cash, according to individual duties and responsibilities.

2) Bonuses

Lump-sum payments will be made in cash after the conclusion of each fiscal year, of an amount calculated based on the Company's performance and individual performance during the respective fiscal year.

The proportions based on the Company's performance and individual performance are 70:30 respectively.

However, the Chairman and President's bonus is calculated based on the Company's performance alone.

i. Company's performance portion

The Company's performance portion will be calculated and paid according to the achievement of the target index, provided the predetermined conditional index is cleared. However, the details and levels, etc. of the conditional index and target index may be treated differently if the Compensation Committee recognizes significant changes in the business environment, or in the case of any other significant requirements.

(i) Conditional index

The achievement of a fixed level of profit for each fiscal year and the ability to maintain stable dividend payments to shareholders will be considered conditions for the payment of the Company's performance portion. Profit attributable to owners of the parent will be the conditional index. The Company's performance portion of bonuses will not be paid if the profit attributable to owners of the parent for the respective fiscal year is less than 70% of the average for the previous five years, excluding the years with the highest and lowest profit.

(ii) Target index

In order to increase the incentive for achieving the goals of Nankai Group Management Vision 2027, the target index will be the Company's consolidated operating income, which is a quantitative target for the vision above. The amount of the Company's performance portion of bonuses will be directly proportional to the achievement of the budget established at the beginning of each fiscal period, within the range from 80% to 120%. The actual amount to be paid varies within a range from 50% to 150% of the standard amount of the Company's performance portion of bonuses. No bonus for the Company's performance portion is paid if the achievement rate of the target index is below 80%.

ii. Individual performance portion

The President will evaluate the overall level of achievement of the targets set out by individual officers each fiscal year, on a scale of 1 to 4, based on which the amount of bonus to be paid for the individual performance portion will be determined. The actual amount of the individual performance portion of bonuses to be paid varies within a range from 70% to 130% of the standard amount of the individual portion of bonuses, or otherwise no amount is to be paid, depending on the President's evaluation.

3) Stock Compensation

The Company will introduce a stock compensation plan for Executive Corporate Officers with Special Titles with the aim of further clarifying the linkage of compensation for Executive Corporate Officers with Special Titles to the Company's performance and share value, having the officers share with shareholders both the benefits and risks of fluctuation in share prices, and thus raising the officers' motivation to contribute to enhancing the Company's performance and corporate value over the medium- to long-term.

The stock compensation plan delivers the Company's shares to the Executive Corporate Officers with Special Titles in office during the period from the conclusion of the 102nd General Meeting of Shareholders until the conclusion of an Annual General Meeting of Shareholders pertaining to the last fiscal year ending within 3 years from this General Meeting of Shareholders (hereinafter, the "Applicable Period"). Under the plan, the Company's shares are acquired through a trust using cash contributed by the Company, through disposal of treasury stock or through the stock market (including off-auction trading), and a number of the Company's shares are delivered through the Trust to Executive Corporate Officers with Special Titles corresponding to the number of points they have been awarded.

In principle, Executive Corporate Officers with Special Titles will receive delivery of the Company's shares upon their retirement from office.

In addition, the Board of Directors may decide to extend the Applicable Period within a period of five years.

[Targets and results for indicators associated with performance-linked remuneration in fiscal 2022]

Profit attributable to owners of parent, which is the conditional index for performance-linked remuneration, was 14,623 million yen for fiscal 2022. In addition, compared to the initial budget of 16,300

million yen for consolidated operating income, which is the target index, the result for fiscal 2022 was 21,023 million yen, and the achievement rate was 128.98%.

V. Other

1. Adoption of Anti-Takeover Measures

Adoption of Anti-Takeover Measures	Not Adopted
------------------------------------	-------------

Supplementary Explanation **Updated**

(1) Basic Policy

The Company believes that the decision in response to a takeover proposal involving a transfer of the Company's control shall be ultimately made based on the intent of our shareholders as a whole. Furthermore, the Company will not deny all large-scale purchases of the Company's shares if such purchases contribute to corporate value and thus the common interests of shareholders.

However, some large-scale purchases do not actually contribute to the corporate value of their target companies or the common interests of shareholders. These include acquisitions with aims that obviously do harm to corporate value and the common interests of shareholders, those that effectively force existing shareholders to sell their holdings, and those that do not provide sufficient time or information for the Board of Directors and shareholders of the target company to consider the details of the large-scale purchase, or for the Board of Directors to present an alternative proposal.

In particular, in order to secure and enhance corporate value, it is necessary for the Company to maintain and strengthen its positive relationship of trust with its customers, centered around those who live close to its lines, and the local community. Furthermore, it is imperative that the Company ensures safe transportation, its greatest responsibility as a railway company. While it is of course necessary for any large-scale buyer of the company's shares to understand details of the Group's finance and business, it is also vital for such a buyer to understand the source of the Company's corporate value, secure and enhance it over the medium and long term. If this is not the case, then the Company's corporate value and the common interests of shareholders will be damaged.

The Company believes that if a large-scale buyer does not contribute to the Company's corporate value and the common interests of shareholders, it is not appropriate for that buyer to control the Company's finance and business policy. In response to large-scale purchases of this nature, we believe it is necessary to engage appropriate measures, in accordance with the Financial Instruments and Exchange Act, the Companies Act and other relevant laws and regulations, to secure the Company's corporate value and the common interests of shareholders.

(2) Summary of the Details of Efforts to Realize the Fundamental Policy

1) Special efforts contributing to the realization of the fundamental policy

In order to help realize Nankai's Corporate Image in 2050 and achieve the Nankai Group Management Vision 2027, the Group has formulated the medium term business plan, Kyoso 140 Plan covering the period fiscal 2022 through fiscal 2024, and is currently promoting this plan in earnest.

In this medium term business plan, as described on the Company's website

(https://www.nankai.co.jp/en/ir/management/medium-term_management_plan), we will carry out three business strategies, human resource strategies, and financial strategies, with the aim of achieving sustainable growth and the enhancement of corporate value over the medium and long term.

2) Efforts to prevent decisions on the Company's financial and business policy being controlled by those who are inappropriate in light of the fundamental policy

In an effort to prevent decisions on the Company's financial and business policy being controlled by those who are inappropriate in light of the fundamental policy, the Company will request any party intending to undertake a large-scale purchase of the Company's shares to provide information necessary for shareholders and the Board of Directors to consider the details of the purchase. Based on this information, the Board of Directors will discuss and negotiate with the buyer as necessary, and present the opinion of the Board of Directors to shareholders. In addition, the Company will engage appropriate measures, in accordance with the Financial Instruments and Exchange Act, the Companies Act and other relevant laws and regulations, including working to ensure that shareholders have sufficient time to make an appropriate decision on the purchase.

(3) The decision of the Board of Directors and its reasons concerning each effort described above

The initiatives mentioned in 1) of (2) above, have both been established as concrete measures to continuously and sustainably enhance corporate value of the Company and the common interests of shareholders, and clearly contribute to the realization of the fundamental policy.

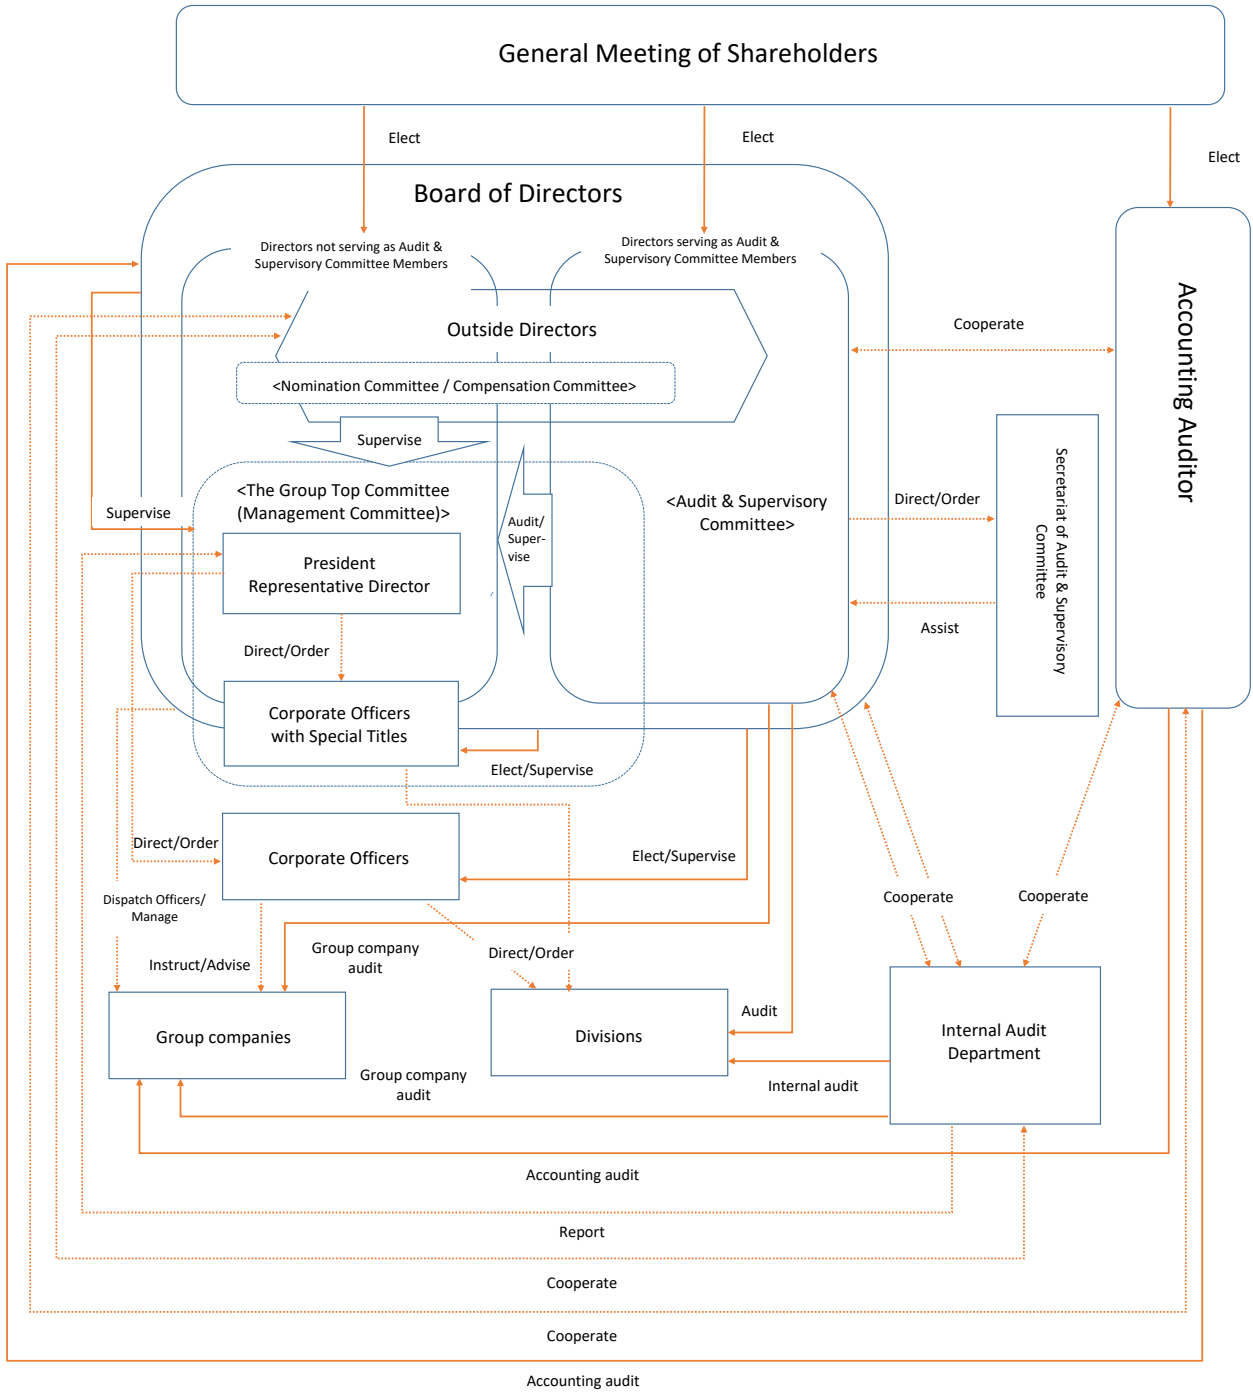

Likewise, the efforts described in 2) of (2) above are aimed at warding-off acquisitions that are detrimental to corporate value and the common interests of shareholders, thus securing and enhancing corporate value and the common interests of shareholders, by ensuring sufficient time and information for all shareholders to make an appropriate decision, as well as securing an opportunity for negotiation with the potential buyer, if a large-scale acquisition of the company's stock is attempted.

Therefore, these efforts and measures conform to the fundamental policy and the common interests of shareholders of the Company, and are not aimed at maintaining the status of the Company's officers.
